Program Requirements | View MAP | View Program Outcomes

1. Students must have a minimum of 124 total hours to graduate with this major.
2. Complete the following supporting courses:

C S 142 : Introduction to Computer Programming. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Knowledge of algebra.

DESCRIPTION: Introduction to object-oriented program design and development. Principles of algorithm formulation and implementation.

Course Outcomes

- Use the rudiments of the environment and the resources available to help them program (editors, basic computer architecture, compilers, libraries, reference manuals, on-line help).Develop programs from an English description.Write programs on their own, independent of "hand holding" by a TA or an instructor (typically a dozen or so).Understand and use the basic programming constructs: types (built in types, basic provided types including arrays and strings, type construction), values (constants,variables, assignment statements, and expressions), control structures (sequential flow, conditional statements, and loops), and I/O (basic output to the screen and input from the keyboard, and file I/O).Understand and use objects (value representation, applicable operations, hidden implementations).Implement basic recursive algorithms.Describe and use the basic ideas of some of the more advanced programming constructs,including exceptions, inheritance, and polymorphism.
- AbstractionDebugging and Assurance of CorrectnessProgram Development (analysis, specification, design, implementation, testing)

C S 235 : Data Structures and Algorithms. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: C S 142

DESCRIPTION: Fundamental data structures and algorithms of computer science; basic algorithm analysis; recursion; sorting and searching; lists, stacks, queues, trees, hashing; object-oriented data abstraction.

Course Outcomes

- Use the fundamental data types of computing (lists, stacks, queues, priority queues, sets, maps, trees, etc.).
- Understand the major techniques for implementing the fundamental data types (linked lists, binary search trees, hashing, heaps, etc.) and implement several of them.
- Properly use and select data structures from language-provided data-structure libraries.
- Apply basic algorithm analysis.
- Understand how recursion works and write programs using recursion to solve problems.
- Make informed decisions about which sorting and searching algorithms to use in specific circumstances.
- Write programs that require ~500 lines of code.

C S 236 : Discrete Structures. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: C S 235

DESCRIPTION: Introduction to grammars and parsing; predicate and propositional logic; proof techniques; sets, functions, relations, relational data model; graphs and graph algorithms.

Course Outcomes

- Understand and be conversant with basic discrete mathematical structures (finite state machines, regular expressions, grammars, propositional calculus, proof techniques, predicate calculus, sets, relations, functions, graphs).Write complex programs by using mathematical concepts as the basis for solving programming problems (finite state machines for lexical analysis; grammars for parsing; propositional and predicate calculus for logic programming; sets and algebras for relational databases; algebras, graphs, and topological sorting for optimizing datalog query processing).Incrementally build sophisticated programs by a systematic design process based on discrete mathematics.Design a solution for a programming problem and justify the design as one that is maintainable and extendable by other programmers who understand and are conversant with discrete mathematical structures.
- Demonstrate ability to build large programs by writing and integrating code from a diverse spectrum of

program components.

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: First-year writing, junior or senior status.
DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.
NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

PHSCS 121 : Introduction to Newtonian Mechanics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Calculus or concurrent enrollment.
DESCRIPTION: Linear, circular, and projectile motion; their prediction from forces and torques. Conservation of energy and momentum. Weekly lab.

Course Outcomes

- Convert quantities from one set of units to another and use a reasonable number of significant digits when expressing answers.
- Compute a particle's classical translational motion in one or two dimensions, including circular motion, both in Cartesian coordinates and in polar coordinates.
- Use the ideas of energy, work, power, linear momentum, and angular momentum to arrive at conclusions about the motion of a system, including the motion of satellites and the planets.
- Use Newton's Second Law to calculate the motion of objects, including those in simple harmonic motion, as well as the forces and torques acting on systems in equilibrium.
- Demonstrate an understanding of the basic scientific principles which undergird the scientific process,

including the strenghts and weaknesses of this process

PHSCS 123 : Introduction to Waves, Optics, and Thermodynamics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Phscs 121 or equivalent. Calculus.

DESCRIPTION: Waves, thermal physics, optics, special relativity, and introduction to modern physics. Weekly lab.

Course Outcomes

- Solve problems and answer conceptual questions using the basics of fluid statics and dynamics, including Bernoulli's principle and Pascal's law.
- Answer conceptual questions and calculate changes in temperature, pressure, entropy and volume for quasistatic ideal gas processes and be able to determine work done and efficiency for gas engines, heat pumps, and refrigerators. Determine heat flow and temperatures in systems in steady state.
- Solve problems and answer conceptual questions involving waves, using concepts such as wave speed, wavelength, frequency, superposition, beats, and resonance. Solve wave interference problems.
- Find the location and magnification of images in single- and multiple-lens/mirror systems by calculation and by ray tracing, and be able to work general problems in optics using Snell's law and specular reflection.
- (Section 1) Solve problems and answer conceptual questions in basic modern physics including special relativity, and quantum mechanics and nuclear physics.
- (Section 2) Solve more advanced problems and answer conceptual questions in wave analysis, including calculating group and phases velocities, solving for Fourier coefficients of periodic functions, and frequencies of notes in the equal temperament musical scale. Solve problems in special relativity.

STAT 201 : Statistics for Engineers and Scientists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 112; or MATH 119

DESCRIPTION: The scientific method; probability, random variables, common discrete and continuous random variables, central limit theorem; confidence intervals and hypothesis testing; completely randomized experiments; factorial experiments.

Course Outcomes

- Compute numerial and graphics summary statistics and explain the difference between populations given the summaries (numerical or graphical)
- Apply fundamentals of set theory and basic set operations to simple problems
- Distinguish between counting techniques (permutations, combinations) and compute the number of possible combinations for simple problems
- Solve simple problems using axioms of probability, conditional probability, independence, and Bayes' theorem
- Compute probabilities, expected values, and variances using the PDF of a discrete and a continuous univariate random variable
- Understand the definition of a sampling distribution, identify the mean, variance, and shape of the sampling distribution given the population information, and explain the application and importance of the Central Limit Theorem
- Understand the basics of experimental design, including the definition of the experimental unit, response, variable, factor(s), and level(s) of a basic experiment, and the role of randomization and replication to permit causal inference
- Compute the confidence interval for μ from a random sample and make the correct decision about an experiment when given a confidence interval
- Compute the test statistic and p-value for H0 : μ = μ0 from a random sample
- Make the correct decision when given the p-value for a hypothesis test and compute the ANOVA table for the data from a completely randomized design
- Compute pairwise confidence intervals on the difference in means (Fisher, Bonferroni) to understand a significant overall F-test from a completely randomized design
- Compute the ANOVA table for data from a two factor experiment
- Explain a statistically significant interaction
- Perform a two factor (or 2^3) experiment (in a group), compute the ANOVA table from the observed data, and write a technical report of the results of the experiment with appropriate graphics of significant effects or interactions

TECH 312 : Exploration in Innovation Design Techniques. (1:1:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Through a series of hands-on experiences, students explore principles, methods, and tools of innovation and design thinking in technology and engineering.

Course Outcomes

- Gain better appreciation and understanding of innovation
- Develop an ability to generate new ideas
- Develop innovation skills to develop ideas into products and processes
- Collaborate as a team to complete a project
- Present ideas and work to the class

3. Complete the following:

IT 101 : Cornerstone: Information Technology. (3:2:3)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Planning and preparing for a successful career in information technology. Developing skills with computers, problem solving, studying, and time management. Comparing information technology to computer science, computer engineering, and information systems.

NOTE: Fee.

Course Outcomes

- Acquire basic skills in using labs as part of the learning experience.
- Be able to reverse engineer a simple algorithm.
- Acquire basic IT terminology.
- Be able to use basic IT tools at the beginning level.
- Acquire a beginning knowledge of programming.Acquire a beginning knowledge of networking.Acquire a beginning knowledge of computer hardware.Acquire a beginning knowledge of operating systems & servers.Acquire a beginning knowledge of database systems.
- Acquire a beginning knowledge of web systems.Acquire a beginning knowledge of how data is represented in a computer.Acquire a beginning knowledge of human-computer interaction.Acquire a beginning knowledge of systems engineering and development methodologies to guide project management.
- Understand the pervasiveness and impacts of IT in our everyday lives locally and globally as well as across organizations and industries.Acquire a beginning knowledge of computer security and ethical issues.Acquire a beginning knowledge of how IT is organized and governed in organizations and enterprises.
- Acquire basic teamwork skills.Begin using oral and written communication in a professional manner.Begin using basic design and problem-solving skills.Acquire basic knowledge and research skills for continuous learning in IT profession and understand the difference between the four computing majors at BYU (IT, IS, CS, and ECE).Get to know the IT Faculty and other IT Professionals.Acquire basic knowledge and research skills for continuous learning in IT profession and for finding associated IT employment.

IT 124 : Introduction to Computer Systems. (3:3:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142; or concurrent enrollment.

DESCRIPTION: How a computer works, from hardware to high-level programming language. Logic circuits, Boolean algebra, computer instructions, assembly language, binary arithmetic, and C programming.

Course Outcomes

There are no course outcomes available

IT 210A : Fundamentals of Web-Based Information Technology. (2:3:3)

PREREQUISITE: C S 142 & IT 101; or instructor's consent.

DESCRIPTION: Web technologies including distributed architecture, networking, database concepts, client and server development, infrastructure management, and web system integration.

Course Outcomes

- Define and describe fundamental computing platform concepts of operating systems and networking and their relationship to Standards
- Analyze, create and integrate systems both at the Web Architecture and at the Web System Architecture levels.
- Demonstrate system administration skills necessary to manage web systems using best practices.
- Review and analyze web systems for specific Information Assurance and Security (IAS) issues, including multiple viewpoints of incident response, within the framework of standard IAS models.
- Analyze and design web systems using professional modeling approaches. This includes systems process development within a larger systems lifecycle model using best practices.
- Acquire and apply life-long learning skills to find, assess, utilize, and attribute web development resources on the Web.

IT 210B : Fundamentals of Web-Based Information Technology. (2:3:3)

PREREQUISITE: IT 210A

DESCRIPTION: Web technologies including distributed architecture, networking, database concepts, client and server development, infrastructure management, and web system integration.

Course Outcomes

- Define and describe fundamental computing platform concepts of operating systems and networking and their relationship to Standards.
- Analyze, create and integrate systems both at the Web Architecture and at the Web System Architecture levels.
- Demonstrate system administration skills necessary to manage web systems using best practices
- Review and analyze web systems for specific Information Assurance and Security (IAS) issues, including multiple viewpoints of incident response, within the framework of standard IAS models.
- Analyze and design web systems using professional modeling approaches. This includes systems process development within a larger systems lifecycle model using best practices.
- Acquire and apply life-long learning skills to find, assess, utilize, and attribute web development resources on the Web.
- Demonstrate skills in technical communication

IT 252 : Computer Architecture and Organization. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IT 124 & C S 235; or C S 124 & C S 235; or EC EN 224 & C S 235

DESCRIPTION: Principles of computer hardware and instruction set architecture. Subjects include: internal CPU organization and implementation, peripheral interconnect and IO systems, and low-level programming and security issues.

Course Outcomes

- Demonstrate ability to understand and program with assembly language.
- Demonstrate ability to use a C compiler, an assembler, a disassembler, a debugger, and CPU emulators to develop, debug, test, analyze and optimize programs.
- Know how to write more reliable, secure, and efficient software with an understanding of how the

software is executed on the underlying architecture.
- Demonstrate ability to modify a CPU design to add instructions and to improve the overall efficiency of execution.
- Demonstrate understanding of the various abstractions used to manage complexity in computer systems and support application concurrency. e.g. system calls and virtual memory.
- Know how application performance can be affected in a target system by memory hierarchy design factors such as cache size, bus width, clock rate and memory speed.
- Demonstrate how vulnerabilities in software coding can be exploited in computer security attacks (eg. buffer overflow).
- Demonstrate understanding of how peripherals are accessed in a computer system, e.g. polling or interrupt driven I/O.

IT 327 : Digital Communications. (4:3:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: Phscs 123 or concurrent enrollment.

DESCRIPTION: Ohm's law, power, inductance, capacitance, reactance, impedance, resonance, transformers. Communication systems, wired and wireless. Bandwidth, modulation; Shannon's theorem, telecommunications. Network physical and data link layers (ISO/OSI model). Optics/Coax/Twisted pair; RS-232/Ethernet; Signals/Protocols/Packets; digital communication theory fundamentals.

Course Outcomes
- Learn the EM spectrum and spectral analysis.
- Understand the limitations of communications links.
- Learn the main types of signal modulation (amplitude, frequency, phase).
- Learn the properties of physical communication media.
- Learn about digital information and how it is communicated.
- Understand how communications links are characterized.
- Learn about modern communication systems, including television, facsimiles, telephone, modems, LANs, WANs, satellite, cell phone and optical systems.
- Understand the main types of multiplexing (time, frequency, spatial, and code division).

IT 344 : Operating Systems. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142 & IT 210B & IT 252; or instructor's consent.

DESCRIPTION: Applying and using computer operating systems. Configuration, file systems, security, administration, network interfacing, multitasking, multiuser, device driver installation. Analyzing operating system performance.

Course Outcomes
- Describe the purposes, types, components, functions and inter-relationships of operating systems (desktop, mobile, and enterprise). Describe how hardware enables and integrates with this functionality.
- Describe how OS sub-systems work (scheduling, memory management, etc).
- Demonstrate an ability to work with Operating Systems by installing, compiling, configuring, and optimizing real and virtual systems. Describe Scalability issues.
- Describe common IAS concepts related to system administration. Describe system administration aspects of IAS, including authentication, directory services and access control models.
- Describe distributed/virtualization computing concepts. Implement some distributed services in an enterprise environment.
- Independently create systems that are in developing fields or applications of OS and system administration.

IT 347 : Computer Networks. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: IT 210B & STAT 201; C S 236 or concurrent enrollment.

DESCRIPTION: Computer networks. Local and wide-area networking for enterprises and service providers. Workgroups/routers/hubs/switches; network server administration; Internet protocols and routing; security and privacy.

Course Outcomes
- Understands computer networking concepts and vocabulary.
- Has received experience with real implementations of the concepts.
- Has built an intuition of the relationship between standards bodies and technology.
- Has built confidence through problem solving.
- Describe the role of a node and a link in an abstract network model.
- Define bandwidth, latency and throughput.
- Explain how bandwidth * latency = data volume is related to the concept of traditional “volume.”
- Describe the operation of a packet based sliding window protocol.
- List 7 layers of the OSI Model and compare them to the layering used in the Internet model.
- Explain the concept of encapsulation and its relationship to layering in the network models.
- Describe how an IP packet is carried in an Ethernet frame.
- Explain how TCP’s byte-stream sliding window is related to a traditional packet-based sliding window algorithm.
- Explain the differences between a hub, switch (bridge), and a router.
- Explain the relationship between an 802.1D bridge and a modern switch.
- Describe how a learning bridge “learns” what port should be used to forward a packet to a device.
- Describe how Spanning tree works and explain why it is necessary.
- Compare and contrast distance-vector and link-state routing algorithms.
- Explain the operation of the components of a SOHO wireless edge router including, DHCP, NAT/PAT, Routing function, Switching function and relationship to wireless access point.
- Describe how DNS works in the global internet including caching and root servers.
- Explain why guaranteed delivery is not desirable in certain multimedia protocols.
- Access MIBS from devices using SNMP on a workstation.

- Describe the operation of and configuration of Virtual LANs on an 802.1Q switchAccess MIBS from devices using SNMP on a workstation.
- Troubleshoot connectivity problems in a host occurring at multiple layers of the OSI model.
- Describe applications of symmetric encryption, asymmetric encryption and one-way hash to authentication, non-repudiation, integrity and confidentiality.

IT 350 : Database Principles and Applications. (3:2:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 236 & IT 210B

DESCRIPTION: Database theory and architecture; data modeling; designing application databases. Query languages, data security, database applications on the Web..

Course Outcomes

- Define and apply the concepts and terminology of Information Management.
- Apply conceptual modeling concepts using standard techniques such as Entity Relationship and Universal Modeling Language diagrams and tools.Use manual and automated techniques for mapping from conceptual to data models (e.g . ER to Relational).
- Use conceptual and data models to design and implement distributed database access applications applying current languages, system technologies and tools.
- Compare and contrast instalation, management, modeling and security features of current database managment systems
- Integrate, deploy, and demonstrate operational applications on database system infrastructure. Includes use of DDL, DML, programming interfaces and UI implementation.

IT 355 : Human-Computer Interaction. (3:2:4)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: IT 210B & TECH 312 & STAT 201

DESCRIPTION: User experience design techniques and best practices including requirements analysis, usability studies, prototyping methods, evaluation techniques, and cognitive, social, and emotional theories.

Course Outcomes

- Explain the significance and benefits of an empathetic understanding of users in systems design
- Analyze users and their environments for the purpose of designing to meet their needs
- Describe and analyze cognitive, affective and cultural aspects of the user experience. Incorporate these into new UI designs.
- Describe and analyze UIs for best-practice UI approaches, including diverse form factors and accessibility issues.
- Design and build UIs in an iterative project environment. Use best practice in creating UIs
- Present and document UX findings and the results of UX project and analysis using technical writing and presentation standards

IT 446 : Senior Project / Capstone 1. (2:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: ENGL 316; All required 300-level information technology courses.

DESCRIPTION: IT senior project proposal and feasibility studies. Project management, teamwork principles, intellectual property, supplier interactions, identifying and using professional technical literature, oral and written presentations.

Course Outcomes

- Participate in creation of concept definition, system definition and appropriate artifacts for a real system.
- Define tasks and use tools for the Project Life Cycle and change management
- Demonstrate an understanding of System Life Cycle models, analyze and apply these to contexts for Systems Project Management
- Demonstrate applications of teamwork principles and skills.
- Demonstrate oral and written communication skills for professional technical communication
- Describe intellectual property protections and how they apply to IT projects
- Understand and apply principles of creativity and how they apply to design.

IT 447 : Senior Projects/Capstone 2. (3:1:5)

WHEN TAUGHT: Winter

PREREQUISITE: IT 446

DESCRIPTION: Senior project design and integration. Second class of two-course sequence. Implementing design. Project management, teamwork, and presentations. Fee.

Course Outcomes

- Participate as a responsible member of a team in project activities and regular project review meetings with a coach.
- Manage tasks and use appropriate tools for the Project Life Cycle and change management of your project.
- Evaluate risk in projects and plan to manage it.
- Describe and practice skills and methods of life-long learning.
- Demonstrate written, multimedia, and presentation skills for professional technical communication.
- Demonstrate an understanding of System Life Cycle models, analyze and apply these to contexts for Systems Project Management
- Participate in the System Realization, change management, and demonstration of a real system.

IT 466 : Information Assurance and Security. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: IT 344 & IT 347 & IT 350

DESCRIPTION: Computer security principles. Incident prevention and management. Information assurance dimensions of availability, integrity, authentication, confidentiality and non-repudiations to ensure transmission, storage, and processing of information.

Course Outcomes

- Explain information assurance and security models, and relate these to historical and current security problems in the context of standards, best practices, policy, planning, usability and continuous education.
- Use risk assessment methods to create a security plan that uses both technical and non-technical countermeasures for a management audience.
- Develop as a team, incident response, disaster recovery and business continuity plans with an awareness of laws, regulatory standards and best practices.
- Install and configure various countermeasures such as firewalls, intrusion detection systems, virtual private networks, and encryption systems; and explain the benefits, limitations and usability impact these may have within an organization.
- Explain how the processes of certification, accreditation and maintenance can mitigate risks, and be able to support these by performing a penetration test using basic hacking techniques.
- Instruct non-technical audiences about the key elements of a good security implementation.

4. Complete 1.5 hours (3 enrollments) of the following:

IT 391R : Junior/Senior Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Required three times during junior/senior years while in professional program. College Lecture and School of Technology Lecture attendance required.

Course Outcomes

- Awareness of professional issues in IT.
- Motivation for life-long learning.

5. Complete the following:

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

6. After consulting with an information technology advisor, complete 6 hours of upper-division information technology technical electives.

7. Complete the following:

IT 491R : Senior Seminar. (.5:1.0:0)

DESCRIPTION: Seminar topics for near-graduation seniors. Information technology work experience required.

Course Outcomes

- Write a great resume
- Ability to interview well
- Understand the offer and negotiate a contract
- Understand Business Etiquette and the written and unwritten rules in the workplace
- Understand what is required for graduation

8. Complete department packet and exit interview.

*Hours include courses that may fulfill university core requirements.

IT 210B : Fundamentals of Web-Based Information Technology. (2:3:3)

PREREQUISITE: IT 210A

DESCRIPTION: Web technologies including distributed architecture, networking, database concepts, client and server development, infrastructure management, and web system integration.

Course Outcomes

- Define and describe fundamental computing platform concepts of operating systems and networking and their relationship to Standards.
- Analyze, create and integrate systems both at the Web Architecture and at the Web System Architecture levels.
- Demonstrate system administration skills necessary to manage web systems using best practices
- Review and analyze web systems for specific Information Assurance and Security (IAS) issues, including multiple viewpoints of incident response, within the framework of standard IAS models.
- Analyze and design web systems using professional modeling approaches. This includes systems process development within a larger systems lifecycle model using best practices.
- Acquire and apply life-long learning skills to find, assess, utilize, and attribute web development resources on the Web.
- Demonstrate skills in technical communication

2. Complete two courses from the following to complete the 16 hours required for the minor:

IT 252 : Computer Architecture and Organization. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IT 124 & C S 235; or C S 124 & C S 235; or EC EN 224 & C S 235

DESCRIPTION: Principles of computer hardware and instruction set architecture. Subjects include: internal CPU organization and implementation, peripheral interconnect and IO systems, and low-level programming and security issues.

Course Outcomes

- Demonstrate ability to understand and program with assembly language.
- Demonstrate ability to use a C compiler, an assembler, a disassembler, a debugger, and CPU emulators to develop, debug, test, analyze and optimize programs.
- Know how to write more reliable, secure, and efficient software with an understanding of how the software is executed on the underlying architecture.
- Demonstrate ability to modify a CPU design to add instructions and to improve the overall efficiency of execution.
- Demonstrate understanding of the various abstractions used to manage complexity in computer systems and support application concurrency. e.g. system calls and virtual memory.
- Know how application performance can be affected in a target system by memory hierarchy design factors such as cache size, bus width, clock rate and memory speed.
- Demonstrate how vulnerabilities in software coding can be exploited in computer security attacks (eg. buffer overflow).
- Demonstrate understanding of how peripherals are accessed in a computer system, e.g. polling or interrupt driven I/O.

IT 327 : Digital Communications. (4:3:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: Phscs 123 or concurrent enrollment.

DESCRIPTION: Ohm's law, power, inductance, capacitance, reactance, impedance, resonance, transformers. Communication systems, wired and wireless. Bandwidth, modulation; Shannon's theorem, telecommunications. Network physical and data link layers (ISO/OSI model). Optics/Coax/Twisted pair; RS-232/Ethernet; Signals/Protocols/Packets; digital communication theory fundamentals.

Course Outcomes

- Learn the EM spectrum and spectral analysis.
- Understand the limitations of communications links.
- Learn the main types of signal modulation (amplitude, frequency, phase).
- Learn the properties of physical communication media.
- Learn about digital information and how it is communicated.
- Understand how communications links are characterized.
- Learn about modern communication systems, including television, facsimiles, telephone, modems, LANs, WANs, satellite, cell phone and optical systems.
- Understand the main types of multiplexing (time, frequency, spatial, and code division).

IT 344 : Operating Systems. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142 & IT 210B & IT 252; or instructor's consent.

DESCRIPTION: Applying and using computer operating systems. Configuration, file systems, security, administration, network interfacing, multitasking, multiuser, device driver installation. Analyzing operating system performance.

Course Outcomes

- Describe the purposes, types, components, functions and inter-relationships of operating systems (desktop, mobile, and enterprise). Describe how hardware enables and integrates with this functionality.
- Describe how OS sub-systems work (scheduling, memory management, etc).
- Demonstrate an ability to work with Operating Systems by installing, compiling, configuring, and optimizing real and virtual systems. Describe Scalability issues.
- Describe common IAS concepts related to system administration. Describe system administration aspects of IAS, including authentication, directory services and access control models.
- Describe distributed/virtualization computing concepts. Implement some distributed services in an

enterprise environment.
- Independently create systems that are in developing fields or applications of OS and system administration.

IT 347 : Computer Networks. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: IT 210B & STAT 201; C S 236 or concurrent enrollment.

DESCRIPTION: Computer networks. Local and wide-area networking for enterprises and service providers. Workgroups/routers/hubs/switches; network server administration; Internet protocols and routing; security and privacy.

Course Outcomes

- Understands computer networking concepts and vocabulary.
- Has received experience with real implementations of the concepts.
- Has built an intuition of the relationship between standards bodies and technology.
- Has built confidence through problem solving.
- Describe the role of a node and a link in an abstract network model.
- Define bandwidth, latency and throughput.
- Explain how bandwidth * latency = data volume is related to the concept of traditional “volume.”
- Describe the operation of a packet based sliding window protocol.
- List 7 layers of the OSI Model and compare them to the layering used in the Internet model.
- Explain the concept of encapsulation and its relationship to layering in the network models.
- Describe how an IP packet is carried in an Ethernet frame.
- Explain how TCP’s byte-stream sliding window is related to a traditional packet-based sliding window algorithm.
- Explain the differences between a hub, switch (bridge), and a router.
- Explain the relationship between an 802.1D bridge and a modern switch.
- Describe how a learning bridge “learns” what port should be used to forward a packet to a device.
- Describe how Spanning tree works and explain why it is necessary.
- Compare and contrast distance-vector and link-state routing algorithms.
- Explain the operation of the components of a SOHO wireless edge router including, DHCP, NAT/PAT, Routing function, Switching function and relationship to wireless access point.
- Describe how DNS works in the global internet including caching and root servers.
- Explain why guaranteed delivery is not desirable in certain multimedia protocols.
- Access MIBS from devices using SNMP on a workstation.
- Describe the operation of and configuration of Virtual LANs on an 802.1Q switchAccess MIBS from devices using SNMP on a workstation.
- Troubleshoot connectivity problems in a host occurring at multiple layers of the OSI model.
- Describe applications of symmetric encryption, asymmetric encryption and one-way hash to authentication, non-repudiation, integrity and confidentiality.

IT 350 : Database Principles and Applications. (3:2:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 236 & IT 210B

DESCRIPTION: Database theory and architecture; data modeling; designing application databases. Query languages, data security, database applications on the Web..

Course Outcomes

- Define and apply the concepts and terminology of Information Management.
- Apply conceptual modeling concepts using standard techniques such as Entity Relationship and Universal Modeling Language diagrams and tools.Use manual and automated techniques for mapping from conceptual to data models (e.g . ER to Relational).
- Use conceptual and data models to design and implement distributed database access applications applying current languages, system technologies and tools.
- Compare and contrast instalation, management, modeling and security features of current database managment systems
- Integrate, deploy, and demonstrate operational applications on database system infrastructure. Includes use of DDL, DML, programming interfaces and UI implementation.

IT 355 : Human-Computer Interaction. (3:2:4)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: IT 210B & TECH 312 & STAT 201

DESCRIPTION: User experience design techniques and best practices including requirements analysis, usability studies, prototyping methods, evaluation techniques, and cognitive, social, and emotional theories.

Course Outcomes

- Explain the significance and benefits of an empathetic understanding of users in systems design
- Analyze users and their environments for the purpose of designing to meet their needs
- Describe and analyze cognitive, affective and cultural aspects of the user experience. Incorporate these into new UI designs.
- Describe and analyze UIs for best-practice UI approaches, including diverse form factors and accessibility issues.
- Design and build UIs in an iterative project environment. Use best practice in creating UIs
- Present and document UX findings and the results of UX project and analysis using technical writing and presentation standards

IT 466 : Information Assurance and Security. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: IT 344 & IT 347 & IT 350

DESCRIPTION: Computer security principles. Incident prevention and management. Information assurance dimensions of availability, integrity, authentication, confidentiality and non-repudiations to ensure transmission, storage, and processing of information.

Course Outcomes

- Explain information assurance and security models, and relate these to historical and current security problems in the context of standards, best practices, policy, planning, usability and continuous education.
- Use risk assessment methods to create a security plan that uses both technical and non-technical countermeasures for a management audience.
- Develop as a team, incident response, disaster recovery and business continuity plans with an awareness of laws, regulatory standards and best practices.
- Install and configure various countermeasures such as firewalls, intrusion detection systems, virtual private networks, and encryption systems; and explain the benefits, limitations and usability impact these may have within an organization.
- Explain how the processes of certification, accreditation and maintenance can mitigate risks, and be able to support these by performing a penetration test using basic hacking techniques.
- Instruct non-technical audiences about the key elements of a good security implementation.

Note: Some of the above courses also have prerequisites, which the student must either take or satisfy in another manner. The main prerequisite is experience using a programming language, preferably C, C++, or Java (see C S 142).

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

IT 101 : Cornerstone: Information Technology. (3:2:3)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Planning and preparing for a successful career in information technology. Developing skills with computers, problem solving, studying, and time management. Comparing information technology to computer science, computer engineering, and information systems.

NOTE: Fee.

Course Outcomes

- Acquire basic skills in using labs as part of the learning experience.
- Be able to reverse engineer a simple algorithm.
- Acquire basic IT terminology.
- Be able to use basic IT tools at the beginning level.
- Acquire a beginning knowledge of programming.Acquire a beginning knowledge of networking.Acquire a beginning knowledge of computer hardware.Acquire a beginning knowledge of operating systems & servers.Acquire a beginning knowledge of database systems.
- Acquire a beginning knowledge of web systems.Acquire a beginning knowledge of how data is represented in a computer.Acquire a beginning knowledge of human-computer interaction.Acquire a beginning knowledge of systems engineering and development methodologies to guide project management.
- Understand the pervasiveness and impacts of IT in our everyday lives locally and globally as well as across organizations and industries.Acquire a beginning knowledge of computer security and ethical issues.Acquire a beginning knowledge of how IT is organized and governed in organizations and enterprises.
- Acquire basic teamwork skills.Begin using oral and written communication in a professional manner.Begin using basic design and problem-solving skills.Acquire basic knowledge and research skills for continuous learning in IT profession and understand the difference between the four computing majors at BYU (IT, IS, CS, and ECE).Get to know the IT Faculty and other IT Professionals.Acquire basic knowledge and research skills for continuous learning in IT profession and for finding associated IT employment.

IT 124 : Introduction to Computer Systems. (3:3:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142; or concurrent enrollment.

DESCRIPTION: How a computer works, from hardware to high-level programming language. Logic circuits, Boolean algebra, computer instructions, assembly language, binary arithmetic, and C programming.

Course Outcomes

There are no course outcomes available

IT 198R : Directed Studies in Information Technology. (2:2:2)

DESCRIPTION: Introductory course. Special topics in problem solving and technology careers.

Course Outcomes

There are no course outcomes available

IT 199R : Academic Internship: Information Technology. (1-3:ARR:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Consent of both department chair and cooperative education coordinator.

DESCRIPTION: Work experience evaluated by supervisor and posted on student's transcript.

Course Outcomes

- Student acquires professional experiences in the discipline.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Faculty

IT 210A : Fundamentals of Web-Based Information Technology. (2:3:3)

PREREQUISITE: C S 142 & IT 101; or instructor's consent.

DESCRIPTION: Web technologies including distributed architecture, networking, database concepts, client and server development, infrastructure management, and web system integration.

Course Outcomes

- Define and describe fundamental computing platform concepts of operating systems and networking and their relationship to Standards
- Analyze, create and integrate systems both at the Web Architecture and at the Web System Architecture levels.
- Demonstrate system administration skills necessary to manage web systems using best practices.
- Review and analyze web systems for specific Information Assurance and Security (IAS) issues, including multiple viewpoints of incident response, within the framework of standard IAS models.
- Analyze and design web systems using professional modeling approaches. This includes systems process development within a larger systems lifecycle model using best practices.
- Acquire and apply life-long learning skills to find, assess, utilize, and attribute web development resources on the Web.

IT 210B : Fundamentals of Web-Based Information Technology. (2:3:3)

PREREQUISITE: IT 210A

DESCRIPTION: Web technologies including distributed architecture, networking, database concepts, client and server development, infrastructure management, and web system integration.

Course Outcomes

- Define and describe fundamental computing platform concepts of operating systems and networking and their relationship to Standards.
- Analyze, create and integrate systems both at the Web Architecture and at the Web System Architecture levels.
- Demonstrate system administration skills necessary to manage web systems using best practices
- Review and analyze web systems for specific Information Assurance and Security (IAS) issues, including multiple viewpoints of incident response, within the framework of standard IAS models.
- Analyze and design web systems using professional modeling approaches. This includes systems process development within a larger systems lifecycle model using best practices.
- Acquire and apply life-long learning skills to find, assess, utilize, and attribute web development resources on the Web.
- Demonstrate skills in technical communication

IT 252 : Computer Architecture and Organization. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IT 124 & C S 235; or C S 124 & C S 235; or EC EN 224 & C S 235

DESCRIPTION: Principles of computer hardware and instruction set architecture. Subjects include: internal CPU organization and implementation, peripheral interconnect and IO systems, and low-level programming and security issues.

Course Outcomes

- Demonstrate ability to understand and program with assembly language.
- Demonstrate ability to use a C compiler, an assembler, a disassembler, a debugger, and CPU emulators to develop, debug, test, analyze and optimize programs.
- Know how to write more reliable, secure, and efficient software with an understanding of how the software is executed on the underlying architecture.
- Demonstrate ability to modify a CPU design to add instructions and to improve the overall efficiency of execution.
- Demonstrate understanding of the various abstractions used to manage complexity in computer systems and support application concurrency. e.g. system calls and virtual memory.
- Know how application performance can be affected in a target system by memory hierarchy design factors such as cache size, bus width, clock rate and memory speed.
- Demonstrate how vulnerabilities in software coding can be exploited in computer security attacks (eg. buffer overflow).
- Demonstrate understanding of how peripherals are accessed in a computer system, e.g. polling or interrupt driven I/O.

300-Level Courses

IT 318 : Electronics, Computers, and Manufacturing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 112 & PHSCS 121; or PHSCS 105 & PHSCS 107; Phscs 121; or Phscs 105 and 107.

DESCRIPTION: Basics of electricity; behavior and manufacture of resistors, inductor, capacitors, transformers; motors; manufacture of transistors, ICs, MCMs, circuit boards. Computers; digital communications; networking.

Course Outcomes

- Describe the basic laws governing electronic circuits, both DC and AC.
- Describe the basic safety considerations relevant to electricity.
- Describe how resistors, potentiometers, inductors, capacitors, integrated circuits, printed wiring boards (PWBs), assembled PWBs, multi-chip modules, and hybrids are manufactured.
- Describe the basic operating characteristics for the following 6 motor types: 1) DC; 2) Stepper; 3) DC Brushless; 4) Universal; 5) AC Induction; 6) Synchronous.
- Describe the capabilities and limitations of electronic measuring equipment.
- Describe the basic characteristics of a computer and how they operate.
- Describe how industrial networks operate.

IT 327 : Digital Communications. (4:3:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: Phscs 123 or concurrent enrollment.

DESCRIPTION: Ohm's law, power, inductance, capacitance, reactance, impedance, resonance, transformers. Communication systems, wired and wireless. Bandwidth, modulation; Shannon's theorem, telecommunications. Network physical and data link layers (ISO/OSI model). Optics/Coax/Twisted pair; RS-232/Ethernet; Signals/Protocols/Packets; digital communication theory fundamentals.

Course Outcomes

- Learn the EM spectrum and spectral analysis.
- Understand the limitations of communications links.
- Learn the main types of signal modulation (amplitude, frequency, phase).
- Learn the properties of physical communication media.
- Learn about digital information and how it is communicated.
- Understand how communications links are characterized.
- Learn about modern communication systems, including television, facsimiles, telephone, modems, LANs, WANs, satellite, cell phone and optical systems.
- Understand the main types of multiplexing (time, frequency, spatial, and code division).

IT 344 : Operating Systems. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142 & IT 210B & IT 252; or instructor's consent.

DESCRIPTION: Applying and using computer operating systems. Configuration, file systems, security, administration, network interfacing, multitasking, multiuser, device driver installation. Analyzing operating system performance.

Course Outcomes

- Describe the purposes, types, components, functions and inter-relationships of operating systems (desktop, mobile, and enterprise). Describe how hardware enables and integrates with this functionality.
- Describe how OS sub-systems work (scheduling, memory management, etc).
- Demonstrate an ability to work with Operating Systems by installing, compiling, configuring, and optimizing real and virtual systems. Describe Scalability issues.
- Describe common IAS concepts related to system administration. Describe system administration aspects of IAS, including authentication, directory services and access control models.
- Describe distributed/virtualization computing concepts. Implement some distributed services in an enterprise environment.
- Independently create systems that are in developing fields or applications of OS and system administration.

IT 347 : Computer Networks. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: IT 210B & STAT 201; C S 236 or concurrent enrollment.

DESCRIPTION: Computer networks. Local and wide-area networking for enterprises and service providers. Workgroups/routers/hubs/switches; network server administration; Internet protocols and routing; security and privacy.

Course Outcomes

- Understands computer networking concepts and vocabulary.
- Has received experience with real implementations of the concepts.
- Has built an intuition of the relationship between standards bodies and technology.
- Has built confidence through problem solving.
- Describe the role of a node and a link in an abstract network model.
- Define bandwidth, latency and throughput.
- Explain how bandwidth * latency = data volume is related to the concept of traditional “volume.”
- Describe the operation of a packet based sliding window protocol.
- List 7 layers of the OSI Model and compare them to the layering used in the Internet model.
- Explain the concept of encapsulation and its relationship to layering in the network models.
- Describe how an IP packet is carried in an Ethernet frame.
- Explain how TCP's byte-stream sliding window is related to a traditional packet-based sliding window algorithm.
- Explain the differences between a hub, switch (bridge), and a router.
- Explain the relationship between an 802.1D bridge and a modern switch.
- Describe how a learning bridge “learns” what port should be used to forward a packet to a device.
- Describe how Spanning tree works and explain why it is necessary.
- Compare and contrast distance-vector and link-state routing algorithms.
- Explain the operation of the components of a SOHO wireless edge router including, DHCP, NAT/PAT, Routing function, Switching function and relationship to wireless access point.
- Describe how DNS works in the global internet including caching and root servers.
- Explain why guaranteed delivery is not desirable in certain multimedia protocols.
- Access MIBS from devices using SNMP on a workstation.
- Describe the operation of and configuration of Virtual LANs on an 802.1Q switchAccess MIBS from devices using SNMP on a workstation.
- Troubleshoot connectivity problems in a host occurring at multiple layers of the OSI model.
- Describe applications of symmetric encryption, asymmetric encryption and one-way hash to authentication, non-repudiation, integrity and confidentiality.

IT 350 : Database Principles and Applications. (3:2:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 236 & IT 210B

DESCRIPTION: Database theory and architecture; data modeling; designing application databases. Query languages, data security, database applications on the Web..

Course Outcomes

- Define and apply the concepts and terminology of Information Management.
- Apply conceptual modeling concepts using standard techniques such as Entity Relationship and Universal Modeling Language diagrams and tools.Use manual and automated techniques for mapping from conceptual to data models (e.g . ER to Relational).
- Use conceptual and data models to design and implement distributed database access applications applying

current languages, system technologies and tools.
- Compare and contrast instalation, management, modeling and security features of current database managment systems
- Integrate, deploy, and demonstrate operational applications on database system infrastructure. Includes use of DDL, DML, programming interfaces and UI implementation.

IT 355 : Human-Computer Interaction. (3:2:4)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: IT 210B & TECH 312 & STAT 201

DESCRIPTION: User experience design techniques and best practices including requirements analysis, usability studies, prototyping methods, evaluation techniques, and cognitive, social, and emotional theories.

Course Outcomes
- Explain the significance and benefits of an empathetic understanding of users in systems design
- Analyze users and their environments for the purpose of designing to meet their needs
- Describe and analyze cognitive, affective and cultural aspects of the user experience. Incorporate these into new UI designs.
- Describe and analyze UIs for best-practice UI approaches, including diverse form factors and accessibility issues.
- Design and build UIs in an iterative project environment. Use best practice in creating UIs
- Present and document UX findings and the results of UX project and analysis using technical writing and presentation standards

IT 391R : Junior/Senior Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Required three times during junior/senior years while in professional program. College Lecture and School of Technology Lecture attendance required.

Course Outcomes
- Awareness of professional issues in IT.
- Motivation for life-long learning.

IT 399R : Academic Internship: Information Technology. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Consent of both department chair and cooperative education coordinator.

DESCRIPTION: Experience in industrial environment. Approved job function supervised by employer and electronics and information technology advisor. Formal technical report required.

Course Outcomes
- Student acquires professional experiences in the discipline.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

400-Level Courses

IT 441 : Embedded Computer Systems. (3:2:3)

PREREQUISITE: IT 344

DESCRIPTION: Design and development of embedded computer systems interacting with the physical world. Hardware/software interfacing and multiple types of embedded systems. Integrated IT design approach with networking, IAS and human interaction concerns.

Course Outcomes
- Describe the characteristics that define embedded systems. Be able to identify embedded systems in various applications.Describe multiple types of embedded systemsDescribe the systems incorporating embedded systems. Analyze case studies to demonstrate the multiple interacting systems required for a successful application.Describe the impact of embedded systems on current and future IT systems.Define real-time computing and its relationship to embedded systemsDescribe communication technologies used in embedded systems
- Describe and analyze sensors and actuators used in embedded systems, including software and hardware requirements
- Design and create applications for both OS-based and small, non-OS, embedded systems.Set up and use appropriate development environments.
- Integrate more than one type of embedded system to enable networking, sensing and actuation in an IT environment
- Present and document labs and projects

IT 443 : Broadband Communications. (3:2:3)

PREREQUISITE: IT 327

DESCRIPTION: Physical-layer communications over broadband media. Optical and radio frequency propagation and devices. Fiber optics.

NOTE: Fee.

Course Outcomes
- Describe standing waves in high-frequency transmission lines and causes such as improper termination.
- Be able to conduct tradeoffs between various transmission media, including various types of wire pairs, coax, waveguides, free-space propagation, and fiber optics.
- Identify atmospheric and obstruction effects on RF propagation.

- Analyze electromagnetic propagation through different media.
- Describe key features of the 802.11 standard and how they effect deployment of a wireless network.
- Be able to perform analysis using gains, losses and decibels, and to convert between them.
- Identify key fiber characteristics and their respective advantages.
- Identify key optical transmitter characteristics and their respective advantages.
- Identify key optical receiver characteristics and their respective advantages.
- Differentiate between electro-optic repeaters and optical amplifiers.
- Describe fiber attenuation and dispersion, their causes, effects and methods of mitigation.
- Be familiar with fiber connectorizing and splicing techniques.
- Describe the components and issues associated with wavelength division multiplexing.

IT 446 : Senior Project / Capstone 1. (2:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: ENGL 316; All required 300-level information technology courses.

DESCRIPTION: IT senior project proposal and feasibility studies. Project management, teamwork principles, intellectual property, supplier interactions, identifying and using professional technical literature, oral and written presentations.

Course Outcomes

- Participate in creation of concept definition, system definition and appropriate artifacts for a real system.
- Define tasks and use tools for the Project Life Cycle and change management
- Demonstrate an understanding of System Life Cycle models, analyze and apply these to contexts for Systems Project Management
- Demonstrate applications of teamwork principles and skills.
- Demonstrate oral and written communication skills for professional technical communication
- Describe intellectual property protections and how they apply to IT projects
- Understand and apply principles of creativity and how they apply to design.

IT 447 : Senior Projects/Capstone 2. (3:1:5)

WHEN TAUGHT: Winter

PREREQUISITE: IT 446

DESCRIPTION: Senior project design and integration. Second class of two-course sequence. Implementing design. Project management, teamwork, and presentations. Fee.

Course Outcomes

- Participate as a responsible member of a team in project activities and regular project review meetings with a coach.
- Manage tasks and use appropriate tools for the Project Life Cycle and change management of your project.
- Evaluate risk in projects and plan to manage it.
- Describe and practice skills and methods of life-long learning.
- Demonstrate written, multimedia, and presentation skills for professional technical communication.
- Demonstrate an understanding of System Life Cycle models, analyze and apply these to contexts for Systems Project Management
- Participate in the System Realization, change management, and demonstration of a real system.

IT 450 : Database Administration. (3:2.0:3.0)

WHEN TAUGHT: Winter

PREREQUISITE: IT 350

DESCRIPTION: The role and responsibilities of database administrators. Database platform, architecture, and configuration; security and account management; backup, restore and disaster recovery; availability, access and performance; data migration. Labs conducted using Oracle's relational database management.

Course Outcomes

There are no course outcomes available

IT 461R : Current Topics in Information Technology. (3:2:3)

PREREQUISITE: Instructor's consent.

DESCRIPTION: In-depth analysis of current growth areas in information technology. Detailed discussion and lab experience of a few topics from faculty working in the field.

Course Outcomes

There are no course outcomes available

IT 466 : Information Assurance and Security. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: IT 344 & IT 347 & IT 350

DESCRIPTION: Computer security principles. Incident prevention and management. Information assurance dimensions of availability, integrity, authentication, confidentiality and non-repudiations to ensure transmission, storage, and processing of information.

Course Outcomes

- Explain information assurance and security models, and relate these to historical and current security problems in the context of standards, best practices, policy, planning, usability and continuous education.
- Use risk assessment methods to create a security plan that uses both technical and non-technical countermeasures for a management audience.
- Develop as a team, incident response, disaster recovery and business continuity plans with an awareness of laws, regulatory standards and best practices.
- Install and configure various countermeasures such as firewalls, intrusion detection systems, virtual private networks, and encryption systems; and explain the benefits, limitations and usability impact these may have

within an organization.
- Explain how the processes of certification, accreditation and maintenance can mitigate risks, and be able to support these by performing a penetration test using basic hacking techniques.
- Instruct non-technical audiences about the key elements of a good security implementation.

IT 491R : Senior Seminar. (.5:1.0:0)

DESCRIPTION: Seminar topics for near-graduation seniors. Information technology work experience required.

Course Outcomes
- Write a great resume
- Ability to interview well
- Understand the offer and negotiate a contract
- Understand Business Etiquette and the written and unwritten rules in the workplace
- Understand what is required for graduation

IT 492R : Special Problems in Information Technology. (1-3:ARR:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Informational technology senior standing, Engl 316, and an approved project proposal.

DESCRIPTION: Individual study in current topics of information technology.

Course Outcomes
- The nature of Information Technology is constant change.This course allows students to pursue personal interests under the direction of a faculty member.

500-Level Graduate Courses (available to advanced undergraduates)

IT 515R : Special Topics in Information Technology. (1-3:ARR:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: New topics in information technology for graduate and undergraduate students. Standard lecture and lab format.

Course Outcomes
- Learn and apply IT concepts and/or practices in a specialized area of IT.

IT 529 : Advanced Networking. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: IT 344, 347; or equivalents.

DESCRIPTION: Analyzing, selecting, configuring, monitoring, and managing of computer network equipment. SNMP-based monitoring and control in process of fault isolation and root cause analysis.

Course Outcomes
- Understands history and evolution of 802.1D, Spanning tree, VLANs and their relationships.
- Has received experience with real implementation of the concepts.
- Has built an intuition of the relationship between standards bodies and technology.
- Has built confidence through problem solving.
- Describe configuration and management issues relative to SNMP MIB.
- Perform basic monitoring with SNMP.
- Perform basic control with SNMP.
- Describe function and purpose of network management systems such as Zenoss, HP OpenView, Tivoli, OpenNMS.
- Perform basic monitoring using some NMS.
- Explain the interaction of a router and a switch implemented in the same device where the router forwards between VLANs only.
- Describe the architecture of a modern enterprise switch-router.
- Explain the details of Distance Vector routing and its advantages and disadvantages relative to Link State routing.
- Explain the details of Link state routing and its advantages and disadvantages relative to Distance Vector Routing.
- Describe the function of and uses of MPLS.
- Has gained experience and confidence in presenting technical information.
- Describe IPv6 and its evolution from IPv4.
- Explain reasons why IPv6 has not been adopted as rapidly as originally predicted.
- Is prepared to read technical literature and evaluate quality of the information.
- Is prepared to read technical literature and present the information and its context to an audience of peers.
- Explain the need for continuous learning in the networking field.

IT 531 : Encryption and Compression. (3:2:3)

WHEN TAUGHT: Contact Department.

PREREQUISITE: C S 235 and Stat 201; or equivalents

DESCRIPTION: Encoding digital data for storage or network transmission using computers. Analyzing and applying algorithms for digital data encryption and compression. Current Web and multimedia standards. Lab emphasizing implementation.

Course Outcomes
- Define and give examples of dictionary compression methods.
- Define and give examples of run-length encoding.
- Define and give examples of statistical compression.
- Show how the various lossless compression techniques are used in modern digital standards.
- Explain the relationship of information theory to compression and encryption.
- Compare the techniques, benefits and risks of symmetric encryption standards such as DES and AES.

- Compare and contrast how symmetric and public-key cryptosystems are used.
- Describe common errors in cryptographic implementations.
- Understand cryptography in the broader social context, including legally and ethically.

IT 548 : Mechatronics. (3:2:3)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Instructor's consent.

DESCRIPTION: Synergistic application of mechanical devices, electronic controls, and cyber-system principles. Design of integrated systems that interact between the real world and the IT cyber-space environment. Advanced applications of automation and control.

Course Outcomes

- Explain what disciplines comprise Mechatronics. Explain how the discipline of mechatronics is an integration of ideas and technologies from the contributing disciplines.
- Explain how the fields of Information Technology (IT) and Mechatronics interact
- Explain design approaches for integrated (multi-disciplinary) systems and how they are applied to Mechatronics (systems design)
- Design system modules with heterogenous component technologies including industrial control (PLC/SCADA/other), sensors and actuators, interface electronics and embedded computer components
- Design, develop and demonstrate a complete mechatronic project using a variety of mechatronic technologies, including IT design aspects.
- Analyze and report on design elements from various technologies and their integration for their intended purpose(s) in Mechatronic systems.

IT 566 : Digital Forensics. (3:2:3)

WHEN TAUGHT: Winter Contact Department

PREREQUISITE: IT 466 or equivalent.

DESCRIPTION: Fundamentals of digital forensics, legal issues, evidence, chain of custody, media analysis, incident response, corporate forensics, and network forensics.

Course Outcomes

- Determine the nature and extent of an incident by applying the principles of digital forensics, including where appropriate reconstructing a cyber-incident.
- Analyze volatile data, nonvolatile data and files of unknown origin.
- Compare the priorities of cyber forensics for different communities
- Evaluate and integrate different tools to create a personal forensics toolkit.
- Defend the results of an investigation to various audiences including technical, legal and management.
- Create and justify forensic checklists for both existing and new technologies using established methods.

IT 567 : Cyber Security and Penetration Testing. (3:2:3)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: IT 466 or C S 465 or I Sys 560 or equivalent content course from another institution.

DESCRIPTION: Advanced computer systems security. Vulnerabilities and exploits. System and network attacks. Ethical hacking and penetration testing. Cyber security, cyber weapons, and advanced persistent threats. Legal and regulatory requirements for security and privacy.

Course Outcomes

- 1. Explain the regulatory and legal requirements, and rationale for penetration testing
- 2. Hold an in-depth discussion about the ethics of cyber-security and other associated domains.
- 3. Demonstrate the use of various security tools, their application in a penetration test and be able to explain how such tools may be abused.
- 4. Illustrate clearly, by means of a written report and verbal presentation, the results of a penetration test with clear recommendations.
- 5. Explain how exploits and vulnerabilities are discovered and the correct protocols to report these for vendor fixes.
- 6. Be able to discuss new threat-types such as APT's and Cyber-Weapons and use these to explain why lifelong learning is critical for a security professional.

Manufacturing Engineering Technology

Michael Miles, Program Coordinator
265 CTB, (801) 422-6300

Admission to Degree Program

Admission to the manufacturing engineering technology program is open to all BYU students.

Educational Objectives

- Leadership — graduates will be able to develop a vision and lead a team or an organization to excellence in all of the areas listed below.
- Professionalism — graduates will have high ethical values, exhibit good work habits and continuously develop relevant new knowledge and skills.
- Creativity and problem solving — graduates will see manufacturing problems from multiple and new perspectives, generate alternative, innovative solutions and select and implement the best solution.
- Management — graduates will be able to plan, organize, staff, and control manufacturing projects.
- Materials — graduates will understand the physical and mechanical properties of engineering materials.
- Processes — graduates will understand manufacturing processes and their applications.
- Quality — graduates will be committed to quality and to continuously improving products and processes.
- Systems — graduates will understand the dynamics of manufacturing systems and supply chains and how to effectively configure the optimum system for efficient manufacture and delivery.
- Design — graduates will be able to design tooling/fixturing and contribute to the design of world-class products.
- Communication — graduates will be effective two-way communicators.
- Global awareness — graduates will be aware of the issues associated with off-shore manufacturing.
- Human and environmental factors — graduates will understand manufacturing's impact on society and the environment.

The Discipline

Manufacturing is an exciting and rewarding discipline that has significant impact on a society's standard of living and economic independence. At BYU the manufacturing program is specifically oriented toward creating leaders in the industry.

Students in manufacturing learn creative and analytical skills that will enable them to quickly diagnose and solve manufacturing problems with insight from both engineering and management perspectives. They also develop interpersonal and communication skills that will prepare them to work as part of an engineering team and effectively interact with vendors, management, and production personnel. In addition, they receive hands-on training in modern lab facilities and learn to use computers to design, analyze, implement, and control manufacturing operations.

Manufacturing professionals are knowledgeable and skilled in the management, methods, technologies, equipment, and tooling needed to produce affordable products of high quality. They are able to effectively coordinate the procurement, installation, and start-up of production equipment as well as improve the productivity of existing operations. They are also able to coordinate manufacturing and supply-chain operation in a global setting.

The manufacturing engineering technology program is accredited by the Technology Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone (410) 347-7700. The program provides students with the option of obtaining a minor in business management. Students may take their electives in other areas of specialization as well. Graduates may further their technical and managerial skills by pursuing either a master of science in technology or a master of business administration.

Career Opportunities

Career opportunities in manufacturing are plentiful and rewarding. Leaders of industry often have manufacturing backgrounds. Typical entry-level job titles include manufacturing engineer, quality manager, process engineer, tool engineer, product engineer, quality engineer, production supervisor, and account manager (technical sales). New graduates are typically hired into technical positions but have the opportunity to move into management.

The job outlook for manufacturing graduates is bright and should continue to be strong into the future. When one considers that everything that does not exist as part of nature is the product of some form of manufacturing, it is easy to see that manufacturing is an integral part of our society and generates an ever-growing workforce. Progressive companies worldwide seek qualified individuals who can provide leadership in improving the quality and productivity of their manufacturing operations.

General Information

The manufacturing program is designed to provide simple transfer from local schools, including BYU—Idaho, Salt Lake Community College (SLCC), and Utah Valley University (UVU). Students transferring from these or other schools should meet with college and program advisors as soon as possible to evaluate transfer credits and plan their BYU curriculum.

Program Requirements | View MAP | View Program Outcomes

1. Students must have a minimum of 124 total hours to graduate with this major.
2. Complete the following manufacturing core courses:

MFG 130 : Modern Manufacturing. (3:2:2)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Methods and characteristics of successful manufacturing engineers and managers. Introduction to engineering and technology, design, and project management. Lab.

Course Outcomes
- Describe the four pillars of manufacturing and their relationship to the manufacturing system.
- Help student prepare for productive professional lives including insights into leadership, teamwork and innovation.

MFG 220 : Material Removal. (3:2:3)
WHEN TAUGHT: Fall
PREREQUISITE: Math 111 or equivalent.
DESCRIPTION: Methods and procedures to shape materials using basic machine tools; cutting theory, tool selection, metrology methods, and machine operation. Introduction to computer numerical control.

Course Outcomes
- Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.
- Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.
- Students will learn to work on teams while preparing presentations on new metal removal manufacturing processes, and while developing a manufacturing plan for a proposed production run.

MFG 230 : Computer-Aided Manufacturing. (3:2:3)
WHEN TAUGHT: Winter
PREREQUISITE: MFG 220 & ME EN 172
DESCRIPTION: Manual and computer-assisted programming of computer numerical controlled (CNC) equipment. Developing CNC programs to manufacture parts for high production.

Course Outcomes
- Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.
- Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.
- Students will understand and be able to apply correct principles related to manual G&M code development, as well as the use of CAD & CAM systems to create G&M code programs.
- Students will understand and be able to apply the design process while solving manufacturing related problems.

MFG 291 : Manufacturing Leadership. (1:1:1)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Lectures on personal and professional development emphasizing internship preparation. Field trips observing different types of manufacturing.

Course Outcomes
- Understand that the essence of leadership is to build people through development of individual talents and fostering life-long growth and learning
- Accept lifelong professional, ethical, and social responsibilities
- Understand how to stay current in technical fields and how to engage in lifelong learning
- Comprehend the challenges of global supply chains
- Acquire an understanding of diverse cultures, perceptions, expectations, and professional practices

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

- Understand the critical role manufacturing plays in the development and stability of a country and society

MFG 331 : Metals Processes. (4:3:3)

WHEN TAUGHT: Fall
PREREQUISITE: ME EN 250
RECOMMENDED: CE En 203 is strongly recommended.
DESCRIPTION: Capabilities and applications of common metal-processing methods, including relationships between part design, material, and process parameters.

Course Outcomes

- Students will learn principles of casting, metal forming, and welding/joining by lecture and by hands-on lab activities. A final project requires students to design and make a part or assembly using the knowledge they gained during the course.

MFG 340 : Quality Systems in Manufacturing. (3:2:3)

WHEN TAUGHT: Winter
PREREQUISITE: STAT 201; or concurrent enrollment.
DESCRIPTION: Tools and principles of quality in manufacturing systems based on the Six Sigma process. Basic tools, variation, loss function, cost of quality, SPC, DOE, and FMEA. Comprehensive project required.

Course Outcomes

- Function effectively as a member or leader of a team
- Understand how to communicate effectively to build relationship and to gain support and commitment of others
- Asses the nature, types and impact of variation
- Understand how to effectively define, measure, analyze, improve and control quality
- Understand the reason for, and impact of, national and international regulatory standards and certifications
- Understand and implement system improvement concepts (lean, TOC, etc.)
- Use modern tools of communication such as charts, graphs, media, and other visual aids

MFG 355 : Plastics Materials and Processing. (3:2:3)

WHEN TAUGHT: Winter
PREREQUISITE: ME EN 250; or CH EN 378; or instructor's consent.
DESCRIPTION: Understanding plastic materials, properties, and uses. Survey of plastic-manufacturing processes. Designing plastic products and manufacturing systems.

Course Outcomes

- Understand the behavior and properties of plastic materials as they are affected by manufacturing processes.
- Understand the design of plastic products and the equipment, tooling, and environment necessary for their manufacture.
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- Function effectively on interdisciplinary teams and to demonstrate leadership characteristics
- Apply knowledge of mathematics, statistics, science and engineering in plastics manufacturing.
- Identify, formulate, and solve manufacturing-engineering problems related to plastics.
- Understand the impact of manufacturing engineering solutions in a global, economic, environmental, and societal context, especially as regards plastics.
- Have a knowledge of contemporary issues in plastics manufacturing.

MFG 431 : Tool Design. (3:2:3)

WHEN TAUGHT: Fall; Spring Contact Department
PREREQUISITE: MFG 230; MFG 331 or concurrent enrollment.
DESCRIPTION: Designing special tooling for manufacturing processes using solids-modeling design systems.

Course Outcomes

- Students will utilize past and additional instruction on the Design Process to solve manufacturing problems related to tooling.
- Students will understand and be able to apply correct principles when design tooling for a variety of processes, such as gages, fixtures, jigs, punch and die, and injection molds.
- Students will understand and apply correct principles related to cost analysis and estimation when designing tooling for manufacturing.

MFG 434 : Introduction to Manufacturing Automation. (3:2:2)

WHEN TAUGHT: Winter
PREREQUISITE: CE EN 203 & MFG 230 & IT 318
DESCRIPTION: Sensors, actuators, robotics, part feeding and assembly, PLCs, pneumatic and hydraulic control, justifying automation.
NOTE: IT 318 may be taken concurrently. Contact the instructor.

Course Outcomes

- Select appropriate automation processes and equipment
- Assess the impact of part variation on production
- Apply Design-for-Assembly principles to manufactured parts

- Communicate effectively through technical reports

MFG 480 : Process Planning and Systems Design. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: MFG 340

DESCRIPTION: Analyzing product specifications and production requirements for manufacturing. Equipment selection and justification; facility layout and material-handling system design; process-improvement techniques.

Course Outcomes

- Understand key metrics in manufacturing and how they are influenced
- Know how to apply process-improvement methodologies (Lean, Six Sigma, TOC, etc.) in order to reduce lead times and to improve efficiency and quality
- Develop a detailed process plan.
- Design a cell, production line, or a plant layout.
- Understand the different elements comprising a manufacturing system and how they interact.
- Develop a schedule for system implementation and startup.
- Understand the principles and techniques of production and inventory control.
- Use discrete event simulation to evaluate a system design.
- Determine resource requirements based on standard operator times and effective machine cycle times.
- Perform an economic anaysis for justifying a proposed manufacturing solution.

MFG 491 : Professional Seminar. (1:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: MFG 291; Senior standing.

DESCRIPTION: Lectures on professionalism, leadership, and career and life success.

Course Outcomes

- Learn principles of leadership and professionalism from industry guest speakers.
- Review and understand the manufacturing principles to be tested on the SME exam.

3. Complete 3 hours of the following:

MFG 399R : International Internship. (1-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Second-semester junior standing and faculty authorization.

DESCRIPTION: Working in teams to solve problems encountered in international industry. Project management and reporting under guidance of industry supervisor and department faculty.

Course Outcomes

No outcomes are available at this time.

4. Complete the following supporting courses:

CE EN 103 : Engineering Mechanics--Statics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 112; or 111 and 119; or concurrent enrollment.

DESCRIPTION: Concepts of mechanics: force systems in equilibrium, resultants, friction, centroids, utilization of vector algebra, simple trusses, shear and bending moment diagrams, moments of inertia.

Course Outcomes

- Be able to manipulate basic engineering units in both the International and US Customary Systems of Units in engineering analysis and be able to convert between the two.
- Be able to perform basic vector operations using standard vector notation.
- Be able to conceptualize and draw a conventional free-body diagram which identifies and applies all known and unknown forces.
- Understand the nature of forces(s) and their manipulation in engineering analysis, including moments, couples, transmissibility and resultants.
- Understand the conditions for equilibrium for both a particle and a rigid body.
- Be able to determine the axial forces in the members of a statically determinant truss.
- Be able to calculate the center of gravity for 2 and 3 dimensional rigid bodies.
- Be able to both calculate and draw diagrams for the internal shear forces and bending moments in straight, statically determinant beams.
- Understand the nature of friction and be able to solve problems involving friction and shear on horizontal and inclined planes.
- Be able to use calculus to compute centroids of lines, areas and volumes.
- Demonstrate competence in basic engineering analysis.

CE EN 203 : Engineering Mechanics--Mechanics of Materials. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CE EN 103

DESCRIPTION: Fundamental concepts of elastic stress and strain, including transformations and stress-strain relations; beam/column theories (axial, flexure, torsion, and shear loads and deformations); shear and bending moment relationships; column stability; and cylindrical and spherical pressure vessels.

Course Outcomes

- Students will be able to calculate and transform axial stress (e.g., Mohr's Circle), shear stress, bearing

stress, thermal stress, bending stress, and combined stress.
- Students will be able to calculate strain, transform strain (e.g., Mohr's Circle), apply stress-strain relations (e.g., Hooke's Law), and solve statically indeterminate problems.
- Students will be able to analyze deflections due to axial, torsion, bending, and shear loads, and manipulate relations between shear and bending moment.
- Students will be able to design beams and columns to carry specified axial, flexure, and shear loads, and predict their deformation and elastic stability (i.e., buckling).
- Students will be able to predict stresses in pressure vessels.

CHEM 105 : General College Chemistry. (4:5:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 110 (or equivalent) or concurrent enrollment.

DESCRIPTION: Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry.

NOTE: Primarily for students in engineering and biological sciences. Three lectures and two recitation sections per week.

Course Outcomes
- Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.
- Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.
- Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.
- A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.
- Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes
- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other

forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

IT 318 : Electronics, Computers, and Manufacturing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 112 & PHSCS 121; or PHSCS 105 & PHSCS 107; Phscs 121; or Phscs 105 and 107.

DESCRIPTION: Basics of electricity; behavior and manufacture of resistors, inductor, capacitors, transformers; motors; manufacture of transistors, ICs, MCMs, circuit boards. Computers; digital communications; networking.

Course Outcomes
- Describe the basic laws governing electronic circuits, both DC and AC.
- Describe the basic safety considerations relevant to electricity.
- Describe how resistors, potentiometers, inductors, capacitors, integrated circuits, printed wiring boards (PWBs), assembled PWBs, multi-chip modules, and hybrids are manufactured.
- Describe the basic operating characteristics for the following 6 motor types: 1) DC; 2) Stepper; 3) DC Brushless; 4) Universal; 5) AC Induction; 6) Synchronous.
- Describe the capabilities and limitations of electronic measuring equipment.
- Describe the basic characteristics of a computer and how they operate.
- Describe how industrial networks operate.

ME EN 172 : Engineering Graphics--Principles and Applications. (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Engineering and technology major status.

DESCRIPTION: Comprehensive applications of CAD-based national (ANSI) and international (ISO) graphics standards, including coordinate and geometric dimensioning and tolerancing practices, manufacturing, and product verification procedures.

Course Outcomes
- 1. Understand both surface and solid modeling techniques found in a modern commercial CAD package.
- 2. Create a CAD model of basic machine components and assemblies.
- 3. Design and create CAD models of average to complex mechanical components.
- 4. Create, read and understand engineering drawings composed of multiple views with standard dimensioning and tolerancing nomenclature.
- 5. Create, read and understand engineering drawings that contain geometric dimensioning and tolerancing symbology.
- 6. Understand the approaches and processes used in component and assembly modeling, i.e. top-down and bottom-up design.
- 7. Collaborate with teammates to learn how to apply CAD tools to the modeling projects.
- 8. Learn about design and engineering processes in a global context.

ME EN 250 : Science of Engineering Materials. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CHEM 105

DESCRIPTION: Principles and properties of solid materials and their behavior as applied to engineering.

Course Outcomes
- 1. Describe the functional behaviors of the primary classes of materials (metals, ceramics, polymers, composites).
- 2. Predict material properties based on atomic structure and defects.
- 3. Apply the lever rule to binary phase diagrams.
- 4. Model the stress-strain diagram and describe the mechanisms for altering it for the various classes of materials.
- 5. Describe the kinetics of diffusion and the process of nucleation and growth as they affect transformation products.
- 6. Describe common degradation and failure processes for each basic class of materials.
- 7. Select an appropriate material class given functional requirements.

STAT 201 : Statistics for Engineers and Scientists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 112; or MATH 119

DESCRIPTION: The scientific method; probability, random variables, common discrete and continuous random variables, central limit theorem; confidence intervals and hypothesis testing; completely randomized experiments; factorial experiments.

Course Outcomes
- Compute numerial and graphics summary statistics and explain the difference between populations given the summaries (numerical or graphical)
- Apply fundamentals of set theory and basic set operations to simple problems
- Distinguish between counting techniques (permutations, combinations) and compute the number of possible combinations for simple problems
- Solve simple problems using axioms of probability, conditional probability, independence, and Bayes' theorem
- Compute probabilities, expected values, and variances using the PDF of a discrete and a continuous univariate random variable
- Understand the definition of a sampling distribution, identify the mean, variance, and shape of the sampling distribution given the population information, and explain the application and importance of the Central Limit Theorem
- Understand the basics of experimental design, including the definition of the experimental unit,

response, variable, factor(s), and level(s) of a basic experiment, and the role of randomization and replication to permit causal inference
- Compute the confidence interval for μ from a random sample and make the correct decision about an experiment when given a confidence interval
- Compute the test statistic and p-value for H0 : μ = μ0 from a random sample
- Make the correct decision when given the p-value for a hypothesis test and compute the ANOVA table for the data from a completely randomized design
- Compute pairwise confidence intervals on the difference in means (Fisher, Bonferroni) to understand a significant overall F-test from a completely randomized design
- Compute the ANOVA table for data from a two factor experiment
- Explain a statistically significant interaction
- Perform a two factor (or 2^3) experiment (in a group), compute the ANOVA table from the observed data, and write a technical report of the results of the experiment with appropriate graphics of significant effects or interactions

TECH 312 : Exploration in Innovation Design Techniques. (1:1:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Through a series of hands-on experiences, students explore principles, methods, and tools of innovation and design thinking in technology and engineering.

Course Outcomes
- Gain better appreciation and understanding of innovation
- Develop an ability to generate new ideas
- Develop innovation skills to develop ideas into products and processes
- Collaborate as a team to complete a project
- Present ideas and work to the class

5. Complete the following:

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes
- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

6. Complete one of the following options:

Either

PHSCS 105 : General Physics 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: High school algebra and trigonometry.

RECOMMENDED: Concurrent enrollment in Phscs 107.

DESCRIPTION: Applied physics course not requiring calculus. Mechanics, heat, wave motion, and sound.

Course Outcomes
There are no course outcomes available

PHSCS 107 : General Physics Lab 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Phscs 105 or concurrent enrollment.

DESCRIPTION: Lab experiments in mechanics and thermodynamics. Measuring and analyzing data.

Course Outcomes
- Develop a greater conceptual understanding of mechanics and thermodynamics through hands-on experience with physical systems that illustrate lecture course material.
- Develop skills in measuring and analyzing physical data.

Or

PHSCS 121 : Introduction to Newtonian Mechanics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Calculus or concurrent enrollment.

DESCRIPTION: Linear, circular, and projectile motion; their prediction from forces and torques. Conservation of energy and momentum. Weekly lab.

Course Outcomes

Convert quantities from one set of units to another and use a reasonable number of significant digits when expressing answers.
- Compute a particle's classical translational motion in one or two dimensions, including circular motion, both in Cartesian coordinates and in polar coordinates.
- Use the ideas of energy, work, power, linear momentum, and angular momentum to arrive at conclusions about the motion of a system, including the motion of satellites and the planets.
- Use Newton's Second Law to calculate the motion of objects, including those in simple harmonic motion, as well as the forces and torques acting on systems in equilibrium.
- Demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strenghts and weaknesses of this process

7. Complete the following:

MFG 479 : Innovation and Entrepreneurship. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Develop ideas into a business model. Learn product development. Entrepreneurial concepts and practices. Strategic planning and global competitiveness.

Course Outcomes
- Participate effectively on an entrepreneurial founding team
- Evaluate business ideas, opportunities, and plans
- Plan a new business financially
- Understand and apply entrepreneurial terminology to the entrepreneurial and investment ecosystems
- Formulate strategies to overcome common start-up business challenges
- Prepare effectively a written business plan
- Make an effective oral business plan presentation

ME EN 475 : Integrated Product and Process Design 1. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 363 & ME EN 372 & ME EN 373; or EC EN 340 & EC EN 370 & EC EN 380; or ENG T 231 & MFG 340 & MFG 355; Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, industrial design, or related disciplines with instructor's consent.

DESCRIPTION: Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property assignment agreement required.

NOTE: MeEn 475 and 476 must be taken in consecutive fall and winter semesters.

Course Outcomes
- 1. Understand the six stages of development through which each product passes.
- 2. Understand how the product information (requirement information and design information) evolves through the stages of development.
- 3. Understand how a purposeful network of design activities is used to cause the product information to evolve.
- 4. Understand how acceptance tests are used to ensure the transferability and quality of the product information throughout the stages of development.
- 5. Understand how product development processes can be customized for specific development projects.
- 6. Develop skills in project planning, idea generation, prototyping, developing engineering models, and engineering reporting and presentations.
- 7. Understand how to work within organizational policies to accomplish important goals.
- 8. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.

ME EN 476 : Integrated Product and Process Design 2. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 363 & ME EN 372 & ME EN 373; or EC EN 340 & EC EN 370 & EC EN 380; or ENG T 231 & MFG 340 & MFG 355; Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, industrial design, or related disciplines with instructor's consent.

DESCRIPTION: Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property assignment agreement required.

NOTE: MeEn 475 and 476 must be taken in consecutive fall and winter semesters.

Course Outcomes
- 1. Develop skills in product development economics and engineering drawing review and checking.
- 2. Develop and demonstrate basic understanding in at least two Design for X areas, such as Design for Manufacturing and Design for Sustainability.
- 3. Develop and demonstrate basic skills with at least two design tools, such as optimization, design of experiments, and sketching.
- 4. Understand real world applications of development methods from development case studies and product development professionals.
- 5. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.
- 6. Apply the understanding and skills from Me En 475 and the other outcomes from Me En 476 while working with a project sponsor in a team setting to produce desirable and transferable product information, through design, building, and acceptance testing.

8. Complete department packet and exit interview.

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete the following:

MFG 130 : Modern Manufacturing. (3:2:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methods and characteristics of successful manufacturing engineers and managers. Introduction to engineering and technology, design, and project management. Lab.

Course Outcomes
- Describe the four pillars of manufacturing and their relationship to the manufacturing system.
- Help student prepare for productive professional lives including insights into leadership, teamwork and innovation.

MFG 340 : Quality Systems in Manufacturing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: STAT 201; or concurrent enrollment.

DESCRIPTION: Tools and principles of quality in manufacturing systems based on the Six Sigma process. Basic tools, variation, loss function, cost of quality, SPC, DOE, and FMEA. Comprehensive project required.

Course Outcomes
- Function effectively as a member or leader of a team
- Understand how to communicate effectively to build relationship and to gain support and commitment of others
- Asses the nature, types and impact of variation
- Understand how to effectively define, measure, analyze, improve and control quality
- Understand the reason for, and impact of, national and international regulatory standards and certifications
- Understand and implement system improvement concepts (lean, TOC, etc.)
- Use modern tools of communication such as charts, graphs, media, and other visual aids

MFG 480 : Process Planning and Systems Design. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: MFG 340

DESCRIPTION: Analyzing product specifications and production requirements for manufacturing. Equipment selection and justification; facility layout and material-handling system design; process-improvement techniques.

Course Outcomes
- Understand key metrics in manufacturing and how they are influenced
- Know how to apply process-improvement methodologies (Lean, Six Sigma, TOC, etc.) in order to reduce lead times and to improve efficiency and quality
- Develop a detailed process plan.
- Design a cell, production line, or a plant layout.
- Understand the different elements comprising a manufacturing system and how they interact.
- Develop a schedule for system implementation and startup.
- Understand the principles and techniques of production and inventory control.
- Use discrete event simulation to evaluate a system design.
- Determine resource requirements based on standard operator times and effective machine cycle times.
- Perform an economic anaysis for justifying a proposed manufacturing solution.

2. Complete two courses from the following:

MFG 220 : Material Removal. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: Math 111 or equivalent.

DESCRIPTION: Methods and procedures to shape materials using basic machine tools; cutting theory, tool selection, metrology methods, and machine operation. Introduction to computer numerical

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

control.

Course Outcomes

- Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.
- Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.
- Students will learn to work on teams while preparing presentations on new metal removal manufacturing processes, and while developing a manufacturing plan for a proposed production run.

MFG 230 : Computer-Aided Manufacturing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: MFG 220 & ME EN 172

DESCRIPTION: Manual and computer-assisted programming of computer numerical controlled (CNC) equipment. Developing CNC programs to manufacture parts for high production.

Course Outcomes

- Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.
- Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.
- Students will understand and be able to apply correct principles related to manual G&M code development, as well as the use of CAD & CAM systems to create G&M code programs.
- Students will understand and be able to apply the design process while solving manufacturing related problems.

MFG 331 : Metals Processes. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 250

RECOMMENDED: CE En 203 is strongly recommended.

DESCRIPTION: Capabilities and applications of common metal-processing methods, including relationships between part design, material, and process parameters.

Course Outcomes

- Students will learn principles of casting, metal forming, and welding/joining by lecture and by hands-on lab activities. A final project requires students to design and make a part or assembly using the knowledge they gained during the course.

MFG 355 : Plastics Materials and Processing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 250; or CH EN 378; or instructor's consent.

DESCRIPTION: Understanding plastic materials, properties, and uses. Survey of plastic-manufacturing processes. Designing plastic products and manufacturing systems.

Course Outcomes

- Understand the behavior and properties of plastic materials as they are affected by manufacturing processes.
- Understand the design of plastic products and the equipment, tooling, and environment necessary for their manufacture.
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- Function effectively on interdisciplinary teams and to demonstrate leadership characteristics
- Apply knowledge of mathematics, statistics, science and engineering in plastics manufacturing.
- Identify, formulate, and solve manufacturing-engineering problems related to plastics.
- Understand the impact of manufacturing engineering solutions in a global, economic, environmental, and societal context, especially as regards plastics.
- Have a knowledge of contemporary issues in plastics manufacturing.

100-Level Courses

MFG 130 : Modern Manufacturing. (3:2:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methods and characteristics of successful manufacturing engineers and managers. Introduction to engineering and technology, design, and project management. Lab.

Course Outcomes

- Describe the four pillars of manufacturing and their relationship to the manufacturing system.
- Help student prepare for productive professional lives including insights into leadership, teamwork and innovation.

200-Level Courses

MFG 220 : Material Removal. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: Math 111 or equivalent.

DESCRIPTION: Methods and procedures to shape materials using basic machine tools; cutting theory, tool selection, metrology methods, and machine operation. Introduction to computer numerical control.

Course Outcomes

- Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.
- Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.
- Students will learn to work on teams while preparing presentations on new metal removal manufacturing processes, and while developing a manufacturing plan for a proposed production run.

MFG 230 : Computer-Aided Manufacturing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: MFG 220 & ME EN 172

DESCRIPTION: Manual and computer-assisted programming of computer numerical controlled (CNC) equipment. Developing CNC programs to manufacture parts for high production.

Course Outcomes

- Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.
- Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.
- Students will understand and be able to apply correct principles related to manual G&M code development, as well as the use of CAD & CAM systems to create G&M code programs.
- Students will understand and be able to apply the design process while solving manufacturing related problems.

MFG 291 : Manufacturing Leadership. (1:1:1)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Lectures on personal and professional development emphasizing internship preparation. Field trips observing different types of manufacturing.

Course Outcomes

- Understand that the essence of leadership is to build people through development of individual talents and fostering life-long growth and learning
- Accept lifelong professional, ethical, and social responsibilities
- Understand how to stay current in technical fields and how to engage in lifelong learning
- Comprehend the challenges of global supply chains
- Acquire an understanding of diverse cultures, perceptions, expectations, and professional practices

300-Level Courses

MFG 331 : Metals Processes. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 250

RECOMMENDED: CE En 203 is strongly recommended.

DESCRIPTION: Capabilities and applications of common metal-processing methods, including relationships between part design, material, and process parameters.

Course Outcomes

- Students will learn principles of casting, metal forming, and welding/joining by lecture and by hands-on lab activities. A final project requires students to design and make a part or assembly using the knowledge they gained during the course.

MFG 340 : Quality Systems in Manufacturing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: STAT 201; or concurrent enrollment.

DESCRIPTION: Tools and principles of quality in manufacturing systems based on the Six Sigma process. Basic tools, variation, loss function, cost of quality, SPC, DOE, and FMEA. Comprehensive project required.

Course Outcomes

- Function effectively as a member or leader of a team
- Understand how to communicate effectively to build relationship and to gain support and commitment of others
- Asses the nature, types and impact of variation
- Understand how to effectively define, measure, analyze, improve and control quality
- Understand the reason for, and impact of, national and international regulatory standards and certifications
- Understand and implement system improvement concepts (lean, TOC, etc.)
- Use modern tools of communication such as charts, graphs, media, and other visual aids

MFG 355 : Plastics Materials and Processing. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 250; or CH EN 378; or instructor's consent.

DESCRIPTION: Understanding plastic materials, properties, and uses. Survey of plastic-manufacturing processes. Designing plastic products and manufacturing systems.

Course Outcomes

- Understand the behavior and properties of plastic materials as they are affected by manufacturing processes.
- Understand the design of plastic products and the equipment, tooling, and environment necessary for their manufacture.
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- Function effectively on interdisciplinary teams and to demonstrate leadership characteristics
- Apply knowledge of mathematics, statistics, science and engineering in plastics manufacturing.
- Identify, formulate, and solve manufacturing-engineering problems related to plastics.
- Understand the impact of manufacturing engineering solutions in a global, economic, environmental, and societal context, especially as regards plastics.
- Have a knowledge of contemporary issues in plastics manufacturing.

MFG 399R : International Internship. (1-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Second-semester junior standing and faculty authorization.

DESCRIPTION: Working in teams to solve problems encountered in international industry. Project management and reporting under guidance of industry supervisor and department faculty.

Course Outcomes

No outcomes are available at this time.

400-Level Courses

MFG 431 : Tool Design. (3:2:3)

WHEN TAUGHT: Fall; Spring Contact Department

PREREQUISITE: MFG 230; MFG 331 or concurrent enrollment.

DESCRIPTION: Designing special tooling for manufacturing processes using solids-modeling design systems.

Course Outcomes

- Students will utilize past and additional instruction on the Design Process to solve manufacturing problems related to tooling.
- Students will understand and be able to apply correct principles when design tooling for a variety of processes, such as gages, fixtures, jigs, punch and die, and injection molds.
- Students will understand and apply correct principles related to cost analysis and estimation when designing tooling for manufacturing.

MFG 434 : Introduction to Manufacturing Automation. (3:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 203 & MFG 230 & IT 318

DESCRIPTION: Sensors, actuators, robotics, part feeding and assembly, PLCs, pneumatic and hydraulic control, justifying automation.

NOTE: IT 318 may be taken concurrently. Contact the instructor.

Course Outcomes
- Select appropriate automation processes and equipment
- Assess the impact of part variation on production
- Apply Design-for-Assembly principles to manufactured parts
- Communicate effectively through technical reports

MFG 479 : Innovation and Entrepreneurship. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Develop ideas into a business model. Learn product development. Entrepreneurial concepts and practices. Strategic planning and global competitiveness.

Course Outcomes
- Participate effectively on an entrepreneurial founding team
- Evaluate business ideas, opportunities, and plans
- Plan a new business financially
- Understand and apply entrepreneurial terminology to the entrepreneurial and investment ecosystems
- Formulate strategies to overcome common start-up business challenges
- Prepare effectively a written business plan
- Make an effective oral business plan presentation

MFG 480 : Process Planning and Systems Design. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: MFG 340

DESCRIPTION: Analyzing product specifications and production requirements for manufacturing. Equipment selection and justification; facility layout and material-handling system design; process-improvement techniques.

Course Outcomes
- Understand key metrics in manufacturing and how they are influenced
- Know how to apply process-improvement methodologies (Lean, Six Sigma, TOC, etc.) in order to reduce lead times and to improve efficiency and quality
- Develop a detailed process plan.
- Design a cell, production line, or a plant layout.
- Understand the different elements comprising a manufacturing system and how they interact.
- Develop a schedule for system implementation and startup.
- Understand the principles and techniques of production and inventory control.
- Use discrete event simulation to evaluate a system design.
- Determine resource requirements based on standard operator times and effective machine cycle times.
- Perform an economic anaysis for justifying a proposed manufacturing solution.

MFG 485 : Capstone: Production Management. (3:1:6)

WHEN TAUGHT: Winter; Summer

PREREQUISITE: MFG 340 & MFG 431 & MFG 480

DESCRIPTION: Production operations: designing a production system, carrying our production functions, and procuring materials from suppliers. Principles of lean operations, project management, and industrial supervision.

Course Outcomes
There are no course outcomes available

MFG 490R : Special Problems in Manufacturing Engineering Technology. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

Course Outcomes
- Students will learn to work to independently and to take initiative in completing a project while being guided by a faculty member.

MFG 491 : Professional Seminar. (1:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: MFG 291; Senior standing.

DESCRIPTION: Lectures on professionalism, leadership, and career and life success.

Course Outcomes
- Learn principles of leadership and professionalism from industry guest speakers.
- Review and understand the manufacturing principles to be tested on the SME exam.

500-Level Graduate Courses (available to advanced undergraduates)

MFG 531 : Advanced Computer-Aided Manufacturing Programming. (3:2:3)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: MFG 230 or previous CNC programming experience, or instructor's approval.

DESCRIPTION: CAD/CAM programming techniques and requirements for manufacturing components on computer numerical-control machine tools, emphasizing CAM programming, postprocessors, and CAM software evaluation.

NOTE: Fee.

Course Outcomes
- Students will understand and be able to apply correct principles in the design of parts, creation of tool path, and machining of the part for advanced surfaces and contours.

MFG 532 : Manufacturing Systems. (3:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Mfg 480 or instructor's consent.

DESCRIPTION: Analyzing lean manufacturing systems. Numerous examples and case studies from industry demonstrating principles of lean production, inventory management, and lean distribution. Project with a local company to gain confidence with these principles in an industrial setting.

Course Outcomes
- Students will understand and be able to apply principles of lean manufacturing in a production environment.

MFG 533 : Manufacturing Information Systems. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: Mfg 480 or instructor's consent.

DESCRIPTION: Applying and integrating software and information technologies in planning, executing, and monitoring production operations.

Course Outcomes
- Understand how to design and interpret and enterprise architecture
- Understand the basics of computers, languages, architectures and networking
- Be able to create and use a simple database management system
- Understand the major IT applications used in a manufacturing enterprise.
- Understand the issues associated with IT integration
- Be able to manipulate and analyze data using Excel
- Understand how to specify, evaluate and implement IT systems in manufacturing

MFG 555 : Composite Materials and Processes. (3:2:3)

PREREQUISITE: Graduate standing or instructor's consent.

DESCRIPTION: Structure, processing, properties, and uses of composite materials, including various manufacturing methods and the relationship between properties and fabrication.

Course Outcomes
- Lectures on each major resin discussing properties as related to structureLectures on each major resin discussing manufacturing process considerations for that resinLectures on each principal manufacturing method and what properties of a resin are most compatible with that processLectures on each principal manufacturing method and what properties are changed in that processLaboratories on manufacturing methods
- Lecture on design of plastic productsBoeing project on design/implementation of plastics
- Knowledge of chemistry applied in understanding the structure and chemistry relationship to plastics propertiesKnowledge of chemistry applied in understanding the crosslinking reactions in thermosets
- Lectures on processes, especially parts of lectures on troubleshooting

MFG 574 : Advanced Tool Design. (3:2:3)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: MFG 431

DESCRIPTION: Advanced design of net-shape products utilizing CAD and CAE methods. Plastic injection mold design and construction. Rapid prototyping and injection molding project.

Course Outcomes
- Students will understand and be able to apply appropriate design principles in the creation of manufacturing tooling.

MFG 580 : Manufacturing Simulation. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: MFG 480

DESCRIPTION: Design and optimization of manufacturing systems using simulation. Simulation languages and modeling methodology.

Course Outcomes
- Understand key manufacturing system performance metrics and associated drivers
- Know how to plan and conduct a simulation study
- Be able to collect and analyze input data for use in a simulation study
- Be able to construct an accurate computer model of a manufacturing system
- Be able to design and conduct simulation experiments
- Be able to analyze simulation output and draw appropriate conclusions
- Be able to present a simulation study and make a compelling recommendation

Technology and Engineering Education

Ronald Terry, Program Coordinator
265K CTB, (801) 422-4297

Learning Outcomes

- Students will receive an opportunity to interact, be mentored, and have close relationship with faculty members as they learn together about secular and spiritual knowledge.
- Students will be able to become certified secondary education teachers in technology and engineering education for the State of Utah.
- Students will increase technical competency in a technology and/or engineering specialization of their choice.
- Students will develop creativity, design, entrepreneurial, innovative, problem solving, critical thinking, effective communication, and life-long learning skills.
- Students will be stretched to maximize their own individual learning through rigor, excellence, and high expectations of performance.

The Discipline

Students graduating from the technology and engineering education program at Brigham Young University are prepared to teach in secondary schools. Students in the program are required to take courses in visual communications, production technologies, and engineering design. Students will need to complete 18 hours of technical emphasis in one or two depth areas: graphic design and multimedia, engineering prep and electronics, construction systems, information technology, architecture and furniture design, manufacturing, computer science, and trade and technical. In addition, students are required to complete teacher education courses. Finally, students are provided with field-based experiences to teach at the middle and high school levels throughout the program, culminating with a semester-long supervised student teaching experience.

Career Opportunities

The dramatic pace of technological innovation makes this a vital major. The current need for teachers is far greater than the number of available graduates resulting in excellent job placement. Most graduates teach technology-related subjects at the middle and high school level. The degree also provides a strong foundation for numerous technical and teaching careers, including corporate or higher education.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements | View MAP | View Program Outcomes

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following core courses:

CE EN 112 : Engineering Drafting with CAD Applications. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Civil engineering or technology education major status

DESCRIPTION: Structural and component drafting, emphasizing computer-automated (CAD) systems. Concepts include applied and descriptive geometry, multiview representation, sectional views, dimensional practices, and axonometric sketching.

Course Outcomes

- An understanding of fundamental drafting concepts and manual drafting techniques
- An understanding of CAD-based drafting techniques
- An ability and skills for preparing technical drawings manually and by using AutoCAD
- An ability to work in a team to complete a term project and produce a technical report
- An ability to communicate with team members and produce an effective, well organized oral presentation
- An understanding of Building Information Modeling (BIM) and its application in engineering
- An ability to use BIM software to develop structural models for analysis
- An ability to present structural data in a collaborative environment

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

TECH 312 : Exploration in Innovation Design Techniques. (1:1:0)

WHEN Fall; Winter; Spring; Summer

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

TAUGHT:
DESCRIPTION: Through a series of hands-on experiences, students explore principles, methods, and tools of innovation and design thinking in technology and engineering.

Course Outcomes

- Gain better appreciation and understanding of innovation
- Develop an ability to generate new ideas
- Develop innovation skills to develop ideas into products and processes
- Collaborate as a team to complete a project
- Present ideas and work to the class

TEE 125 : Technological Systems 1. (3:2:4)

WHEN TAUGHT: Fall
DESCRIPTION: Use of, interaction with, and teaching about communication, technologies.

Course Outcomes

- INTASC Standard 1: Making Content MeaningfulINTASC Standard 6: Communication/KnowledgeINTASC Standard 9: Professional Growth/ReflectionSTL Standard 1. Students will develop an understanding of the characteristics and scope of technology (as it pertains to communication technologies).STL Standard 2. Students will develop an understanding of the core concepts of technology (as it pertains to communication technologies). STL Standard 3. Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study (as it pertains to communication technologies). STL Standard 4. Students will develop an understanding of the cultural, social, economic, and political effects of technology (as it pertains to communication technologies). STL Standard 5. Students will develop an understanding of the effects of technology on the environment (as it pertains to communication technologies). STL Standard 6. Students will develop an understanding of the role of society in the development and use of technology (as it pertains to communication technologies). STL Standard 7. Students will develop an understanding of the influence of technology on history (as it pertains to communication technologies). STL Standard 8. Students will develop an understanding of the attributes of design (as it pertains to communication technologies). STL Standard 9. Students will develop an understanding of engineering design (as it pertains to communication technologies). STL Standard 10. Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving (as it pertains to communication technologies). STL Standard 17:Students will develop an understanding of and be able to select and use information and communication technologies.
- Historical Development: Introduce students to past communication technologies, with a focus on their development, usability, sustainability, evolution, and relative impact on: society, politics, economy, environment, and leisure.Ethics: Help students develop an understanding of the ethical development and use of communication technologies.User and Actor Skills: Help students develop the skills to not only be users, but actors in the positive development and evolution of society's Technology (Postman, 1999).Tools and Services: Expose and train students in a broad range of communication technology tools and services (i.e., Wiki language, desktop publishing, web authoring, HTML and CSS languages, Flash and JavaScript, social bookmarking, Video and TV production, RSS and ATOM feeds and subscriptions, Pod and podcasting, digital photography (techniques, tools, storage), computer hardware and networking issues, GPS technologies, and 3D modeling.Technology Assessment: Throughout this semester students will be asked to collect, implement, and assess the relative value of various contemporary technologies, and will be asked to discuss if and how the technologies should be used in classrooms and in the world.

TEE 200 : Processes and Prototyping with Wood. (3:2:4)

WHEN TAUGHT: Fall; Winter Even Yrs.; Spring Odd Yrs.
DESCRIPTION: Processes for and prototyping with wood and wood-based composites.
NOTE: Fee.

Course Outcomes

- Visualization of how components are joined and how to communicate this through drawings and specifications.Properties of wood as a material and how these properties impact design of projects using wood and wood products.Subtractive processes in prototype construction: sawing, shaping, milling, turning, routing, etc.Additive processes in prototype construction: joining, laminating, fastening, etc.Identification, care, and use of hand tools including tools for measuring, layout, sawing, planing, scraping, shaping, clamping, drilling, driving, and sharpening.Set-up and accurate and safe use of woodworking machinery including the jointer, surface planer, table saw, panel saw radial arm saw, power miter saw, bandsaw, thickness sander, mortiser, boring machine, lathe, and drill press.The use of electric, pneumatic, and cordless power hand tools including routers, drills, and sanders.Methods of clamping, gluing, and assembly, sanding, and finishing.Practical problem solving in working with industrial materials, tools, and machines.The importance of caring, hard work, planning, initiative, and patience, in making a project that is well designed, includes quality workmanship, and is nicely finished. Concepts and methods of teaching safe use of woodworking equipment.Basic machine and hand tool maintenance.

TEE 225 : Technological Systems 2. (3:2:4)

WHEN TAUGHT: Fall
DESCRIPTION: Teaching electronic, construction, and transportation systems.

Course Outcomes

- UETS STANDARD 4- Content Knowledge: The teacher understands the central concepts, tools of inquiry, and structure of the discipline. STL Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.· BMG: Technology transfer occurs when a new user applies an existing innovation developed for one purpose in a different function.BMH: Technological innovation often results when ideas, knowledge or skills are shared within a technology, among technologies or across other fields.BMI: Technological progress promotes the advancement of science and mathematics. STL Standard 7: Students will develop an understanding of the influence of technology on history.BMG: Most technological development has been evolutionary, the result of a series of refinements to a basic invention.BMH: The evolution of society has been directly affected by, and has in turn affected, the

development and use of tools and materials.BMI: Throughout history, technology has been a powerful force in reshaping the social, cultural, political, and economic landscape.BMO: The information age places emphasis on the processing and exchange of information. STL Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.· BMF: Troubleshooting is a problem-solving method used to identify the cause of a malfunction in a technological system.BMG: Invention is a process of turning ideas and imagination into devices and systems. Innovation is the process of modifying an existing product or system to improve it.BMH: Some technological problems are best solved through experimentation. STL Standard 17: Students will develop an understanding of and be able to select and use information and communication technologies.· BML: Information and communication technologies include the inputs, processes, and outputs associated with sending and receiving information.BMM: Information and communication systems allow information to be transferred from human to human, human to machine, machine to human, and machine to machine.BMO: Communication systems are made up of source, encoder, transmitter, receiver, decoder, storage, retrieval, and destination.BMP: There are many ways to communicate information, such as graphic and electronic means.BMQ: Technological knowledge and processes are communicated using symbols, measurement, conventions, icons, graphic images, and languages that incorporate a variety of visual, auditory, and tactile stimuli.

- Students will be able to describe the basic electronic concepts of voltage, amperage, resistance & power.Students will be able to use Ohm's and Watt's law to perform basic calculations in an electronic circuit.Students will be able to describe how voltage, amperage, power & resistance behave in series and parallel circuits and be able to calculate unknown quantities in a circuit.Students will be able to use a power supply, breadboard, basic components, and a digital multi-meter to build, test and troubleshoot basic electronic circuits.Students will be able to use a digital multi-meter, oscilloscope and digital logic probe to test, troubleshoot and repair faulty circuits.Students will be able to identify basic electronics components and describe the function of each component.Students will be able to identify and draw the basic schematic symbols used to represent electronics components in a circuit.Students will be able to use appropriate materials and equipment (including simulation software, CNC Mill, soldering iron) to design and build a working electronic circuit that is a solution to a technological problem and/or need.Students will be able to successfully calculate unknown quantities and complete labs associated with magnetism, electromagnetic induction, capacitors, semiconductors, transformers and alternating current.Based on a set of given inputs and desired outputs, students will be able to design a digital electronic circuit as a solution to a technological problem or need.Students will be able to collect technical data and to apply appropriate math and science knowledge to see the connections between technology and other fields of study.Students will be able to describe historical examples of discoveries, experiments, innovations and inventions related to electronics communications technology and be able to provide examples of technology transfer and how these technologies affected past and current society.

TEE 229 : Processes and Manufacturing with Metals and Polymers. (3:2:4)

WHEN TAUGHT: Winter
PREREQUISITE: TEE 200; or concurrent enrollment.
DESCRIPTION: Processes for and manufacturing with metals and polymers.
NOTE: Fee.

Course Outcomes

- Students will gain an understanding of the properties and processes of the primary domains of polymers.
- Students will learn the classifications of metals, safety, design principles, measurement, reading a drawing, sheet metal, bench metal, metal fasteners, Shielded Metal Arc Welding, MIG Welding, Oxy-acetylene gas welding, and metal removal using a lathe and a mill.
- Students will understand:Historical aspects and impacts of manufacturing.Principles of manufacturing including material flow, converting raw materials and standard stock into finished products, economy of motion and material use, interchangeability of parts, product design for manufacture, and tasks involved in manufacturing a finished product.Principles of free enterprise including types of ownership, product selection and design, marketing techniques, corporate structure in manufacturing, and record keeping.

TEE 255 : Visual Communication Design. (3:2:4)

WHEN TAUGHT: Winter
PREREQUISITE: TEE 125; or instructor's consent.
DESCRIPTION: Teaching visual design principles and processes through digital and print media.

Course Outcomes

- Prepare you to teach communications technology, graphic design, and web design.
- Provide an opportunity to learn the basics of graphic design.
- Introduce you to the visual communications profession and professional literature.
- Gain competency in applying the design principles in both print and web mediums.

TEE 330 : Creativity, Engineering, and Problem Solving. (3:2:4)

WHEN TAUGHT: Winter
DESCRIPTION: Designing solutions to technological problems using innovation, creativity, experimentation, problem solving, and engineering design. Manufacturing systems; teaching methods and prototype development.

Course Outcomes

- UETS STANDARD 4 - Content Knowledge: The teacher understands the central concepts, tools of inquiry, and structure of the discipline.STL Standard 2: Students will develop an understanding of the core concepts of technology.STL Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.STL Standard 8: Students will develop an understanding of the attributes of design.STL Standard 9: Students will develop an understanding of engineering design.STL Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.STL Standard 11: Students will develop the abilities to apply the design process.
- Students will incorporate the concepts of group goals, individual accountability, group processing and

practice interpersonal and small group skills in order to work cooperatively in a group engineering design project.Students will incorporate various systems (e.g., electronic, mechanical, hydraulic, pneumatic, thermal) as they use the engineering design process to design an invention, innovation or solution to a design problem.Students will know the steps of the engineering design process and then document and apply this process in building a solution to a design activity.Students will use the steps of the engineering design process to innovate a new design solution to a common household item.Students will create an operations manual (design portfolio) which includes a self-evaluation, peer evaluation, sketches made during the ideation stage, problem-solving log, copy of the computer program and final drawing of the engineering design project.As a group, students will verbally and visually present their design portfolio to the rest of the class.During the engineering design process, students will identify the constraints and limitations of the design problem, consider trade-offs, and then design, build a prototype, test, optimize and troubleshoot a design solution to a problem.Students will collect technical data and then apply math and science knowledge in contextual setting.Students will learn the basics of computer control systems, including, inputs, outputs, and feedback loops; and be able to design, build and program a microprocessor-driven system to drive a specific set of output devices based upon inputs to the system from various sensors and feedback mechanisms.Students will build and program a robot as a solution to a given problem.Students will know the basics of radio control devices and then use these principles to design a solution to a problem.Students will identify a variety of engineering related curriculum resources that are currently available for them to use in their future classrooms.

TEE 340 : Principles of Technology and Engineering. (3:2:4)

WHEN TAUGHT: Fall

DESCRIPTION: Teaching technology and engineering concepts in education. Developing problem-solving skills by tackling technological and engineering problems.

Course Outcomes

- UETS STANDARD 4 - Content Knowledge: The teacher understands the central concepts, tools of inquiry, and structure of the discipline.STL Standard 4: Students will develop an understanding of the cultural, social, economic, and political effects of technology.STL Standard 5: Students will develop an understanding of the effects of technology on the environment.STL Standard 6: Students will develop an understanding of the role of society in the development and use of technology.STL Standard 8: Students will develop an understanding of the attributes of design.STL Standard 9: Students will develop an understanding of engineering design.STL Standard 11: Students will develop the abilities to apply the design process.STL Standard 12: Students will develop the abilities to use and maintain technological products and systems.STL Standard 16: Students will develop an understanding of and be able to select and use energy and power technologies.STL Standard 20: Students will develop an understanding of and be able to select and use construction technologies.
- Students will understand and be able to differentiate between the concepts of force, work, energy and power in mechanical, fluid, electrical and thermal systems.Students will be able to perform calculations to determine the amount of work, energy or power of various mechanical, fluid, electrical or thermal systems. Students will know and be able to use the engineering design cycle to design a prototype of a solution to a power, energy and/or transportation problem.Students will be able to identify, describe, and perform basic calculations for simple machines (e.g. levers, gears, pulleys, hydraulic systems).Students will be able to use equipment and materials to perform basic power and energy experiments.Students will understand basic terminology related to construction technologies and be able to identify and describe the basic components of a structure.Students will know how to use tools and equipment to process various materials in order to design, build and test a structure as a solution to a technological problem.Students will be able to use simulation software to design, build and test a structure as a solution to a technological problem.

TEE 360 : Standards for Technological Literacy. (3:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: Eng T 231 or concurrent enrollment; completion of the GE Physical Science and Biological Science requirements.

DESCRIPTION: The teaching of technological literacy and engineering problem solving in education specifically focusing on the fields of medical, agricultural, and energy and power technologies.

Course Outcomes

- UETS Standard 4: Content Knowledge. Each candidate understands the central concepts, tools of inquiry, and structure of the discipline.UETS Standard 6: Instructional Planning. Each candidate plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content area, Core Curriculum standards, instructional best practices, and the community context.UETS Standard 7: Instructional Strategies. Each candidate uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.STL Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.STL Standard 7: Students will develop an understanding of the influence of technology on history.STL Standard 8: Students will develop an understanding of the attributes of design.STL Standard 11: Students will develop the abilities to apply the design process.STL Standard 14: Students will develop an understanding of and be able to select and use medical technologies.STL Standard 15: Students will develop an understanding of and be able to select and use agricultural and related biotechnologies.STL Standard 16: Students will develop an understanding of and be able to select and use energy and power technologies.
- Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 14, Medical Technologies.Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 15, Agricultural and Related Biotechnologies.Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 16, Energy and Power Technologies.Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 14, Medical Technologies.Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 15, Agricultural and Related Biotechnologies.Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 16, Energy and Power Technologies.

3. Complete 14 hours from one or more of the following areas:
   Graphic design and multimedia
   Engineering prep and electronics
   Construction systems
   Information technology
   Architecture and furniture design
   Manufacturing
   Computer science
   Trade and technical

   For specific courses, please visit www.et.byu.edu/tte or contact the School of Technology advisement center in 250 SNLB.

4. Complete four registrations of the following:
   TEE 291R : Undergraduate Seminar. (.5:1:0)
   WHEN TAUGHT: Fall; Winter
   DESCRIPTION: Student leadership training, including organization and operation of student technology education clubs. College Lecture attendance required. Separate program sections.
   NOTE: Required each semester for undergraduate majors not enrolled in TTE 391R or 491R.

   Course Outcomes
   - Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).

5. Complete one course from the following:
   MATH 110 : College Algebra. (3:3:0)
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   PREREQUISITE: Math 97 or equivalent (see Independent Study).
   DESCRIPTION: Functions, polynomials, theory of equations, exponential and logarithmic functions, matrices, determinants, systems of linear equations, permutations, combinations, binomial theorem.

   Course Outcomes
   - Graph functions using horizontal and vertical shiftsGraph functions using compressions and stretchesGraph functions using reflections about the x-axis or y-axisForm composite functions and find the domainDetermine the inverse of a function and graph an inverse function from the graph of a function
   - This course prepares students to take courses in calculus, statistics, mathematics for elementary education majors, and other areas where algebra skills are required. Fluent skills in algebra are necessary for success in any area that uses mathematical analysis. The mastery of college algebra requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. College Algebra develops the concepts of graphing functions, polynomial and rational functions, exponential and logarithmic functions, conic sections, solving systems of equations, the binomial theorem, permutations, combinations, and probability. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information, visit the Math 110 Wiki page.
   - Quadratic functionsPolynomial functionsRational functionsPolynomial and rational inequalitiesThe real zeros of a polynomial functionComplex zeros and the Fundamental Theorem of Algebra
   - Exponential functionsLogarithmic functionsProperties of LogarithmsLogarithmic and exponential equationsCompound interestExponential growth and decay
   - Graph parabolas, ellipses, and hyperbolasFind the equation of parabolas, ellipses, and hyperbolasDiscuss the equation of conic sections to find vertices, foci, asymptotes, and the directrixWork with conic sections that are not centered at the origin
   - Solve systems of linear equations using substitution and eliminationSolve systems of non-linear equations using substitution and eliminationDecompose rational functions using partial fractions
   - Find terms in a sequence using a formula and a recursive definitionFind a formula for terms in an arithmetic sequence and be able to add the terms of a finite arithmetic sequenceFind a formula for the terms in a geometric sequence and be able to find the sum of finite and infinite geometric seriesProve statements using mathematical induction
   - Work with operations on sets such as union, intersection and complement and count the number of elements in a setCompute permutations and combinationsEvaluate binomial coefficients and expand binomials using the Binomial TheoremCompute probabilities of equally likely outcomes

   MATH 111 : Trigonometry. (2:2:0)
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   PREREQUISITE: Math 110 or equivalent.
   DESCRIPTION: Circular functions, triangle relationships, identities, inverse trig functions, trigonometric equations, vectors, complex numbers, DeMoivre's theorem.

   Course Outcomes
   - Students should gain familiarity and proficiency with the basic theorems of trigonometry.For more detailed information, visit the Math 111 Wiki page.

6. Complete the Professional Education Component:
   - Complete the following:
     CPSE 402 : Educating Students with Disabilities in Secondary Classrooms. (2:2:0)
     WHEN TAUGHT: Fall; Winter; Spring
     PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or comparable major course; FBI

fingerprint background clearance.

DESCRIPTION: Issues, policies, and methods in teaching secondary students with disabilities in general education classrooms. Lab.

Course Outcomes

- Demonstrate sensitivity to individuals with disabilities.
- Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- Describe the steps in the Individual Education Program (IEP) process, including Individualized Transition Plans for students aged 14-22.
- Use research-supported methods for academic instruction of individuals with disabilities including explicit instruction, learning strategies, task analysis, and active participation.
- Describe models and strategies of consultation and collaboration including co-planning and co-teaching.
- Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act (IDEA).
- Develop a personal philosophy of special education which includes an understanding of the implications of Least Restrictive Environment as defined in IDEA.
- Demonstrate knowledge of basic classroom management theories and an understanding of teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs.
- Describe the characteristics and educational implications of students with high and low incidence disabilities
- Demonstrate ability to identify and prioritize areas of the general curriculum and provide accommodations for individuals with exceptional learning needs

SC ED 353 : Multicultural Education. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Designing and adapting instruction for diverse learners; collaborating with families, cultures, and communities in promoting and sustaining learning.

Course Outcomes

- Students will examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavio through a process of reflection.
- Acknowledge the dynamics of culture and diversity in school success and teachers' teaching. This includes recognizing and overcoming deficit thinking.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.
- Recognize and acknowledge racism, discrimination and other forms of inquity and privilege in themselves, in others, and within institutions.
- Recognize and use a personal moral spiritual framework along with principles and concepts of social science to guide educational accomplishments for diverse learners.

SC ED 375 : Theory and Methods of Secondary Education. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Disciplines of education; analysis of educational practice and relationship between theories and research on education and the practice of teaching.

Course Outcomes

- Students will demonstrate readiness to assume the responsibilities of studentteaching in general, choral, or instrumental music in the public schools.

TEE 276A : Exploration of Teaching A. (2:Arr:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent enrollment with TEE 276B.

DESCRIPTION: Lecture series directed at helping prospective teachers understand demands and opportunities associated with teaching secondary students.

Course Outcomes

There are no course outcomes available

TEE 276B : Exploration of Teaching B. (2:Arr:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: FBI fingerprint and background clearance; concurrent enrollment with TEE 276A.

DESCRIPTION: Field-based initial experience directed at helping prospective teachers understand demands and opportunities associated with teaching secondary students.

Course Outcomes

There are no course outcomes available

TEE 377 : Teaching Methods in Technology Education. (2:2:0)

PREREQUISITE: TEE 276B

DESCRIPTION: Developing meaningful and engaging instruction for secondary students in technology education; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Educator Preparation Program OutcomesThis course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.As students progress through the Technology and Engineering teacher education program, they should gain knowledge, dispositions and skills that will enable them to become effective teachers. The standards that encompass the knowledge, dispositions and skills that teachers should have are known as the UETS standards and can be found on the TEE Outcomes webpage. The following UETS standards will be addressed in this class (TEE 377).
- UETS Standard 1 - Learner and Development:The teacher understands cognitive, linguistic, social, emotional and physical areas of student development.UETS Standard 3 - Learning Environments:The teacher works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.UETS Standard 4 - Content Knowledge:The teacher understands the central concepts, tools of inquiry, and structure of the discipline.UETS Standard 5 - Assessment:The teacher uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in the content standards have been met.UETS Standard 6- Instructional Planning:The teacher plans instruction to support students in meeting rigorous learning goals by drawing uopn knowlege of content area, Core Curriculum standards, instructional best practices, and the community context.UETS Standard 7- Instructional Strategies:The teacher uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.
- Students will be able to identify the basic theories of student motivation and apply these theories to design classroom instruction for a technology and engineering classroom.Students will be able to identify and differentiate between direct and inquiry- based instruction and to develop lesson plans using both instructional approaches.Students will be able to develop instructional objectives that address cognitive, affective, and psychomotor domains of learning.Students will be able to develop instructional objectives for each of the levels of Blooms taxonomy.Students will be able to develop a disclosure document that outlines classroom procedures and student expectations appropriate for a T&E classroom.Students will be able to identify instructional strategies and teaching methods that might be used in a T&E classroom and to incorporate these strategies into a lesson plan.Students will be able to develop an assessment plan that includes strategies for formative and summative assessment in a T&E classroom.Students will be able to develop a rubric for assessment of a technology and engineering classroom activity.Students will be able to develop a plan for implementing problem solving strategies into their course instruction.Students will be able to identify implications for how students learn; including addressing student pre-conceptions of course content, developing student competence in a content area, and developing strategies for meta-cognition. Students will also be able to identify interventions for each of these areas.Students will be able to identify examples of student multiple intelligences and develop a plan for how this might affect instruction in the classroom.Students will be able to describe appropriate procedures for implementing cooperative learning into classroom activities.

TEE 378 : Practicum in Technology Education. (2:2:0)

PREREQUISITE: TEE 377

DESCRIPTION: Implementing meaningful and engaging instruction for secondary students in technology education; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Educator Preparation Program OutcomesThis course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.UETS Standard 1 - Learner and Development:The teacher understands cognitive, linguistic, social, emotional and physical areas of student development.UETS Standard 2 - Learning Differences: The teacher understands individual learner differences and cultural and linguistic diversity.UETS Standard 3 - Learning Environments:The teacher works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.UETS Standard 4 - Content Knowledge:The teacher understands the central concepts, tools of inquiry, and structure of the discipline.UETS Standard 5 - Assessment:The teacher uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in the content standards have been met.UETS Standard 6- Instructional Planning:The teacher plans instruction to support students in meeting rigorous learning goals by drawing uopn knowlege of content area, Core Curriculum standards, instructional best practices, and the community context.UETS Standard 7- Instructional Strategies:The teacher uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.UETS Standard 8 - Reflection and Continuous Growth: The teacher is a reflectiv practitioner who uses evidence to continually evaluate and adapt practice to meet the needs of each learner.
- Students will identify the basic steps of the Backwards Design approach to curriculum development and use these steps to develop a curricular unit to be taught as part of the practicum experience in a middle school setting.As part of their practicum experience, students will successfully develop and teach a curricular unit (including unit plan, lesson plans, assessments, lab experiences, instructional materials) in a middle school technology and engineering classroom. Note: the mentor teacher and the university supervisor will assess this practicum experience using the CPAS assessment.During their practicum experience, students will demonstrate effective classroom management strategies.

Note: FBI fingerprinting and background clearance must be completed prior to enrollment in TEE 276R.

- Complete 12 hours of the following:

  TEE 476 : Secondary Student Teaching. (12:Arr:Arr)

  WHEN TAUGHT: Fall; Winter

  PREREQUISITE: Completion of all course work or departmental approval.

  DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

  Course Outcomes

  - Students will complete a classroom experience.Students will attend a school faculty meeting.Students will attend parent-teacher conferences.Students will record a 5-minute video of themselves teaching in the classroom.Students will keep a lesson plan notebook that will include copies of all lesson plans developed and used during the student teaching experience.Students will complete a teacher work sample. Students will complete a Field Experience Demographic for each school in which they teach.Students will have their mentor teachers complete the Clinical Practice Assessment System evaluation.Students will have their mentor teachers complete the Professional Disposition Instrument. Students will have a final interview with the program student teacher coordinator.

7. Complete department packet and exit interview.

*Hours include courses that may fulfill university core requirements.

TEE 125 : Technological Systems 1. (3:2:4)

WHEN TAUGHT: Fall

DESCRIPTION: Use of, interaction with, and teaching about communication, technologies.

Course Outcomes

- INTASC Standard 1: Making Content MeaningfulINTASC Standard 6: Communication/KnowledgeINTASC Standard 9: Professional Growth/ReflectionSTL Standard 1. Students will develop an understanding of the characteristics and scope of technology (as it pertains to communication technologies).STL Standard 2. Students will develop an understanding of the core concepts of technology (as it pertains to communication technologies). STL Standard 3. Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study (as it pertains to communication technologies). STL Standard 4. Students will develop an understanding of the cultural, social, economic, and political effects of technology (as it pertains to communication technologies). STL Standard 5. Students will develop an understanding of the effects of technology on the environment (as it pertains to communication technologies). STL Standard 6. Students will develop an understanding of the role of society in the development and use of technology (as it pertains to communication technologies). STL Standard 7. Students will develop an understanding of the influence of technology on history (as it pertains to communication technologies). STL Standard 8. Students will develop an understanding of the attributes of design (as it pertains to communication technologies). STL Standard 9. Students will develop an understanding of engineering design (as it pertains to communication technologies). STL Standard 10. Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving (as it pertains to communication technologies). STL Standard 17:Students will develop an understanding of and be able to select and use information and communication technologies.
- Historical Development: Introduce students to past communication technologies, with a focus on their development, usability, sustainability, evolution, and relative impact on: society, politics, economy, environment, and leisure.Ethics: Help students develop an understanding of the ethical development and use of communication technologies.User and Actor Skills: Help students develop the skills to not only be users, but actors in the positive development and evolution of society's Technology (Postman, 1999).Tools and Services: Expose and train students in a broad range of communication technology tools and services (i.e., Wiki language, desktop publishing, web authoring, HTML and CSS languages, Flash and JavaScript, social bookmarking, Video and TV production, RSS and ATOM feeds and subscriptions, Pod and podcasting, digital photography (techniques, tools, storage), computer hardware and networking issues, GPS technologies, and 3D modeling.Technology Assessment: Throughout this semester students will be asked to collect, implement, and assess the relative value of various contemporary technologies, and will be asked to discuss if and how the technologies should be used in classrooms and in the world.

200-Level Courses

TEE 200 : Processes and Prototyping with Wood. (3:2:4)

WHEN TAUGHT: Fall; Winter Even Yrs.; Spring Odd Yrs.

DESCRIPTION: Processes for and prototyping with wood and wood-based composites.

NOTE: Fee.

Course Outcomes

- Visualization of how components are joined and how to communicate this through drawings and specifications.Properties of wood as a material and how these properties impact design of projects using wood and wood products.Subtractive processes in prototype construction: sawing, shaping, milling, turning, routing, etc.Additive processes in prototype construction: joining, laminating, fastening, etc.Identification, care, and use of hand tools including tools for measuring, layout, sawing, planing, scraping, shaping, clamping, drilling, driving, and sharpening.Set-up and accurate and safe use of woodworking machinery including the jointer, surface planer, table saw, panel saw radial arm saw, power miter saw, bandsaw, thickness sander, mortiser, boring machine, lathe, and drill press.The use of electric, pneumatic, and cordless power hand tools including routers, drills, and sanders.Methods of clamping, gluing, and assembly, sanding, and finishing.Practical problem solving in working with industrial materials, tools, and machines.The importance of caring, hard work, planning, initiative, and patience, in making a project that is well designed, includes quality workmanship, and is nicely finished. Concepts and methods of teaching safe use of woodworking equipment.Basic machine and hand tool maintenance.

TEE 225 : Technological Systems 2. (3:2:4)

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

WHEN TAUGHT: Fall
DESCRIPTION: Teaching electronic, construction, and transportation systems.

Course Outcomes

- UETS STANDARD 4- Content Knowledge: The teacher understands the central concepts, tools of inquiry, and structure of the discipline. STL Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.· BMG: Technology transfer occurs when a new user applies an existing innovation developed for one purpose in a different function.BMH: Technological innovation often results when ideas, knowledge or skills are shared within a technology, among technologies or across other fields.BMI: Technological progress promotes the advancement of science and mathematics. STL Standard 7: Students will develop an understanding of the influence of technology on history.BMG: Most technological development has been evolutionary, the result of a series of refinements to a basic invention.BMH: The evolution of society has been directly affected by, and has in turn affected, the development and use of tools and materials.BMI: Throughout history, technology has been a powerful force in reshaping the social, cultural, political, and economic landscape.BMO: The information age places emphasis on the processing and exchange of information. STL Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.· BMF: Troubleshooting is a problem-solving method used to identify the cause of a malfunction in a technological system.BMG: Invention is a process of turning ideas and imagination into devices and systems. Innovation is the process of modifying an existing product or system to improve it.BMH: Some technological problems are best solved through experimentation. STL Standard 17: Students will develop an understanding of and be able to select and use information and communication technologies.· BML: Information and communication technologies include the inputs, processes, and outputs associated with sending and receiving information.BMM: Information and communication systems allow information to be transferred from human to human, human to machine, machine to human, and machine to machine.BMO: Communication systems are made up of source, encoder, transmitter, receiver, decoder, storage, retrieval, and destination.BMP: There are many ways to communicate information, such as graphic and electronic means.BMQ: Technological knowledge and processes are communicated using symbols, measurement, conventions, icons, graphic images, and languages that incorporate a variety of visual, auditory, and tactile stimuli.
- Students will be able to describe the basic electronic concepts of voltage, amperage, resistance & power.Students will be able to use Ohm's and Watt's law to perform basic calculations in an electronic circuit.Students will be able to describe how voltage, amperage, power & resistance behave in series and parallel circuits and be able to calculate unknown quantities in a circuit.Students will be able to use a power supply, breadboard, basic components, and a digital multi-meter to build, test and troubleshoot basic electronic circuits.Students will be able to use a digital multi-meter, oscilloscope and digital logic probe to test, troubleshoot and repair faulty circuits.Students will be able to identify basic electronics components and describe the function of each component.Students will be able to identify and draw the basic schematic symbols used to represent electronics components in a circuit.Students will be able to use appropriate materials and equipment (including simulation software, CNC Mill, soldering iron) to design and build a working electronic circuit that is a solution to a technological problem and/or need.Students will be able to successfully calculate unknown quantities and complete labs associated with magnetism, electromagnetic induction, capacitors, semiconductors, transformers and alternating current.Based on a set of given inputs and desired outputs, students will be able to design a digital electronic circuit as a solution to a technological problem or need.Students will be able to collect technical data and to apply appropriate math and science knowledge to see the connections between technology and other fields of study.Students will be able to describe historical examples of discoveries, experiments, innovations and inventions related to electronics communications technology and be able to provide examples of technology transfer and how these technologies affected past and current society.

TEE 229 : Processes and Manufacturing with Metals and Polymers. (3:2:4)

WHEN TAUGHT: Winter
PREREQUISITE: TEE 200; or concurrent enrollment.
DESCRIPTION: Processes for and manufacturing with metals and polymers.
NOTE: Fee.

Course Outcomes

- Students will gain an understanding of the properties and processes of the primary domains of polymers.
- Students will learn the classifications of metals, safety, design principles, measurement, reading a drawing, sheet metal, bench metal, metal fasteners, Shielded Metal Arc Welding, MIG Welding, Oxy-acetylene gas welding, and metal removal using a lathe and a mill.
- Students will understand:Historical aspects and impacts of manufacturing.Principles of manufacturing including material flow, converting raw materials and standard stock into finished products, economy of motion and material use, interchangeability of parts, product design for manufacture, and tasks involved in manufacturing a finished product.Principles of free enterprise including types of ownership, product selection and design, marketing techniques, corporate structure in manufacturing, and record keeping.

TEE 251 : Video Production and Nonlinear Editing. (3:2:4)

WHEN TAUGHT: Winter
PREREQUISITE: TEE 125 & TEE 255; or instructor's consent.
DESCRIPTION: Teaching video in education to inspire, communicate, and develop creativity. Fundamentals include planning, storyboarding, camera techniques, composition, assembling, and editing video projects.

Course Outcomes

- Provide students an opportunity to gain an understanding of the technical, creative, and cultural, political, economic, and environmental impact of photography, television and film/video media.Expose and train students in contemporary video, film, TV, and photography pre-production, production, and post-production techniques.Expose and train students to effectively use contemporary video, film, TV, and photography tools (i.e., Final Cut Pro, DVD Studio, Studio Code, Adobe Creative Suite, Camera Switcher, HD Video, digital SLR cameras, Celtix [script writing], lighting and audio recording equipment, and so forth).Teach students the primary elements of photography and TV/Film production, which are:1. Principles of audio, including micing techniques and handling of common audio problems.2. Camera placement and operations, including a basic understanding of camera color balancing and various important framing techniques.3. Lighting techniques, including existing light, bounced light and three-point lighting.4. Technical and production differences between standard definition (SDTV) and HDTV/DTV production.5. Elements of effective visual composition. 6. Editing techniques: assembly and insert, on-line and off-line, linear and random access, and the use of time-code.7. A

general understanding of the pre-production, production, and post-production stages for both TV and film, including associated audio and video equipment.

TEE 255 : Visual Communication Design. (3:2:4)

WHEN TAUGHT: Winter

PREREQUISITE: TEE 125; or instructor's consent.

DESCRIPTION: Teaching visual design principles and processes through digital and print media.

Course Outcomes

- Prepare you to teach communications technology, graphic design, and web design.
- Provide an opportunity to learn the basics of graphic design.
- Introduce you to the visual communications profession and professional literature.
- Gain competency in applying the design principles in both print and web mediums.

TEE 276A : Exploration of Teaching A. (2:Arr:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent enrollment with TEE 276B.

DESCRIPTION: Lecture series directed at helping prospective teachers understand demands and opportunities associated with teaching secondary students.

Course Outcomes

There are no course outcomes available

TEE 276B : Exploration of Teaching B. (2:Arr:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: FBI fingerprint and background clearance; concurrent enrollment with TEE 276A.

DESCRIPTION: Field-based initial experience directed at helping prospective teachers understand demands and opportunities associated with teaching secondary students.

Course Outcomes

There are no course outcomes available

TEE 291R : Undergraduate Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Student leadership training, including organization and operation of student technology education clubs. College Lecture attendance required. Separate program sections.

NOTE: Required each semester for undergraduate majors not enrolled in TTE 391R or 491R.

Course Outcomes

- Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).

300-Level Courses

TEE 330 : Creativity, Engineering, and Problem Solving. (3:2:4)

WHEN TAUGHT: Winter

DESCRIPTION: Designing solutions to technological problems using innovation, creativity, experimentation, problem solving, and engineering design. Manufacturing systems; teaching methods and prototype development.

Course Outcomes

- UETS STANDARD 4 - Content Knowledge: The teacher understands the central concepts, tools of inquiry, and structure of the discipline.STL Standard 2: Students will develop an understanding of the core concepts of technology.STL Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.STL Standard 8: Students will develop an understanding of the attributes of design.STL Standard 9: Students will develop an understanding of engineering design.STL Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.STL Standard 11: Students will develop the abilities to apply the design process.
- Students will incorporate the concepts of group goals, individual accountability, group processing and practice interpersonal and small group skills in order to work cooperatively in a group engineering design project.Students will incorporate various systems (e.g., electronic, mechanical, hydraulic, pneumatic, thermal) as they use the engineering design process to design an invention, innovation or solution to a design problem.Students will know the steps of the engineering design process and then document and apply this process in building a solution to a design activity.Students will use the steps of the engineering design process to innovate a new design solution to a common household item.Students will create an operations manual (design portfolio) which includes a self-evaluation, peer evaluation, sketches made during the ideation stage, problem-solving log, copy of the computer program and final drawing of the engineering design project.As a group, students will verbally and visually present their design portfolio to the rest of the class.During the engineering design process, students will identify the constraints and limitations of the design problem, consider trade-offs, and then design, build a prototype, test, optimize and troubleshoot a design solution to a problem.Students will collect technical data and then apply math and science knowledge in contextual setting.Students will learn the basics of computer control systems, including, inputs, outputs, and feedback loops; and be able to design, build and program a microprocessor-driven system to drive a specific set of output devices based upon inputs to the system from various sensors and feedback mechanisms.Students will build and program a robot as a solution to a given problem.Students will know the basics of radio control devices and then use these principles to design a solution to a problem.Students will identify a variety of

engineering related curriculum resources that are currently available for them to use in their future classrooms.

TEE 340 : Principles of Technology and Engineering. (3:2:4)

WHEN TAUGHT: Fall

DESCRIPTION: Teaching technology and engineering concepts in education. Developing problem-solving skills by tackling technological and engineering problems.

Course Outcomes

- UETS STANDARD 4 - Content Knowledge: The teacher understands the central concepts, tools of inquiry, and structure of the discipline.STL Standard 4: Students will develop an understanding of the cultural, social, economic, and political effects of technology.STL Standard 5: Students will develop an understanding of the effects of technology on the environment.STL Standard 6: Students will develop an understanding of the role of society in the development and use of technology.STL Standard 8: Students will develop an understanding of the attributes of design.STL Standard 9: Students will develop an understanding of engineering design.STL Standard 11: Students will develop the abilities to apply the design process.STL Standard 12: Students will develop the abilities to use and maintain technological products and systems.STL Standard 16: Students will develop an understanding of and be able to select and use energy and power technologies.STL Standard 20: Students will develop an understanding of and be able to select and use construction technologies.
- Students will understand and be able to differentiate between the concepts of force, work, energy and power in mechanical, fluid, electrical and thermal systems.Students will be able to perform calculations to determine the amount of work, energy or power of various mechanical, fluid, electrical or thermal systems. Students will know and be able to use the engineering design cycle to design a prototype of a solution to a power, energy and/or transportation problem.Students will be able to identify, describe, and perform basic calculations for simple machines (e.g. levers, gears, pulleys, hydraulic systems).Students will be able to use equipment and materials to perform basic power and energy experiments.Students will understand basic terminology related to construction technologies and be able to identify and describe the basic components of a structure.Students will know how to use tools and equipment to process various materials in order to design, build and test a structure as a solution to a technological problem.Students will be able to use simulation software to design, build and test a structure as a solution to a technological problem.

TEE 350 : Multimedia Authoring and Publishing. (3:2:4)

WHEN TAUGHT: Spring

PREREQUISITE: TEE 125; or instructor's consent.

DESCRIPTION: Developing advanced media authoring skills for teaching interactive design. Solving real-world interactive design problems for the World Wide Web, CD-ROM, and DVD-ROM in an entrepreneurial environment.

Course Outcomes

- Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).

TEE 360 : Standards for Technological Literacy. (3:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: Eng T 231 or concurrent enrollment; completion of the GE Physical Science and Biological Science requirements.

DESCRIPTION: The teaching of technological literacy and engineering problem solving in education specifically focusing on the fields of medical, agricultural, and energy and power technologies.

Course Outcomes

- UETS Standard 4: Content Knowledge. Each candidate understands the central concepts, tools of inquiry, and structure of the discipline.UETS Standard 6: Instructional Planning. Each candidate plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content area, Core Curriculum standards, instructional best practices, and the community context.UETS Standard 7: Instructional Strategies. Each candidate uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.STL Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.STL Standard 7: Students will develop an understanding of the influence of technology on history.STL Standard 8: Students will develop an understanding of the attributes of design.STL Standard 11: Students will develop the abilities to apply the design process.STL Standard 14: Students will develop an understanding of and be able to select and use medical technologies.STL Standard 15: Students will develop an understanding of and be able to select and use agricultural and related biotechnologies.STL Standard 16: Students will develop an understanding of and be able to select and use energy and power technologies.
- Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 14, Medical Technologies.Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 15, Agricultural and Related Biotechnologies.Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 16, Energy and Power Technologies.Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 14, Medical Technologies.Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 15, Agricultural and Related Biotechnologies.Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 16, Energy and Power Technologies.

TEE 377 : Teaching Methods in Technology Education. (2:2:0)

PREREQUISITE: TEE 276B

DESCRIPTION: Developing meaningful and engaging instruction for secondary students in technology education; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Educator Preparation Program OutcomesThis course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.As students progress through the Technology and Engineering teacher education program, they should gain knowledge, dispositions and skills that will enable them to become effective teachers. The standards that encompass the knowledge, dispositions and skills that teachers should have are known as the UETS standards and can be found on the TEE Outcomes webpage. The following UETS standards will be addressed in this class (TEE 377).
- UETS Standard 1 - Learner and Development:The teacher understands cognitive, linguistic, social, emotional and physical areas of student development.UETS Standard 3 - Learning Environments:The teacher works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.UETS Standard 4 - Content Knowledge:The teacher understands the central concepts, tools of inquiry, and structure of the discipline.UETS Standard 5 - Assessment:The teacher uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in the content standards have been met.UETS Standard 6- Instructional Planning:The teacher plans instruction to support students in meeting rigorous learning goals by drawing uopn knowlege of content area, Core Curriculum standards, instructional best practices, and the community context.UETS Standard 7- Instructional Strategies:The teacher uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.
- Students will be able to identify the basic theories of student motivation and apply these theories to design classroom instruction for a technology and engineering classroom.Students will be able to identify and differentiate between direct and inquiry- based instruction and to develop lesson plans using both instructional approaches.Students will be able to develop instructional objectives that address cognitive, affective, and psychomotor domains of learning.Students will be able to develop instructional objectives for each of the levels of Blooms taxonomy.Students will be able to develop a disclosure document that outlines classroom procedures and student expectations appropriate for a T&E classroom.Students will be able to identify instructional strategies and teaching methods that might be used in a T&E classroom and to incorporate these strategies into a lesson plan.Students will be able to develop an assessment plan that includes strategies for formative and summative assessment in a T&E classroom.Students will be able to develop a rubric for assessment of a technology and engineering classroom activity.Students will be able to develop a plan for implementing problem solving strategies into their course instruction.Students will be able to identify implications for how students learn; including addressing student pre-conceptions of course content, developing student competence in a content area, and developing strategies for meta-cognition. Students will also be able to identify interventions for each of these areas.Students will be able to identify examples of student multiple intelligences and develop a plan for how this might affect instruction in the classroom.Students will be able to describe appropriate procedures for implementing cooperative learning into classroom activities.

TEE 378 : Practicum in Technology Education. (2:2:0)

PREREQUISITE: TEE 377

DESCRIPTION: Implementing meaningful and engaging instruction for secondary students in technology education; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Educator Preparation Program OutcomesThis course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.UETS Standard 1 - Learner and Development:The teacher understands cognitive, linguistic, social, emotional and physical areas of student development.UETS Standard 2 - Learning Differences: The teacher understands individual learner differences and cultural and linguistic diversity.UETS Standard 3 - Learning Environments:The teacher works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.UETS Standard 4 - Content Knowledge:The teacher understands the central concepts, tools of inquiry, and structure of the discipline.UETS Standard 5 - Assessment:The teacher uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in the content standards have been met.UETS Standard 6- Instructional Planning:The teacher plans instruction to support students in meeting rigorous learning goals by drawing uopn knowlege of content area, Core Curriculum standards, instructional best practices, and the community context.UETS Standard 7- Instructional Strategies:The teacher uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.UETS Standard 8 - Reflection and Continuous Growth: The teacher is a reflectiv practitioner who uses evidence to continually evaluate and adapt practice to meet the needs of each learner.
- Students will identify the basic steps of the Backwards Design approach to curriculum development and use these steps to develop a curricular unit to be taught as part of the practicum experience in a middle school setting.As part of their practicum experience, students will successfully develop and teach a curricular unit (including unit plan, lesson plans, assessments, lab experiences, instructional materials) in a middle school technology and engineering classroom. Note: the mentor teacher and the university supervisor will assess this practicum experience using the CPAS assessment.During their practicum experience, students will demonstrate effective classroom management strategies.

TEE 399R : Academic Internship. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Department chair's consent.

DESCRIPTION: Work experience in technical and/or teaching environment. Internship will be supervised by employer and program internship coordinator. Formal technical report required.

Course Outcomes

- Student acquires professional experiences in any discipline within technology.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

400-Level Courses

TEE 400 : Furniture Design and Advanced Woodworking Processes. (3:2:4)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: TEE 200

DESCRIPTION: Designing several projects and building a significant piece of furniture. Topics include: current and past designers; surface decoration through coloring, texturing, pyrography; models, mock-ups, working drawings; bending, turning, advanced machining.

Course Outcomes

- Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).
- Explore furniture design and design and build a significant piece of furniture.Prepare a research report summarizing the life and key contributions of a furniture designer assigned/selected from the list provided and give a brief presentation (five minutes) to the class of your findings.Construct 6 sketch models of possible furniture pieces.Complete thumbnail design sketches of at least 24 pieces of furniture that could be appropriate to build in the class.Complete a working drawing which includes a 3-view orthographic projection drawn to an appropriate scale, and full scale details of all joints and connections of materials (including those containing hardware).If building a chair, a full-scale mock-up is required and will substitute for the primary views of the drawing requirement, full scale details of each joint or connection of materials is still required.Complete a cost estimate using the Estimating Sheet provided.Complete a plan of procedure detailing the sequence to be followed in building your furniture.Using a variety of surface decoration/manipulation techniques make three surface decoration swatches approximately 1/4" x 2" x 5".Design and make two full-scale, completely finished, functioning door or drawer pulls.

TEE 476 : Secondary Student Teaching. (12:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

- Students will complete a classroom experience.Students will attend a school faculty meeting.Students will attend parent-teacher conferences.Students will record a 5-minute video of themselves teaching in the classroom.Students will keep a lesson plan notebook that will include copies of all lesson plans developed and used during the student teaching experience.Students will complete a teacher work sample. Students will complete a Field Experience Demographic for each school in which they teach.Students will have their mentor teachers complete the Clinical Practice Assessment System evaluation.Students will have their mentor teachers complete the Professional Disposition Instrument. Students will have a final interview with the program student teacher coordinator.

TEE 490R : Independent Research and Development. (.5-3:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Program supervisor's consent.

DESCRIPTION: Individually preparing technical content associated with selected technological emphases.

NOTE: Fee.

Course Outcomes

- Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).

TEE 496 : Academic Internship. (12:Arr:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: All course work or departmental approval; major GPA of 2.85; at least a C- in TEE 377.

DESCRIPTION: Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

There are no course outcomes available

500-Level Graduate Courses (available to advanced undergraduates)

TEE 593R : Workshop in Applied Technology Education. (.5-2:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Teaching and learning technological literacy skills. Reviewing and participating in current technological advances, with a focus on teaching practice and methods.

NOTE: Maximum of 2 credit hours applicable to MS program. Fee.

Course Outcomes

- Students will understand the current pedagogical techniques used in their teaching field of choice.

Graduate Courses

For 600-level courses, see the BYU 2013–2014 Graduate Catalog.

College of Family, Home, and Social Sciences

990 SWKT
(801) 422-2083

Dean: Benjamin M. Ogles, Professor, Psychology
Associate Dean: Shawn W. Miller, Associate Professor, History
Associate Dean: Kelly D. Patterson, Professor, Political Science
Associate Dean: Susanne Olsen Roper, Associate Professor, Family Life

The College of Family, Home, and Social Sciences is composed of departments that study patterns of human behavior from diverse disciplinary approaches. Teaching and scholarship rely on social science methodology to learn about human behavior and human societies — their histories, organization, governments, and economies. As the name implies, the college is particularly concerned with studying the family as the basic unit of society. The many institutes and centers within the college provide opportunities for faculty and students to further research and disseminate scholarship.

Students in the college gain a broad education that helps develop an appreciation of the values of modern civilization and prepares them to contribute effectively as citizens. The knowledge and skills gained in the varied disciplines prepare them well for graduate study and professional careers. Many of the departments and programs housed within the college provide opportunities for student learning outside the classroom through internships and faculty-mentored teaching and research experiences.

Academic Departments and Curriculum Areas

American Heritage
Anthropology
Economics
Family Life
Geography
History
Political Science
Psychology
Social Work
Sociology

Research and Academic Support Areas

Center for Family History and Genealogy
Center for the Study of Elections and Democracy (CSED)
Charles Redd Center for Western Studies and Lemuel H. Redd Jr. Chair in Western History
Child and Family Studies Laboratory
Comprehensive Clinic
Family and Social Service Internships
Family Studies Center
Gerontology Program
Museum of Peoples and Cultures
New World Archaeological Foundation
Office of Public Archaeology
Relate Institute
Survey Research Lab
Washington Seminar

International and Area Studies

The Kennedy Center administers International and Area Studies. Faculty in Family, Home, and Social Sciences teach courses in the various area studies programs, including Asian Studies, Latin American Studies, and Middle East Studies. Students in these programs receive advisement from the IAS Advisement Center, 273 HRCB, (801) 422-3548.

College Advisement Center

Lori L. Seely, Supervisor
1041 JFSB
(801) 422-3541

Advisors are prepared to assist students in the selection of university core offerings that will contribute to a broad education. Advisors also assist departments in offering counsel for specific majors, counseling for a career, and monitoring a student's progress toward graduation.

Degrees Offered

Bachelor's, master's, and doctoral degrees are offered in the college. See the individual department and program listings in this catalog for specific degrees offered and the requirements for each.

Scholarships and Awards

Scholarships and awards are available to qualified students. Applications may be obtained from the Financial Aid Office, A-141 ASB. See department and college websites for their scholarships.

Family and Social Service Internships

945 SWKT
(801) 422-2168

Assists students in the School of Family Life, Psychology, and Sociology in finding and successfully completing an internship to enhance their undergraduate education. Academic credit for internships is offered through the individual departments.

FHSS Writing Lab

Joyce Adams, Director
1051 JFSB
(801) 422-4454
fhss-writinglab@byu.edu

Offers discipline-specific tutoring in writing for FHSS students. Helps students become better writers by focusing on the global aspects of writing, such as thesis construction, organization, transitions, idea development, logical coherence, style, and argument clarity.

Family Studies Center

801-422-2069

The Family Studies Center is dedicated to identifying characteristics associated with strong families and the processes by which they develop. At the heart of the center's mission is a deep and abiding desire to understand families and family members and to assist them to achieve their full potential. The fundamental guiding document is "The Family: A Proclamation to the World" by the First Presidency and the Quorum of the Twelve Apostles of The Church of Jesus Christ of Latter-day Saints. Understanding and promoting the principles in this proclamation will provide guidelines to help strengthen individuals, marriages, and families.

The center fosters the important link that research can and must have to families themselves. Research that illuminates the relationship between the family and other important institutions such as governments, schools, and business, as well as social contexts including households, neighborhoods, and cultures, is germane to the center's research program. Relevant information is presented through publications, conferences, symposia, seminars, and lectures.

The center helps organizations design and implement programs to aid couples and individuals in building and sustaining stronger families. Programs are designed not only to strengthen families but also to prevent critical family problems, including family violence, child abuse and neglect, divorce, financial mismanagement, and substance abuse. In addition, public policies that strengthen families are discussed and developed.

Museum of Peoples and Cultures

105 ALLN
(801) 422-0020

The Museum of Peoples and Cultures is located in Allen Hall at 700 North 100 East in Provo. Museum hours are from 9:00 a.m. to 5:00 p.m. Monday through Friday. General admission is free. Guided tours are available for a nominal fee and can be scheduled by calling the museum at (801) 422-0020.

Educational Opportunities. Classes in museum practices designed to provide students with practical experience in collections care and management—including computer applications, exhibition curation, and educational programming—are available with approval. Museum practice courses are taught by the museum's staff, who are adjunct anthropology faculty (see listings in the Anthropology section of this catalog). The museum also employs several students each semester to assist in collections work and welcomes volunteers to assist in educational and promotional work.

Anthropological Collections and Research Opportunities. Museum collections comprise prehistoric and ethnographic artifacts from various parts of the world. The bulk of holdings are from the Southwest, Mesoamerica, Polynesia, ancient Peru, and the Great Basin, especially Utah Valley. The museum also cares for a collection of more than 100,000 documents and over 50,000 images that document BYU archaeological research and artifactual materials. The museum encourages students to inquire about research possibilities using its collections.

Undergraduate Course

100-Level Courses

A HTG 100 : American Heritage. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Synthesis of American constitutional and economic principles, and patterns of historical development.

Course Outcomes

- Understand the religious, historical, political and economic origins of the Constitution
- Learn how the Constitution works;
- Apply their knowledge of the Constitution to analyze major historical, political and economic issues
- Become better informed, more active citizens

Admission to Degree Program

All undergraduate degree programs in the Department of Anthropology are open enrollment.

The Discipline

Anthropology's central aims are to describe, interpret, and make meaningful human behavior in sociocultural systems. Anthropology also seeks to explain the similarities and differences in human behavior patterns among all peoples and cultures, both in the present and the past. Social and cultural anthropology study human society in the present, using participant-observation, interviewing, and other techniques to understand the full round of life in a single culture, a subculture, or a multicultural system. Archaeology provides methods for learning about the world's peoples who are no longer living; thus it is an important part of the anthropological family of special skills and interests. Museum Studies integrates the above skills with the management, curation, research, and display of museum quality ethnographic and archaeological collections in professional museum settings.

Career Opportunities

Distinctive contributions are made by both anthropology and archaeology majors, and therefore jobs are available wherever social and cultural differences or social system complexities exist. International development, social services, businesses, schools, development projects, medicine, and law all offer significant careers. Recent concerns with environmental protection has opened up others. University teaching and research positions are limited in growth, but highly qualified students can find positions after obtaining the PhD degree from first-rank schools.

For archaeology majors, both legal and societal interest in understanding and preserving the past have resulted in increased job opportunities in state and national agencies required to observe recent preservation laws and in private corporations serving this end. Archaeologists working in international regions are not only employable in scholastic venues of teaching and research, but also international heritage site development.

For those students interested in combining Museum Studies courses with anthropology, employment opportunities exist in many collections-related venues including museums, libraries, and research institutes that rely on maintaining large collections of specimens for scholarly use.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BA in Anthropology
Archaeology Emphasis (Program Outcomes)
Sociocultural Emphasis (Program Outcomes)
BA in Anthropology (Sociocultural Double Major) (Program Outcomes)

Minor in African Studies
Minor in Anthropology

Students should see their college advisement center for help or information concerning the undergraduate programs.

Graduate Programs and Degrees

MA in Anthropology with an emphasis in Archaeology

A Museum Practices Certificate is available in conjunction with acceptance in the MA in Archaeology or a related MA program on campus.

For more information see the BYU 2013-2014 Graduate Catalog.

General Information

1. Each student wishing to major in anthropology should arrange through the college advisement center to counsel with an advisor and prepare a proposed sequence of study. Following this, the student should meet with the assigned faculty advisor for final approval of the program.
2. Undergraduate students are allowed some, but not excessive, specialization.
3. All degrees are in the field of anthropology.

Special Opportunities for Field Study

The department offers a number of unique curriculum and field study opportunities. Students interested in Pacific Island studies are encouraged to spend a semester or two at BYU— Hawaii, where this area of study is well represented. Selected courses are regularly counted toward BYU's major. Consult with the department chair or your faculty advisor about equivalencies.

Archaeology students complete their requirement in the field school typically held in conjunction with an ongoing, local (Utah) research project and occasionally in more exotic settings (Jordan).

Sociocultural faculty rotate leading ethnographic field schools abroad in India, Latin America, and Southeast Asia.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following:

ANTHR 101 : Social/Cultural Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.Acquire an informed awareness of other cultural worlds—an appreciation of other ways of being human—of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.— Learn to see personal beliefs, values, attitudes, and conduct—including kinship organization and ritual, economic and political practices—from the perspective of people with different ideas about the way the world works.Develop an increased ability to write effectively.

ANTHR 110 : Introduction to Archaeology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Studying past human behaviors and cultures by applying scientific principles and reasoning; exploring case studies concerning archaeological discoveries.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- This course should help students to demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. Students will learn to appreciate the excitement of discovery that has accompanied important scientific developments as well as demonstrate how scientific methodology can be used to analyze real-world science-related problems. Students will become adept at evaluating scientific data and claims in order to make rational decisions on public-policy science issues that affect their community. As students complete the course they will learn to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, as well as reflect rationally upon the interface between science and religion.

ANTHR 150 : Introduction to the Major. (.5:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Overview of anthropology major and graduation requirements; preparing for senior thesis sequence; career opportunities; and graduate school application process.

Course Outcomes
- Students in this course will gain an introductory level understanding of the basic assumptions of the disciplines of Anthropology and Archaeology as well as their historical development along with examples of applications of various methodologies in the field.

ANTHR 201 : Foundations of Social Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ANTHR 101

DESCRIPTION: Theoretical and philosophical antecedents of modern social theory; ideas and theorists that shaped the formation of anthropology as a discipline.

Course Outcomes
There are no course outcomes available

ANTHR 202 : Foundations of Anthropological Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ANTHR 201

DESCRIPTION: Ideas from the founders of social and cultural anthropology and archaeology as disciplines, particularly at the turn of the 20th century.

Course Outcomes
There are no course outcomes available

ANTHR 203 : Contemporary Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: ANTHR 202

DESCRIPTION: Important current theoretical frameworks in anthropology.

Course Outcomes
There are no course outcomes available

ANTHR 215 : Introduction to Archaeology: Method and Theory. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Field and analytic methods and their relevance to data acquisition; use of theory and the relation of theory to methods.

Course Outcomes
- Students will gain a knowledge of the history of archaeology as well as an exposure to basic archaeological theory and methodological practices in the field. Through this study, students will also gain a knowledge of the most important figures in archaeology as well as the major sites world-wide integrated with a chronology of world pre-history and history relevant to archaeological research.

ANTHR 300 : Biological Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Relationships between human biology, environment, social structure, and culture. Concepts and data on race, primates, evolution, population genetics, growth, and sociobiology.

Course Outcomes
- Develop an understanding of the relationships between human biology, environment, social structure.
- Collect data on race, primates, evolution, population genetics, growth, and sociobiology.

ANTHR 402 : Quantitative Methods for Anthropology. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Quantitative methods in archaeology and sociocultural anthropology, including methods of organizing, exploring, and presenting data, probability, and statistical inference.

Course Outcomes
There are no course outcomes available

2. Complete 3 hours from the following old world archaeology courses:

ANTHR 351 : Archaeology and the Bible. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.; Winter Odd Yrs.

DESCRIPTION: Setting and context of the Bible as clarified and supplemented from archaeology, history, and related studies. Archaeological methods.

Course Outcomes
- Students will gain knowledge of the development of Biblical archaeology as a field within the overall umbrella of the discipline of anthropology. This study will include extensive study of the both the defining personalities and methodologies in this sub-area of archaeology, as well as the major excavated sites in the Levant associated with Biblical events. Students will also gain a knowledge of the historical development of the Near East through its archaeological contexts, and the debates existing between differing methodologies associated with the use of the Bible as a primary document.

ANTHR 375 : Archaeology of Egypt. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: ANTHR 101; or ANTHR 110; or ANTHR 215

DESCRIPTION: Survey of the most important archaeological sites, artifacts, and monuments of Egypt, their cultural contexts, as well as major methodological developments in Egyptian archaeology and Egyptology.

Course Outcomes
- Survey of the most important archaeological sites, artifacts, and monuments of Egypt, their cultural contexts, as well as major methodological developments in Egyptian archaeology and Egyptology
- Pre-Islamic roots through Ottoman period. Sites, artifacts, and monuments of Islam. Focus on religious and cultural contexts. Relevant Islamic texts and archaeological methods for understanding medieval Islamic sites and artifacts

ANTHR 376 : Archaeology of the Ancient Aegean and Greece. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

RECOMMENDED: Anthr 101, 110, or 205.

DESCRIPTION: Bronze Age Aegean through the Classical and Hellenistic eras. Archaeological sites, artifacts, and monuments of the Mediterranean region impacted by Greek civilization. Classical archaeological methodologies associated with the study, excavation, and interpretation of these cultures.

Course Outcomes

- Students will learn the archaeology and cultural contexts of the ancient Aegean and Greek worlds, including classical archaeological methodologies and theory. Students will analyze the contributions that Greek culture, religion, art, and architecture, have played in the development of world history and society.

ANTHR 377 : Archaeology of Roman Civilization. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

RECOMMENDED: Anthr 101, 110, or 205.

DESCRIPTION: Survey of the most important sites, artifacts, monuments, and methodological approaches associated with the archaeological study of Etruria, Roman Italy, and the Roman Empire. Cultural contexts of the regions impacted by Roman civilization.

Course Outcomes

- Students will gain a knowledge of the development of Etruscan and Roman societies through a study of Classical archaeological techniques and methodology. Heavy emphasis will be placed on students gaining a chronological knowledge of both of these cultures and their impact on the Mediterranean Basin as well as on developments in the medieval worlds of Europe and Islam. Students will also gain a knowledge of the major assumptions and methodologies of Classical archaeology and gain experience in writing in the discipline.

ANTHR 378 : Near Eastern Archaeology. (3:2:ARR)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Peoples and culture history in Mesopotamia, Syria, Palestine, Egypt, 3500--500 B.C. Substantial reading, writing, discussion.

Course Outcomes

- Students will gain an introductory level understanding of the archaeology, history, and ancient cultural contexts of the major ancient civilizations of Mesopotamia, Syria, Palestine, and Egypt through readings, research assignments, and discussion.
- Students will increase their skill sets with regard to critical thinking, research, analysis of data, and writing through multiple types of course assignments including a final research paper project.

ANTHR 379 : Archaeology of Islam. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

RECOMMENDED: Anthr 101, 110, or 205.

DESCRIPTION: Pre-Islamic roots through Ottoman period. Sites, artifacts, and monuments of Islam. Focus on religious and cultural contexts. Relevant Islamic texts and archaeological methods for understanding medieval Islamic sites and artifacts.

Course Outcomes

- Pre-Islamic roots through Ottoman period. Sites, artifacts, and monuments of Islam. Focus on religious and cultural contexts. Relevant Islamic texts and archaeological methods for understanding medieval Islamic sites and artifacts

ANTHR 385 : Archaeology of Europe. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Cultural developments of temperate Europe from prehistory to the Roman expansion; lectures and case studies highlight issues related to environmental change, the introduction of farming, population movement, and the emergence of increasingly complex socio-economic systems.

Course Outcomes

There are no course outcomes available

ANTHR 390R : Special Topics in Regional Anthropology. (.5-3:ARR:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to a particular area or people.

Course Outcomes

- ANTHR 390R Provides students the opportunity to gain a more in-depth knowledge in a field specific region of archaeological or socio-cultural interest. The course offers the chance for visiting scholars with special expertise or regional interest to provide an intensive learning experience in anthropology for students interested in the field or the specific region.

ANTHR 580 : Near East Seminar. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Current issues in Near Eastern archaeological research.

NOTE: Undergraduates may enroll if they have completed 30 hours in anthropology coursework.

Course Outcomes
- Topics vary according to the instructor's research interests. However, each graduate seminar must provide students an intensive mentored research experience in the archaeology of the Near East. Often the seminars are organized by topic. Example: The Archaeology of Mortuary Practices Applied to the Archaeological Data Set of the Near East. Each Seminar must increase the students' research, critical thinking, analysis, and writing skills in the discipline.

ANTHR 590R : Special Topics. (3:3:ARR)
WHEN TAUGHT: Contact Department.
DESCRIPTION: Special topics in archaeology or museum studies.

Course Outcomes
- Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in Anothropology studies.

Note: Anthr 390R and 590R must be an old world topic.

3. Complete 3 hours from the following new world archaeology courses:

ANTHR 350 : Archaeological Cultures of North America. (3:3:0)
WHEN TAUGHT: Winter
DESCRIPTION: Cultural developments of North American Indians (Canada, U.S., and northern Mexico) before Columbus.

Course Outcomes
- Students will gain an introductory level comprehension of the diverse cultural developments of North American indigenous peoples as well as selected examples from Canada and Northern Mexico through the study of archaeological evidence and material culture.
- Students will gain a more in-depth comprehension of the diversity and complexity of data sets regarding archaeological evidence via material cultural remains by hands-on interactions with the collections of the Museum of Peoples and Cultures at BYU.
- Through course assignments, students will increase their skills in critical thinking, research, analysis, and writing. Emphasis will be placed on writing in the discipline.

ANTHR 355 : Mesoamerican Archaeology. (3:2:ARR)
WHEN TAUGHT: Fall
DESCRIPTION: Cultural and environmental bases of ancient civilizations in Mexico and Central America. Olmec, Maya, Toltec, and Aztec cultures.

Course Outcomes
- Students will gain knowledge of the major archaeological sites excavated and studied in Meso-America with an emphasis on critiquing archaeological methodologies and theory as they have been applied to specific archaeological sites in the field. Through this study, students will also gain a knowledge of the history and cultural development of the major societies and cultures of this region and the role that archaeology plays in assisting in providing data related to questions associated with the development and decline of these entities.

ANTHR 390R : Special Topics in Regional Anthropology. (.5-3:ARR:0)
OFFERED: Offered when unique opportunities or needs arise.
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Subjects related to a particular area or people.

Course Outcomes
- ANTHR 390R Provides students the opportunity to gain a more in-depth knowledge in a field specific region of archaeological or socio-cultural interest. The course offers the chance for visiting scholars with special expertise or regional interest to provide an intensive learning experience in anthropology for students interested in the field or the specific region.

ANTHR 530 : Great Basin Archaeology. (3:3:0)
WHEN TAUGHT: Winter Even Yrs.
PREREQUISITE: Anthr 350 or equivalent.
DESCRIPTION: Overview of ethnography, history of research, and prehistory of the Great Basin culture area. Current issues in archaeological research emphasized.

Course Outcomes
- Students will gain archaeological and cultural knowledge of the major native peoples of the Great Basin Region from pre-history through European contact through a study of their archaeologial remains and ethnographic studies.
- Students will have hands-on experiences with the collections of the Museum of Peoples and Cultures that are representative of the cultures of the Great Basin Region.

ANTHR 535 : Southwest Seminar. (3:3:0)
WHEN TAUGHT: Winter Odd Yrs.
PREREQUISITE: Anthr 350 or equivalent.

DESCRIPTION: Overview of ethnography and prehistory of American Southwest. Current issues in archaeological research emphasized.

Course Outcomes
There are no course outcomes available

ANTHR 562 : Formative Mesoamerica. (3:3:0)

DESCRIPTION: Topics and issues concerning beginnings and development of Mesoamerican civilizations. Mexican and Mayan antecedents of classic Mayan civilization and culture.

Course Outcomes
There are no course outcomes available

ANTHR 564 : Classic Mayan Civilization. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Topics and issues concerning archaeological and cultural aspects of classic Mayan civilization and society.

Course Outcomes
- Students will gain an in-depth knowledge of the development and accomplishments of the Classic Mayan Civilization at a graduate level.
- Students will expand their abilities to critically problem solve and write effectively in the discipline through class assignments including readings, class discussion, and research paper assignments.
- Students will gain a graduate level knowledge of Classic Mayan material culture through class readings, discussions, writing assignments, and the study of actual material artifacts including but not limited to pottery samples.
- Students will gain a graduate level knowledge of archaeological field methodologies that are pertinent to the excavation of Mayan sites.

ANTHR 565 : Mayan Ceramic Analysis. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Current approaches to classification and analysis of archaeological ceramics, particularly Maya Lowland pottery. Laboratory study of pottery collections from the Maya area.

Course Outcomes
There are no course outcomes available

ANTHR 566 : Mayan Ethnohistory. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Topics and issues of cultural change, colonization, and documentation of change processes in the Mayan region, from postclassic period and independence from Spain.

Course Outcomes
There are no course outcomes available

ANTHR 590R : Special Topics. (3:3:ARR)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Special topics in archaeology or museum studies.

Course Outcomes
- Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in Anothropology studies.

Note: Anthr 390R and 590R must be a new world topic.

4. Complete 3 hours from the following ethnography courses:

ANTHR 317 : Native Peoples of North America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Indian groups at the time of the European arrival; social organization, beliefs, values, economy, and adaptation to environment.

Course Outcomes
- Through course assignments, students will gain an introductory knowledge of the major Native American cultures at the time of European contact including but not limited to social organization, belief systems, values, economies, and adaptations to environments.
- Through course assignments and hands-on access to the collections of the BYU Museum of Peoples and Cultures, students will gain a greater depth of knowledge concerning the diverse range of material culture represented by the indigenous peoples of North America.
- Through course assignments, students will increase their skill sets in critical thinking, research, analysis, and writing skills in the disciplines of anthropology and archaeology.

ANTHR 326 : Guatemalan Society and Culture. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: History, culture, society, and life (economic, familial, religious) among peoples of Guatemala. Guatemala as exemplar of colonial, cultural, and global processes evident throughout Latin America.

Course Outcomes
- Using Guatemala as a case, which exemplifies the political, economic, and religious histories of Latin America, students will learn the basic relationships between cultural principles, social structure, environmental constraint, and important symbols in Latin America, and how these were constructed through historical processes of violent and peaceful social interaction.

ANTHR 330 : Peoples of Africa. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, economic, and social organization, family life, language, worldview, religion, ritual, artistic expression, ecological adaptation, and contemporary development issues among rural and urban sub-Saharan peoples.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

ANTHR 335 : Peoples of India. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Society and culture on the Indian subcontinent. Stratification, kinship, marriage, religion, politics, economics.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will be provided an overview of the peoples and cultures of South Asia with an emphasis on India; a region consisting of several hundred languages, multiple ethnicities, many religious traditions, and competing political orientations.
- Students will receive increased knowledge of the cultures of India through in-depth readings, lectures, discussions, and films.
- Students will increase their capacity for critical thinking skills and writing within the discipline through discussions, exams, and a written research papers.

ANTHR 340 : Peoples of the Middle East. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Ecology, social organization, and beliefs of nomadic, rural, and urban groups between western Africa and Pakistan.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will gain an introductory level understanding of the variety of cultures, ethnic groups, religious variances, and competing political entities representative of the regions included in the MIddle East. Special emphasis will be placed on applying this knowledge to archaeological and anthropological perspectives, disciplines, and professions.
- Through course assignments, students will increase their skills in creative thinking, analysis of data, research, and writing.
- Through course assignments, students will gain a knowledge and demonstrate their comprehension of the ecologies, social organizations, religious beliefs, and variances between nomadic, rural, and urban groups in the Middle East.

ANTHR 341 : Ethnonationalism and Southeast Asia. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Anthr 101.

DESCRIPTION: Historical and ethnographic perspectives on social and political dynamics in Southeast Asia, including upland ethnic minority issues, ethnonationalistic movements, geopolitical influences, war, genocide, religious dynamics, and the rise of nationalism in the region.

Course Outcomes
There are no course outcomes available

ANTHR 343 : Chinese Culture and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter Odd Yrs.

DESCRIPTION: Cultural and social institutions of traditional and modern China, including mainland China, Taiwan, Hong Kong, or other areas of Chinese impact.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will gain knowledge of the varieties of cultures encompassed in the vast domains of China as well as the basic social paradigms of Chinese society. Through this study, students will also gain a basic knowledge of the history of China and its importance in both past and present world contexts.

5. Complete 3 hours from the following systems and institutions courses:
   ANTHR 309 : Language, Culture, and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Linguistic anthropology as a way of doing ethnography; language as symbolic form, vehicle of thought, and instrument of social interaction; speech events as cultural texts.

Course Outcomes
There are no course outcomes available

ANTHR 430 : Moral and Ritual Institutions. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Anthropological approaches to religion; its content and relation to other social institutions in societies ranging from gatherers to industrialists.

Course Outcomes
- Be able to discuss the major theorists and theories of religion, the major theories of religion advanced, and the relation to various categories of religious practice. Be able to use ethnographic data to discuss and illustrate major religious and ritual practices, the significance of these practices as symbols, and the consequences of these practices in society and in the individual.

ANTHR 431 : Kinship and Gender. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Kinship theory and analysis, 1920-present. Recent issues in anthropological treatment of gender, marriage, and family structure.

Course Outcomes
- Students will learn the nature of kinship and the geneological basis of society. Students will also learn the importance of kinship when conducting fieldwork.

ANTHR 432 : Economic and Political Institutions. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Connections between wealth and power: political and legal systems in state and nonstate societies; global expansion of capitalism and technology.

Course Outcomes
- This course is designed to enhance student knowledge and skills as a scholar with relation to critical reading within the discipline, intelligent and informed discussion, and writing about past and current issues in global economics.
- Students will gain a working knowledge of political, legal, and economic anthropology as a preparation for the senior thesis, graduate programs, and possible careers in anthropological, political, legal, or economic fields.
- Students will expand their capacities to read with increased comprehension and to write coherently and persuasively in the discipline.
- Students will be given many opportunities to think critically about topics pertinent to the course content and their individual research assignments.
- Students will present their own individual research assignment in both written form and through the venues of a class presentation and discussion of the central themes and tenets as well as methodologies utilized within their individual research project.

ANTHR 436 : Symbolic Anthropology. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Social use and understanding of semiotics, signs, symbols, and other meaningful forms as critically constitutive of culture.

Course Outcomes
There are no course outcomes available

ANTHR 490R : Special Topics in Theory and System. (3:3:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to anthropological theory or the operation of social systems.

Course Outcomes
- Develop an enhanced understanding of social interaction, of what it means to be in the presence of others, and ultimately of human being and human beings.Prepare to do effective fieldwork and deskwork, to eventually produce accurate, useful, and insightful interpretations of various interactional practices.Describe the positions, ideas, and methods that will most help you make sense of various interactional practices, of particular social institutions, activities, events, roles, places, and objects.Demonstrate the ability to think soundly, to communicate effectively, and to write a clear and convincing essay.

6. Complete 6 hours from the following:
   a. Museum

ANTHR 311 : Museums and Cultures. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Role of museums in society. Analyzing museum content, use, and sociology. Visits to and critiques of area museums. Final projects with real museums in the region.

Course Outcomes
- This course will give participants a sound foundation in understanding the important roles museums play as cultural symbols in world societies, as well as exploring how individual types of museums becomes unique paradigms of cultural memory, education, and identity. The diverse ways in which societies utilize and conceptualize museums will also be a major focus for discussion.

ANTHR 314 : Museum Registration and Legal/Ethical Issues. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 311

DESCRIPTION: Managing museum collections: cataloging, loans, ethics, legal issues, object handling, basic object conservation. Practical experience working with museum objects and specific museum challenges.

Course Outcomes
- Students will be familiar with registration/collections management/collections care disciplines
- Students will gain hands-on, real-life experience with museum collections and registration
- Students will be familiar with technical writing for collections care (mainly object description and condition reporting)
- Students will be learn basic project management skills in managing collection projects
- Students will have a basic understanding of museum ethics and laws affecting museum collections

ANTHR 412 : Museum Collections Management. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 311 & ANTHR 314

DESCRIPTION: Instruction and practice in aspects of managing museum collections: writing catalogs, processing donations, preserving objects.

Course Outcomes
There are no course outcomes available

ANTHR 414 : Museum Projects. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 311 & ANTHR 314

DESCRIPTION: Supervised experience in a museum working with exhibitions, public programs, or research.

Course Outcomes
There are no course outcomes available

ANTHR 511 : Museums and Cultures. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Museums in society. Cultural foundations of museum content and sociology of museum use. Analyzing museum studies literature. Visits to and critiques of area museums. Final projects in real museums in the region.

Course Outcomes
- To introduce students to the unique and important roles that differing types of museums play in world cultures as well as how diverse cultures view museums and collective memory.
- Students will be provided hands-on, real-life experiences with museum collections related to the issues and methodologies introduced by the course.
- Students will have hands-on experiences in research, analysis, and writing related to the anthropology of museums both nationally and internationally.
- Students will be introduced to the major museum fields, their sub-fields,and their professional assumptions and opportunities, thus also helping students identify their own career interests in, and aptitudes for, the various museum disciplines.
- Student projects will introduce students to the team approach to museum work. Assignments will assist students in learning how to give professional and persuasive presentations of their written research in group settings.
- Students will be provided opportunities to work closely with professionals in the field and visit diverse museum types thus expanding their knowledge of the museum profession and practices.
- Students will be provided individual counseling in how to prepare for a career in the museum fields.

ANTHR 512 : Heritage Resource Management. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admittance into graduate program in archaeology or certificate program in museum practices.

DESCRIPTION: Legal and ethical issues for practicing archaeologists. Preservation law, collections law, public archaeology, Native American issues, and careers in archaeology and museums.

Course Outcomes

Students will learn the history of cultural resource management and laws relevant to its inception and current state.
- Students are to understand the inherent value in cultural resource preservation.
- This course will instruct students in the basic methods necessary in carrying out compliance for the Section 106 review process.
- Students will learn the current fundamental issues relative to CRM in the U.S. and will discuss ways in which certain aspects of the field can be improved.

b. Practicum, internship, applications

ANTHR 441 : Anthropology of Development. (3:3:3)

DESCRIPTION: Theory, practice, and research methods regarding the anthropological study and resolution of poverty, disease, malnutrition, displacement, and inadequate educational opportunities.

Course Outcomes
- To enable the students to apply anthropological theory and ideas in a practical manner and by so doing to assess how the process of development has traditionally been done, say from 1945 to the present. Has that system worked? What have been its successes and failures, and why? We will study what the difficulties are that impede development, structurally, culturally, and environmentally. In addition, we will ask whether the cross-cultural analysis and communication perspective that anthropology (supposedly) excels in helps. Does or can the use of anthropological techniques and analysis help make development more successful? Has anthropologically-informed development worked? Where, when, why? And if not, why not? In a word, can the principles and practices of anthropology be used in development projects to produce something more successful and reliable in the way of development? Can the principles and skills be identified and learned or imparted to a group of students so that new practitioners can be more successful if they enter into some kind of development enterprise or project? These objectives will be achieved by a] studying class texts; b] undertaking an individual research project; c] preparing and presenting a critique of a development project based on a journal account. Outcomes will be the ability to better understand the role of Anthropology in development work coupled with greater knowledge and skills in carrying out personal development projects. This in turn will contribute to greater confidence; a greater ability to analyze and understand human activity, sociality and thought; a greater awareness of cultural diversity, and an increased ability to communicate both orally and in written work.

ANTHR 460 : Practical Applications in Contract Archaeology. (3:1:9)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 215

RECOMMENDED: Anthr 454, 455, 456.

DESCRIPTION: Working with professionals and graduate students on contract and research projects; learning archaeological field/laboratory methods; applying training to actual research projects, artifact analyses, site documentation, and report writing.

Course Outcomes
No outcomes are available at this time.

ANTHR 496R : Academic Internship: Research. (.5-3:ARR:ARR)

PREREQUISITE: Supervising instructor's consent.

DESCRIPTION: Field or library research.

Course Outcomes
- Complete a supervised internship in an employment setting or agency related to Anthropology.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

c. Electives

Additional courses selected from items 2, 3, 4, or 5 above.

7. Complete the following in sequential order:

ANTHR 454 : Field School Preparation. (2:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: Major status.

DESCRIPTION: Topics and training related to preparation for archaeological field school assignments and on-site excavation required for Anthr 455.

Course Outcomes
There are no course outcomes available

ANTHR 455 : Field School of Archaeology. (6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: ANTHR 215 & ANTHR 454

DESCRIPTION: Training and experience in excavation at a BYU-sponsored dig.

Course Outcomes
There are no course outcomes available

(6 hours required)

ANTHR 456 : Lab Skills for Anthropology. (3:1:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 402 & ANTHR 455
DESCRIPTION: Analytical and laboratory techniques as part of a BYU-sponsored archaeological project.

Course Outcomes
There are no course outcomes available

ANTHR 499 : Senior Thesis. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Anthr 205, 206, 442, 495 (for sociocultural); 205, 206, 215, 402, 454R, 455R, 456R (for archaeology).
DESCRIPTION: Supervised analysis and write-up of data generated during field project. Refinement for publication.

Course Outcomes
- Students will analyze data and field notes collected for Anthr 495 to produce publishable journal article, a large-size poster, and a conference presentation.

*Hours include courses that may fulfill university core requirements.

1. Complete the following:

ANTHR 101 : Social/Cultural Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.Acquire an informed awareness of other cultural worlds—an appreciation of other ways of being human—of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.— Learn to see personal beliefs, values, attitudes, and conduct—including kinship organization and ritual, economic and political practices—from the perspective of people with different ideas about the way the world works.Develop an increased ability to write effectively.

ANTHR 110 : Introduction to Archaeology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Studying past human behaviors and cultures by applying scientific principles and reasoning; exploring case studies concerning archaeological discoveries.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- This course should help students to demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. Students will learn to appreciate the excitement of discovery that has accompanied important scientific developments as well as demonstrate how scientific methodology can be used to analyze real-world science-related problems. Students will become adept at evaluating scientific data and claims in order to make rational decisions on public-policy science issues that affect their community. As students complete the course they will learn to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, as well as reflect rationally upon the interface between science and religion.

ANTHR 150 : Introduction to the Major. (.5:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Overview of anthropology major and graduation requirements; preparing for senior thesis sequence; career opportunities; and graduate school application process.

Course Outcomes
- Students in this course will gain an introductory level understanding of the basic assumptions of the disciplines of Anthropology and Archaeology as well as their historical development along with examples of applications of various methodologies in the field.

ANTHR 201 : Foundations of Social Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ANTHR 101

DESCRIPTION: Theoretical and philosophical antecedents of modern social theory; ideas and theorists that shaped the formation of anthropology as a discipline.

Course Outcomes
There are no course outcomes available

ANTHR 202 : Foundations of Anthropological Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ANTHR 201

DESCRIPTION: Ideas from the founders of social and cultural anthropology and archaeology as disciplines, particularly at the turn of the 20th century.

Course Outcomes
There are no course outcomes available

ANTHR 203 : Contemporary Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: ANTHR 202

DESCRIPTION: Important current theoretical frameworks in anthropology.

Course Outcomes
There are no course outcomes available

2. Complete 9 hours from the following "peoples" courses:

ANTHR 317 : Native Peoples of North America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Indian groups at the time of the European arrival; social organization, beliefs, values, economy, and adaptation to environment.

Course Outcomes
- Through course assignments, students will gain an introductory knowledge of the major Native American cultures at the time of European contact including but not limited to social organization, belief systems, values, economies, and adaptations to environments.
- Through course assignments and hands-on access to the collections of the BYU Museum of Peoples and Cultures, students will gain a greater depth of knowledge concerning the diverse range of material culture represented by the indigenous peoples of North America.
- Through course assignments, students will increase their skill sets in critical thinking, research, analysis, and writing skills in the disciplines of anthropology and archaeology.

ANTHR 326 : Guatemalan Society and Culture. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: History, culture, society, and life (economic, familial, religious) among peoples of Guatemala. Guatemala as exemplar of colonial, cultural, and global processes evident throughout Latin America.

Course Outcomes
- Using Guatemala as a case, which exemplifies the political, economic, and religious histories of Latin America, students will learn the basic relationships between cultural principles, social structure, environmental constraint, and important symbols in Latin America, and how these were constructed through historical processes of violent and peaceful social interaction.

ANTHR 330 : Peoples of Africa. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, economic, and social organization, family life, language, worldview, religion, ritual, artistic expression, ecological adaptation, and contemporary development issues among rural and urban sub-Saharan peoples.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

ANTHR 335 : Peoples of India. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Society and culture on the Indian subcontinent. Stratification, kinship, marriage, religion, politics, economics.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will be provided an overview of the peoples and cultures of South Asia with an emphasis on India; a region consisting of several hundred languages, multiple ethnicities, many religious traditions, and competing political orientations.
- Students will receive increased knowledge of the cultures of India through in-depth readings, lectures, discussions, and films.
- Students will increase their capacity for critical thinking skills and writing within the discipline through discussions, exams, and a written research papers.

ANTHR 340 : Peoples of the Middle East. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Ecology, social organization, and beliefs of nomadic, rural, and urban groups between western Africa and Pakistan.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Students will gain an introductory level understanding of the variety of cultures, ethnic groups, religious variances, and competing political entities representative of the regions included in the MIddle East. Special emphasis will be placed on applying this knowledge to archaeological and anthropological perspectives, disciplines, and professions.
- Through course assignments, students will increase their skills in creative thinking, analysis of data, research, and writing.
- Through course assignments, students will gain a knowledge and demonstrate their comprehension of the ecologies, social organizations, religious beliefs, and variances between nomadic, rural, and urban groups in the Middle East.

ANTHR 341 : Ethnonationalism and Southeast Asia. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Anthr 101.

DESCRIPTION: Historical and ethnographic perspectives on social and political dynamics in Southeast Asia, including upland ethnic minority issues, ethnonationalistic movements, geopolitical influences, war, genocide, religious dynamics, and the rise of nationalism in the region.

Course Outcomes

There are no course outcomes available

ANTHR 343 : Chinese Culture and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter Odd Yrs.

DESCRIPTION: Cultural and social institutions of traditional and modern China, including mainland China, Taiwan, Hong Kong, or other areas of Chinese impact.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Students will gain knowledge of the varieties of cultures encompassed in the vast domains of China as well as the basic social paradigms of Chinese society. Through this study, students will also gain a basic knowledge of the history of China and its importance in both past and present world contexts.

ANTHR 345 : American Culture. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Perspectives and methods for making sense of mainstream middle-class American society; American ways of being-in-the-world, of believing, behaving, and belonging; American cultural themes.

Course Outcomes

- Develop an enhanced understanding of what it means to be American.Learn how to use the stories Americans tell about themselves as portholes through which to peer into the ordinarily invisible world of American culture.Be able to describe the values, beliefs, and attitudes that shape and color how Americans perceive and act in the world, that inform American social and political life as well as individual psychology.Demonstrate theability to think soundly, to communicate effectively, and to write a clear and convincing memoir of a specific American experience that reveals a particular, readily identifiable aspect of American culture.

ANTHR 346 : Anthropology of Mormonism. (3:3:0)

DESCRIPTION: Intensive analysis of Mormon society and culture using a range of anthropological perspectives.

Course Outcomes

- Students will gain a knowledge of the development of Mormonism as a distinct religious and cultural force within American society as well as its impact in world-wide contexts. The emergence of Mormonism as a 'culture' and the evolution of its assumptions and unique cultural characteristics will also be emphasized. Students will gain practice in applying current anthropological theories to a culture familiar to the majority of participants, but perhaps never thought about by students through the disciplinary assumptions of anthropology.

ANTHR 390R : Special Topics in Regional Anthropology. (.5-3:ARR:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to a particular area or people.

Course Outcomes

- ANTHR 390R Provides students the opportunity to gain a more in-depth knowledge in a field specific region of archaeological or socio-cultural interest. The course offers the chance for visiting scholars with special expertise or regional interest to provide an intensive learning experience in anthropology for students interested in the field or the specific region.

3. Complete 15 hours from the following systems/institution courses:
    - ANTHR 247 : Applied Anthropology. (3:3:0)

      WHEN TAUGHT: Winter

DESCRIPTION: Anthropological principles and methods applied to business, education, environment, government, communication, national and international development, and health sectors. Ethically and culturally appropriate strategies for researching and participating in planned socio-cultural change.

Course Outcomes
- This course has the objectives to introduce students to career options outside academia and to help them explore graduate programs that will prepare them for those careers. This course will also introduce them to theoretical and ethical issues in applied and practicing anthropology and to some of the current social problems that are dominating the field. Students will learn the basic training in the skills and methodologies, (including report writing), that they will use as an applied anthropologist.

ANTHR 300 : Biological Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Relationships between human biology, environment, social structure, and culture. Concepts and data on race, primates, evolution, population genetics, growth, and sociobiology.

Course Outcomes
- Develop an understanding of the relationships between human biology, environment, social structure.
- Collect data on race, primates, evolution, population genetics, growth, and sociobiology.

ANTHR 309 : Language, Culture, and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Linguistic anthropology as a way of doing ethnography; language as symbolic form, vehicle of thought, and instrument of social interaction; speech events as cultural texts.

Course Outcomes
There are no course outcomes available

ANTHR 430 : Moral and Ritual Institutions. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Anthropological approaches to religion; its content and relation to other social institutions in societies ranging from gatherers to industrialists.

Course Outcomes
- Be able to discuss the major theorists and theories of religion, the major theories of religion advanced, and the relation to various categories of religious practice. Be able to use ethnographic data to discuss and illustrate major religious and ritual practices, the significance of these practices as symbols, and the consequences of these practices in society and in the individual.

ANTHR 431 : Kinship and Gender. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Kinship theory and analysis, 1920-present. Recent issues in anthropological treatment of gender, marriage, and family structure.

Course Outcomes
- Students will learn the nature of kinship and the geneological basis of society. Students will also learn the importance of kinship when conducting fieldwork.

ANTHR 432 : Economic and Political Institutions. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Connections between wealth and power: political and legal systems in state and nonstate societies; global expansion of capitalism and technology.

Course Outcomes
- This course is designed to enhance student knowledge and skills as a scholar with relation to critical reading within the discipline, intelligent and informed discussion, and writing about past and current issues in global economics.
- Students will gain a working knowledge of political, legal, and economic anthropology as a preparation for the senior thesis, graduate programs, and possible careers in anthropological, political, legal, or economic fields.
- Students will expand their capacities to read with increased comprehension and to write coherently and persuasively in the discipline.
- Students will be given many opportunities to think critically about topics pertinent to the course content and their individual research assignments.
- Students will present their own individual research assignment in both written form and through the venues of a class presentation and discussion of the central themes and tenets as well as methodologies utilized within their individual research project.

ANTHR 434 : Medical Anthropology. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.; Winter Even Yrs.

RECOMMENDED: Anthr 247.

DESCRIPTION: Interactions between culture and health in comparative perspective, emphasizing social, historical, and ecological determinants.

Course Outcomes
There are no course outcomes available

ANTHR 436 : Symbolic Anthropology. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Social use and understanding of semiotics, signs, symbols, and other meaningful forms as critically constitutive of culture.

Course Outcomes
There are no course outcomes available

ANTHR 439 : Psychological Anthropology. (3:3:0)

DESCRIPTION: Culture/mind relationship. Cross-cultural variation in concepts of person, emotions, and treatment modalities by society. Psychological implications of cultural differences in childrearing.

Course Outcomes
- 1. Through this course students will develop a critique of both the overemphasis on macro-level 'structure' and 'culture' in mainstream anthropology, as well as the overly individualistic emphasis in psychology on micro-processes and the 'psyches' of individuals. Students will gain an appreciation for the extent to which 'mind' and 'culture' co-constitute one another in various dimensions of human experience.
- 2. Students will learn to critique the philosophical and theoretical assumptions inherent in various approaches to understanding human experience and intersubjectivity.
- 3. Students will learn to analyze cultural and psychological data from a person-centered ethnographic standpoint by engaging with readings and conducting a course project analyzing some psychocultural phenomenon and writing up the results.

ANTHR 441 : Anthropology of Development. (3:3:3)

DESCRIPTION: Theory, practice, and research methods regarding the anthropological study and resolution of poverty, disease, malnutrition, displacement, and inadequate educational opportunities.

Course Outcomes
- To enable the students to apply anthropological theory and ideas in a practical manner and by so doing to assess how the process of development has traditionally been done, say from 1945 to the present. Has that system worked? What have been its successes and failures, and why? We will study what the difficulties are that impede development, structurally, culturally, and environmentally. In addition, we will ask whether the cross-cultural analysis and communication perspective that anthropology (supposedly) excels in helps. Does or can the use of anthropological techniques and analysis help make development more successful? Has anthropologically-informed development worked? Where, when, why? And if not, why not? In a word, can the principles and practices of anthropology be used in development projects to produce something more successful and reliable in the way of development? Can the principles and skills be identified and learned or imparted to a group of students so that new practitioners can be more successful if they enter into some kind of development enterprise or project? These objectives will be achieved by a] studying class texts; b] undertaking an individual research project; c] preparing and presenting a critique of a development project based on a journal account. Outcomes will be the ability to better understand the role of Anthropology in development work coupled with greater knowledge and skills in carrying out personal development projects. This in turn will contribute to greater confidence; a greater ability to analyze and understand human activity, sociality and thought; a greater awareness of cultural diversity, and an increased ability to communicate both orally and in written work.

ANTHR 490R : Special Topics in Theory and System. (3:3:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to anthropological theory or the operation of social systems.

Course Outcomes
- Develop an enhanced understanding of social interaction, of what it means to be in the presence of others, and ultimately of human being and human beings.Prepare to do effective fieldwork and deskwork, to eventually produce accurate, useful, and insightful interpretations of various interactional practices.Describe the positions, ideas, and methods that will most help you make sense of various interactional practices, of particular social institutions, activities, events, roles, places, and objects.Demonstrate the ability to think soundly, to communicate effectively, and to write a clear and convincing essay.

LING 550 : Sociolinguistics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: For Fall 2013 & forward admits, Ling 210 or ELang 223; or equivalent.

DESCRIPTION: Research and theory in anthropological linguistics and sociolinguistics.

Course Outcomes
- Understand the relationship between language use and society with respect to regional, social, ethnic and contextual variation.
- Conduct research into a wide range of sociolingusitic variation
- Impart knowledge of sociolinguistics and related research in presentations and papers

LING 551 : Anthropological Linguistics. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: For Fall 2013 & forward admits, Ling 220 and Ling 230; or equivalent.

DESCRIPTION: Language in culture and society: development, typology, and description.

Course Outcomes

- Upon completion of this course students will be equipped with the conceptual tools to think about and analyze linguistic data in social contexts of use.
- Student will become conversant with foundational texts which inform our cultural understanding and use of language.
- Through readings, weekly exercises and discussions they will acquire the metalinguistic concepts necessary for contextualizing varieties of language.
- In class transcription sessions will address the representation of linguistic data, and how that representation may affect one's assessments of semantic intent.

- Up to 3 hours of the following Museum Studies courses may be used to complete the 15 hour requirement:

ANTHR 311 : Museums and Cultures. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Role of museums in society. Analyzing museum content, use, and sociology. Visits to and critiques of area museums. Final projects with real museums in the region.

Course Outcomes

- This course will give participants a sound foundation in understanding the important roles museums play as cultural symbols in world societies, as well as exploring how individual types of museums becomes unique paradigms of cultural memory, education, and identity. The diverse ways in which societies utilize and conceptualize museums will also be a major focus for discussion.

ANTHR 314 : Museum Registration and Legal/Ethical Issues. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 311

DESCRIPTION: Managing museum collections: cataloging, loans, ethics, legal issues, object handling, basic object conservation. Practical experience working with museum objects and specific museum challenges.

Course Outcomes

- Students will be familiar with registration/collections management/collections care disciplines
- Students will gain hands-on, real-life experience with museum collections and registration
- Students will be familiar with technical writing for collections care (mainly object description and condition reporting)
- Students will be learn basic project management skills in managing collection projects
- Students will have a basic understanding of museum ethics and laws affecting museum collections

ANTHR 412 : Museum Collections Management. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 311 & ANTHR 314

DESCRIPTION: Instruction and practice in aspects of managing museum collections: writing catalogs, processing donations, preserving objects.

Course Outcomes

There are no course outcomes available

ANTHR 414 : Museum Projects. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 311 & ANTHR 314

DESCRIPTION: Supervised experience in a museum working with exhibitions, public programs, or research.

Course Outcomes

There are no course outcomes available

ANTHR 511 : Museums and Cultures. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Museums in society. Cultural foundations of museum content and sociology of museum use. Analyzing museum studies literature. Visits to and critiques of area museums. Final projects in real museums in the region.

Course Outcomes

- To introduce students to the unique and important roles that differing types of museums play in world cultures as well as how diverse cultures view museums and collective memory.
- Students will be provided hands-on, real-life experiences with museum collections related to the issues and methodologies introduced by the course.
- Students will have hands-on experiences in research, analysis, and writing related to the

anthropology of museums both nationally and internationally.
- Students will be introduced to the major museum fields, their sub-fields,and their professional assumptions and opportunities, thus also helping students identify their own career interests in, and aptitudes for, the various museum disciplines.
- Student projects will introduce students to the team approach to museum work. Assignments will assist students in learning how to give professional and persuasive presentations of their written research in group settings.
- Students will be provided opportunities to work closely with professionals in the field and visit diverse museum types thus expanding their knowledge of the museum profession and practices.
- Students will be provided individual counseling in how to prepare for a career in the museum fields.

4. Complete 3 hours of statistics or data management courses:

ANTHR 402 : Quantitative Methods for Anthropology. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Quantitative methods in archaeology and sociocultural anthropology, including methods of organizing, exploring, and presenting data, probability, and statistical inference.

Course Outcomes
There are no course outcomes available

ANTHR 443 : Ethnographic Data Analysis. (3:3:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 442

RECOMMENDED: Anthr 495R.

DESCRIPTION: Systematic text analysis of interview data, audio, video, and survey data. Grounded theory and content analysis. Coding methods and codebook development/management. Developing an empirically grounded analysis of qualitative or mixed-methods data. Using qualitative data analysis software.

NOTE: For sociocultural anthropology majors, Anthr 495R is most appropriate after thesis fieldwork is complete and data is ready for analysis.

Course Outcomes
There are no course outcomes available

5. Complete the following in sequential order:

ANTHR 442 : Ethnographic Research Design and Methods. (3:2:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ANTHR 201 & ANTHR 202

RECOMMENDED: 300-level regionally relevant courses in the geographic area of interest.

DESCRIPTION: Methods and philosophy of social science research design. Rationale, limitations, ethical issues, and practices of participant observation, interviewing, quantitative measurement, and other methods. Developing complete research proposal for EthnographicField Project (Anthr 495). Securing IRB approval. Local fieldwork exercises.

Course Outcomes
There are no course outcomes available

**ANTHR 495R : Ethnographic Field Project. (3-6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: ANTHR 203 & ANTHR 442

DESCRIPTION: Conduct field work. Maintain, code, and index field notes, interview transcripts, and other data sources in preparation for Anthr 499 thesis write-up.

NOTE: IRB approval and instructor's consent required before departure to field. No class meetings.

Course Outcomes
- Students will conduct independent field work and log field notes. Students will follow their own research plan developed in Anthr 442.

(6 hours required)

ANTHR 499 : Senior Thesis. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Anthr 205, 206, 442, 495 (for sociocultural); 205, 206, 215, 402, 454R, 455R, 456R (for archaeology).

DESCRIPTION: Supervised analysis and write-up of data generated during field project. Refinement for publication.

Course Outcomes
- Students will analyze data and field notes collected for Anthr 495 to produce publishable journal article, a large-size poster, and a conference presentation.

*Hours include courses that may fulfill university core requirements.

** The major requires that a field project be completed in one of the recognized field schools conducted by a member of the BYU

faculty. A local field work option is available in exceptional circumstances and must be approved by the entire faculty.

BA in Anthropology (Sociocultural Double Major) (39.5 hours*)

Show All Course Descriptions
Hide All Course Descriptions

This major is designed to accommodate the varying interests of students from a range of other disciplines, but it is only available to students completing an additional major in another field. Its purpose is to allow students with other majors to add the perspectives that anthropology is uniquely qualified to provide.

Program Requirements | View MAP | View Program Outcomes

1. Complete all requirements of a primary major. Double counting courses between primary major and anthropology will not be allowed.
2. Complete the following:

ANTHR 101 : Social/Cultural Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.Acquire an informed awareness of other cultural worlds—an appreciation of other ways of being human—of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.— Learn to see personal beliefs, values, attitudes, and conduct—including kinship organization and ritual, economic and political practices—from the perspective of people with different ideas about the way the world works.Develop an increased ability to write effectively.

ANTHR 150 : Introduction to the Major. (.5:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Overview of anthropology major and graduation requirements; preparing for senior thesis sequence; career opportunities; and graduate school application process.

Course Outcomes
- Students in this course will gain an introductory level understanding of the basic assumptions of the disciplines of Anthropology and Archaeology as well as their historical development along with examples of applications of various methodologies in the field.

ANTHR 201 : Foundations of Social Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ANTHR 101

DESCRIPTION: Theoretical and philosophical antecedents of modern social theory; ideas and theorists that shaped the formation of anthropology as a discipline.

Course Outcomes
There are no course outcomes available

ANTHR 202 : Foundations of Anthropological Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ANTHR 201

DESCRIPTION: Ideas from the founders of social and cultural anthropology and archaeology as disciplines, particularly at the turn of the 20th century.

Course Outcomes
There are no course outcomes available

ANTHR 203 : Contemporary Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: ANTHR 202

DESCRIPTION: Important current theoretical frameworks in anthropology.

Course Outcomes
There are no course outcomes available

ANTHR 442 : Ethnographic Research Design and Methods. (3:2:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ANTHR 201 & ANTHR 202

RECOMMENDED: 300-level regionally relevant courses in the geographic area of interest.

DESCRIPTION: Methods and philosophy of social science research design. Rationale, limitations, ethical issues, and practices of participant observation, interviewing, quantitative measurement, and other methods. Developing complete research proposal for EthnographicField Project (Anthr 495). Securing IRB approval. Local fieldwork exercises.

Course Outcomes
There are no course outcomes available

**ANTHR 495R : Ethnographic Field Project. (3-6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: ANTHR 203 & ANTHR 442

DESCRIPTION: Conduct field work. Maintain, code, and index field notes, interview transcripts, and other data sources in preparation for Anthr 499 thesis write-up.

NOTE: IRB approval and instructor's consent required before departure to field. No class meetings.

Course Outcomes
- Students will conduct independent field work and log field notes. Students will follow their own research plan developed in Anthr 442.

ANTHR 499 : Senior Thesis. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Anthr 205, 206, 442, 495 (for sociocultural); 205, 206, 215, 402, 454R, 455R, 456R (for archaeology).

DESCRIPTION: Supervised analysis and write-up of data generated during field project. Refinement for publication.

Course Outcomes
- Students will analyze data and field notes collected for Anthr 495 to produce publishable journal article, a large-size poster, and a conference presentation.

3. Complete 6 hours from the following:

ANTHR 317 : Native Peoples of North America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Indian groups at the time of the European arrival; social organization, beliefs, values, economy, and adaptation to environment.

Course Outcomes
- Through course assignments, students will gain an introductory knowledge of the major Native American cultures at the time of European contact including but not limited to social organization, belief systems, values, economies, and adaptations to environments.
- Through course assignments and hands-on access to the collections of the BYU Museum of Peoples and Cultures, students will gain a greater depth of knowledge concerning the diverse range of material culture represented by the indigenous peoples of North America.
- Through course assignments, students will increase their skill sets in critical thinking, research, analysis, and writing skills in the disciplines of anthropology and archaeology.

ANTHR 326 : Guatemalan Society and Culture. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: History, culture, society, and life (economic, familial, religious) among peoples of Guatemala. Guatemala as exemplar of colonial, cultural, and global processes evident throughout Latin America.

Course Outcomes
- Using Guatemala as a case, which exemplifies the political, economic, and religious histories of Latin America, students will learn the basic relationships between cultural principles, social structure, environmental constraint, and important symbols in Latin America, and how these were constructed through historical processes of violent and peaceful social interaction.

ANTHR 330 : Peoples of Africa. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, economic, and social organization, family life, language, worldview, religion, ritual,

artistic expression, ecological adaptation, and contemporary development issues among rural and urban sub-Saharan peoples.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

ANTHR 335 : Peoples of India. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Society and culture on the Indian subcontinent. Stratification, kinship, marriage, religion, politics, economics.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will be provided an overview of the peoples and cultures of South Asia with an emphasis on India; a region consisting of several hundred languages, multiple ethnicities, many religious traditions, and competing political orientations.
- Students will receive increased knowledge of the cultures of India through in-depth readings, lectures, discussions, and films.
- Students will increase their capacity for critical thinking skills and writing within the discipline through discussions, exams, and a written research papers.

ANTHR 340 : Peoples of the Middle East. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Ecology, social organization, and beliefs of nomadic, rural, and urban groups between western Africa and Pakistan.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will gain an introductory level understanding of the variety of cultures, ethnic groups, religious variances, and competing political entities representative of the regions included in the MIddle East. Special emphasis will be placed on applying this knowledge to archaeological and anthropological perspectives, disciplines, and professions.
- Through course assignments, students will increase their skills in creative thinking, analysis of data, research, and writing.
- Through course assignments, students will gain a knowledge and demonstrate their comprehension of the ecologies, social organizations, religious beliefs, and variances between nomadic, rural, and urban groups in the Middle East.

ANTHR 341 : Ethnonationalism and Southeast Asia. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Anthr 101.

DESCRIPTION: Historical and ethnographic perspectives on social and political dynamics in Southeast Asia, including upland ethnic minority issues, ethnonationalistic movements, geopolitical influences, war, genocide, religious dynamics, and the rise of nationalism in the region.

Course Outcomes
There are no course outcomes available

ANTHR 343 : Chinese Culture and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter Odd Yrs.

DESCRIPTION: Cultural and social institutions of traditional and modern China, including mainland China, Taiwan, Hong Kong, or other areas of Chinese impact.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will gain knowledge of the varieties of cultures encompassed in the vast domains of China as well as the basic social paradigms of Chinese society. Through this study, students will also gain a basic knowledge of the history of China and its importance in both past and present world contexts.

ANTHR 345 : American Culture. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Perspectives and methods for making sense of mainstream middle-class American society; American ways of being-in-the-world, of believing, behaving, and belonging; American cultural themes.

Course Outcomes
- Develop an enhanced understanding of what it means to be American.Learn how to use the stories Americans tell about themselves as portholes through which to peer into the ordinarily invisible world of American culture.Be able to describe the values, beliefs, and attitudes that shape and color how Americans perceive and act in the world, that inform American social and political life as well as individual psychology.Demonstrate theability to think soundly, to communicate effectively, and to write a clear and convincing memoir of a specific American experience that reveals a particular, readily identifiable aspect of American culture.

ANTHR 346 : Anthropology of Mormonism. (3:3:0)

DESCRIPTION: Intensive analysis of Mormon society and culture using a range of anthropological perspectives.

Course Outcomes
- Students will gain a knowledge of the development of Mormonism as a distinct religious and cultural force within American society as well as its impact in world-wide contexts. The emergence of Mormonism as a 'culture' and the evolution of its assumptions and unique cultural characteristics will also be emphasized. Students will gain practice in applying current anthropological theories to a culture familiar to the majority of participants, but perhaps never thought about by students through the disciplinary assumptions of anthropology.

ANTHR 390R : Special Topics in Regional Anthropology. (.5-3:ARR:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to a particular area or people.

Course Outcomes
- ANTHR 390R Provides students the opportunity to gain a more in-depth knowledge in a field specific region of archaeological or socio-cultural interest. The course offers the chance for visiting scholars with special expertise or regional interest to provide an intensive learning experience in anthropology for students interested in the field or the specific region.

4. Complete 6 hours from the following:

ANTHR 309 : Language, Culture, and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Linguistic anthropology as a way of doing ethnography; language as symbolic form, vehicle of thought, and instrument of social interaction; speech events as cultural texts.

Course Outcomes
There are no course outcomes available

ANTHR 402 : Quantitative Methods for Anthropology. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Quantitative methods in archaeology and sociocultural anthropology, including methods of organizing, exploring, and presenting data, probability, and statistical inference.

Course Outcomes
There are no course outcomes available

ANTHR 430 : Moral and Ritual Institutions. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Anthropological approaches to religion; its content and relation to other social institutions in societies ranging from gatherers to industrialists.

Course Outcomes
- Be able to discuss the major theorists and theories of religion, the major theories of religion advanced, and the relation to various categories of religious practice. Be able to use ethnographic data to discuss and illustrate major religious and ritual practices, the significance of these practices as symbols, and the consequences of these practices in society and in the individual.

ANTHR 431 : Kinship and Gender. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Kinship theory and analysis, 1920-present. Recent issues in anthropological treatment of gender, marriage, and family structure.

Course Outcomes
- Students will learn the nature of kinship and the geneological basis of society. Students will also learn the importance of kinship when conducting fieldwork.

ANTHR 432 : Economic and Political Institutions. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Connections between wealth and power: political and legal systems in state and nonstate societies; global expansion of capitalism and technology.

Course Outcomes
- This course is designed to enhance student knowledge and skills as a scholar with relation to critical reading within the discipline, intelligent and informed discussion, and writing about past and current issues in global economics.
- Students will gain a working knowledge of political, legal, and economic anthropology as a preparation for the senior thesis, graduate programs, and possible careers in anthropological, political, legal, or economic fields.
- Students will expand their capacities to read with increased comprehension and to write coherently and persuasively in the discipline.
- Students will be given many opportunities to think critically about topics pertinent to the course content and their individual research assignments.

- Students will present their own individual research assignment in both written form and through the venues of a class presentation and discussion of the central themes and tenets as well as methodologies utilized within their individual research project.

ANTHR 434 : Medical Anthropology. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.; Winter Even Yrs.

RECOMMENDED: Anthr 247.

DESCRIPTION: Interactions between culture and health in comparative perspective, emphasizing social, historical, and ecological determinants.

Course Outcomes

There are no course outcomes available

ANTHR 436 : Symbolic Anthropology. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Social use and understanding of semiotics, signs, symbols, and other meaningful forms as critically constitutive of culture.

Course Outcomes

There are no course outcomes available

ANTHR 439 : Psychological Anthropology. (3:3:0)

DESCRIPTION: Culture/mind relationship. Cross-cultural variation in concepts of person, emotions, and treatment modalities by society. Psychological implications of cultural differences in childrearing.

Course Outcomes

- 1. Through this course students will develop a critique of both the overemphasis on macro-level 'structure' and 'culture' in mainstream anthropology, as well as the overly individualistic emphasis in psychology on micro-processes and the 'psyches' of individuals. Students will gain an appreciation for the extent to which 'mind' and 'culture' co-constitute one another in various dimensions of human experience.
- 2. Students will learn to critique the philosophical and theoretical assumptions inherent in various approaches to understanding human experience and intersubjectivity.
- 3. Students will learn to analyze cultural and psychological data from a person-centered ethnographic standpoint by engaging with readings and conducting a course project analyzing some psychocultural phenomenon and writing up the results.

ANTHR 441 : Anthropology of Development. (3:3:3)

DESCRIPTION: Theory, practice, and research methods regarding the anthropological study and resolution of poverty, disease, malnutrition, displacement, and inadequate educational opportunities.

Course Outcomes

- To enable the students to apply anthropological theory and ideas in a practical manner and by so doing to assess how the process of development has traditionally been done, say from 1945 to the present. Has that system worked? What have been its successes and failures, and why? We will study what the difficulties are that impede development, structurally, culturally, and environmentally. In addition, we will ask whether the cross-cultural analysis and communication perspective that anthropology (supposedly) excels in helps. Does or can the use of anthropological techniques and analysis help make development more successful? Has anthropologically-informed development worked? Where, when, why? And if not, why not? In a word, can the principles and practices of anthropology be used in development projects to produce something more successful and reliable in the way of development? Can the principles and skills be identified and learned or imparted to a group of students so that new practitioners can be more successful if they enter into some kind of development enterprise or project? These objectives will be achieved by a] studying class texts; b] undertaking an individual research project; c] preparing and presenting a critique of a development project based on a journal account. Outcomes will be the ability to better understand the role of Anthropology in development work coupled with greater knowledge and skills in carrying out personal development projects. This in turn will contribute to greater confidence; a greater ability to analyze and understand human activity, sociality and thought; a greater awareness of cultural diversity, and an increased ability to communicate both orally and in written work.

ANTHR 443 : Ethnographic Data Analysis. (3:3:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 442

RECOMMENDED: Anthr 495R.

DESCRIPTION: Systematic text analysis of interview data, audio, video, and survey data. Grounded theory and content analysis. Coding methods and codebook development/management. Developing an empirically grounded analysis of qualitative or mixed-methods data. Using qualitative data analysis software.

NOTE: For sociocultural anthropology majors, Anthr 495R is most appropriate after thesis fieldwork is complete and data is ready for analysis.

Course Outcomes

There are no course outcomes available

ANTHR 490R : Special Topics in Theory and System. (3:3:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to anthropological theory or the operation of social systems.

Course Outcomes

- Develop an enhanced understanding of social interaction, of what it means to be in the presence of others, and ultimately of human being and human beings.Prepare to do effective fieldwork and deskwork, to eventually produce accurate, useful, and insightful interpretations of various interactional practices.Describe the positions, ideas, and methods that will most help you make sense of various interactional practices, of particular social institutions, activities, events, roles, places, and objects.Demonstrate the ability to think soundly, to communicate effectively, and to write a clear and convincing essay.

ANTHR 511 : Museums and Cultures. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Museums in society. Cultural foundations of museum content and sociology of museum use. Analyzing museum studies literature. Visits to and critiques of area museums. Final projects in real museums in the region.

Course Outcomes

- To introduce students to the unique and important roles that differing types of museums play in world cultures as well as how diverse cultures view museums and collective memory.
- Students will be provided hands-on, real-life experiences with museum collections related to the issues and methodologies introduced by the course.
- Students will have hands-on experiences in research, analysis, and writing related to the anthropology of museums both nationally and internationally.
- Students will be introduced to the major museum fields, their sub-fields,and their professional assumptions and opportunities, thus also helping students identify their own career interests in, and aptitudes for, the various museum disciplines.
- Student projects will introduce students to the team approach to museum work. Assignments will assist students in learning how to give professional and persuasive presentations of their written research in group settings.
- Students will be provided opportunities to work closely with professionals in the field and visit diverse museum types thus expanding their knowledge of the museum profession and practices.
- Students will be provided individual counseling in how to prepare for a career in the museum fields.

5. Complete an additional 3 hours from sections 3 or 4 above.

*Hours include courses that may fulfill university core requirements.

** The major requires that a field project be completed in one of the recognized field schools conducted by a member of the BYU faculty. A local field work option is available in exceptional circumstances and must be approved by the entire faculty.

The Discipline

The African Studies minor is designed to complement several majors in preparing students interested in work related to the continent of Africa or the African Diaspora.

Program Requirements

1. Complete three courses from the following:

ANTHR 330 : Peoples of Africa. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, economic, and social organization, family life, language, worldview, religion, ritual, artistic expression, ecological adaptation, and contemporary development issues among rural and urban sub-Saharan peoples.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 285 : Africa South of the Sahara. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Geographical analysis focusing on resource management, political issues, development, environmental problems, economic development, and urban-rural change; case studies from selected countries.

Course Outcomes
There are no course outcomes available

HIST 261 : Modern Africa. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Survey of the history of the African continent from circa 1800, focusing on experiences and perspectives of Africans. Topics may include culture and identity, colonialism, independence movements, religion, gender relations, the environment, and economic development.

Course Outcomes
- Students will gain a greater knowledge of major events, developments, and questions in modern African history
- Students will develop a historical understanding of African societies, cultures, and peoples
- Students will improve their ability to weigh evidence, assess conflicting viewpoints, and evaluate arguments
- Students will improve their ability to write clearly and organize evidence to build an argument
- Students will gain a greater understanding of how Africa has related to the rest of the world

PL SC 352 : African Politics. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Processes of change and development of nation states; African regionalism and relations with other nations; contemporary political issues.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Possess a factual and theoretical knowledge of the themes, issues, and trends that shape politics in Africa.

2. Complete one course from the following:

ENGL 358R : Ethnic, Regional, and Other Literatures in English. (3:3:0)

WHEN: Contact Department.

TAUGHT:
PREREQUISITE: ENGL 251 & ENGL 295
DESCRIPTION: Sections stressing Native American, African American, Chicano, third-world, regional, or other literatures in English.

Course Outcomes
- Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of a given American region or ethnic group.
- Demonstrate a knowledge of the history, nature, aesthetics, and broadly defined thematic concerns of the literature at the center of the course.
- Compare and contrast the literature in question with larger or "mainstream" American literature.
- Form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop a focused and effective written argument.
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines

: Ethnic, Regional, and Other Literatures in English.

Course Outcomes

: Native American Literature.

Course Outcomes

: African American Literature.

Course Outcomes

: Asian American Literature.

Course Outcomes

: Latino/a American Literature.

Course Outcomes

: Post-Colonial Literature.

Course Outcomes

FREN 456R : Francophone Studies. (3:3:0)
PREREQUISITE: Fren 340.
DESCRIPTION: Readings from major French-speaking writers from countries outside France, such as Canada, Africa, and the Caribbean.

Course Outcomes
- Analyze and compare the cultures and practices that create African Francophone identities.
- Analyze and interpret literary texts of the French-speaking world.

3. Complete the following:

ANTHR 491 : Directed Research for African Studies Minor. (3:2.5:0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: Enrollment in the African Studies minor.
DESCRIPTION: Students will work closely with a faculty member in the Anthropology Department who has extensive experience in Africa and African Studies to produce a 12-page paper/project related to African Studies or the African diaspora. Intenstive library reserach may be coupled with on-site experiences should these be available to individual students given their course schedules and resources.

Course Outcomes
No outcomes are available at this time.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

ANTHR 101 : Social/Cultural Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.Acquire an informed awareness of other cultural worlds—an appreciation of other ways of being human—of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.— Learn to see personal beliefs, values, attitudes, and conduct—including kinship organization and ritual, economic and political practices—from the perspective of people with different ideas about the way the world works.Develop an increased ability to write effectively.

ANTHR 103 : Archaeology Field Trip. (1:2:0)

DESCRIPTION: Archaeology field trip to Four Corners.

NOTE: Meet weekly prior to trip. Students responsible for food and camping costs. Limited enrollment

Course Outcomes

- Through on-site study, students will gain archaeological knowledge related to the major cultures of the Great Basin and Southwest regions of the United States.

ANTHR 108R : Anthropological Films. (1:0:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Examination of other cultures through ethnographic or archaeological film.

NOTE: Can be taken separately or concurrently with Anthr 101 or 110.

Course Outcomes

- Through an exposure, critique, and study of ethnographic films, students will gain knowledge of the diverse types of human cultural systems in existence today in addition to the methodologies utilized to study and record them.

ANTHR 110 : Introduction to Archaeology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Studying past human behaviors and cultures by applying scientific principles and reasoning; exploring case studies concerning archaeological discoveries.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- This course should help students to demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. Students will learn to appreciate the excitement of discovery that has accompanied important scientific developments as well as demonstrate how scientific methodology can be used to analyze real-world science-related problems. Students will become adept at evaluating scientific data and claims in order to make rational decisions on public-policy science issues that affect their community. As students complete the course they will learn to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, as well as reflect rationally upon the interface between science and religion.

ANTHR 150 : Introduction to the Major. (.5:1:0)

WHEN Fall

TAUGHT:

DESCRIPTION: Overview of anthropology major and graduation requirements; preparing for senior thesis sequence; career opportunities; and graduate school application process.

Course Outcomes

- Students in this course will gain an introductory level understanding of the basic assumptions of the disciplines of Anthropology and Archaeology as well as their historical development along with examples of applications of various methodologies in the field.

200-Level Courses

ANTHR 201 : Foundations of Social Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ANTHR 101

DESCRIPTION: Theoretical and philosophical antecedents of modern social theory; ideas and theorists that shaped the formation of anthropology as a discipline.

Course Outcomes

There are no course outcomes available

ANTHR 202 : Foundations of Anthropological Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ANTHR 201

DESCRIPTION: Ideas from the founders of social and cultural anthropology and archaeology as disciplines, particularly at the turn of the 20th century.

Course Outcomes

There are no course outcomes available

ANTHR 203 : Contemporary Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: ANTHR 202

DESCRIPTION: Important current theoretical frameworks in anthropology.

Course Outcomes

There are no course outcomes available

ANTHR 207 : Experiments in Ancient Technology. (3:1:2)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Processes by which tools and other objects were produced anciently; experimental reproduction and use of ancient tools and their scientific analysis..

Course Outcomes

There are no course outcomes available

ANTHR 215 : Introduction to Archaeology: Method and Theory. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Field and analytic methods and their relevance to data acquisition; use of theory and the relation of theory to methods.

Course Outcomes

- Students will gain a knowledge of the history of archaeology as well as an exposure to basic archaeological theory and methodological practices in the field. Through this study, students will also gain a knowledge of the most important figures in archaeology as well as the major sites world-wide integrated with a chronology of world pre-history and history relevant to archaeological research.

ANTHR 247 : Applied Anthropology. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Anthropological principles and methods applied to business, education, environment, government, communication, national and international development, and health sectors. Ethically and culturally appropriate strategies for researching and participating in planned socio-cultural change.

Course Outcomes

- This course has the objectives to introduce students to career options outside academia and to help them explore graduate programs that will prepare them for those careers. This course will also introduce them to theoretical and ethical issues in applied and practicing anthropology and to some of the current social problems that are dominating the field. Students will learn the basic training in the skills and methodologies, (including report writing), that they will use as an applied anthropologist.

300-Level Courses

ANTHR 300 : Biological Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Relationships between human biology, environment, social structure, and culture. Concepts and data on race, primates, evolution, population genetics, growth, and sociobiology.

Course Outcomes

- Develop an understanding of the relationships between human biology, environment, social structure.
- Collect data on race, primates, evolution, population genetics, growth, and sociobiology.

ANTHR 301 : Human Osteology. (2:1:2)

DESCRIPTION: Identification and treatment of skeletal material found in archaeological excavations.

Course Outcomes

- In archaeology, the recovery of human remains is often a critical part of field work. Students will thus learn all the necessary skills involved with identifying osteological remains and their relationship to both archaeological and forensic analysis including relationships to race, gender, and human disease and diet. Modern techniques of analysis will be a major focus of this course.

ANTHR 309 : Language, Culture, and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Linguistic anthropology as a way of doing ethnography; language as symbolic form, vehicle of thought, and instrument of social interaction; speech events as cultural texts.

Course Outcomes

There are no course outcomes available

ANTHR 311 : Museums and Cultures. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Role of museums in society. Analyzing museum content, use, and sociology. Visits to and critiques of area museums. Final projects with real museums in the region.

Course Outcomes

- This course will give participants a sound foundation in understanding the important roles museums play as cultural symbols in world societies, as well as exploring how individual types of museums becomes unique paradigms of cultural memory, education, and identity. The diverse ways in which societies utilize and conceptualize museums will also be a major focus for discussion.

ANTHR 312 : Intercultural Communication. (3:3:0)

OFFERED: Independent Study only.

DESCRIPTION: Communication processes as affected by proxemic, kinesic, linguistic, social, institutional, worldview, value differences, and other aspects of culture. Seminar/workshop: theory, research methods, applications.

Course Outcomes

- After taking this course, you should be able to discuss the following questions and to give examples to illustrate your explanations:1. What must we take into account if we want to learn how to communicate appropriately and effectively with members of other societies?2. How does culture shape communication and social interaction in general?3. What values, beliefs, and attitudes seem to shape the interactions and communications of members of mainstream middle-class American society? And how do these patterns compare and contrast with those of other societies with which you are familiar?

ANTHR 314 : Museum Registration and Legal/Ethical Issues. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 311

DESCRIPTION: Managing museum collections: cataloging, loans, ethics, legal issues, object handling, basic object conservation. Practical experience working with museum objects and specific museum challenges.

Course Outcomes

- Students will be familiar with registration/collections management/collections care disciplines
- Students will gain hands-on, real-life experience with museum collections and registration
- Students will be familiar with technical writing for collections care (mainly object description and condition reporting)
- Students will be learn basic project management skills in managing collection projects
- Students will have a basic understanding of museum ethics and laws affecting museum collections

ANTHR 317 : Native Peoples of North America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Indian groups at the time of the European arrival; social organization, beliefs, values, economy, and adaptation to environment.

Course Outcomes

- Through course assignments, students will gain an introductory knowledge of the major Native American cultures at the time of European contact including but not limited to social organization, belief systems, values, economies, and adaptations to environments.
- Through course assignments and hands-on access to the collections of the BYU Museum of Peoples and Cultures, students will gain a greater depth of knowledge concerning the diverse range of material culture

represented by the indigenous peoples of North America.
- Through course assignments, students will increase their skill sets in critical thinking, research, analysis, and writing skills in the disciplines of anthropology and archaeology.

ANTHR 326 : Guatemalan Society and Culture. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: History, culture, society, and life (economic, familial, religious) among peoples of Guatemala. Guatemala as exemplar of colonial, cultural, and global processes evident throughout Latin America.

Course Outcomes
- Using Guatemala as a case, which exemplifies the political, economic, and religious histories of Latin America, students will learn the basic relationships between cultural principles, social structure, environmental constraint, and important symbols in Latin America, and how these were constructed through historical processes of violent and peaceful social interaction.

ANTHR 330 : Peoples of Africa. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, economic, and social organization, family life, language, worldview, religion, ritual, artistic expression, ecological adaptation, and contemporary development issues among rural and urban sub-Saharan peoples.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

ANTHR 335 : Peoples of India. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Society and culture on the Indian subcontinent. Stratification, kinship, marriage, religion, politics, economics.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will be provided an overview of the peoples and cultures of South Asia with an emphasis on India; a region consisting of several hundred languages, multiple ethnicities, many religious traditions, and competing political orientations.
- Students will receive increased knowledge of the cultures of India through in-depth readings, lectures, discussions, and films.
- Students will increase their capacity for critical thinking skills and writing within the discipline through discussions, exams, and a written research papers.

ANTHR 336 : Cinema and Culture in India. (3:3:0)

WHEN TAUGHT: Spring

DESCRIPTION: Anthropology of film in India; the world's largest film industry. Indian cultural and linguistic diversity. How different film genres reflect, distort, or utilize Indian cultural diversity. Evidences in the film work of Satyajit Ray.

Course Outcomes
There are no course outcomes available

ANTHR 340 : Peoples of the Middle East. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Ecology, social organization, and beliefs of nomadic, rural, and urban groups between western Africa and Pakistan.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will gain an introductory level understanding of the variety of cultures, ethnic groups, religious variances, and competing political entities representative of the regions included in the MIddle East. Special emphasis will be placed on applying this knowledge to archaeological and anthropological perspectives, disciplines, and professions.
- Through course assignments, students will increase their skills in creative thinking, analysis of data, research, and writing.
- Through course assignments, students will gain a knowledge and demonstrate their comprehension of the ecologies, social organizations, religious beliefs, and variances between nomadic, rural, and urban groups in the Middle East.

ANTHR 341 : Ethnonationalism and Southeast Asia. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Anthr 101.

DESCRIPTION: Historical and ethnographic perspectives on social and political dynamics in Southeast Asia, including upland ethnic minority issues, ethnonationalistic movements, geopolitical influences, war, genocide, religious dynamics, and the rise of nationalism in the region.

Course Outcomes
There are no course outcomes available

ANTHR 343 : Chinese Culture and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter Odd Yrs.

DESCRIPTION: Cultural and social institutions of traditional and modern China, including mainland China, Taiwan, Hong Kong, or other areas of Chinese impact.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Students will gain knowledge of the varieties of cultures encompassed in the vast domains of China as well as the basic social paradigms of Chinese society. Through this study, students will also gain a basic knowledge of the history of China and its importance in both past and present world contexts.

ANTHR 345 : American Culture. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Perspectives and methods for making sense of mainstream middle-class American society; American ways of being-in-the-world, of believing, behaving, and belonging; American cultural themes.

Course Outcomes

- Develop an enhanced understanding of what it means to be American.Learn how to use the stories Americans tell about themselves as portholes through which to peer into the ordinarily invisible world of American culture.Be able to describe the values, beliefs, and attitudes that shape and color how Americans perceive and act in the world, that inform American social and political life as well as individual psychology.Demonstrate theability to think soundly, to communicate effectively, and to write a clear and convincing memoir of a specific American experience that reveals a particular, readily identifiable aspect of American culture.

ANTHR 346 : Anthropology of Mormonism. (3:3:0)

DESCRIPTION: Intensive analysis of Mormon society and culture using a range of anthropological perspectives.

Course Outcomes

- Students will gain a knowledge of the development of Mormonism as a distinct religious and cultural force within American society as well as its impact in world-wide contexts. The emergence of Mormonism as a 'culture' and the evolution of its assumptions and unique cultural characteristics will also be emphasized. Students will gain practice in applying current anthropological theories to a culture familiar to the majority of participants, but perhaps never thought about by students through the disciplinary assumptions of anthropology.

ANTHR 348 : Contemporary Japan. (3:3:0)

DESCRIPTION: Using movies and popular media to examine the social structures and family life dynamics of contemporary Japan.

Course Outcomes

There are no course outcomes available

ANTHR 350 : Archaeological Cultures of North America. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Cultural developments of North American Indians (Canada, U.S., and northern Mexico) before Columbus.

Course Outcomes

- Students will gain an introductory level comprehension of the diverse cultural developments of North American indigenous peoples as well as selected examples from Canada and Northern Mexico through the study of archaeological evidence and material culture.
- Students will gain a more in-depth comprehension of the diversity and complexity of data sets regarding archaeological evidence via material cultural remains by hands-on interactions with the collections of the Museum of Peoples and Cultures at BYU.
- Through course assignments, students will increase their skills in critical thinking, research, analysis, and writing. Emphasis will be placed on writing in the discipline.

ANTHR 351 : Archaeology and the Bible. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.; Winter Odd Yrs.

DESCRIPTION: Setting and context of the Bible as clarified and supplemented from archaeology, history, and related studies. Archaeological methods.

Course Outcomes

- Students will gain knowledge of the development of Biblical archaeology as a field within the overall umbrella of the discipline of anthropology. This study will include extensive study of the both the defining personalities and methodologies in this sub-area of archaeology, as well as the major excavated sites in the Levant associated with Biblical events. Students will also gain a knowledge of the historical development of the Near East through its archaeological contexts, and the debates existing between differing methodologies associated with the use of the Bible as a primary document.

ANTHR 355 : Mesoamerican Archaeology. (3:2:ARR)

WHEN TAUGHT: Fall

DESCRIPTION: Cultural and environmental bases of ancient civilizations in Mexico and Central America. Olmec, Maya, Toltec, and Aztec cultures.

Course Outcomes

- Students will gain knowledge of the major archaeological sites excavated and studied in Meso-America with an emphasis on critiquing archaeological methodologies and theory as they have been applied to specific archaeological sites in the field. Through this study, students will also gain a knowledge of the history and cultural development of the major societies and cultures of this region and the role that archaeology plays in assisting in providing data related to questions associated with the development and decline of these entities.

ANTHR 375 : Archaeology of Egypt. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: ANTHR 101; or ANTHR 110; or ANTHR 215

DESCRIPTION: Survey of the most important archaeological sites, artifacts, and monuments of Egypt, their cultural contexts, as well as major methodological developments in Egyptian archaeology and Egyptology.

Course Outcomes

- Survey of the most important archaeological sites, artifacts, and monuments of Egypt, their cultural contexts, as well as major methodological developments in Egyptian archaeology and Egyptology
- Pre-Islamic roots through Ottoman period. Sites, artifacts, and monuments of Islam. Focus on religious and cultural contexts. Relevant Islamic texts and archaeological methods for understanding medieval Islamic sites and artifacts

ANTHR 376 : Archaeology of the Ancient Aegean and Greece. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

RECOMMENDED: Anthr 101, 110, or 205.

DESCRIPTION: Bronze Age Aegean through the Classical and Hellenistic eras. Archaeological sites, artifacts, and monuments of the Mediterranean region impacted by Greek civilization. Classical archaeological methodologies associated with the study, excavation, and interpretation of these cultures.

Course Outcomes

- Students will learn the archaeology and cultural contexts of the ancient Aegean and Greek worlds, including classical archaeological methodologies and theory. Students will analyze the contributions that Greek culture, religion, art, and architecture, have played in the development of world history and society.

ANTHR 377 : Archaeology of Roman Civilization. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

RECOMMENDED: Anthr 101, 110, or 205.

DESCRIPTION: Survey of the most important sites, artifacts, monuments, and methodological approaches associated with the archaeological study of Etruria, Roman Italy, and the Roman Empire. Cultural contexts of the regions impacted by Roman civilization.

Course Outcomes

- Students will gain a knowledge of the development of Etruscan and Roman societies through a study of Classical archaeological techniques and methodology. Heavy emphasis will be placed on students gaining a chronological knowledge of both of these cultures and their impact on the Mediterranean Basin as well as on developments in the medieval worlds of Europe and Islam. Students will also gain a knowledge of the major assumptions and methodologies of Classical archaeology and gain experience in writing in the discipline.

ANTHR 378 : Near Eastern Archaeology. (3:2:ARR)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Peoples and culture history in Mesopotamia, Syria, Palestine, Egypt, 3500--500 B.C. Substantial reading, writing, discussion.

Course Outcomes

- Students will gain an introductory level understanding of the archaeology, history, and ancient cultural contexts of the major ancient civilizations of Mesopotamia, Syria, Palestine, and Egypt through readings, research assignments, and discussion.
- Students will increase their skill sets with regard to critical thinking, research, analysis of data, and writing through multiple types of course assignments including a final research paper project.

ANTHR 379 : Archaeology of Islam. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

RECOMMENDED: Anthr 101, 110, or 205.

DESCRIPTION: Pre-Islamic roots through Ottoman period. Sites, artifacts, and monuments of Islam. Focus on religious and cultural contexts. Relevant Islamic texts and archaeological methods for understanding medieval Islamic sites and artifacts.

Course Outcomes

- Pre-Islamic roots through Ottoman period. Sites, artifacts, and monuments of Islam. Focus on religious and cultural contexts. Relevant Islamic texts and archaeological methods for understanding medieval Islamic sites and artifacts

ANTHR 385 : Archaeology of Europe. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Cultural developments of temperate Europe from prehistory to the Roman expansion; lectures and case studies highlight issues related to environmental change, the introduction of farming, population movement, and the emergence of increasingly complex socio-economic systems.

Course Outcomes

There are no course outcomes available

ANTHR 390R : Special Topics in Regional Anthropology. (.5-3:ARR:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to a particular area or people.

Course Outcomes

- ANTHR 390R Provides students the opportunity to gain a more in-depth knowledge in a field specific region of archaeological or socio-cultural interest. The course offers the chance for visiting scholars with special expertise or regional interest to provide an intensive learning experience in anthropology for students interested in the field or the specific region.

400-Level Courses

ANTHR 402 : Quantitative Methods for Anthropology. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Quantitative methods in archaeology and sociocultural anthropology, including methods of organizing, exploring, and presenting data, probability, and statistical inference.

Course Outcomes

There are no course outcomes available

ANTHR 412 : Museum Collections Management. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 311 & ANTHR 314

DESCRIPTION: Instruction and practice in aspects of managing museum collections: writing catalogs, processing donations, preserving objects.

Course Outcomes

There are no course outcomes available

ANTHR 414 : Museum Projects. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 311 & ANTHR 314

DESCRIPTION: Supervised experience in a museum working with exhibitions, public programs, or research.

Course Outcomes

There are no course outcomes available

ANTHR 430 : Moral and Ritual Institutions. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Anthropological approaches to religion; its content and relation to other social institutions in societies ranging from gatherers to industrialists.

Course Outcomes

- Be able to discuss the major theorists and theories of religion, the major theories of religion advanced, and the relation to various categories of religious practice. Be able to use ethnographic data to discuss and illustrate major religious and ritual practices, the significance of these practices as symbols, and the consequences of these practices in society and in the individual.

ANTHR 431 : Kinship and Gender. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Kinship theory and analysis, 1920-present. Recent issues in anthropological treatment of gender, marriage, and family structure.

Course Outcomes

- Students will learn the nature of kinship and the geneological basis of society. Students will also learn the importance of kinship when conducting fieldwork.

ANTHR 432 : Economic and Political Institutions. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Connections between wealth and power: political and legal systems in state and nonstate societies; global expansion of capitalism and technology.

Course Outcomes

- This course is designed to enhance student knowledge and skills as a scholar with relation to critical reading within the discipline, intelligent and informed discussion, and writing about past and current issues in global economics.
- Students will gain a working knowledge of political, legal, and economic anthropology as a preparation for the senior thesis, graduate programs, and possible careers in anthropological, political, legal, or economic fields.
- Students will expand their capacities to read with increased comprehension and to write coherently and persuasively in the discipline.
- Students will be given many opportunities to think critically about topics pertinent to the course content and their individual research assignments.
- Students will present their own individual research assignment in both written form and through the venues of a class presentation and discussion of the central themes and tenets as well as methodologies utilized within their individual research project.

ANTHR 434 : Medical Anthropology. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.; Winter Even Yrs.

RECOMMENDED: Anthr 247.

DESCRIPTION: Interactions between culture and health in comparative perspective, emphasizing social, historical, and ecological determinants.

Course Outcomes

There are no course outcomes available

ANTHR 436 : Symbolic Anthropology. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Social use and understanding of semiotics, signs, symbols, and other meaningful forms as critically constitutive of culture.

Course Outcomes

There are no course outcomes available

ANTHR 439 : Psychological Anthropology. (3:3:0)

DESCRIPTION: Culture/mind relationship. Cross-cultural variation in concepts of person, emotions, and treatment modalities by society. Psychological implications of cultural differences in childrearing.

Course Outcomes

- 1. Through this course students will develop a critique of both the overemphasis on macro-level 'structure' and 'culture' in mainstream anthropology, as well as the overly individualistic emphasis in psychology on micro-processes and the 'psyches' of individuals. Students will gain an appreciation for the extent to which 'mind' and 'culture' co-constitute one another in various dimensions of human experience.
- 2. Students will learn to critique the philosophical and theoretical assumptions inherent in various approaches to understanding human experience and intersubjectivity.
- 3. Students will learn to analyze cultural and psychological data from a person-centered ethnographic standpoint by engaging with readings and conducting a course project analyzing some psychocultural phenomenon and writing up the results.

ANTHR 441 : Anthropology of Development. (3:3:3)

DESCRIPTION: Theory, practice, and research methods regarding the anthropological study and resolution of poverty, disease, malnutrition, displacement, and inadequate educational opportunities.

Course Outcomes

- To enable the students to apply anthropological theory and ideas in a practical manner and by so doing to assess how the process of development has traditionally been done, say from 1945 to the present. Has that system worked? What have been its successes and failures, and why? We will study what the difficulties are that impede development, structurally, culturally, and environmentally. In addition, we will ask whether the cross-cultural analysis and communication perspective that anthropology (supposedly) excels in helps. Does or can the use of anthropological techniques and analysis help make development more successful? Has anthropologically-informed development worked? Where, when, why? And if not, why not? In a word, can the principles and practices of anthropology be used in development projects to produce something more successful and reliable in the way of development? Can the principles and skills be identified and learned or imparted to a group of students so that new practitioners can be more successful if they enter into some kind of development enterprise or project? These objectives will be achieved by a] studying class texts; b] undertaking an individual research project; c] preparing and presenting a critique of a development project based on a journal account. Outcomes will be the ability to better understand the role of Anthropology in development work coupled with greater knowledge and skills in carrying out personal development projects. This in turn will contribute to greater confidence; a greater ability to analyze and understand human activity, sociality and thought; a greater awareness of cultural diversity, and an increased ability to communicate both orally and in written work.

ANTHR 442 : Ethnographic Research Design and Methods. (3:2:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ANTHR 201 & ANTHR 202

RECOMMENDED: 300-level regionally relevant courses in the geographic area of interest.

DESCRIPTION: Methods and philosophy of social science research design. Rationale, limitations, ethical issues, and practices of participant observation, interviewing, quantitative measurement, and other methods. Developing complete research proposal for EthnographicField Project (Anthr 495). Securing IRB approval. Local fieldwork exercises.

Course Outcomes

There are no course outcomes available

ANTHR 443 : Ethnographic Data Analysis. (3:3:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 442

RECOMMENDED: Anthr 495R.

DESCRIPTION: Systematic text analysis of interview data, audio, video, and survey data. Grounded theory and content analysis. Coding methods and codebook development/management. Developing an empirically grounded analysis of qualitative or mixed-methods data. Using qualitative data analysis software.

NOTE: For sociocultural anthropology majors, Anthr 495R is most appropriate after thesis fieldwork is complete and data is ready for analysis.

Course Outcomes

There are no course outcomes available

ANTHR 454 : Field School Preparation. (2:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: Major status.

DESCRIPTION: Topics and training related to preparation for archaeological field school assignments and on-site excavation required for Anthr 455.

Course Outcomes
There are no course outcomes available

ANTHR 455 : Field School of Archaeology. (6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: ANTHR 215 & ANTHR 454

DESCRIPTION: Training and experience in excavation at a BYU-sponsored dig.

Course Outcomes
There are no course outcomes available

ANTHR 456 : Lab Skills for Anthropology. (3:1:Arr)

WHEN TAUGHT: Fall

PREREQUISITE: ANTHR 402 & ANTHR 455

DESCRIPTION: Analytical and laboratory techniques as part of a BYU-sponsored archaeological project.

Course Outcomes
There are no course outcomes available

ANTHR 460 : Practical Applications in Contract Archaeology. (3:1:9)

WHEN TAUGHT: Winter

PREREQUISITE: ANTHR 215

RECOMMENDED: Anthr 454, 455, 456.

DESCRIPTION: Working with professionals and graduate students on contract and research projects; learning archaeological field/laboratory methods; applying training to actual research projects, artifact analyses, site documentation, and report writing.

Course Outcomes
No outcomes are available at this time.

ANTHR 490R : Special Topics in Theory and System. (3:3:0)

OFFERED: Offered when unique opportunities or needs arise.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Subjects related to anthropological theory or the operation of social systems.

Course Outcomes
- Develop an enhanced understanding of social interaction, of what it means to be in the presence of others, and ultimately of human being and human beings.Prepare to do effective fieldwork and deskwork, to eventually produce accurate, useful, and insightful interpretations of various interactional practices.Describe the positions, ideas, and methods that will most help you make sense of various interactional practices, of particular social institutions, activities, events, roles, places, and objects.Demonstrate the ability to think soundly, to communicate effectively, and to write a clear and convincing essay.

ANTHR 491 : Directed Research for African Studies Minor. (3:2.5:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Enrollment in the African Studies minor.

DESCRIPTION: Students will work closely with a faculty member in the Anthropology Department who has extensive experience in Africa and African Studies to produce a 12-page paper/project related to African Studies or the African diaspora. Intenstive library reserach may be coupled with on-site experiences should these be available to individual students given their course schedules and resources.

Course Outcomes
No outcomes are available at this time.

ANTHR 495R : Ethnographic Field Project. (3-6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: ANTHR 203 & ANTHR 442

DESCRIPTION: Conduct field work. Maintain, code, and index field notes, interview transcripts, and other data sources in preparation for Anthr 499 thesis write-up.

NOTE: IRB approval and instructor's consent required before departure to field. No class meetings.

Course Outcomes
- Students will conduct independent field work and log field notes. Students will follow their own research plan developed in Anthr 442.

ANTHR 496R : Academic Internship: Research. (.5-3:ARR:ARR)

PREREQUISITE: Supervising instructor's consent.

DESCRIPTION: Field or library research.

Course Outcomes
- Complete a supervised internship in an employment setting or agency related to Anthropology.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

ANTHR 497 : Directed Readings. (3:ARR:0)

PREREQUISITE: Major status; Supervising instructor's consent.

DESCRIPTION: Reading 2,500 pages on a stated topic.

Course Outcomes
- Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in anthropology.

ANTHR 499 : Senior Thesis. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Anthr 205, 206, 442, 495 (for sociocultural); 205, 206, 215, 402, 454R, 455R, 456R (for archaeology).

DESCRIPTION: Supervised analysis and write-up of data generated during field project. Refinement for publication.

Course Outcomes
- Students will analyze data and field notes collected for Anthr 495 to produce publishable journal article, a large-size poster, and a conference presentation.

500-Level Graduate Courses (available to advanced undergraduates)

ANTHR 500 : History of Archaeology. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Acceptance into the graduate program.

DESCRIPTION: Historical approach to development of archaeological knowledge, method, and theory, emphasizing North America and individual contributions.

Course Outcomes
There are no course outcomes available

ANTHR 501 : Current Archaeological Method and Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Acceptance into the graduate program.

RECOMMENDED: Anthr 500.

DESCRIPTION: Major developments in archaeological method and theory, emphasizing current perspectives.

Course Outcomes
There are no course outcomes available

ANTHR 502 : Quantitative Methods for Anthropology. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Methods of organizing, exploring, and presenting data. Probability and statistical inference.

Course Outcomes
- Students will gain hands-on experience in applying differing types of quantitative analysis methods to artifacts and other materials recovered from the BYU Summer Field School in Archaeology. The strengths and weaknesses of each methodology will be emphasized as well as discerning which form of analysis best suits the research questions to be addressed.
- Students will learn to intelligently integrate appropriate forms of quantative methods to their senior thesis capstone project and demonstrate their abilities to utilize such methodologies as a professional in archaeology.

ANTHR 511 : Museums and Cultures. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Museums in society. Cultural foundations of museum content and sociology of museum use. Analyzing museum studies literature. Visits to and critiques of area museums. Final projects in real museums in the region.

Course Outcomes
- To introduce students to the unique and important roles that differing types of museums play in world cultures as well as how diverse cultures view museums and collective memory.
- Students will be provided hands-on, real-life experiences with museum collections related to the issues and methodologies introduced by the course.
- Students will have hands-on experiences in research, analysis, and writing related to the anthropology of museums both nationally and internationally.
- Students will be introduced to the major museum fields, their sub-fields,and their professional assumptions and opportunities, thus also helping students identify their own career interests in, and aptitudes for, the various museum disciplines.
- Student projects will introduce students to the team approach to museum work. Assignments will assist students in learning how to give professional and persuasive presentations of their written research in group settings.
- Students will be provided opportunities to work closely with professionals in the field and visit diverse museum types thus expanding their knowledge of the museum profession and practices.
- Students will be provided individual counseling in how to prepare for a career in the museum fields.

ANTHR 512 : Heritage Resource Management. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admittance into graduate program in archaeology or certificate program in museum practices.

DESCRIPTION: Legal and ethical issues for practicing archaeologists. Preservation law, collections law, public archaeology, Native American issues, and careers in archaeology and museums.

Course Outcomes

- Students will learn the history of cultural resource management and laws relevant to its inception and current state.
- Students are to understand the inherent value in cultural resource preservation.
- This course will instruct students in the basic methods necessary in carrying out compliance for the Section 106 review process.
- Students will learn the current fundamental issues relative to CRM in the U.S. and will discuss ways in which certain aspects of the field can be improved.

ANTHR 522 : Museum Practices and Technologies. (3:3:ARR)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Core museum disciplines: collections management, curation, education, exhibition, and conservation. Supporting technologies: database, digital photography, Web design, etc. Career paths.

Course Outcomes

- Students will have competency in a variety of computer software and technologies upon which museum practices are dependent.
- Students will learn how to work as leaders and/or team members in a museum setting.
- Students will be able to apply museum technologies effectively to ensure the success of various museum projects.
- Students will be familiar with career options in the museum field and understand what skills they need to develop to succeed.

ANTHR 524 : Museology: Curation and Writing. (3:3:ARR)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Admission to certificate in museum practices program.

DESCRIPTION: Professional practices supporting the educational, research, and reporting functions of museums, emphasizing museum writing leading to publication, cataloguing, policy writing, exhibition conceptualization, etc.

Course Outcomes

- Students will have hands-on experiences through class assignments in all aspects of writing associated with museum functions and curation including condition reports, registration documents and databases, exhibition research and panels, and educational materials.
- Students will also learn how to research and write a grant for a museum project or exhibition.
- Students will learn hands-on skills by developing, researching, and writing all materials necessary for a new exhibition at the Museum of Peoples and Cultures. This experience will also require students to work directly with collections held at the Museum or in other storage facilities.

ANTHR 525 : Museum Registration and Collections Management. (3:3:ARR)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Managing anthropological collections: object-handling, object-tracking, accessioning, deaccessioning, collections databases, loans, valuating collections, conservation environments, ethics, and NAGPRA and other laws relating to museums.

Course Outcomes

There are no course outcomes available

ANTHR 526 : Museum Exhibitions and Programming. (3:1:8)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: ANTHR 524

DESCRIPTION: Instruction and practica in all aspects of exhibition development. Current thought and literature in museum education with practica for application.

Course Outcomes

There are no course outcomes available

ANTHR 530 : Great Basin Archaeology. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: Anthr 350 or equivalent.

DESCRIPTION: Overview of ethnography, history of research, and prehistory of the Great Basin culture area. Current issues in archaeological research emphasized.

Course Outcomes

- Students will gain archaeological and cultural knowledge of the major native peoples of the Great Basin Region from pre-history through European contact through a study of their archaeologial remains and ethnographic studies.
- Students will have hands-on experiences with the collections of the Museum of Peoples and Cultures that are representative of the cultures of the Great Basin Region.

ANTHR 535 : Southwest Seminar. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: Anthr 350 or equivalent.

DESCRIPTION: Overview of ethnography and prehistory of American Southwest. Current issues in archaeological research emphasized.

Course Outcomes
There are no course outcomes available

ANTHR 562 : Formative Mesoamerica. (3:3:0)

DESCRIPTION: Topics and issues concerning beginnings and development of Mesoamerican civilizations. Mexican and Mayan antecedents of classic Mayan civilization and culture.

Course Outcomes
There are no course outcomes available

ANTHR 564 : Classic Mayan Civilization. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Topics and issues concerning archaeological and cultural aspects of classic Mayan civilization and society.

Course Outcomes
- Students will gain an in-depth knowledge of the development and accomplishments of the Classic Mayan Civilization at a graduate level.
- Students will expand their abilities to critically problem solve and write effectively in the discipline through class assignments including readings, class discussion, and research paper assignments.
- Students will gain a graduate level knowledge of Classic Mayan material culture through class readings, discussions, writing assignments, and the study of actual material artifacts including but not limited to pottery samples.
- Students will gain a graduate level knowledge of archaeological field methodologies that are pertinent to the excavation of Mayan sites.

ANTHR 565 : Mayan Ceramic Analysis. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Current approaches to classification and analysis of archaeological ceramics, particularly Maya Lowland pottery. Laboratory study of pottery collections from the Maya area.

Course Outcomes
There are no course outcomes available

ANTHR 566 : Mayan Ethnohistory. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Topics and issues of cultural change, colonization, and documentation of change processes in the Mayan region, from postclassic period and independence from Spain.

Course Outcomes
There are no course outcomes available

ANTHR 580 : Near East Seminar. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Current issues in Near Eastern archaeological research.

NOTE: Undergraduates may enroll if they have completed 30 hours in anthropology coursework.

Course Outcomes
- Topics vary according to the instructor's research interests. However, each graduate seminar must provide students an intensive mentored research experience in the archaeology of the Near East. Often the seminars are organized by topic. Example: The Archaeology of Mortuary Practices Applied to the Archaeological Data Set of the Near East. Each Seminar must increase the students' research, critical thinking, analysis, and writing skills in the discipline.

ANTHR 590R : Special Topics. (3:3:ARR)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Special topics in archaeology or museum studies.

Course Outcomes
- Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in Anothropology studies.

ANTHR 596 : Museum Projects. (3:0:8)

WHEN TAUGHT: Spring Odd Yrs.

PREREQUISITE: ANTHR 524 & ANTHR 526

DESCRIPTION: One or more supervised museum projects, such as producing an exhibition, developing educational materials, conducting inventory, or accessioning collections.

Course Outcomes
There are no course outcomes available

ANTHR 599R : Academic Internship: Federal Agency on Museum/Collections Repository. (1-6:0:0)

PREREQUISITE: Prior approval; completion of all course work for certificate in museum practices (may be taken concurrently with Anthr 596).

DESCRIPTION: Earning credit while employed in federal agency archaeology (BLM, U.S. Forest Service, etc.); or 320 hours in collections-holding institution (sixteen weeks half-time; eight weeks full-time).

Course Outcomes
There are no course outcomes available

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

Admission to Degree Program

All degree programs in the Department of Economics are open enrollment. However, special limitations apply for teaching majors.

The Discipline

Economics examines how societies choose to allocate scarce resources among competing uses. A broad range of contemporary policy issues are studied in fields such as natural resource and environmental economics; economic development and growth; international trade and finance; economic history; the organization of industries; the development and efficiency of law; business cycles; labor markets; and public and private finance.

Career Opportunities

Professional economists work in three basic areas: business, government, and academics. Undergraduates generally pursue training beyond their BS/BA in economics if they wish to become professional economists.

Those in business forecast and analyze various aspects of the economy or of particular markets and most often work for brokerage firms, business or economic consulting firms, investment banks, insurance companies, or large manufacturing firms.

Those in government accumulate, interpret, and analyze national and international data in support of policy development and work for agencies such as the U.S. State Department, Treasury Department, Bureau of Labor Statistics, and Office of the Trade Representative; for state planning bodies and regulatory commissions; or for international bodies like the World Bank or IMF.

Academic economists teach and conduct research at colleges and universities. Entry into these positions requires training at least as far as the master's level; for the most part, the professional degree is the PhD.

Undergraduates who are not interested in postundergraduate study in economics generally pursue one of three options: graduate training in a profession (e.g., the MBA, MPA, JD, or MD); employment with a business consulting, economic consulting, brokerage, or other specialized service provider that relies to a substantial degree on economic analysis; or employment with a government agency or entity that relies on economic analysis and data. In the latter two areas, those with BAs typically gather and analyze data and provide research support under the direction of professional staff economists. A BA/BS in economics is also very good preparation for those interested in foreign service careers or work with organizations in economic development, international finance, or actuarial licensing. Many undergraduates pursue business careers, including those of finance, marketing, sales, and production.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BA in Economics (Program Outcomes)

Program Requirements | View MAP | View Program Outcomes

1. The Economics Department requires a minimum of 21 hours in the major to be taken in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Major courses: complete the following with a grade of C– or better:

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

ECON 378 : Statistics for Economists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: ECON 110 & MATH 112
DESCRIPTION: Introduction to matrix algebra and statistics in preparation for regression analysis. Other topics include: probability, random variables, density and distribution functions, estimation, hypothesis testing.

Course Outcomes
- Demonstrate an understanding of the basic principles and terminology of probability, simple distribution theory, statistics, and matrix algebra in preparation for a successful introduction to econometric methods in Economics 388. These principles and concepts include:The language, intuition, and notation necessary to understand basic approaches to probability, including basic combinatoric counting techniques, the additive and multiplicative laws of probability, conditional probability and independence, the law of total probability, and Bayes' rule, and to solve basic probability problems using these techniques.Random variables, both univariate and bivariate, including: distribution functions, density functions, conditional density, expected values, variance, covariance, and correlation coefficients. Specific examples of useful random variables.Statistics and sampling distributions.Law of Large Numbers and Central Limit Theorem. Parameter estimators and their derivation using the Method of Moments and Method of Maximum Likelihood.Statistical inference, including the idea of sampling error, sampling distributions, the construction of confidence intervals, and formal hypothesis tests.Basic matrix theory and the properties of matrix operations, including addition, subtraction, matrix products, matrix determinants, and matrix inversion.Use these statistical techniques to analyze data in diverse applications. Recognize the usefulness of statistics in a variety of career fields.

(or equivalent)

ECON 380 : Intermediate Price Theory 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: ECON 110 & MATH 112
DESCRIPTION: Producer, consumer, and equilibrium theories; mathematical techniques of unconstrained and constrained optimization introduced and applied extensively.

Course Outcomes
- Recognize the common building blocks of economic models (actors, choices, objectives, constraints)Solve economic models (constrained optimization, equilibrium conditions) Interpret the results (comparative statics)Explain concepts using graphs, prose, and mathematical analysis
- ConsumerThe axioms upon which standard microeconomic consumer theory is based.The implications of consumer demand including price and income responses in absolute and elasticity forms in both utility maximization and expenditure minimization problems.FirmsThe meaning and representation of technologyThe implications of cost and profit maximization for firmsMarketsIntegrate consumers and

producers into a market in order to perform market analysis on equilibrium traded quantities and pricesUse market analysis to understand the effects of public policy
- Compare the impact on equilibrium behavior of altering the assumptions of canonical modelsContrast the results of different market imperfections

ECON 381 : Intermediate Macroeconomics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 110 & MATH 112; Math 112 can be concurrent enrollment.

DESCRIPTION: Intermediate macroeconomic theory, emphasizing income, unemployment, and price-level analysis.

Course Outcomes
- Demonstrate an understanding of the nature and construction of key macroeconomic data;Demonstrate an understanding of the connection between microeconomics and macroeconomics;Demonstrate an understanding of standard models ofeconomic growthlong-run macroeconomic behaviorshort-run macroeconomic behaviorUse these models to analyze the macroeconomic effects of monetary and fiscal policy changes as well as other economic shocks;Use these models to interpret historical and current events; andDemonstrate an understanding of issues regarding the value and limitations of monetary and fiscal policy.

ECON 382 : Intermediate Price Theory 2. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Welfare theory, imperfect information, imperfect competition, uncertainty, externalities, and public goods.

Course Outcomes
- Formally express and analyze economic modelsRecognize the common building blocks of economic models (actors, choices, objectives, constraints)Solve economic models (constrained optimization, equilibrium conditions)Interpret the results (comparative statics)Demonstrate an understanding of the core microeconomic models ofPerfect competition in general equilibrium (exchange and production)Monopoly and oligopolyExternalities and public goodsDecision-making under uncertainty (expected utility)Information problems (moral hazard, adverse selection)Adapt models to new scenariosCompare the impact on equilibrium behavior of altering the assumptions of canonical modelsContrast the results of different market imperfectionsEstablish a knowledge base that will be useful in economic field classesApply models in various real-world examples and identify the positive and normative conclusions in that environment

ECON 388 : Introduction to Econometrics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Mathematical and statistical techniques used in estimating, predicting, and testing hypotheses associated with quantifiable economic relationships.

Course Outcomes
- Demonstrate an understanding of the theoretical foundations of estimating and testing the basic regression model, employing tools from matrix algebra, calculus, and statistics.Perform basic regression and testing procedures using Stata. Complete an empirical research project that includes the following elements:.Formulate an econometric model.Collect and prepare relevant data for use in estimating the model.Use appropriate methods of estimation.Test relevant behavioral hypotheses.Understand and test the Gauss-Markov assumptions.Analyze and interpret the estimated model.Prepare a written report summarizing the research results.

Note: Stat 201 and Math 313 may be substituted for Econ 378.

3. Supporting courses: complete the following:

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes
- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

Note 1: A *university* calculus course such as Math 112 or 113 is strongly recommended. Deferred students

are encouraged to take a refresher math course such as Eng T 295R before or concurrent with Econ 378, 380, or 381.

Note 2: For students contemplating graduate work in economics, the 500-level economics courses plus Math 113, 313, and 314 are strongly recommended.

4. Complete GE Foreign Language or 7 hours of mathematics in addition to Math 112.

5. Complete 15 hours from the following (at least 12 hours must be from courses 410-588):

ECON 213R : Topics in Economic Analysis. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

PREREQUISITE: ECON 110

Course Outcomes

There are no course outcomes available

ECON 230 : Economic Development and Growth. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: ECON 110

DESCRIPTION: Problems and processes of economic growth and development, emphasizing less-developed nations.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Be familiar with the labor and consumption patterns among the world's poor.Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 110 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsGain a basic understanding of econometric methods used in testing economic theories in growth and development.Analyze the Solow Growth model and its implications for economic growth.Explain the functioning of the credit and capital market:How it relates to alleviating poverty and stimulating economic growth.Why it may be prone to information problems and the implications of those problems.Discuss the potential role of government in economic development. Especially as it relates to:Public Goods and ExternalitiesEnforcing ContractsCorruptionExplain the importance of labor, health, and education to the lives of those in developing countries and how these fields relate to improving outcomes among the poor.

ECON 253 : Money and Banking. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Economic principles applied to monetary analysis and policy and the banking structure.

Course Outcomes

No outcomes are available at this time.

ECON 257 : International Trade and Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ECON 110

DESCRIPTION: Economic analysis of the mechanisms, problems, institutions, and policies of trade among countries. Financial and monetary arrangements that facilitate trade.

Course Outcomes

- Explain the key developments (models) in the intellectual history of the study of the patterns of trade in goods and services from Adam Smith through the present.Broadly discuss the evidence which supports or is contrary to the application of these developments to particular countries and goods and services.Analyze policy within the context of these models in order to gain insights about the patterns of trade.Analyze the gains from international trade with these key models and understand the political economy of trade (who gains and who loses from trade).Analyze the patterns, gains, and losses from international trade (migration) in financial and direct foreign investment and labor migration in the short and long runs.Analyze the reasons for international outsourcing portions of production and the gains and losses from doing so.Identify how trade in goods, services, and capital enter the international income accounts and the balance of payments.Discuss how exchange rates affect trade and how trade, fiscal, and monetary policy affects exchange rates.Explain the essential differences in fiscal and monetary effects for floating and fixed exchange rates.Broadly discuss the development of U.S. trade policy and the world institutions that support international trade and finance.

ECON 274 : American Economic History. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Impact on households, firms, and government of America's transformation from a rural, agricultural colony to a major industrial nation.

Course Outcomes

There are no course outcomes available

ECON 275 : Public Finance. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Economics of decision making in the public sector; cost-benefit analysis and efficiency-equity issues of taxation and expenditure policies.

Course Outcomes

- Discuss the revenue, expenditure, and debt patterns of the U.S. Federal Government.Analyze how welfare impolications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsInformation ProblemsDemonstart an understanding of the function and incentive effects of the major redistribution programs in the United States.Demonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.Discuss the efficiency and distributional effects of taxation.

ECON 410 : Agricultural Economics. (3:3:0)

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Application of supply and demand concepts to price determination and analysis in agricultural markets.

Course Outcomes

No outcomes are available at this time.

ECON 413R : Topics in Economic Theory. (.5-5:ARR:ARR)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

Course Outcomes

- Learn in depth about an area of research in economics;Understand the research literature and in particular the contributions of the seminal articles;Analyze current journal articles and assess their contribution to the literature.

ECON 415 : History of Economic Thought. (3:3:0)

PREREQUISITE: ECON 380 & ECON 381

Course Outcomes

No outcomes are available at this time.

ECON 420 : Economics of Antitrust Law and Regulation. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

RECOMMENDED: Econ 382.

DESCRIPTION: Economic analysis of reasons for - and effects of - antitrust laws and regulation in selected areas, including utilities, telecommunications, transportation, energy, health, safety, and the environment.

Course Outcomes

- Demonstrate basic familiarity with the provisions of the principal Federal antitrust statutes, including the Sherman Act, the Clayton Act, the FTC Act, the Robinson-Patman Act, and the Hart-Scott-Rodino Act.Evaluate the likely effects of Section 1 of the Sherman Antitrust Act using monopoly, Cournot, Stackelberg, and Bertrand models of non-cooperative behavior among a small number of rival firms.Evaluate the likely effects of Section 2 of the Sherman Antitrust Act using simple analytical models of predation, exclusion, tying, bundling.Evaluate the likely effects of laws limiting price discrimination, including the Robinson-Patman Act, using simple analytical models of price discrimination.Evaluate the likely effects of Section 7 of the Clayton Act and the HRS Act using simple analytical models of mergers.Evaluate public regulation of monopolies as an alternative to relying on antitrust law using simple analytical models of rate-of-return regulation, nonlinear pricing and peak load pricing.Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific antitrust issue.

ECON 421 : Law and Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Common law allocative mechanisms (contract, tort, and property law) as alternatives to collective intervention when markets fail; consideration of economic logic of law.

Course Outcomes

- Demonstrate a basic familiarity with the Common Law.Analyze the incentives created by Common Law tort rules.Analyze the incentives created by Common Law contract rules.Distinguish between “property rules” and “liability rules” with regard to property rights.Evaluate the relative efficiency of specific tort rules.Evaluate the relative efficiency of specific contract rules.Analyze the incentives to litigate or settle under different rules about which party pays the costs of the litigation.Analyze the incentives created by criminal sanctions.Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific tort, contract or property issue.

ECON 431 : Economic Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 380; Econ 388 (or concurrent enrollment) or Pl Sc 328.

DESCRIPTION: Microeconomic analysis of the causes of income differences across countries.

Course Outcomes

- Discuss the labor and consumption patterns among the world’s poor.Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property Rights.Discuss the functioning of the credit and capital market:How it relates to alleviating poverty and stimulating economic growth.Why it may be prone to information problems and the implications of those problems.Explain the potential role of

government in economic development, especially as it relates to:Public Goods and ExternalitiesEnforcing ContractsCorruptionExplain the importance of labor, health, and education to the lives of those in developing countries and how these fields relate to improving outcomes among the poor.

ECON 432 : Economic Growth. (3:3.0:0.0)

PREREQUISITE: ECON 380 & ECON 381

RECOMMENDED: Econ 388.

DESCRIPTION: Theory and evidence relating to economic growth, including physical and human capital accumulation, population, technological change, institutions, and government.

Course Outcomes

- Adjust values in one currency to values in another currency controlling for purchasing power parity (PPP) deviations.Demonstrate an understanding of basic dynamic models of economic growth, including:The Solow modelThe Solow model with population growthThe Harrod-Domar modelAK modelsModels of product varietySchumpeterian models.Discuss growth and development accounting, and decompose observed differences across countries into efficiency and technology components.Discuss Lorenz curves and Gini coefficients.Discuss how growth interacts with:Population & demographyHuman capitalTechnical progressOpennessGovernmentInequalityCultureGeography, Climate & Resources.

ECON 440 : Natural Resources and Environmental Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 380 & ECON 388

RECOMMENDED: Econ 382.

DESCRIPTION: Economic theory applied to allocation of natural resources and environmental amenities. Issues relating to externalities, common property resources, public goods, allocation of depletable natural resources over time, economic factors of environmental polarization, and others.

Course Outcomes

- Utilize economic principles and models to address private and public policy issues related to allocating natural resources and environmental amenities.Demonstrate an active understanding of the following elements of economic theory as it relates to natural resource and environmental economics:Welfare economics and concepts of Pareto optimality, efficiency, and equityThe role of property, property rights, and the bundle of rights conceptThe role of externalities, common property resources, and public goodsConcepts and measures of economic value including non-market valuation.Demonstrate a basic knowledge of the role of markets and market failure with regards to the allocation of natural resources and environmental amenities.Gain a basic understanding of the effects and relative merits of public environmental policy efforts, including cap-and-trade schemes, Pigovian taxes, regulation, and public ownership and/or management.Become knowledgeable about and be able to use economic principles and non-market valuation techniques to address a variety of continuing and contemporary natural resource and environmental issues. These issues may include, but are not exclusive to:Population growth and the environmentGlobal warmingWilderness protection and related public lands issuesAir pollution and public healthIntergenerational allocation of soil, forest, and other depleteable natural resourcesImpacts of environmental features on property values.

ECON 450 : Financial Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 382 & ECON 388

DESCRIPTION: Theory of financial economics, emphasizing capital markets, investment decisions, choice, capital asset pricing model, futures and options markets, efficient markets, and capital structures.

Course Outcomes

- Understand and derive the fundamental relationship between risk and return that is implied by the Capital Asset Pricing Model (CAPM). Students should also know the assumptions necessary for this model to hold and be capable of identifying when potential investment projects satisfy these assumptions.Use linear regression to calculate an asset's historical sensitivity to broad market indices, its implied historical mispricing and an estimate of the asset's idiosyncratic risk. Students should also be capable of performing hypothesis testing on these values.Replicate traditional tests of the CAPM using currently available data.Be capable of collecting and analyzing asset market data to estimate the efficient frontier of risky assets using either Excel or another software package. Students should also be able to understand the efficient frontier mathematically and the reasons that it is useful.Calculate the present value of a stream of payments given an appropriate discount factor. Students should know how to use the CAPM to derive potential discount factors for payment streams.Calculate the yield to maturity of a stream of payments given an observed price. Students should also understand the relationship between the coupon rate of traditional bonds, their price and their yield to maturity.Calculate forward rates for all future periods given the observed yield curve.Understand the liquidity preference theory of bond markets as well as the expectations hypothesis. They should also be able to price complicated payment streams using observations of the yield curve and the expectations hypothesis.Calculate the duration and modified duration of a stream of payments and use these to calculate optimal hedges given an arbitrary position in the fixed income market.Calculate and understand bond convexity and its role (along with duration) in hedging.Price forward contracts by arbitrage given a risk-free rate.Price futures contracts whose payoffs are not correlated with the market reinvestment rate. Understand currently used hypotheses regarding futures contract pricing.Understand the structure of call and put options.Price put options given a call option (and vice versa) using the put-call parity relationship.Apply the Black-Scholes option pricing formula to price call and put options given beliefs about the volatility of the underlying asset.Apply the Black-Scholes option pricing formula to calculate the implied volatility of an asset given its price.

ECON 453 : Monetary Theory and Policy. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: ECON 380 & ECON 381

RECOMMENDED: Concurrent enrollment in Econ 388.

DESCRIPTION: Macroeconomic aspects of money demand, money supply, the monetary transmission mechanism, central bank policy, and other current issues.

Course Outcomes

- Summarize the broad empirical evidence regarding the long-run and short-run relationships between money and inflation and money and output.Demonstrate a fundamental knowledge of the institutional and regulatory structure of the U.S. financial system.Explain the macroeconomic role of central banks with special emphasis on the role of the Federal Reserve System in the U.S. economy.Demonstrate an active understanding of the following elements of modern monetary theory:The role of expectations, especially rational expectationsSolve simple rational expectations modelsAnalyze the rudimentary new Keynesian dynamic stochastic general equilibrium modelsTheories of the transmission mechanism of monetary policyIdentify the current issues in the conduct of monetary policy.Demonstrate a general understanding of the causes and consequences of financial crises with a focus on the financial crisis of 2007-2009.Identify and evaluate the principal issues regarding financial regulation.

ECON 458 : International Trade Theory and Applications. (3:3:0)

PREREQUISITE: ECON 380

DESCRIPTION: Microeconomic analysis of why nations trade, who wins and loses from trade, and the costs and benefits of various trade policies.

Course Outcomes

- Discuss why all kinds of nations—rich and poor, large and small—gain from international trade.Demonstrate an understanding of comparative advantage and how it creates gains from trade.Analyze the Ricardian model of trade and thereby learn how different technologies in different nations create comparative advantage and gains from trade.Analyze the Heckscher-Ohlin model of trade and thereby learn: 1) How different factor endowments in different nations create comparative advantage and gains from trade, and 2) Why some people lose from trade even though nations as a whole gain from trade.Discuss economies of scale and how they can generate gains from trade.Discuss how trade generates extra gains by reducing market power.Demonstrate an understanding of the main causes and effects of direct foreign investment.Demonstrate an understanding of the main causes and effects of international migration.Discuss how various trade policies affect national welfare and why such policies help some while hurting others.Discuss the politics of trade.

ECON 459 : International Monetary Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 381 & ECON 388; or ECON 381 & PL SC 328

DESCRIPTION: Monetary and macroeconomic aspects of international relations dealing primarily with short-run balance-of-payments disequilibrium and adjustments.

Course Outcomes

- Demonstrate a familiarity with the key issues in two broad fields:International Finance, particularly exchange rate behavior, Open Economy Macroeconomics.Discuss the nature of the foreign exchange market, including:It's market organizationThe role of vehicle currenciesThe instruments tradedThe role of arbitrage.Understand and use models of exchange rate behavior:Covered and uncovered interest rate parityLong-run monetary and equilibrium models.Understand financial portfolio theory to the extent that it is useful in explaining exchange rate behavior, including:The determination of risk premiaHow it may explain the "forward bias" puzzle.Discuss the history of the international financial system since the late 1700's.Discuss the international aspects of the national income and product accounts, along with the balance of payments accounts.Apply simple dynamic models of consumption smoothing to the current account.

ECON 461 : Economics of Education. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Evaluation of education policy from an economic perspective, focusing on the benefits and costs of policy outcomes. Introduction to quantitative methods used by empirical education researchers.

NOTE: Concurrent enrollment accepted for Econ 388; see professor.

Course Outcomes

- Evaluate education policy from an economics perspectiveIncorporate costs and benefits in education policy analysisIdentify unintended consequences associated with alternative policy optionsBase analysis on research literature findings.Demonstrate an understanding of the theoretical underpinnings of the fieldEducation productionHuman Capital formationRole of incentives.Speak fluently and intelligently about current issues in education policy, includingUS and International policyTeacher labor marketsK-12 education policyHigher education.Evaluate the economics of education research literatureKnow the seminal papers in the field, and how they shaped the disciplineKnow the current "cutting edge" papers and how they are pushing the frontiers of knowledge.Demonstrate an understanding of the quantitative methods and research tools that empirical education economists use to conduct research, includingCross sectional and panel data modelsMethods to account for selection biasThe importance of obtaining causal effects.

ECON 463 : Economics of the Labor Market. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Economic analysis and institutional background of labor markets in developed countries, particularly the United States. Typical topics include labor supply and demand analysis, determination of wages and employment, investment in education, wage differences by gender and race, immigration, and unions.

Course Outcomes

- Demonstrate an understanding of standard optimization models to set up and solve the labor supply problem facing the individual and the labor demand problem facing the firm and show the important comparative statics results of both models. Students will understand how these models produce the

neoclassical market framework and be able to solve problems using that framework.Solve and use other microeconomic optimizing models of agent behavior, such as models of job search, human capital choices, labor supply, and demand in risky occupations, union wage setting, and behavior under alternative compensation schemes.Demonstrate an understanding of the basic institutional structure of the U.S. labor market, including broad trends in labor supply behavior and wages and the institutional details and likely labor market effects of major government programs.Read and discuss high quality empirical research on labor economic topics and explain how these results interrelate to the predictions of formal economic models.Complete an empirical project demonstrating competence in basic econometric techniques.Identify some of the ways in which government policy choices affect labor market outcomes

ECON 465 : Health Economics. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: ECON 382 & ECON 388

DESCRIPTION: Economic models of health-care markets, including the supply and demand for health and health care, insurance, market imperfections, public-sector involvement, and regulation.

NOTE: Concurrent enrollment accepted for Econ 388; see professor.

Course Outcomes

- Read, understand, and discuss the academic literature in health economics. A daily quiz will be administered to test understanding of the reading.Participate in linking academic research to contemporary policy discussions through class discussion and preparation of occasional class presentations.Complete a major research project in which they either 1) summarize and evaluate the available evidence on a particular policy question, or 2) conduct an original research project where they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

ECON 468 : Urban Economics. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380; Econ 388 or concurrent enrollment.

DESCRIPTION: Economic models relating to spatial location of economic activities and development of cities. Application of economic theory to problems and policies associated with housing, urban transportation, congestion, local government finance, and other urban problems.

Course Outcomes

- Demonstrate an understanding of the role of transportation costs in determining land uses and land prices.Demonstrate a familiarity with the monocentric city model of land use and its use in understanding the impact of local land use and transportation policies.Apply the basic models of housing demand and the role of filtering in determining the stock of housing in a city.Demonstrate an understanding of the economic concepts of external costs and how these play a role in air pollution and highway congestion. Apply the concept of Pigouvian pricing as a solution to externality problems in the case of highway congestion.Discuss the role of time costs in consumers' choice of transportation mode, and why collection and distribution parts of urban trips are so important in determining the proper design of mass transit systems. Demonstrate an understanding of the role of economies of scale in efficient mass transit design.Use the basic economic model of "rational" crime to predict the impact of various anti-crime policies.

ECON 474 : Topics in Economic History. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECON 380; Econ 388 or concurrent enrollment.

Course Outcomes

There are no course outcomes available

ECON 475 : Public Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Evaluation of the role of government from an economic perspective. Typical topics include taxation, externalities, public goods, corruption, public choice, Social Security, Medicare and Medicaid, education, income redistribution, and crime.

Course Outcomes

- Discuss the revenue, expenditure, and debt patterns of the U.S federal government.Analyze how modifying the neoclassical assumptions learned in 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsInformation ProblemsHyperbolic Discounting or Loss AversionDemonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.Discuss the efficiency and distributional effects of taxation and the theory of optimal taxation for both income and commodity taxes.Read papers in the public economics literature andProvide written and oral critiques of the papersApply modern tools of econometric analysis in discussing the papers

ECON 476 : Industrial Organization. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECON 378; or STAT 201 & MATH 313

DESCRIPTION: Industrial organization focuses on firm behavior in imperfectly competitive markets. Typical topics include the acquisition and use of market power by firms, strategic interactions among firms, and

an introduction to noncooperative game theory.

Course Outcomes
- Analyze basic models of competition among firms producing homogeneous goods: competition, monopoly, Cournot oligopoly, Bertrand oligopoly, Stackelberg oligopoly.Apply basic game theory including solution concepts for normal and extensive form games.Demonstrate an understanding of extensions to these basic model, including supergames, models of product differentiation, and games of incomplete information.Apply these models to key issues in theoretical and applied industrial organization: mergers, collusion, advertising, R&D competition, antitrust policy, entry accommodation and entry deterrence, and business strategy.Discuss the role of government in the market in determining antitrust policy, patent policy, and regulation.Read, synthesize, and write short review papers on applied or empirical papers from the industrial organization literature.

ECON 478 : Game Theory and Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Application of game theory to study strategic interaction between individuals and organizations. Applications include imperfect competition, insurance markets, and bargaining.

Course Outcomes
- Demonstrate an understanding of the game theoretic method of analysis.Define a Nash Equilibrium and discuss refinements of the Nash Equilibrium Concept.Think abstractly and rigorously about strategic interaction.

ECON 482 : Welfare Economics. (3:3.0:0.0)

PREREQUISITE: ECON 378 & ECON 382; or STAT 201 & MATH 313 & ECON 382

DESCRIPTION: General equilibrium theorems and considerations that must guide applied economic work and provide quantitative information on the effects of alternative policy measures.

Course Outcomes
No outcomes are available at this time.

ECON 486 : Mathematical Economics. (3:3:0)

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Further development of optimization and comparative statics. Differential equations and dynamic analysis.

Course Outcomes
No outcomes are available at this time.

ECON 488 : Applied Econometrics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 388

DESCRIPTION: Application of econometric methods, introduction to research design, and evaluation of empirical research. Special attention given to linking economic theory and econometrics, and causal inference.

Course Outcomes
- Demonstrate an understanding of the assumptions underlying commonly used empirical approaches for the identification of causal effects, including:Ordinary least squaresMatchingInterrupted time seriesDifference in differencesFixed effectsInstrumental variablesDemonstrate an understanding of the interplay between economic theory and empirical work.Read and understand contemporary academic literature in economics. Students will provide written evaluations of selected academic papers, including a clear description and critique of the empirical methods used.Apply modern empirical methods using data analysis exercises.Complete a research project in which they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

ECON 580 : Advanced Price Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 378 & ECON 382; or STAT 201 & MATH 313 & ECON 382

DESCRIPTION: Modern theories of consumers, producers, and competitive equilibria.

Course Outcomes
- Use the tools of constrained optimization in analyzing comparative statics results arising in the study of economic phenomena.

ECON 581 : Advanced Macroeconomics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 381 & ECON 382 & ECON 388

DESCRIPTION: Theory of determining national income, employment, inflation, and interest rates. Issues of economic fluctuations, economic growth, and monetary and fiscal policy.

Course Outcomes
- Acquire a toolset for analyzing modern macroeconomic models.Demonstrate an understanding of basic dynamic stochastic general equilibrium (DSGE) macroeconomic modeling, including:How to set up a

model.How to render it stationary, if necessary.How to solve for the model's steady state both analytically and numerically.How to solve for the model's dynamics using various numerical techniques.How to calibrate the model.How to simulate the model economy.How to generate impulse response functions.How to generate data moments.How to estimate model parameters using simulated method of momentsUse MATLAB and Dynare, software packages widely used in macroeconomic model simulation.Demonstrate an understanding of other macroeconomic models, such as:Overlapping generations (OLG) models.Continuous-time Ramsey-style models.Estimate and interpret structural vector autoregression (SVAR) empirical models.Demonstrate an understanding of current issues being addressed in macroeconomics research.Be prepared to perform well in the macroeconomics classes in the top Ph.D. programs in economics.

ECON 582 : Topics in Mathematical Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 580

DESCRIPTION: Advanced topics such as risk and uncertainty, game theory, and capital theory.

Course Outcomes

- Economics 582 is a topics course with the goal of showing students the frontier. By its nature, the course exhibits different learning objectives each time it is taught.

ECON 586 : Advanced Mathematics for Economists. (3:3:0)

PREREQUISITE: ECON 380 & MATH 314

DESCRIPTION: Advanced mathematical methods that have proved useful in economic modeling.

Course Outcomes

No outcomes are available at this time.

ECON 588 : Advanced Econometrics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Theory and practice of formulating, estimating, and analyzing economic models.

Course Outcomes

- Demonstrate a familiarity with the properties and applications of several families of statistical distributions to econometric problems.Demonstrate an understanding of variations and generalizations of the basic regression model includingGeneralized least squaresGeneralized autoregressive conditional heteroskedasticity modelsInstrumental variablesSeemingly unrelated regression modelsPanel dataHausman specification tests.Demonstrate an understanding of estimation frameworks in econometric models includingParametric, semiparametric, and non parametric specificationsMaximum likelihood, M-, generalized method of moments, kernel, empirical likelihood, and extremum estimation.Formulate and estimate various nonlinear models.Identify and estimate autoregressive integrated moving average (ARIMA) models and obtain forecasts of economic variables.Demonstrate an understanding of dynamic (and static) structural econometric models including being able to discussReduced form, structural, and transfer function representationsThe identification problemIssues of estimation and statistical inferenceVector autoregression models.Complete a research project in which they formulate a research question, apply appropriate methods to answer the question, and prepare a paper summarizing their results.

Note 1: The 200-level field courses are intended as interim courses as a student moves from Econ 110 into the 300-level core courses. Once the student has completed Econ 380, he or she is strongly encouraged to take the 400-level rather than the 200-level field courses.

Note 2: Students should not take both a 200-level and a 400-level course with the same last two digits (e.g., Econ 275 and 475), although they are encouraged to take the 300- and 500-level theory classes (e.g., Econ 380 and 580).

*Hours include courses that may fulfill university core requirements.

Program Requirements | View MAP | View Program Outcomes

1. The Economics Department requires a minimum of 21 hours in the major to be taken in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Major courses: complete the following with a grade of C– or better:

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

ECON 378 : Statistics for Economists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: ECON 110 & MATH 112
DESCRIPTION: Introduction to matrix algebra and statistics in preparation for regression analysis. Other topics include: probability, random variables, density and distribution functions, estimation, hypothesis testing.

Course Outcomes

- Demonstrate an understanding of the basic principles and terminology of probability, simple distribution theory, statistics, and matrix algebra in preparation for a successful introduction to econometric methods in Economics 388. These principles and concepts include:The language, intuition, and notation necessary to understand basic approaches to probability, including basic combinatoric counting techniques, the additive and multiplicative laws of probability, conditional probability and independence, the law of total probability, and Bayes' rule, and to solve basic probability problems using these techniques.Random variables, both univariate and bivariate, including: distribution functions, density functions, conditional density, expected values, variance, covariance, and correlation coefficients. Specific examples of useful random variables.Statistics and sampling distributions.Law of Large Numbers and Central Limit Theorem. Parameter estimators and their derivation using the Method of Moments and Method of Maximum Likelihood.Statistical inference, including the idea of sampling error, sampling distributions, the construction of confidence intervals, and formal hypothesis tests.Basic matrix theory and the properties of matrix operations, including addition, subtraction, matrix products, matrix determinants, and matrix inversion.Use these statistical techniques to analyze data in diverse applications. Recognize the usefulness of statistics in a variety of career fields.

(or equivalent)

ECON 380 : Intermediate Price Theory 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: ECON 110 & MATH 112
DESCRIPTION: Producer, consumer, and equilibrium theories; mathematical techniques of unconstrained and constrained optimization introduced and applied extensively.

Course Outcomes

- Recognize the common building blocks of economic models (actors, choices, objectives, constraints)Solve economic models (constrained optimization, equilibrium conditions) Interpret the results (comparative statics)Explain concepts using graphs, prose, and mathematical analysis
- ConsumerThe axioms upon which standard microeconomic consumer theory is based.The implications of consumer demand including price and income responses in absolute and elasticity forms in both utility maximization and expenditure minimization problems.FirmsThe meaning and representation of technologyThe implications of cost and profit maximization for firmsMarketsIntegrate consumers and

producers into a market in order to perform market analysis on equilibrium traded quantities and pricesUse market analysis to understand the effects of public policy
- Compare the impact on equilibrium behavior of altering the assumptions of canonical modelsContrast the results of different market imperfections

ECON 381 : Intermediate Macroeconomics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 110 & MATH 112; Math 112 can be concurrent enrollment.

DESCRIPTION: Intermediate macroeconomic theory, emphasizing income, unemployment, and price-level analysis.

Course Outcomes
- Demonstrate an understanding of the nature and construction of key macroeconomic data;Demonstrate an understanding of the connection between microeconomics and macroeconomics;Demonstrate an understanding of standard models ofeconomic growthlong-run macroeconomic behaviorshort-run macroeconomic behaviorUse these models to analyze the macroeconomic effects of monetary and fiscal policy changes as well as other economic shocks;Use these models to interpret historical and current events; andDemonstrate an understanding of issues regarding the value and limitations of monetary and fiscal policy.

ECON 382 : Intermediate Price Theory 2. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Welfare theory, imperfect information, imperfect competition, uncertainty, externalities, and public goods.

Course Outcomes
- Formally express and analyze economic modelsRecognize the common building blocks of economic models (actors, choices, objectives, constraints)Solve economic models (constrained optimization, equilibrium conditions)Interpret the results (comparative statics)Demonstrate an understanding of the core microeconomic models ofPerfect competition in general equilibrium (exchange and production)Monopoly and oligopolyExternalities and public goodsDecision-making under uncertainty (expected utility)Information problems (moral hazard, adverse selection)Adapt models to new scenariosCompare the impact on equilibrium behavior of altering the assumptions of canonical modelsContrast the results of different market imperfectionsEstablish a knowledge base that will be useful in economic field classesApply models in various real-world examples and identify the positive and normative conclusions in that environment

ECON 388 : Introduction to Econometrics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Mathematical and statistical techniques used in estimating, predicting, and testing hypotheses associated with quantifiable economic relationships.

Course Outcomes
- Demonstrate an understanding of the theoretical foundations of estimating and testing the basic regression model, employing tools from matrix algebra, calculus, and statistics.Perform basic regression and testing procedures using Stata. Complete an empirical research project that includes the following elements:.Formulate an econometric model.Collect and prepare relevant data for use in estimating the model.Use appropriate methods of estimation.Test relevant behavioral hypotheses.Understand and test the Gauss-Markov assumptions.Analyze and interpret the estimated model.Prepare a written report summarizing the research results.

Note: Stat 201 and Math 313 may be substituted for Econ 378.

3. Supporting courses: complete the following:

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes
- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

Note 1: A *university* calculus course such as Math 112 or 113 is strongly recommended. Deferred students

are encouraged to take a refresher math course such as Eng T 295R before or concurrent with Econ 378, 380, or 381.

Note 2: For students contemplating graduate work in economics, the 500-level economics courses plus Math 113, 313, and 314 are strongly recommended.

4. Complete 15 hours from the following (at least 12 hours must be from courses 410-588):

ECON 213R : Topics in Economic Analysis. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

PREREQUISITE: ECON 110

Course Outcomes
There are no course outcomes available

ECON 230 : Economic Development and Growth. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: ECON 110

DESCRIPTION: Problems and processes of economic growth and development, emphasizing less-developed nations.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Be familiar with the labor and consumption patterns among the world's poor.Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 110 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsGain a basic understanding of econometric methods used in testing economic theories in growth and development.Analyze the Solow Growth model and its implications for economic growth.Explain the functioning of the credit and capital market:How it relates to alleviating poverty and stimulating economic growth.Why it may be prone to information problems and the implications of those problems.Discuss the potential role of government in economic development. Especially as it relates to:Public Goods and ExternalitiesEnforcing ContractsCorruptionExplain the importance of labor, health, and education to the lives of those in developing countries and how these fields relate to improving outcomes among the poor.

ECON 253 : Money and Banking. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Economic principles applied to monetary analysis and policy and the banking structure.

Course Outcomes
No outcomes are available at this time.

ECON 257 : International Trade and Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ECON 110

DESCRIPTION: Economic analysis of the mechanisms, problems, institutions, and policies of trade among countries. Financial and monetary arrangements that facilitate trade.

Course Outcomes
- Explain the key developments (models) in the intellectual history of the study of the patterns of trade in goods and services from Adam Smith through the present.Broadly discuss the evidence which supports or is contrary to the application of these developments to particular countries and goods and services.Analyze policy within the context of these models in order to gain insights about the patterns of trade.Analyze the gains from international trade with these key models and understand the political economy of trade (who gains and who loses from trade).Analyze the patterns, gains, and losses from international trade (migration) in financial and direct foreign investment and labor migration in the short and long runs.Analyze the reasons for international outsourcing portions of production and the gains and losses from doing so.Identify how trade in goods, services, and capital enter the international income accounts and the balance of payments.Discuss how exchange rates affect trade and how trade, fiscal, and monetary policy affects exchange rates.Explain the essential differences in fiscal and monetary effects for floating and fixed exchange rates.Broadly discuss the development of U.S. trade policy and the world institutions that support international trade and finance.

ECON 274 : American Economic History. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Impact on households, firms, and government of America's transformation from a rural, agricultural colony to a major industrial nation.

Course Outcomes
There are no course outcomes available

ECON 275 : Public Finance. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Economics of decision making in the public sector; cost-benefit analysis and efficiency-equity issues of taxation and expenditure policies.

Course Outcomes
- Discuss the revenue, expenditure, and debt patterns of the U.S. Federal Government.Analyze how welfare impolications are affected byExternalities and Public GoodsFixed Costs or Increasing

ReturnsPoorly Enforced Property RightsInformation ProblemsDemonstart an understanding of the function and incentive effects of the major redistribution programs in the United States.Demonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.Discuss the efficiency and distributional effects of taxation.

ECON 410 : Agricultural Economics. (3:3:0)

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Application of supply and demand concepts to price determination and analysis in agricultural markets.

Course Outcomes

No outcomes are available at this time.

ECON 413R : Topics in Economic Theory. (.5-5:ARR:ARR)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

Course Outcomes

- Learn in depth about an area of research in economics;Understand the research literature and in particular the contributions of the seminal articles;Analyze current journal articles and assess their contribution to the literature.

ECON 415 : History of Economic Thought. (3:3:0)

PREREQUISITE: ECON 380 & ECON 381

Course Outcomes

No outcomes are available at this time.

ECON 420 : Economics of Antitrust Law and Regulation. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

RECOMMENDED: Econ 382.

DESCRIPTION: Economic analysis of reasons for - and effects of - antitrust laws and regulation in selected areas, including utilities, telecommunications, transportation, energy, health, safety, and the environment.

Course Outcomes

- Demonstrate basic familiarity with the provisions of the principal Federal antitrust statutes, including the Sherman Act, the Clayton Act, the FTC Act, the Robinson-Patman Act, and the Hart-Scott-Rodino Act.Evaluate the likely effects of Section 1 of the Sherman Antitrust Act using monopoly, Cournot, Stackelberg, and Bertrand models of non-cooperative behavior among a small number of rival firms.Evaluate the likely effects of Section 2 of the Sherman Antitrust Act using simple analytical models of predation, exclusion, tying, bundling.Evaluate the likely effects of laws limiting price discrimination, including the Robinson-Patman Act, using simple analytical models of price discrimination.Evaluate the likely effects of Section 7 of the Clayton Act and the HRS Act using simple analytical models of mergers.Evaluate public regulation of monopolies as an alternative to relying on antitrust law using simple analytical models of rate-of-return regulation, nonlinear pricing and peak load pricing.Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific antitrust issue.

ECON 421 : Law and Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Common law allocative mechanisms (contract, tort, and property law) as alternatives to collective intervention when markets fail; consideration of economic logic of law.

Course Outcomes

- Demonstrate a basic familiarity with the Common Law.Analyze the incentives created by Common Law tort rules.Analyze the incentives created by Common Law contract rules.Distinguish between “property rules” and “liability rules” with regard to property rights.Evaluate the relative efficiency of specific tort rules.Evaluate the relative efficiency of specific contract rules.Analyze the incentives to litigate or settle under different rules about which party pays the costs of the litigation.Analyze the incentives created by criminal sanctions.Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific tort, contract or property issue.

ECON 431 : Economic Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 380; Econ 388 (or concurrent enrollment) or Pl Sc 328.

DESCRIPTION: Microeconomic analysis of the causes of income differences across countries.

Course Outcomes

- Discuss the labor and consumption patterns among the world’s poor.Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property Rights.Discuss the functioning of the credit and capital market:How it relates to alleviating poverty and stimulating economic growth.Why it may be prone to information problems and the implications of those problems.Explain the potential role of government in economic development, especially as it relates to:Public Goods and ExternalitiesEnforcing ContractsCorruptionExplain the importance of labor, health, and education to the lives of those in

developing countries and how these fields relate to improving outcomes among the poor.

ECON 432 : Economic Growth. (3:3.0:0.0)

PREREQUISITE: ECON 380 & ECON 381

RECOMMENDED: Econ 388.

DESCRIPTION: Theory and evidence relating to economic growth, including physical and human capital accumulation, population, technological change, institutions, and government.

Course Outcomes

- Adjust values in one currency to values in another currency controlling for purchasing power parity (PPP) deviations.Demonstrate an understanding of basic dynamic models of economic growth, including:The Solow modelThe Solow model with population growthThe Harrod-Domar modelAK modelsModels of product varietySchumpeterian models.Discuss growth and development accounting, and decompose observed differences across countries into efficiency and technology components.Discuss Lorenz curves and Gini coefficients.Discuss how growth interacts with:Population & demographyHuman capitalTechnical progressOpennessGovernmentInequalityCultureGeography, Climate & Resources.

ECON 440 : Natural Resources and Environmental Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 380 & ECON 388

RECOMMENDED: Econ 382.

DESCRIPTION: Economic theory applied to allocation of natural resources and environmental amenities. Issues relating to externalities, common property resources, public goods, allocation of depletable natural resources over time, economic factors of environmental polarization, and others.

Course Outcomes

- Utilize economic principles and models to address private and public policy issues related to allocating natural resources and environmental amenities.Demonstrate an active understanding of the following elements of economic theory as it relates to natural resource and environmental economics:Welfare economics and concepts of Pareto optimality, efficiency, and equityThe role of property, property rights, and the bundle of rights conceptThe role of externalities, common property resources, and public goodsConcepts and measures of economic value including non-market valuation.Demonstrate a basic knowledge of the role of markets and market failure with regards to the allocation of natural resources and environmental amenities.Gain a basic understanding of the effects and relative merits of public environmental policy efforts, including cap-and-trade schemes, Pigovian taxes, regulation, and public ownership and/or management.Become knowledgeable about and be able to use economic principles and non-market valuation techniques to address a variety of continuing and contemporary natural resource and environmental issues. These issues may include, but are not exclusive to:Population growth and the environmentGlobal warmingWilderness protection and related public lands issuesAir pollution and public healthIntergenerational allocation of soil, forest, and other depleteable natural resourcesImpacts of environmental features on property values.

ECON 450 : Financial Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 382 & ECON 388

DESCRIPTION: Theory of financial economics, emphasizing capital markets, investment decisions, choice, capital asset pricing model, futures and options markets, efficient markets, and capital structures.

Course Outcomes

- Understand and derive the fundamental relationship between risk and return that is implied by the Capital Asset Pricing Model (CAPM). Students should also know the assumptions necessary for this model to hold and be capable of identifying when potential investment projects satisfy these assumptions.Use linear regression to calculate an asset's historical sensitivity to broad market indices, its implied historical mispricing and an estimate of the asset's idiosyncratic risk. Students should also be capable of performing hypothesis testing on these values.Replicate traditional tests of the CAPM using currently available data.Be capable of collecting and analyzing asset market data to estimate the efficient frontier of risky assets using either Excel or another software package. Students should also be able to understand the efficient frontier mathematically and the reasons that it is useful.Calculate the present value of a stream of payments given an appropriate discount factor. Students should know how to use the CAPM to derive potential discount factors for payment streams.Calculate the yield to maturity of a stream of payments given an observed price. Students should also understand the relationship between the coupon rate of traditional bonds, their price and their yield to maturity.Calculate forward rates for all future periods given the observed yield curve.Understand the liquidity preference theory of bond markets as well as the expectations hypothesis. They should also be able to price complicated payment streams using observations of the yield curve and the expectations hypothesis.Calculate the duration and modified duration of a stream of payments and use these to calculate optimal hedges given an arbitrary position in the fixed income market.Calculate and understand bond convexity and its role (along with duration) in hedging.Price forward contracts by arbitrage given a risk-free rate.Price futures contracts whose payoffs are not correlated with the market reinvestment rate. Understand currently used hypotheses regarding futures contract pricing.Understand the structure of call and put options.Price put options given a call option (and vice versa) using the put-call parity relationship.Apply the Black-Scholes option pricing formula to price call and put options given beliefs about the volatility of the underlying asset.Apply the Black-Scholes option pricing formula to calculate the implied volatility of an asset given its price.

ECON 453 : Monetary Theory and Policy. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: ECON 380 & ECON 381

RECOMMENDED: Concurrent enrollment in Econ 388.

DESCRIPTION: Macroeconomic aspects of money demand, money supply, the monetary transmission mechanism, central bank policy, and other current issues.

Course Outcomes

- Summarize the broad empirical evidence regarding the long-run and short-run relationships between money and inflation and money and output.Demonstrate a fundamental knowledge of the institutional and regulatory structure of the U.S. financial system.Explain the macroeconomic role of central banks with special emphasis on the role of the Federal Reserve System in the U.S. economy.Demonstrate an active understanding of the following elements of modern monetary theory:The role of expectations, especially rational expectationsSolve simple rational expectations modelsAnalyze the rudimentary new Keynesian dynamic stochastic general equilibrium modelsTheories of the transmission mechanism of monetary policyIdentify the current issues in the conduct of monetary policy.Demonstrate a general understanding of the causes and consequences of financial crises with a focus on the financial crisis of 2007-2009.Identify and evaluate the principal issues regarding financial regulation.

ECON 458 : International Trade Theory and Applications. (3:3:0)

PREREQUISITE: ECON 380

DESCRIPTION: Microeconomic analysis of why nations trade, who wins and loses from trade, and the costs and benefits of various trade policies.

Course Outcomes

- Discuss why all kinds of nations—rich and poor, large and small—gain from international trade.Demonstrate an understanding of comparative advantage and how it creates gains from trade.Analyze the Ricardian model of trade and thereby learn how different technologies in different nations create comparative advantage and gains from trade.Analyze the Heckscher-Ohlin model of trade and thereby learn: 1) How different factor endowments in different nations create comparative advantage and gains from trade, and 2) Why some people lose from trade even though nations as a whole gain from trade.Discuss economies of scale and how they can generate gains from trade.Discuss how trade generates extra gains by reducing market power.Demonstrate an understanding of the main causes and effects of direct foreign investment.Demonstrate an understanding of the main causes and effects of international migration.Discuss how various trade policies affect national welfare and why such policies help some while hurting others.Discuss the politics of trade.

ECON 459 : International Monetary Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 381 & ECON 388; or ECON 381 & PL SC 328

DESCRIPTION: Monetary and macroeconomic aspects of international relations dealing primarily with short-run balance-of-payments disequilibrium and adjustments.

Course Outcomes

- Demonstrate a familiarity with the key issues in two broad fields:International Finance, particularly exchange rate behavior, Open Economy Macroeconomics.Discuss the nature of the foreign exchange market, including:It's market organizationThe role of vehicle currenciesThe instruments tradedThe role of arbitrage.Understand and use models of exchange rate behavior:Covered and uncovered interest rate parityLong-run monetary and equilibrium models.Understand financial portfolio theory to the extent that it is useful in explaining exchange rate behavior, including:The determination of risk premiaHow it may explain the "forward bias" puzzle.Discuss the history of the international financial system since the late 1700's.Discuss the international aspects of the national income and product accounts, along with the balance of payments accounts.Apply simple dynamic models of consumption smoothing to the current account.

ECON 461 : Economics of Education. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Evaluation of education policy from an economic perspective, focusing on the benefits and costs of policy outcomes. Introduction to quantitative methods used by empirical education researchers.

NOTE: Concurrent enrollment accepted for Econ 388; see professor.

Course Outcomes

- Evaluate education policy from an economics perspectiveIncorporate costs and benefits in education policy analysisIdentify unintended consequences associated with alternative policy optionsBase analysis on research literature findings.Demonstrate an understanding of the theoretical underpinnings of the fieldEducation productionHuman Capital formationRole of incentives.Speak fluently and intelligently about current issues in education policy, includingUS and International policyTeacher labor marketsK-12 education policyHigher education.Evaluate the economics of education research literatureKnow the seminal papers in the field, and how they shaped the disciplineKnow the current "cutting edge" papers and how they are pushing the frontiers of knowledge.Demonstrate an understanding of the quantitative methods and research tools that empirical education economists use to conduct research, includingCross sectional and panel data modelsMethods to account for selection biasThe importance of obtaining causal effects.

ECON 463 : Economics of the Labor Market. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Economic analysis and institutional background of labor markets in developed countries, particularly the United States. Typical topics include labor supply and demand analysis, determination of wages and employment, investment in education, wage differences by gender and race, immigration, and unions.

Course Outcomes

- Demonstrate an understanding of standard optimization models to set up and solve the labor supply problem facing the individual and the labor demand problem facing the firm and show the important comparative statics results of both models. Students will understand how these models produce the neoclassical market framework and be able to solve problems using that framework.Solve and use other microeconomic optimizing models of agent behavior, such as models of job search, human capital

choices, labor supply, and demand in risky occupations, union wage setting, and behavior under alternative compensation schemes.Demonstrate an understanding of the basic institutional structure of the U.S. labor market, including broad trends in labor supply behavior and wages and the institutional details and likely labor market effects of major government programs.Read and discuss high quality empirical research on labor economic topics and explain how these results interrelate to the predictions of formal economic models.Complete an empirical project demonstrating competence in basic econometric techniques.Identify some of the ways in which government policy choices affect labor market outcomes

ECON 465 : Health Economics. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: ECON 382 & ECON 388

DESCRIPTION: Economic models of health-care markets, including the supply and demand for health and health care, insurance, market imperfections, public-sector involvement, and regulation.

NOTE: Concurrent enrollment accepted for Econ 388; see professor.

Course Outcomes

- Read, understand, and discuss the academic literature in health economics. A daily quiz will be administered to test understanding of the reading.Participate in linking academic research to contemporary policy discussions through class discussion and preparation of occasional class presentations.Complete a major research project in which they either 1) summarize and evaluate the available evidence on a particular policy question, or 2) conduct an original research project where they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

ECON 468 : Urban Economics. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380; Econ 388 or concurrent enrollment.

DESCRIPTION: Economic models relating to spatial location of economic activities and development of cities. Application of economic theory to problems and policies associated with housing, urban transportation, congestion, local government finance, and other urban problems.

Course Outcomes

- Demonstrate an understanding of the role of transportation costs in determining land uses and land prices.Demonstrate a familiarity with the monocentric city model of land use and its use in understanding the impact of local land use and transportation policies.Apply the basic models of housing demand and the role of filtering in determining the stock of housing in a city.Demonstrate an understanding of the economic concepts of external costs and how these play a role in air pollution and highway congestion. Apply the concept of Pigouvian pricing as a solution to externality problems in the case of highway congestion.Discuss the role of time costs in consumers' choice of transportation mode, and why collection and distribution parts of urban trips are so important in determining the proper design of mass transit systems. Demonstrate an understanding of the role of economies of scale in efficient mass transit design.Use the basic economic model of "rational" crime to predict the impact of various anti-crime policies.

ECON 474 : Topics in Economic History. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECON 380; Econ 388 or concurrent enrollment.

Course Outcomes

There are no course outcomes available

ECON 475 : Public Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Evaluation of the role of government from an economic perspective. Typical topics include taxation, externalities, public goods, corruption, public choice, Social Security, Medicare and Medicaid, education, income redistribution, and crime.

Course Outcomes

- Discuss the revenue, expenditure, and debt patterns of the U.S federal government.Analyze how modifying the neoclassical assumptions learned in 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsInformation ProblemsHyperbolic Discounting or Loss AversionDemonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.Discuss the efficiency and distributional effects of taxation and the theory of optimal taxation for both income and commodity taxes.Read papers in the public economics literature andProvide written and oral critiques of the papersApply modern tools of econometric analysis in discussing the papers

ECON 476 : Industrial Organization. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECON 378; or STAT 201 & MATH 313

DESCRIPTION: Industrial organization focuses on firm behavior in imperfectly competitive markets. Typical topics include the acquisition and use of market power by firms, strategic interactions among firms, and an introduction to noncooperative game theory.

Course Outcomes

- Analyze basic models of competition among firms producing homogeneous goods: competition, monopoly, Cournot oligopoly, Bertrand oligopoly, Stackelberg oligopoly.Apply basic game theory including solution concepts for normal and extensive form games.Demonstrate an understanding of extensions to these basic model, including supergames, models of product differentiation, and games of incomplete information.Apply these models to key issues in theoretical and applied industrial organization: mergers, collusion, advertising, R&D competition, antitrust policy, entry accommodation and entry deterrence, and business strategy.Discuss the role of government in the market in determining antitrust policy, patent policy, and regulation.Read, synthesize, and write short review papers on applied or empirical papers from the industrial organization literature.

ECON 478 : Game Theory and Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Application of game theory to study strategic interaction between individuals and organizations. Applications include imperfect competition, insurance markets, and bargaining.

Course Outcomes

- Demonstrate an understanding of the game theoretic method of analysis.Define a Nash Equilibrium and discuss refinements of the Nash Equilibrium Concept.Think abstractly and rigorously about strategic interaction.

ECON 482 : Welfare Economics. (3:3.0:0.0)

PREREQUISITE: ECON 378 & ECON 382; or STAT 201 & MATH 313 & ECON 382

DESCRIPTION: General equilibrium theorems and considerations that must guide applied economic work and provide quantitative information on the effects of alternative policy measures.

Course Outcomes

No outcomes are available at this time.

ECON 486 : Mathematical Economics. (3:3:0)

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Further development of optimization and comparative statics. Differential equations and dynamic analysis.

Course Outcomes

No outcomes are available at this time.

ECON 488 : Applied Econometrics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 388

DESCRIPTION: Application of econometric methods, introduction to research design, and evaluation of empirical research. Special attention given to linking economic theory and econometrics, and causal inference.

Course Outcomes

- Demonstrate an understanding of the assumptions underlying commonly used empirical approaches for the identification of causal effects, including:Ordinary least squaresMatchingInterrupted time seriesDifference in differencesFixed effectsInstrumental variablesDemonstrate an understanding of the interplay between economic theory and empirical work.Read and understand contemporary academic literature in economics. Students will provide written evaluations of selected academic papers, including a clear description and critique of the empirical methods used.Apply modern empirical methods using data analysis exercises.Complete a research project in which they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

ECON 580 : Advanced Price Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 378 & ECON 382; or STAT 201 & MATH 313 & ECON 382

DESCRIPTION: Modern theories of consumers, producers, and competitive equilibria.

Course Outcomes

- Use the tools of constrained optimization in analyzing comparative statics results arising in the study of economic phenomena.

ECON 581 : Advanced Macroeconomics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 381 & ECON 382 & ECON 388

DESCRIPTION: Theory of determining national income, employment, inflation, and interest rates. Issues of economic fluctuations, economic growth, and monetary and fiscal policy.

Course Outcomes

- Acquire a toolset for analyzing modern macroeconomic models.Demonstrate an understanding of basic dynamic stochastic general equilibrium (DSGE) macroeconomic modeling, including:How to set up a model.How to render it stationary, if necessary.How to solve for the model's steady state both analytically and numerically.How to solve for the model's dynamics using various numerical techniques.How to calibrate the model.How to simulate the model economy.How to generate impulse

response functions.How to generate data moments.How to estimate model parameters using simulated method of momentsUse MATLAB and Dynare, software packages widely used in macroeconomic model simulation.Demonstrate an understanding of other macroeconomic models, such as:Overlapping generations (OLG) models.Continuous-time Ramsey-style models.Estimate and interpret structural vector autoregression (SVAR) empirical models.Demonstrate an understanding of current issues being addressed in macroeconomics research.Be prepared to perform well in the macroeconomics classes in the top Ph.D. programs in economics.

ECON 582 : Topics in Mathematical Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 580

DESCRIPTION: Advanced topics such as risk and uncertainty, game theory, and capital theory.

Course Outcomes

- Economics 582 is a topics course with the goal of showing students the frontier. By its nature, the course exhibits different learning objectives each time it is taught.

ECON 586 : Advanced Mathematics for Economists. (3:3:0)

PREREQUISITE: ECON 380 & MATH 314

DESCRIPTION: Advanced mathematical methods that have proved useful in economic modeling.

Course Outcomes

No outcomes are available at this time.

ECON 588 : Advanced Econometrics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Theory and practice of formulating, estimating, and analyzing economic models.

Course Outcomes

- Demonstrate a familiarity with the properties and applications of several families of statistical distributions to econometric problems.Demonstrate an understanding of variations and generalizations of the basic regression model includingGeneralized least squaresGeneralized autoregressive conditional heteroskedasticity modelsInstrumental variablesSeemingly unrelated regression modelsPanel dataHausman specification tests.Demonstrate an understanding of estimation frameworks in econometric models includingParametric, semiparametric, and non parametric specificationsMaximum likelihood, M-, generalized method of moments, kernel, empirical likelihood, and extremum estimation.Formulate and estimate various nonlinear models.Identify and estimate autoregressive integrated moving average (ARIMA) models and obtain forecasts of economic variables.Demonstrate an understanding of dynamic (and static) structural econometric models including being able to discussReduced form, structural, and transfer function representationsThe identification problemIssues of estimation and statistical inferenceVector autoregression models.Complete a research project in which they formulate a research question, apply appropriate methods to answer the question, and prepare a paper summarizing their results.

Note 1: The 200-level field courses are intended as interim courses as a student moves from Econ 110 into the 300-level core courses. Once the student has completed Econ 380, he or she is strongly encouraged to take the 400-level rather than the 200-level field courses.

Note 2: Students should not take both a 200-level and a 400-level course with the same last two digits (e.g., Econ 275 and 475), although they are encouraged to take the 300- and 500-level theory classes (e.g., Econ 380 and 580).

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete the following:

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

ECON 380 : Intermediate Price Theory 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: ECON 110 & MATH 112
DESCRIPTION: Producer, consumer, and equilibrium theories; mathematical techniques of unconstrained and constrained optimization introduced and applied extensively.

Course Outcomes

- Recognize the common building blocks of economic models (actors, choices, objectives, constraints)Solve economic models (constrained optimization, equilibrium conditions) Interpret the results (comparative statics)Explain concepts using graphs, prose, and mathematical analysis
- ConsumerThe axioms upon which standard microeconomic consumer theory is based.The implications of consumer demand including price and income responses in absolute and elasticity forms in both utility maximization and expenditure minimization problems.FirmsThe meaning and representation of technologyThe implications of cost and profit maximization for firmsMarketsIntegrate consumers and producers into a market in order to perform market analysis on equilibrium traded quantities and pricesUse market analysis to understand the effects of public policy
- Compare the impact on equilibrium behavior of altering the assumptions of canonical modelsContrast the results of different market imperfections

ECON 381 : Intermediate Macroeconomics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: ECON 110 & MATH 112; Math 112 can be concurrent enrollment.
DESCRIPTION: Intermediate macroeconomic theory, emphasizing income, unemployment, and price-level analysis.

Course Outcomes

- Demonstrate an understanding of the nature and construction of key macroeconomic data;Demonstrate an understanding of the connection between microeconomics and macroeconomics;Demonstrate an understanding of standard models ofeconomic growthlong-run macroeconomic behaviorshort-run macroeconomic behaviorUse these models to analyze the macroeconomic effects of monetary and fiscal policy changes as well as other economic shocks;Use these models to interpret historical and current events; andDemonstrate an understanding of issues regarding the value and limitations of monetary and fiscal policy.

2. Complete 9 additional hours in economics courses.

*Hours include courses that may fulfill university core requirements.

100-Level Courses

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

ECON 199R : Academic Internship. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Faculty advisor's and department chair's prior written consent
NOTE: Not counted toward required major or minor hours.

Course Outcomes

- Apply economic analysis to real-world problems while working for an employer in the private, public, or non-profit sectors.

200-Level Courses

ECON 213R : Topics in Economic Analysis. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department
PREREQUISITE: ECON 110

Course Outcomes
There are no course outcomes available

ECON 230 : Economic Development and Growth. (3:3:0)

WHEN TAUGHT: Spring
PREREQUISITE: ECON 110
DESCRIPTION: Problems and processes of economic growth and development, emphasizing less-developed nations.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Be familiar with the labor and consumption patterns among the world's poor.Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 110 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsGain a basic understanding of econometric methods used in testing economic theories in growth and development.Analyze the Solow Growth model and its implications for economic growth.Explain the functioning of the credit and capital market:How it relates to alleviating poverty and stimulating economic growth.Why it may be prone to information problems and the implications of those problems.Discuss the potential role of government in economic development. Especially as it relates to:Public Goods and ExternalitiesEnforcing ContractsCorruptionExplain the importance of labor, health, and education to the lives of those in developing countries and how these fields relate to improving outcomes among the poor.

ECON 253 : Money and Banking. (3:3:0)

PREREQUISITE: ECON 110
DESCRIPTION: Economic principles applied to monetary analysis and policy and the banking structure.

Course Outcomes
No outcomes are available at this time.

ECON 257 : International Trade and Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ECON 110

DESCRIPTION: Economic analysis of the mechanisms, problems, institutions, and policies of trade among countries. Financial and monetary arrangements that facilitate trade.

Course Outcomes
- Explain the key developments (models) in the intellectual history of the study of the patterns of trade in goods and services from Adam Smith through the present.Broadly discuss the evidence which supports or is contrary to the application of these developments to particular countries and goods and services.Analyze policy within the context of these models in order to gain insights about the patterns of trade.Analyze the gains from international trade with these key models and understand the political economy of trade (who gains and who loses from trade).Analyze the patterns, gains, and losses from international trade (migration) in financial and direct foreign investment and labor migration in the short and long runs.Analyze the reasons for international outsourcing portions of production and the gains and losses from doing so.Identify how trade in goods, services, and capital enter the international income accounts and the balance of payments.Discuss how exchange rates affect trade and how trade, fiscal, and monetary policy affects exchange rates.Explain the essential differences in fiscal and monetary effects for floating and fixed exchange rates.Broadly discuss the development of U.S. trade policy and the world institutions that support international trade and finance.

ECON 265 : Introduction to Health Economics. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Applying economic principles to markets for health and health care.

Course Outcomes
No outcomes are available at this time.

ECON 274 : American Economic History. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Impact on households, firms, and government of America's transformation from a rural, agricultural colony to a major industrial nation.

Course Outcomes
There are no course outcomes available

ECON 275 : Public Finance. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Economics of decision making in the public sector; cost-benefit analysis and efficiency-equity issues of taxation and expenditure policies.

Course Outcomes
- Discuss the revenue, expenditure, and debt patterns of the U.S. Federal Government.Analyze how welfare impolications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsInformation ProblemsDemonstart an understanding of the function and incentive effects of the major redistribution programs in the United States.Demonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.Discuss the efficiency and distributional effects of taxation.

ECON 280 : Introduction to Economic Analysis and Reasoning. (3:3:0)

PREREQUISITE: ECON 110 & MATH 112

DESCRIPTION: Maximizing self-interest model of behavior and the environment, and constraints within which business and household decisions are made.

NOTE: Not for majors or major credit.

Course Outcomes
No outcomes are available at this time.

300-Level Courses

ECON 378 : Statistics for Economists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ECON 110 & MATH 112

DESCRIPTION: Introduction to matrix algebra and statistics in preparation for regression analysis. Other topics include: probability, random variables, density and distribution functions, estimation, hypothesis testing.

Course Outcomes
- Demonstrate an understanding of the basic principles and terminology of probability, simple distribution theory, statistics, and matrix algebra in preparation for a successful introduction to econometric methods in Economics 388. These principles and concepts include:The language, intuition, and notation necessary to understand basic approaches to probability, including basic combinatoric counting techniques, the additive and multiplicative laws of probability, conditional probability and independence, the law of total probability, and Bayes' rule, and to solve basic probability problems using these techniques.Random variables, both univariate and bivariate, including: distribution functions, density functions, conditional density, expected values, variance, covariance,

and correlation coefficients. Specific examples of useful random variables.Statistics and sampling distributions.Law of Large Numbers and Central Limit Theorem. Parameter estimators and their derivation using the Method of Moments and Method of Maximum Likelihood.Statistical inference, including the idea of sampling error, sampling distributions, the construction of confidence intervals, and formal hypothesis tests.Basic matrix theory and the properties of matrix operations, including addition, subtraction, matrix products, matrix determinants, and matrix inversion.Use these statistical techniques to analyze data in diverse applications. Recognize the usefulness of statistics in a variety of career fields.

ECON 380 : Intermediate Price Theory 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 110 & MATH 112

DESCRIPTION: Producer, consumer, and equilibrium theories; mathematical techniques of unconstrained and constrained optimization introduced and applied extensively.

Course Outcomes

- Recognize the common building blocks of economic models (actors, choices, objectives, constraints)Solve economic models (constrained optimization, equilibrium conditions) Interpret the results (comparative statics)Explain concepts using graphs, prose, and mathematical analysis
- ConsumerThe axioms upon which standard microeconomic consumer theory is based.The implications of consumer demand including price and income responses in absolute and elasticity forms in both utility maximization and expenditure minimization problems.FirmsThe meaning and representation of technologyThe implications of cost and profit maximization for firmsMarketsIntegrate consumers and producers into a market in order to perform market analysis on equilibrium traded quantities and pricesUse market analysis to understand the effects of public policy
- Compare the impact on equilibrium behavior of altering the assumptions of canonical modelsContrast the results of different market imperfections

ECON 381 : Intermediate Macroeconomics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 110 & MATH 112; Math 112 can be concurrent enrollment.

DESCRIPTION: Intermediate macroeconomic theory, emphasizing income, unemployment, and price-level analysis.

Course Outcomes

- Demonstrate an understanding of the nature and construction of key macroeconomic data;Demonstrate an understanding of the connection between microeconomics and macroeconomics;Demonstrate an understanding of standard models ofeconomic growthlong-run macroeconomic behaviorshort-run macroeconomic behaviorUse these models to analyze the macroeconomic effects of monetary and fiscal policy changes as well as other economic shocks;Use these models to interpret historical and current events; andDemonstrate an understanding of issues regarding the value and limitations of monetary and fiscal policy.

ECON 382 : Intermediate Price Theory 2. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Welfare theory, imperfect information, imperfect competition, uncertainty, externalities, and public goods.

Course Outcomes

- Formally express and analyze economic modelsRecognize the common building blocks of economic models (actors, choices, objectives, constraints)Solve economic models (constrained optimization, equilibrium conditions)Interpret the results (comparative statics)Demonstrate an understanding of the core microeconomic models ofPerfect competition in general equilibrium (exchange and production)Monopoly and oligopolyExternalities and public goodsDecision-making under uncertainty (expected utility)Information problems (moral hazard, adverse selection)Adapt models to new scenariosCompare the impact on equilibrium behavior of altering the assumptions of canonical modelsContrast the results of different market imperfectionsEstablish a knowledge base that will be useful in economic field classesApply models in various real-world examples and identify the positive and normative conclusions in that environment

ECON 388 : Introduction to Econometrics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Mathematical and statistical techniques used in estimating, predicting, and testing hypotheses associated with quantifiable economic relationships.

Course Outcomes

- Demonstrate an understanding of the theoretical foundations of estimating and testing the basic regression model, employing tools from matrix algebra, calculus, and statistics.Perform basic regression and testing procedures using Stata. Complete an empirical research project that includes the following elements:.Formulate an econometric model.Collect and prepare relevant data for use in estimating the model.Use appropriate methods of estimation.Test relevant behavioral hypotheses.Understand and test the Gauss-Markov assumptions.Analyze and interpret the estimated model.Prepare a written report summarizing the research results.

400-Level Courses

ECON 410 : Agricultural Economics. (3:3:0)

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Application of supply and demand concepts to price determination and analysis in agricultural markets.

Course Outcomes

No outcomes are available at this time.

ECON 413R : Topics in Economic Theory. (.5-5:ARR:ARR)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

Course Outcomes

- Learn in depth about an area of research in economics;Understand the research literature and in particular the contributions of the seminal articles;Analyze current journal articles and assess their contribution to the literature.

ECON 415 : History of Economic Thought. (3:3:0)

PREREQUISITE: ECON 380 & ECON 381

Course Outcomes

No outcomes are available at this time.

ECON 420 : Economics of Antitrust Law and Regulation. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

RECOMMENDED: Econ 382.

DESCRIPTION: Economic analysis of reasons for - and effects of - antitrust laws and regulation in selected areas, including utilities, telecommunications, transportation, energy, health, safety, and the environment.

Course Outcomes

- Demonstrate basic familiarity with the provisions of the principal Federal antitrust statutes, including the Sherman Act, the Clayton Act, the FTC Act, the Robinson-Patman Act, and the Hart-Scott-Rodino Act.Evaluate the likely effects of Section 1 of the Sherman Antitrust Act using monopoly, Cournot, Stackelberg, and Bertrand models of non-cooperative behavior among a small number of rival firms.Evaluate the likely effects of Section 2 of the Sherman Antitrust Act using simple analytical models of predation, exclusion, tying, bundling.Evaluate the likely effects of laws limiting price discrimination, including the Robinson-Patman Act, using simple analytical models of price discrimination.Evaluate the likely effects of Section 7 of the Clayton Act and the HRS Act using simple analytical models of mergers.Evaluate public regulation of monopolies as an alternative to relying on antitrust law using simple analytical models of rate-of-return regulation, nonlinear pricing and peak load pricing.Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific antitrust issue.

ECON 421 : Law and Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Common law allocative mechanisms (contract, tort, and property law) as alternatives to collective intervention when markets fail; consideration of economic logic of law.

Course Outcomes

- Demonstrate a basic familiarity with the Common Law.Analyze the incentives created by Common Law tort rules.Analyze the incentives created by Common Law contract rules.Distinguish between “property rules” and “liability rules” with regard to property rights.Evaluate the relative efficiency of specific tort rules.Evaluate the relative efficiency of specific contract rules.Analyze the incentives to litigate or settle under different rules about which party pays the costs of the litigation.Analyze the incentives created by criminal sanctions.Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific tort, contract or property issue.

ECON 431 : Economic Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 380; Econ 388 (or concurrent enrollment) or PI Sc 328.

DESCRIPTION: Microeconomic analysis of the causes of income differences across countries.

Course Outcomes

- Discuss the labor and consumption patterns among the world’s poor.Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property Rights.Discuss the functioning of the credit and capital market:How it relates to alleviating poverty and stimulating economic growth.Why it may be prone to information problems and the implications of those problems.Explain the potential role of government in economic development, especially as it relates to:Public Goods and ExternalitiesEnforcing ContractsCorruptionExplain the importance of labor, health, and education to the lives of those in developing countries and how these fields relate to improving outcomes among the poor.

ECON 432 : Economic Growth. (3:3.0:0.0)

PREREQUISITE: ECON 380 & ECON 381

RECOMMENDED: Econ 388.

DESCRIPTION: Theory and evidence relating to economic growth, including physical and human capital accumulation, population, technological change, institutions, and government.

Course Outcomes

- Adjust values in one currency to values in another currency controlling for purchasing power parity (PPP) deviations.Demonstrate an understanding of basic dynamic models of economic growth, including:The Solow modelThe Solow model with population growthThe Harrod-Domar modelAK modelsModels of product varietySchumpeterian models.Discuss growth and development accounting, and decompose observed differences across countries into efficiency and technology components.Discuss Lorenz curves and Gini

coefficients.Discuss how growth interacts with:Population & demographyHuman capitalTechnical progressOpennessGovernmentInequalityCultureGeography, Climate & Resources.

ECON 440 : Natural Resources and Environmental Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 380 & ECON 388

RECOMMENDED: Econ 382.

DESCRIPTION: Economic theory applied to allocation of natural resources and environmental amenities. Issues relating to externalities, common property resources, public goods, allocation of depletable natural resources over time, economic factors of environmental polarization, and others.

Course Outcomes

- Utilize economic principles and models to address private and public policy issues related to allocating natural resources and environmental amenities.Demonstrate an active understanding of the following elements of economic theory as it relates to natural resource and environmental economics:Welfare economics and concepts of Pareto optimality, efficiency, and equityThe role of property, property rights, and the bundle of rights conceptThe role of externalities, common property resources, and public goodsConcepts and measures of economic value including non-market valuation.Demonstrate a basic knowledge of the role of markets and market failure with regards to the allocation of natural resources and environmental amenities.Gain a basic understanding of the effects and relative merits of public environmental policy efforts, including cap-and-trade schemes, Pigovian taxes, regulation, and public ownership and/or management.Become knowledgeable about and be able to use economic principles and non-market valuation techniques to address a variety of continuing and contemporary natural resource and environmental issues. These issues may include, but are not exclusive to:Population growth and the environmentGlobal warmingWilderness protection and related public lands issuesAir pollution and public healthIntergenerational allocation of soil, forest, and other depleteable natural resourcesImpacts of environmental features on property values.

ECON 450 : Financial Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 382 & ECON 388

DESCRIPTION: Theory of financial economics, emphasizing capital markets, investment decisions, choice, capital asset pricing model, futures and options markets, efficient markets, and capital structures.

Course Outcomes

- Understand and derive the fundamental relationship between risk and return that is implied by the Capital Asset Pricing Model (CAPM). Students should also know the assumptions necessary for this model to hold and be capable of identifying when potential investment projects satisfy these assumptions.Use linear regression to calculate an asset's historical sensitivity to broad market indices, its implied historical mispricing and an estimate of the asset's idiosyncratic risk. Students should also be capable of performing hypothesis testing on these values.Replicate traditional tests of the CAPM using currently available data.Be capable of collecting and analyzing asset market data to estimate the efficient frontier of risky assets using either Excel or another software package. Students should also be able to understand the efficient frontier mathematically and the reasons that it is useful.Calculate the present value of a stream of payments given an appropriate discount factor. Students should know how to use the CAPM to derive potential discount factors for payment streams.Calculate the yield to maturity of a stream of payments given an observed price. Students should also understand the relationship between the coupon rate of traditional bonds, their price and their yield to maturity.Calculate forward rates for all future periods given the observed yield curve.Understand the liquidity preference theory of bond markets as well as the expectations hypothesis. They should also be able to price complicated payment streams using observations of the yield curve and the expectations hypothesis.Calculate the duration and modified duration of a stream of payments and use these to calculate optimal hedges given an arbitrary position in the fixed income market.Calculate and understand bond convexity and its role (along with duration) in hedging.Price forward contracts by arbitrage given a risk-free rate.Price futures contracts whose payoffs are not correlated with the market reinvestment rate. Understand currently used hypotheses regarding futures contract pricing.Understand the structure of call and put options.Price put options given a call option (and vice versa) using the put-call parity relationship.Apply the Black-Scholes option pricing formula to price call and put options given beliefs about the volatility of the underlying asset.Apply the Black-Scholes option pricing formula to calculate the implied volatility of an asset given its price.

ECON 453 : Monetary Theory and Policy. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: ECON 380 & ECON 381

RECOMMENDED: Concurrent enrollment in Econ 388.

DESCRIPTION: Macroeconomic aspects of money demand, money supply, the monetary transmission mechanism, central bank policy, and other current issues.

Course Outcomes

- Summarize the broad empirical evidence regarding the long-run and short-run relationships between money and inflation and money and output.Demonstrate a fundamental knowledge of the institutional and regulatory structure of the U.S. financial system.Explain the macroeconomic role of central banks with special emphasis on the role of the Federal Reserve System in the U.S. economy.Demonstrate an active understanding of the following elements of modern monetary theory:The role of expectations, especially rational expectationsSolve simple rational expectations modelsAnalyze the rudimentary new Keynesian dynamic stochastic general equilibrium modelsTheories of the transmission mechanism of monetary policyIdentify the current issues in the conduct of monetary policy.Demonstrate a general understanding of the causes and consequences of financial crises with a focus on the financial crisis of 2007-2009.Identify and evaluate the principal issues regarding financial regulation.

ECON 458 : International Trade Theory and Applications. (3:3:0)

PREREQUISITE: ECON 380

DESCRIPTION: Microeconomic analysis of why nations trade, who wins and loses from trade, and the costs and benefits of various trade policies.

Course Outcomes

- Discuss why all kinds of nations—rich and poor, large and small—gain from international trade.Demonstrate an understanding of comparative advantage and how it creates gains from trade.Analyze the Ricardian model of trade and thereby learn how different technologies in different nations create comparative advantage and gains from trade.Analyze the Heckscher-Ohlin model of trade and thereby learn: 1) How different factor endowments in different nations create comparative advantage and gains from trade, and 2) Why some people lose from trade even though nations as a whole gain from trade.Discuss economies of scale and how they can generate gains from trade.Discuss how trade generates extra gains by reducing market power.Demonstrate an understanding of the main causes and effects of direct foreign investment.Demonstrate an understanding of the main causes and effects of international migration.Discuss how various trade policies affect national welfare and why such policies help some while hurting others.Discuss the politics of trade.

ECON 459 : International Monetary Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 381 & ECON 388; or ECON 381 & PL SC 328

DESCRIPTION: Monetary and macroeconomic aspects of international relations dealing primarily with short-run balance-of-payments disequilibrium and adjustments.

Course Outcomes

- Demonstrate a familiarity with the key issues in two broad fields:International Finance, particularly exchange rate behavior, Open Economy Macroeconomics.Discuss the nature of the foreign exchange market, including:It's market organizationThe role of vehicle currenciesThe instruments tradedThe role of arbitrage.Understand and use models of exchange rate behavior:Covered and uncovered interest rate parityLong-run monetary and equilibrium models.Understand financial portfolio theory to the extent that it is useful in explaining exchange rate behavior, including:The determination of risk premiaHow it may explain the "forward bias" puzzle.Discuss the history of the international financial system since the late 1700's.Discuss the international aspects of the national income and product accounts, along with the balance of payments accounts.Apply simple dynamic models of consumption smoothing to the current account.

ECON 461 : Economics of Education. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Evaluation of education policy from an economic perspective, focusing on the benefits and costs of policy outcomes. Introduction to quantitative methods used by empirical education researchers.

NOTE: Concurrent enrollment accepted for Econ 388; see professor.

Course Outcomes

- Evaluate education policy from an economics perspectiveIncorporate costs and benefits in education policy analysisIdentify unintended consequences associated with alternative policy optionsBase analysis on research literature findings.Demonstrate an understanding of the theoretical underpinnings of the fieldEducation productionHuman Capital formationRole of incentives.Speak fluently and intelligently about current issues in education policy, includingUS and International policyTeacher labor marketsK-12 education policyHigher education.Evaluate the economics of education research literatureKnow the seminal papers in the field, and how they shaped the disciplineKnow the current "cutting edge" papers and how they are pushing the frontiers of knowledge.Demonstrate an understanding of the quantitative methods and research tools that empirical education economists use to conduct research, includingCross sectional and panel data modelsMethods to account for selection biasThe importance of obtaining causal effects.

ECON 463 : Economics of the Labor Market. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Economic analysis and institutional background of labor markets in developed countries, particularly the United States. Typical topics include labor supply and demand analysis, determination of wages and employment, investment in education, wage differences by gender and race, immigration, and unions.

Course Outcomes

- Demonstrate an understanding of standard optimization models to set up and solve the labor supply problem facing the individual and the labor demand problem facing the firm and show the important comparative statics results of both models. Students will understand how these models produce the neoclassical market framework and be able to solve problems using that framework.Solve and use other microeconomic optimizing models of agent behavior, such as models of job search, human capital choices, labor supply, and demand in risky occupations, union wage setting, and behavior under alternative compensation schemes.Demonstrate an understanding of the basic institutional structure of the U.S. labor market, including broad trends in labor supply behavior and wages and the institutional details and likely labor market effects of major government programs.Read and discuss high quality empirical research on labor economic topics and explain how these results interrelate to the predictions of formal economic models.Complete an empirical project demonstrating competence in basic econometric techniques.Identify some of the ways in which government policy choices affect labor market outcomes

ECON 465 : Health Economics. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: ECON 382 & ECON 388

DESCRIPTION: Economic models of health-care markets, including the supply and demand for health and health care, insurance, market imperfections, public-sector involvement, and regulation.

NOTE: Concurrent enrollment accepted for Econ 388; see professor.

Course Outcomes

- Read, understand, and discuss the academic literature in health economics. A daily quiz will be administered to test understanding of the reading.Participate in linking academic research to contemporary policy discussions through class discussion and preparation of occasional class presentations.Complete a major research project in which they either 1) summarize and evaluate the available evidence on a particular policy question, or 2)

conduct an original research project where they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

ECON 468 : Urban Economics. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380; Econ 388 or concurrent enrollment.

DESCRIPTION: Economic models relating to spatial location of economic activities and development of cities. Application of economic theory to problems and policies associated with housing, urban transportation, congestion, local government finance, and other urban problems.

Course Outcomes

- Demonstrate an understanding of the role of transportation costs in determining land uses and land prices.Demonstrate a familiarity with the monocentric city model of land use and its use in understanding the impact of local land use and transportation policies.Apply the basic models of housing demand and the role of filtering in determining the stock of housing in a city.Demonstrate an understanding of the economic concepts of external costs and how these play a role in air pollution and highway congestion. Apply the concept of Pigouvian pricing as a solution to externality problems in the case of highway congestion.Discuss the role of time costs in consumers' choice of transportation mode, and why collection and distribution parts of urban trips are so important in determining the proper design of mass transit systems. Demonstrate an understanding of the role of economies of scale in efficient mass transit design.Use the basic economic model of "rational" crime to predict the impact of various anti-crime policies.

ECON 474 : Topics in Economic History. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECON 380; Econ 388 or concurrent enrollment.

Course Outcomes

There are no course outcomes available

ECON 475 : Public Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Evaluation of the role of government from an economic perspective. Typical topics include taxation, externalities, public goods, corruption, public choice, Social Security, Medicare and Medicaid, education, income redistribution, and crime.

Course Outcomes

- Discuss the revenue, expenditure, and debt patterns of the U.S federal government.Analyze how modifying the neoclassical assumptions learned in 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected byExternalities and Public GoodsFixed Costs or Increasing ReturnsPoorly Enforced Property RightsInformation ProblemsHyperbolic Discounting or Loss AversionDemonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.Discuss the efficiency and distributional effects of taxation and the theory of optimal taxation for both income and commodity taxes.Read papers in the public economics literature andProvide written and oral critiques of the papersApply modern tools of econometric analysis in discussing the papers

ECON 476 : Industrial Organization. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECON 378; or STAT 201 & MATH 313

DESCRIPTION: Industrial organization focuses on firm behavior in imperfectly competitive markets. Typical topics include the acquisition and use of market power by firms, strategic interactions among firms, and an introduction to noncooperative game theory.

Course Outcomes

- Analyze basic models of competition among firms producing homogeneous goods: competition, monopoly, Cournot oligopoly, Bertrand oligopoly, Stackelberg oligopoly.Apply basic game theory including solution concepts for normal and extensive form games.Demonstrate an understanding of extensions to these basic model, including supergames, models of product differentiation, and games of incomplete information.Apply these models to key issues in theoretical and applied industrial organization: mergers, collusion, advertising, R&D competition, antitrust policy, entry accommodation and entry deterrence, and business strategy.Discuss the role of government in the market in determining antitrust policy, patent policy, and regulation.Read, synthesize, and write short review papers on applied or empirical papers from the industrial organization literature.

ECON 478 : Game Theory and Economics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Application of game theory to study strategic interaction between individuals and organizations. Applications include imperfect competition, insurance markets, and bargaining.

Course Outcomes

- Demonstrate an understanding of the game theoretic method of analysis.Define a Nash Equilibrium and discuss refinements of the Nash Equilibrium Concept.Think abstractly and rigorously about strategic interaction.

ECON 482 : Welfare Economics. (3:3.0:0.0)

PREREQUISITE: ECON 378 & ECON 382; or STAT 201 & MATH 313 & ECON 382

DESCRIPTION: General equilibrium theorems and considerations that must guide applied economic work and provide quantitative information on the effects of alternative policy measures.

Course Outcomes
No outcomes are available at this time.

ECON 486 : Mathematical Economics. (3:3:0)

PREREQUISITE: ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380

DESCRIPTION: Further development of optimization and comparative statics. Differential equations and dynamic analysis.

Course Outcomes
No outcomes are available at this time.

ECON 488 : Applied Econometrics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 388

DESCRIPTION: Application of econometric methods, introduction to research design, and evaluation of empirical research. Special attention given to linking economic theory and econometrics, and causal inference.

Course Outcomes
- Demonstrate an understanding of the assumptions underlying commonly used empirical approaches for the identification of causal effects, including:Ordinary least squaresMatchingInterrupted time seriesDifference in differencesFixed effectsInstrumental variablesDemonstrate an understanding of the interplay between economic theory and empirical work.Read and understand contemporary academic literature in economics. Students will provide written evaluations of selected academic papers, including a clear description and critique of the empirical methods used.Apply modern empirical methods using data analysis exercises.Complete a research project in which they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

ECON 490 : Senior Paper. (1:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

Course Outcomes
- Demonstrate competency of research skills by writing an original, independent research paper that makes a contribution to the literature in an area of economics.

ECON 498R : Readings in Economics. (.5-2:ARR:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

NOTE: P/F grade only; maximum of 2 credit hours; 3 hours of reading per week required for each credit hour taken. Not counted toward required major hours.

Course Outcomes
- Develop a rigorous understanding of a specific area of economics through intensive study of the research literature.

500-Level Graduate Courses (available to advanced undergraduates)

ECON 580 : Advanced Price Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 378 & ECON 382; or STAT 201 & MATH 313 & ECON 382

DESCRIPTION: Modern theories of consumers, producers, and competitive equilibria.

Course Outcomes
- Use the tools of constrained optimization in analyzing comparative statics results arising in the study of economic phenomena.

ECON 581 : Advanced Macroeconomics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ECON 381 & ECON 382 & ECON 388

DESCRIPTION: Theory of determining national income, employment, inflation, and interest rates. Issues of economic fluctuations, economic growth, and monetary and fiscal policy.

Course Outcomes
- Acquire a toolset for analyzing modern macroeconomic models.Demonstrate an understanding of basic dynamic stochastic general equilibrium (DSGE) macroeconomic modeling, including:How to set up a model.How to render it stationary, if necessary.How to solve for the model's steady state both analytically and numerically.How to solve for the model's dynamics using various numerical techniques.How to calibrate the model.How to simulate the model economy.How to generate impulse response functions.How to generate data moments.How to estimate model parameters using simulated method of momentsUse MATLAB and Dynare, software packages widely used in macroeconomic model simulation.Demonstrate an understanding of other macroeconomic models, such as:Overlapping generations (OLG) models.Continuous-time Ramsey-style models.Estimate and interpret structural vector autoregression (SVAR) empirical models.Demonstrate an

understanding of current issues being addressed in macroeconomics research.Be prepared to perform well in the macroeconomics classes in the top Ph.D. programs in economics.

ECON 582 : Topics in Mathematical Economics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 580

DESCRIPTION: Advanced topics such as risk and uncertainty, game theory, and capital theory.

Course Outcomes

- Economics 582 is a topics course with the goal of showing students the frontier. By its nature, the course exhibits different learning objectives each time it is taught.

ECON 586 : Advanced Mathematics for Economists. (3:3:0)

PREREQUISITE: ECON 380 & MATH 314

DESCRIPTION: Advanced mathematical methods that have proved useful in economic modeling.

Course Outcomes

No outcomes are available at this time.

ECON 588 : Advanced Econometrics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ECON 388

DESCRIPTION: Theory and practice of formulating, estimating, and analyzing economic models.

Course Outcomes

- Demonstrate a familiarity with the properties and applications of several families of statistical distributions to econometric problems.Demonstrate an understanding of variations and generalizations of the basic regression model includingGeneralized least squaresGeneralized autoregressive conditional heteroskedasticity modelsInstrumental variablesSeemingly unrelated regression modelsPanel dataHausman specification tests.Demonstrate an understanding of estimation frameworks in econometric models includingParametric, semiparametric, and non parametric specificationsMaximum likelihood, M-, generalized method of moments, kernel, empirical likelihood, and extremum estimation.Formulate and estimate various nonlinear models.Identify and estimate autoregressive integrated moving average (ARIMA) models and obtain forecasts of economic variables.Demonstrate an understanding of dynamic (and static) structural econometric models including being able to discussReduced form, structural, and transfer function representationsThe identification problemIssues of estimation and statistical inferenceVector autoregression models.Complete a research project in which they formulate a research question, apply appropriate methods to answer the question, and prepare a paper summarizing their results.

ECON 599R : Academic Internship: Supervised Management and Training. (.5-6:0:ARR)

PREREQUISITE: Course work pertinent to proposed experience.

Course Outcomes

No outcomes are available at this time.

The School of Family Life is committed to enhancing the quality of life of individuals and families within homes and communities. Accordingly, the mission of the school is to:

- Provide instruction that fosters commitment to the principles in *The Family: A Proclamation to the World.*
- Conduct research that contributes to the understanding and enhancement of human development, temporal well-being in the home, marriage and family relationships.
- Help students develop the attitudes, beliefs, behaviors, and skills that characterize persons of positive influence—in their own marriage and families, in their professions, in church and public service, and in other personal relationships.

Admission to Degree Program

All degree programs in the School of Family Life are open enrollment.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Family and Consumer Sciences Education (Program Outcomes)
BS in Family Life
Family Studies Emphasis (Program Outcomes)
Human Development Emphasis (Program Outcomes)

Minor in Family Life
Minor in Gerontology

Students should see their college advisement center for help or information concerning the undergraduate programs.

Graduate Programs and Degrees

MS in Marriage, Family, and Human Development
MS in Marriage and Family Therapy
PhD in Marriage, Family, and Human Development
PhD in Marriage and Family Therapy

BS in Family and Consumer Sciences Education (76 hours*, including licensure hours)

Show All Course Descriptions
Hide All Course Descriptions

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

The Discipline

Academic preparation in this interdisciplinary education program includes study in the areas of early childhood development, marriage and family relationships, parenting education, housing and interiors, clothing and textiles, and nutrition and wellness.

With the development of a knowledge base in these critical areas, graduates will be prepared to provide valuable content to secondary education students as they confront life's challenges. These students can become a resource to their own families empowering them to become healthy community contributors.

This program interfaces with the McKay School of Education and includes professional education courses.

Careers

The family and consumer sciences education program prepares students to be licensed by the State of Utah for teaching in the secondary schools. This teaching license can be transferred to other states upon meeting individual state requirements. Students may also find employment in business and Cooperative Extension.

Program Requirements | View MAP | View Program Outcomes

1. The School of Family Life requires a minimum of 18 hours of major credit to be taken in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.
2. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.
3. Complete the following human development course:

   SFL 210 : Human Development. (3:3:0)

   OFFERED: Independent Study also.
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.
   NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

   Course Outcomes
   - Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
   - Improve your writing and critical thinking skills.
   - Understand the research methodology utilized in the study of human development.

4. Complete the following marriage, family relationships, and parenting courses:

   SFL 240 : Parenting and Child Guidance. (3:3:0)

   WHEN TAUGHT: Fall; Winter; Spring
   DESCRIPTION: Theories and skills related to quality parent-child relationships.

   Course Outcomes
   - Critically examine theories of overall parenting styles and the impact of these styles upon optimal parenting.Critically examine parenting practices within the overall parenting styles and the impact of these practices upon optimal parenting.Identify effective parenting practices in the context of various life stages.Understand parenting principles that may heighten professional and/or parental potential.
   - Synthesize in writing an analysis of parenting styles and practices of your family of origin and how you may modify those styles and practices with the principles obtained in this class.Examine and write in depth a specific area of interest related to parenting styles and practices.

And complete one of the following courses:

Either

SFL 160 : Introduction to Family Processes. (3:3:0)

OFFERED: Honors also; Independent Study also.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

Course Outcomes

- Critically examine the main theoretical frameworks used in the family sciences.Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.
- Identify and discuss how researchers uniquely study families and family systems.

Or

SFL 223 : Preparation for Marriage. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Factors related to quality relationships, mate selection, and the transition into marriage.

Course Outcomes

- Understand the Lord's "divine design" (Proc. ¶ 7) for marriage relationships (e.g., the nature of the marriage covenant, equal partnership, stewardships of husbands & wives, etc).Increase awareness of marriage as a social institution.Become sensitized to the modern threats to marriage.Increase understanding of the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.Increase awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.Enhance spiritual awareness and academic skills in order to help them weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship.Critically explicate your awareness of marriage as a social institution.Identify and be sensitive to modern cultural threats to marriage.Be able to grasp and understand the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.Increase your awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.Enhance your spiritual awareness and academic skills in order to help you critically weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship to "hold fast to that which is good" (1Thess. 5:21).

5. Complete the following early childhood learning experiences practice with lab:

SFL 221 : Foundations of Developmentally Appropriate Practices in Programs for Young Children. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 210

DESCRIPTION: Historical, philosophical, organizational, and curricular issues related to developmentally appropriate practices in programs for young children.

NOTE: Due to enrollment constraints, SFL 221 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes

- Obtain an historical perspective of early childhood and a philosophical foundation in developmentally appropriate practices.Become conversant with the developmentally appropriate practice standards published by NAEYC (National Association for the Education of Young Children) and understand how they apply to making effective educational decisions that will benefit children and enhance their growth and development.Communicate the principles of developmentally appropriate practices to parents and colleagues.Understand how to create classrooms that incorporate the five guidelines or points of the "Mariner's Star":creating a caring community of learnersteaching to enhance development and learningconstructing an appropriate curriculumassessing children's learning and developmentestablishing reciprocal relationships with families.Gain a functional understanding of how teachers within a developmental model implement appropriate guidance and classroom management strategies, function in "lead" and "support" teacher roles, create and modify effective learning environments, facilitate and scaffold learning and, develop strategies to meet the diversity of needs in the children and families they serve.
- Utilize observational opportunities to assess teaching roles, learning environments, and young children's individual and/or group learning.

SFL 222 : Practicum in Developmentally Appropriate Practices. (2:0:12)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SFL 240; SFL 221 (must be taken within 5 years of SFL 222).

DESCRIPTION: Initial practicum with young children to increase understanding of socialization and learning processes, to create meaningful learning opportunities, and to implement developmentally appropriate practices.

NOTE: Due to enrollment constraints, SFL 222 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes

- Demonstrate understanding of how children develop and learn by assisting in and developing learning

opportunities that support social, intellectual and personal growth.Develop instructional strategies for teaching children in small group and large group classroom settings.Evaluate and record student learning to assess instructional goals and objectives to drive continuing classroom instructionUse understanding of individual and group behavior to establish a learning environment that encourages active engagement, positive interactions and self motivation.Reflectively evaluate daily and weekly goals, assignment objectives and program expectations to refine personal development in teaching.Demonstrate professional habits that will guide interpersonal and caree choices.

6. Complete the following consumer and the market, family finance, family resource management courses:

SFL 260 : Family Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Introduction to time value of money, budgeting, saving, credit, taxes, housing, insurance, and investing emphasizing practical application in the home.

Course Outcomes

- Identify areas of financial risk in your personal lives.Differentiate between a good financial decision and a poor financial decision.Use financial calculators or financial equations for time value of money to classify various financial products to determine the most appropriate product for their family given their current financial situation.Generate a family budget and evaluate home and automobile purchasing and financing options.Analyze and plan for present and future needs by understanding investing option available.

SFL 261 : Consumerism and the Marketplace for Secondary Teachers. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: A pre-service preparation course designed to prepare FACSED classroom teachers to teach content regarding dynamics of consumerism and the marketplace and develop skills for implementing a discipline-based approach for teaching consumerism in secondary schools.

Course Outcomes

- Identify consumer rights, responsibilities, and remedies and identify effective practices for purchasing consumer goods and services.
- Synthesize legal and ethical considerations of being an informed consumer in today's market.
- Identify and explain the purposes and features of private and government agencies providing assistance, information, and published materials that are consumer resources for decision making.
- Distinguish the roles of labels, warranties, guarantees, and advocate groups in wise consumer behavior.
- Determine how government, business, and the consumer interact for the mutual benefit of each other in the marketplace.
- Analyze prudent steps in the selection of healthcare, childcare, elder care, repair services, household materials, automobiles, toys, and equipment.
- Describe ways to avoid identity theft, fraud, deceptions, and rip-offs.
- Explain the importance of understanding financial contracts (disclosure information, grace period, payment penalties, method of interest calculation).
- Perform a market analysis exercise and exercise better shopping practices.

7. Complete the following nutrition through the life cycle course:

NDFS 100 : Essentials of Human Nutrition. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

DESCRIPTION: Food-oriented study of nutritional facts and principles as a basis for dietary choices; consequences of choices; scientifically examining controversial topics.

Course Outcomes

- Apply the scientific method to identify and interpret credible nutrition information.
- Identify, interpret, and apply nutrition information.
- Identify functions of nutrients and their major food sources.

8. Complete the following food preparation and meal management courses:

SFL 110 : Food Preparation in the Home. (2:1:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Principles of cooking and skill development in food preparation techniques. Lab required.

NOTE: Fee.

Course Outcomes

- Understand food preparation principles and techniques and apply them while mixing, cooking, and baking food products for home use.Identify and prevent food borne illness and safety hazards with appropriate food handling and preparation techniques.Understand and apply knowledge of nutrition to food preparation.Develop confidence in selecting and following recipes.Demonstrate proper use of equipment for baking and cooking.

SFL 340 : Family Meal Management. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 110 or instructor's consent.

DESCRIPTION: Organizing and managing time, energy, finance, and nutrition in planning, preparing, and serving family meals; ethnic and cultural diversity in etiquette and meal planning. Lab required.

NOTE: Fee.

Course Outcomes

- Develop a philosophy of why meal preparation and consumption at the family table is an important component in development and stability of families.Plan attractive meals with consideration for nutritional adequacy, income level, social, cultural, psychological, palatability, and aesthetic factors.Employ sanitation standards and safety procedures in food handling and in the use and care of kitchen utensils, equipment, and food storage.Demonstrate an understanding of factors affecting food habits, meal consumption patterns, and trends in food cost.Utilize managerial skills and available resources in food purchasing, and meal planning, preparation, and service

9. Complete the following food science with lab courses:

NDFS 250 : Essentials of Food Science. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CHEM 101; or CHEM 105; or SFL 110; concurrent enrollment in NDFS 251

DESCRIPTION: Overview of food science, including chemical, physical and microbiological principles related to food processing, storage, and utilization. Current issues in food science.

NOTE: This class should be taken concurrently with NDFS 251.

Course Outcomes

- Explain the basic concepts and principles of Food Science
- Recognize (distinguish) current topics in the news and in lay literature as being related to Food Science and Technology
- Evaluate the scientific validity of various consumer concerns regarding food production, distribution, preservation, storage and utilization
- Obtain further information on Food Science topics through library research of the scientific literature
- Explain how Food Science knowledge applies to your major field of study, and make the connection between what you're learning and what you plan to do after graduation
- Solve Food Science related problems.
- Determine if you more fully enjoy eating, understanding what happens to food between farm gate and dinner plate

NDFS 251 : Essentials of Food Science Laboratory. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CHEM 101; or CHEM 105; or SFL 110; Concurrent enrollment in NDFS 250.

DESCRIPTION: Laboratory experience in the chemistry of changes occurring during food processing, storage, and utilization.

NOTE: This class should be taken concurrently with NDFS 250.

Course Outcomes

- Understand the basic chemistry involved in ripening, processing, and storing food*Relates to Program Learning Outcome: Demonstrate an understanding of the chemical changes occurring during food processing and storage, including reactions involving carbohydrates, protein and fats
- Develop the ability to work in teams to carry out laboratory experiments
- Understand key elements of food required for proper preservation and safety*Relates to Program Learning Outcome: Demonstrate an understanding of the role of microorganisms in food processing, food preservation, and food safety with respect to pathogens, spoilage, and fermentative microorganisms, and apply the basic elements of sanitation and quality assurance programs to understand and control microbial effects in food

10. Complete the following introduction to housing and interior design course:

SFL 102 : Introduction to Interiors. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Interior design, emphasizing history and development of the American home.

Course Outcomes

There are no course outcomes available

11. Complete the following textiles course:

SFL 282 : Textiles. (3:3:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Natural and synthetic textile fibers, yarns, fabric construction, dyes, and finishes. Care and performance of textile fabrics for clothing and household use.

Course Outcomes

- Distinguish between fibers, yarns and fabrics.Predict behavior of fabric based on fiber content, as much as possible without having studied finishes and dying. That is, they will be able to use fiber and yarn and weave or knit properties to predict behavior.Choose among alternatives in the creation of simple yarns for specific purposes.Distinguish a woven fabric from a knitted one.Identify the basic weaves used in woven fabrics, and the 2 basic classes of knits, with several of the subclasses of common knits.Utilize correct terminology for the many items and processes used in the textile industry.Make choices among the many variables to create a particular fabric for a particular use.Identify forty-six common fabrics on sight.

12. Complete the following residential technology or housing: societal/environmental issues course:

SFL 202 : Design in the Home. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 102

DESCRIPTION: Intermediate application of elements and principles of design in the home.

Course Outcomes
- Develop or reinforce basic vocabulary of design.Increase awareness of design possibilities and the aesthetic and spiritual effect of different designs.Develop an understanding of design as a problem-solving process.Become a life-long observer of design and the designed environment.

13. Complete the following intermediate clothing construction and alterations course:
SFL 287 : Intermediate Clothing Construction. (3:3:5)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: SFL 185R or equivalent sewing skills.
DESCRIPTION: Assessing and executing various construction methods, including construction of several full-scale garments.
NOTE: Student-supplied materials required. Fee.

Course Outcomes
- Increase your ability in making appropriate choices among various construction methods given various fabric and style variablesStrengthen and broaden your experience in apparel construction techniques.Learn and use correct/appropriate construction terminologyRecognize and describe quality characteristics of various construction techniques, understand and apply processes necessary to produce them, and accurately evaluate resulting quality.Create examples of construction techniques which illustrate personal skill improvement over the course of the semester.Assemble a sample portfolio with materials prepared, mounted, and presented professionally.Continue to feel a sense of accomplishment and personal satisfaction in sewing.Understand and apply garment assembly sequencing as it relates to fabric and style variables.Demonstrate the “sample making” teaching approach and the “garment making” teaching approach in order to evaluate and have both in the professional repertoire.

14. Complete one of the following flat pattern design or advanced clothing construction courses:
SFL 387 : Advanced Clothing Studies: Patternmaking. (3:3:5)
WHEN TAUGHT: Fall; Summer
PREREQUISITE: SFL 287
DESCRIPTION: Flat pattern design, basic drafting, and basic draping for women's apparel.
NOTE: Student-supplied materials required.

Course Outcomes
- Understand and apply flat pattern principles and methods to create patterns for women's apparel.Demonstrate how to manipulate fabrics through draping to create basic styles for women's apparel.Demonstrate how to apply basic pattern drafting techniques to create basic patterns from measurements for women.Create a record of work done with accompanying examples of styles made in class.Demonstrate the use of correct terminology.Apply pattern making principles in fabric test items.

SFL 487 : Advanced Clothing Studies: Construction. (3:3:5)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SFL 287 or equivalent sewing skills.
DESCRIPTION: Three-dimensional fitting of apparel and advanced garment construction.
NOTE: Fee.

Course Outcomes
- Apply the four aspects of fit and apply them to create correct fit in the basic garment.Be able to identify a new range of construction and style details and execute them well.Become more independent in sewing activities.Develop and improve skill levels of sewing techniques.Assemble a professional quality planned and organized portfolio of assigned techniques.Demonstrate sewing and fitting vocabulary and use terms correctly.

15. Complete the following clothing selection and psychology of clothing course:
SFL 280 : Dynamics of Clothing. (3:3:0)
WHEN TAUGHT: Fall; Spring
DESCRIPTION: Introduction to the influences, meanings, and dimensions of individual clothing selection processes and its effect on families, communities, and cultures.

Course Outcomes
- · Develop critical judgment about the effects of clothing upon the physical, social, psychological, and economic well-being of individuals, families, and social groups.· Understand the terminology, concepts, and theories in clothing, fashion, and consumer behavior.· Identify and understand the interrelationships among areas in the fashion industry and become aware of related careers.· Learn the history of fashion through the 20th century and influential fashion designers and capitals.· Become acquainted with types of research conducted in the field.· Develop critical thinking skills, and use these skills to communicate ideas related to clothing in the family.

16. Complete the following teaching methods for family consumer science course:
SFL 377 : Teaching Methods and Instruction in Family and Consumer Sciences Education. (3:6:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SFL 276R
DESCRIPTION: Developing meaningful and engaging instruction for secondary students; developing critical

thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes
- Understand the central concepts, tools of inquiry, and structures of the discipline(s} you teach and can create learning experiences that make these aspects of subject matter meaningful for students.
- Understand how children learn and develop, and provide learning opportunities that support students' intellectual social and personal development.
- Understand how students differ in their approaches to learning and create instructional opportunities that are adapted to diverse learners.
- Understand and use a variety of instructional strategies to encourage students' development of critical thinking, problem solving, and performance skills.
- Develop an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interaction, active engagement in learning, and self motivation.
- Utilize knowledge of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom.
- Plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.
- Understand and use formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social and physical development of the learner.
- Critically evaluate the effects of choices and actions on others (students, parents, and other professionals in the learning community} and actively seek out opportunities to grow professionally.
- Understand how to foster relationships with school colleagues, parents, and agencies in the larger community to support students' learning and well- being.

17. Complete the Professional Education Component:
    - Complete the following:

CPSE 402 : Educating Students with Disabilities in Secondary Classrooms. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or comparable major course; FBI fingerprint background clearance.

DESCRIPTION: Issues, policies, and methods in teaching secondary students with disabilities in general education classrooms. Lab.

Course Outcomes
- Demonstrate sensitivity to individuals with disabilities.
- Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- Describe the steps in the Individual Education Program (IEP) process, including Individualized Transition Plans for students aged 14-22.
- Use research-supported methods for academic instruction of individuals with disabilities including explicit instruction, learning strategies, task analysis, and active participation.
- Describe models and strategies of consultation and collaboration including co-planning and co-teaching.
- Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act (IDEA).
- Develop a personal philosophy of special education which includes an understanding of the implications of Least Restrictive Environment as defined in IDEA.
- Demonstrate knowledge of basic classroom management theories and an understanding of teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs.
- Describe the characteristics and educational implications of students with high and low incidence disabilities
- Demonstrate ability to identify and prioritize areas of the general curriculum and provide accommodations for individuals with exceptional learning needs

IP&T 286 : Instructional Technology in Teaching. (1:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

Course Outcomes
There are no course outcomes available

SC ED 350 : Adolescent Development in an Education Context. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Adolescent development and its implications for integrated school culture, curriculum design, instructional practices, and assessment.

Course Outcomes
- The students will demonstrate how the stages of development impact instructional practices.
- The students will understand the social, physical, and cognitive developmental stages of adolescence in relation to the tasks of automony, identity and intimacy.
- The students will demonstrate how the stages of development impact classroom environments and management.

SC ED 353 : Multicultural Education. (2:2:0)

WHEN Fall; Winter; Spring; Summer

TAUGHT:
PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.
DESCRIPTION: Designing and adapting instruction for diverse learners; collaborating with families, cultures, and communities in promoting and sustaining learning.

Course Outcomes
- Students will examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavio through a process of reflection.
- Acknowledge the dynamics of culture and diversity in school success and teachers' teaching. This includes recognizing and overcoming deficit thinking.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.
- Recognize and acknowledge racism, discrimination and other forms of inquity and privilege in themselves, in others, and within institutions.
- Recognize and use a personal moral spiritual framework along with principles and concepts of social science to guide educational accomplishments for diverse learners.

SFL 276R : Exploration of Teaching: Family and Consumer Sciences. (3-4:ARR:ARR)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Major-area preadmission requirements; FBI fingerprint and background clearance.
DESCRIPTION: Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Course Outcomes
There are no course outcomes available

(4 hours required)
SFL 378 : Practicum in Secondary Education. (1:0:3)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: SFL 276R
RECOMMENDED: SFL 110, 185, and 276R.
DESCRIPTION: Field-based teaching experience directed at helping prospective teachers learn to give demonstrations, prepare for lab experiences, and execute the experience using meaningful and engaging instruction for students in the Family and Consumer Sciences content.

Course Outcomes
There are no course outcomes available

Note: FBI fingerprinting and background clearance must be completed before registration in SFL 276R.

- Complete 12 hours from the following:

SC ED 496R : Academic Internship: Secondary Education. (12:ARR:ARR)
WHEN TAUGHT: Fall
PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.
DESCRIPTION: Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes
- Students will demonstrate that they can teach, manage, and assess content area knowledge and skills in the 7-12 classroom.
- Foster relationships with school colleagues, parents, and the larger community.

: Academic Internship: Social Sciences.

Course Outcomes

: Academic Internship: English.

Course Outcomes

: Academic Internship: Mathematics.

Course Outcomes

: Academic Internship: Biological Sciences.

Course Outcomes

: Academic Internship: Physical Sciences.

Course Outcomes

Or
SFL 476 : Secondary Student Teaching - Consumer Science. (12:ARR:ARR)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at

least a C- in Sc Ed 377; FBI fingerprint and background clearance.

RECOMMENDED: All core and education classes.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes
There are no course outcomes available

18. Complete the PRAXIS II test.

*Hours include courses that may fulfill university core requirements.

BS in Family Life: Family Studies Emphasis (43 hours*)

Show All Course Descriptions
Hide All Course Descriptions

The Discipline

Family studies designates a curriculum for those who wish to become skilled in a discipline of inquiry (theory, research, and practice) regarding all aspects of family life, including the temporal welfare of families, the interactions within a family, and the family's central role in community and culture.

Students will study the theories, contexts, and processes used to understand the dynamics of family interaction within and outside of the home. Students can study the practical skills required to meet human needs such as feeding, housing, clothing, and financing the family. The family studies major seeks to promote religious and community involvement that maintains and strengthens home and family as the fundamental unit of society.

This curriculum offers a foundation to understand the conduct and value of human social science. It also offers the student a specific focus, an identity and expertise, and freedom to create a program that best meets their professional and life goals. Specific goals for students include how to: (a) conduct and evaluate research efforts—reported both in journals and in the press, (b) use interpretive frameworks to offer coherent renditions of the meaning of human experience, (c) evaluate contexts of family interaction, and (d) apply family science knowledge to real-life issues that emerge in practice and daily family life.

Careers

Many possible careers are open to family studies majors. Because of the variety of options, SFL 101 has been created to help students create a course of study that will best fit their goals. The family studies faculty can provide individual consultation as students demand. An internship as a capstone experience is also an excellent way to integrate theory, research, and practice.

Research Opportunities

Students are encouraged to work with professors on research projects that help them experience the "how to" of being a family scientist. Students may contact faculty individually, seek mentoring grants from the university, register for internships (the capstone course) that help them integrate classroom learning with real-world experience, and create projects of their own.

Preparation for Graduate Studies

Students who plan to attend graduate school should take SFL 336 and 460. In addition, SFL 330 and Psych 342 will help students explore options for graduate study in marriage and family therapy. Other 300- and 400-level courses that emphasize human development or family studies will prepare students for the marriage, family, and human development graduate program.

Internships

Contact the Family and Social Services Internship Office, 945 SWKT, (801) 422-2168, for information.

Program Requirements | View MAP | View Program Outcomes

1. The School of Family Life requires a minimum of 18 hours of SFL upper-division course work to be taken in residency at BYU. These hours count toward BYU's 30-hour residency requirement for graduation.

2. Complete the following School of Family Life core courses:
   SFL 100 : Strengthening Marriage and Family: Proclamation Principles and Scholarship. (3:3:0)
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: Understanding, applying, and sharing principles of successful marriage and family life from the LDS proclamation on the family, using sacred and scholarly perspectives.

   Course Outcomes
   - Critically understand your testimony of the principles of the Restored Gospel pertaining to marriage, home and family.Synthesize and be able to apply principles from revealed truth and supportive

scholarship to strengthen marriage, home, and family life.Be able to confidently share and defend principles of successful marriage, home and family life using support from sacred and scholarly sources.
- Demonstrate improvement in writing skills, speaking, and critical thinking skills to be more effective advocates for marriage, home, and family in a variety of settings.

SFL 101 : Introduction to School of Family Life. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Required seminar for all students entering the major. Overview of curriculum and major requirements, faculty research programs and specialties, campus resources, future opportunities, and career possibilities.

Course Outcomes
- Create a realistic major or minor plan in the School of Family Life.Identify possible post-graduation pathways with a major in the School of Family Life.Participate in and develop a sense of community that includes both faculty and students.Be able to utilize important resources to become an effective learner during college and after.

SFL 160 : Introduction to Family Processes. (3:3:0)

OFFERED: Honors also; Independent Study also.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

Course Outcomes
- Critically examine the main theoretical frameworks used in the family sciences.Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.
- Identify and discuss how researchers uniquely study families and family systems.

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

SFL 290 : Critical Inquiry and Research Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Philosophies of critical inquiry. Principles of designing, conducting, and reporting social science investigations.

Course Outcomes
- Evaluate the strengths and weaknesses of different methods of inquiry used in investigating the human contexts of human development, home, and family.
- Conduct a research study and write up the results.
- Gain practical experience in using research methods.
- Use library search engines to identify articles targeted toward a specific research question.

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

RECOMMENDED: MATH 110 or equivalent.

DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes
- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

3. Complete the following family studies core courses:

SFL 336 : Theories in Family Perspective. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Introduction of major theoretical perspectives and of philosophical issues. Readings include representative papers applying theoretical and philosophic tenets.

Course Outcomes

- Recognize important philosophical foundations of social research methods and theory.Identify and understand the basic components of eight family theories.Compare and contrast the philosophical underpinnings (assumptions and implications) of theories.
- Apply theory to family focused research.
- Represent your own ideas about family life using theoretical language.Write more clearly about your ideas and the ideas of other family social scientists.

SFL 460 : Advanced Family Processes. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Integrating theory, research, and application of ideas introduced in SFL 160, focusing on key theoretical points, how research is conducted and applied, communication patterns, ritualization, conflict, distance regulation, crises, stress, and building family strengths.

Course Outcomes

- Understand the research on family processesCritically evaluate the research on family processesSynthesize the research on family processes
- Create recommendations for family issues using your understanding, evaluation, and synthesis of the research on family processes.

4. Complete 12 hours from any SFL upper-division (300-level and above) courses based on personal interests/professional goals. SFL 101 will provide guidance.

5. Complete 6 hours from any SFL courses not already taken above.

6. Complete three hours from one of the following capstone courses:

SFL 399R : Academic Internship. (1-9:Arr.:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Internship program coordinator's consent.

DESCRIPTION: Supervised professional experiences linking academic learning with experience in the field.

NOTE: Forty-five internship hours required per credit hour.

Course Outcomes

- Complete a supervised internship in an employment setting or agency related to human development, marriage, home, or family.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

SFL 403R : Research/Creative Works Practicum. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

DESCRIPTION: Research/Creative works experience in a project directed by a faculty member.

Course Outcomes

- Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

SFL 498 : Family Life Education: Integrating Theory, Research, and Practice. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Senior standing; instructor's consent.

DESCRIPTION: Integrating theory, research, and practice. Developing competencies to design, implement, and evaluate family flife education programs. Preparing to work preventively with couples, parents, and families in areas such as marriage preparation, marriage enhancement, and parenting.

Course Outcomes

- Develop and articulate a personal philosophy of family life education.
- Critically evaluate the quality of several examples of family life education programs.
- Design a family life education program using scholarly literature and best practices.
- Be able to apply a framework for the development of family life education programs.
- Be able to utilize a variety of approaches to evaluating family life education programs.
- Learn principles and practices for teaching about family life in a variety of traditional and contemporary venues, including workshop and self-directed approaches.
- Practice workshop teaching and receive peer, clientele, and instructor feedback.
- Be able to utilize principles and practices for reaching diverse audiences.

- Be able to utilize principles and strategies for multiplying their reach through collaborative partnerships and social marketing.

Note: Students who take a full-time semester internship may earn up to 6 additional credit hours for SFL 399R. These additional hours will count toward graduation but not toward emphasis requirements. (A student in the Family Studies Emphasis may petition for 3 of the additional internship hours to count toward an upper-division elective.) For exceptions for capstone courses, contact department.

*Hours include courses that may fulfill university core requirements.

BS in Family Life: Human Development Emphasis (46 hours*)

Show All Course Descriptions
Hide All Course Descriptions

The Discipline

The human development emphasis centers on theories, research, and practices related to optimal human development within the context of family life. Human development scholarship provides a life-span perspective for understanding human development within the family context by helping students learn how children, youth, and adults develop, change, and face challenges throughout the life course (infancy, childhood, adolescence, and adulthood). Our teaching strategy reflects a strong commitment to better critical thinking and problem solving skills as students become involved in mentored learning research, internships, and outreach experiences.

Careers

The program in human development is a broad, liberal arts training designed to assist students as they seek professional activity (as volunteers or for pay) in settings where knowledge of human development and behavior is valued. An emphasis in human development prepares graduates to make significant contributions locally (e.g., one's own family, church, and local community) and professionally (e.g., working in the community services professions, and as volunteers or paid professionals for worldwide human service-based organizations). Coursework in the human development emphasis also helps students to fulfill part of the requirements to become a certified Child-Life Specialist and work with children and families in hospital settings.

Some graduates with a human development emphasis are employed in community action centers, childcare centers, residential treatment centers, programs for the elderly, juvenile correction programs, and youth programs. Still other students prepare for volunteer-based community intervention (e.g., Habitat for Humanity, Red Cross, and The Muscular Dystrophy Association).

Additionally, a human development emphasis is an excellent undergraduate preparation for those pursuing graduate school in human development research. Others seek professional certification by obtaining advanced degrees in school counseling, special education, clinical gerontology, and clinical psychology.

For students who are interested in teaching opportunities in public schools, a major in early childhood education teacher certification is available through the Teacher Education Department in the McKay School of Education. This certification qualifies individuals to teach kindergarten through third grade in public and private schools. The human development emphasis provides foundation courses for those preparing to enter early childhood education teacher certification programs (see Teacher Education Department for a list of these courses).

In addition, an early childhood focus within the human development emphasis prepares students for vocations that do not require teacher certifications (e.g., Head Start).

Research Opportunities

Students are encouraged to work with professors on research projects that help them experience the "how to" of being a family scientist. Students may contact faculty individually, seek mentoring grants from the university, register for internships (the capstone course) that help them integrate classroom learning with real-world experience, and create projects of their own.

Preparation for Graduate Studies

Students who plan to attend graduate school are encouraged to take as many of the upper-division human development topic courses as possible. Other 300- and 400-level courses that emphasize human development or family studies will serve as a springboard to masters or PhD programs in human development, developmental psychology, and family studies related programs.

Internships

Contact the Family and Social Services Internship Office, 945 SWKT, (801) 422-2168, for information.

Program Requirements | View MAP | View Program Outcomes

1. The School of Family Life requires a minimum of 18 hours of upper-division major course work to be taken in residency at BYU for this degree program. (This requirement includes taking at least 12 hours minimum of the human development core

in residency at BYU.) These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Complete the following School of Family Life core courses:

SFL 100 : Strengthening Marriage and Family: Proclamation Principles and Scholarship. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Understanding, applying, and sharing principles of successful marriage and family life from the LDS proclamation on the family, using sacred and scholarly perspectives.

Course Outcomes

- Critically understand your testimony of the principles of the Restored Gospel pertaining to marriage, home and family.Synthesize and be able to apply principles from revealed truth and supportive scholarship to strengthen marriage, home, and family life.Be able to confidently share and defend principles of successful marriage, home and family life using support from sacred and scholarly sources.
- Demonstrate improvement in writing skills, speaking, and critical thinking skills to be more effective advocates for marriage, home, and family in a variety of settings.

SFL 101 : Introduction to School of Family Life. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Required seminar for all students entering the major. Overview of curriculum and major requirements, faculty research programs and specialties, campus resources, future opportunities, and career possibilities.

Course Outcomes

- Create a realistic major or minor plan in the School of Family Life.Identify possible post-graduation pathways with a major in the School of Family Life.Participate in and develop a sense of community that includes both faculty and students.Be able to utilize important resources to become an effective learner during college and after.

SFL 160 : Introduction to Family Processes. (3:3:0)

OFFERED: Honors also; Independent Study also.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

Course Outcomes

- Critically examine the main theoretical frameworks used in the family sciences.Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.
- Identify and discuss how researchers uniquely study families and family systems.

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

SFL 290 : Critical Inquiry and Research Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Philosophies of critical inquiry. Principles of designing, conducting, and reporting social science investigations.

Course Outcomes

- Evaluate the strengths and weaknesses of different methods of inquiry used in investigating the human contexts of human development, home, and family.
- Conduct a research study and write up the results.
- Gain practical experience in using research methods.
- Use library search engines to identify articles targeted toward a specific research question.

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

RECOMMENDED: MATH 110 or equivalent.

DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes

- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

3. Complete the following human development life-span core courses:

SFL 331 : Infant Development in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Conception, prenatal development, pregnancy. Physical, cognitive, and social development of the first twenty-four months. Implications for guidance and care in the family.

Course Outcomes

There are no course outcomes available

SFL 333 : (SFL-Soc 318) Adolescent Development in the Family and Other Social Contexts. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Examining the developmental and social contexts of adolescents with emphasis on the importance of the family. Other contexts include peers, religion, community, schools, and cross-cultural issues.

Course Outcomes

- Critically examine and discuss selected topics in adolescent development, as well as being able to apply the information and skills learned in this class to your own life.Identify and discuss the major theories of adolescent development, as well as the various research methods used in the study of adolescent development.Understand the important developmental changes that young people experience during this period and during their transition to adulthood.Discuss why at-risk issues are so pronounced during this period and understand prevention and intervention measures that can be taken by families to help them cope with this transition.
- Synthesize (both in thought and writing) information on adolescent development, and apply this information to “real” adolescents with whom you come into contact.

SFL 334 : Adult Development and Aging in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 160

DESCRIPTION: Adjustments to physical, emotional, social, and economic changes. Needs arising from changes in family relationships, living arrangements, and employment; retirement planning.

Course Outcomes

- Interact with older adults (parents, grandparents, neighbors, ward members, research participants, clients, etc.) in an informed (accurate knowledge of relevant issues) and sensitive (aware of “life course” perspective) manner.Apply complex interactions of gerontology concepts to real-life situations, including current issues in local, national, and world communities.Understand and articulate basic age-related biological, psychological, and sociological processes and learn how to access and evaluate information about those age-related experiences.Synthesize course concepts through observing, serving, and interacting with older adults in the community.

SFL 351 : Socialization Across Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Processes and sequences of social development across childhood.

Course Outcomes

There are no course outcomes available

4. Complete 6 hours from the following human development topic courses:

SFL 352 : Cognitive Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Development of mental abilities; effects of maturation and learning on memory, perception, attention processes, intelligence, social cognition.

Course Outcomes

- Critically examine and discuss selected topics in cognitive development.Identify and discuss selected theories and theoretical models of cognitive development, as well as the various research methods used in the study of cognitive develop. Understand how cognitive development changes throughout life span.
- Evaluate in empirical research studies a specific topic in cognitive development and synthesize in each study the research questions, methodology, findings, and discussions of the findings.
- Succinctly summarize in writing a collection of empirical studies on a topic in cognitive development of your interest.

SFL 355 : Language Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Philosophical, social, intellectual, and emotional contexts of language acquisition and usage.

Course Outcomes

There are no course outcomes available

SFL 358 : Media, Family, and Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Aspects of media and their potential effects on family interactions and human development across the lifespan.

Course Outcomes

- Discuss the frequency of use of forms of media.Describe the major theories and associated research that are used to describe media research.Critically examine media theory and research in the field and apply course material to your own experiences.Understand how media may influence human development.Discuss how media can shape the family.
- Demonstrate research skills by researching a topic area relevant to the media.

SFL 359 : Child Life in Healthcare Settings. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 210

RECOMMENDED: SFL 331, 333, 351.

DESCRIPTION: Roles of child life specialists in preparing children and families for healthcare experiences. Content includes psychosocial and developmental needs of children, adolescents, and families in healthcare settings and impact of illness, injury, and hospitalization on the child and family.

Course Outcomes

- Describe the contents of the official documents of the Child Life Council (CLC), including the Code of Ethical Responsibility, Child Life Competencies, and Standards of Clinical Practice, the Child Life Mission, Values and Vision Statements, and the Code of Professional Practice.
- Identify the elements of child life practice in direct and non-direct services in pediatric health care including a historical review of the profession and its development in the evolution of children's healthcare.
- Use developmental theory to assess the impact of illness, injury and health care on patients and families, identifying the stressors and developmental and psychosocial treatment issues that affect the healthcare experience of a child and family including siblings.
- Be able to apply the key principles of patient- and family-centered care, including principles of respect and dignity, information sharing, supporting participation in care, and collaboration in relationship to child life practice.
- Compare both historical and current perspectives on the rationale for, and techniques and outcomes of preparation, as well as accepted preparation methods for healthcare encounters and life-changing events.

SFL 449 : Biological Foundations of Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Biological, genetic, and neurological foundations of human development and their interactions with family socialization processes.

Course Outcomes

- Understand how biological process influences human development.Understand and synthesize the intersections between biology, psychology, and behavior in a developmental context.
- Critically examine and analyze current research in the areas of developmental psychobiology.
- Demonstrate critical thinking/writing skills.

SFL 453 : Moral Development. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Theories and applications of moral development, including moral reasoning, moral emotions, contextual factors, and socialization influences that influence moral decisions and moral behavior.

Course Outcomes

- Critically examine and discuss selected topics in moral development, as well as being able to apply the information and skills learned in this class to your own life.Understand the different constructs that contribute to moral development, such as cognition, emotion, identity, context, and culture.Be able to discuss socialization influences that impact children's moral development, such as parents, peers, teachers, and media.
- Identify and discuss the major theories of moral development, as well as the various research methods used in the study of moral and prosocial development.

- Think and write in a synthesized, analytical fashion, combining information across sources rather than merely summarizing information.

Note: Courses taken beyond the 6 required hours may count towards the 9-hour electives/prerequisites requirement below.

5. Complete 9 hours of any SFL course as electives/prerequisites.

6. Complete three hours of a capstone experience from the following:

SFL 399R : Academic Internship. (1-9:Arr.:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Internship program coordinator's consent.
DESCRIPTION: Supervised professional experiences linking academic learning with experience in the field.
NOTE: Forty-five internship hours required per credit hour.

Course Outcomes
- Complete a supervised internship in an employment setting or agency related to human development, marriage, home, or family.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

SFL 403R : Research/Creative Works Practicum. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.
DESCRIPTION: Research/Creative works experience in a project directed by a faculty member.

Course Outcomes
- Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

SFL 490 : Advanced Issues in Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
DESCRIPTION: Evaluation of research on physical, mental, emotional, and social development.

Course Outcomes
- Critically evaluate issues related to studying developmental processes as well as study and practice critical thinking skills.Critically synthesize information learned from previous human development courses by examining how biological (e.g., temperament) and environmental (e.g., parents and peers) processes interact to shape development.Demonstrate how to examine current issues in human development developmentally.Critically synthesize the information, skills, and abilities learned in the first three units in an examination of the period of development recently termed “emerging adulthood” (ages 18-27).

Note 1: If SFL 490 is not used to fulfill the capstone requirement, it may be used to fulfill 3 of the 9-hour elective/prerequisite requirements above.

Note 2: For SFL 399R and 403R human development related experiences are preferred. Only 3 credit hours of 399R or 403R may count towards the 46-hour degree requirement. Additional credits may, however, count towards the overall 120-hour graduation requirement.

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. This minor is intended for non-School of Family Life majors only.
2. The School of Family Life requires a minimum of nine hours to be taken in residency at BYU and from the School of Family Life for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.
3. Complete the following:

SFL 100 : Strengthening Marriage and Family: Proclamation Principles and Scholarship. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Understanding, applying, and sharing principles of successful marriage and family life from the LDS proclamation on the family, using sacred and scholarly perspectives.

Course Outcomes
- Critically understand your testimony of the principles of the Restored Gospel pertaining to marriage, home and family.Synthesize and be able to apply principles from revealed truth and supportive scholarship to strengthen marriage, home, and family life.Be able to confidently share and defend principles of successful marriage, home and family life using support from sacred and scholarly sources.
- Demonstrate improvement in writing skills, speaking, and critical thinking skills to be more effective advocates for marriage, home, and family in a variety of settings.

SFL 160 : Introduction to Family Processes. (3:3:0)

OFFERED: Honors also; Independent Study also.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

Course Outcomes
- Critically examine the main theoretical frameworks used in the family sciences.Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.
- Identify and discuss how researchers uniquely study families and family systems.

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

SFL 260 : Family Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Introduction to time value of money, budgeting, saving, credit, taxes, housing, insurance, and investing emphasizing practical application in the home.

Course Outcomes
- Identify areas of financial risk in your personal lives.Differentiate between a good financial decision and a poor financial decision.Use financial calculators or financial equations for time value of money to classify various financial products to determine the most appropriate product for their family given their current

financial situation.Generate a family budget and evaluate home and automobile purchasing and financing options.Analyze and plan for present and future needs by understanding investing option available.

4. Complete two additional courses from the School of Family Life.

Program Requirements

1. Complete 3 hours from the following Mentored Research Experience courses:

EXSC 497R : Undergraduate Research and Study. (.5-4:0:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Individual research and study in any area of exercise science.

Course Outcomes
- To provide the undergraduate student with a mentored learning experience specifically in exercise science related research

HLTH 491R : Mentored Research. (.5-3:Arr.:0)
DESCRIPTION: Collaborate with professors on mentoring grants or other public health-related research and initiatives.

Course Outcomes
- Experience at least one subset of research skills while conducting supervised public health research with a faculty member.

NURS 491 : Nursing Capstone. (2:4:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Courses in Nursing Semester 5.
DESCRIPTION: Seminar in advanced theory and synthesis of concepts for the nursing profession focusing on planning, delivering, and managing patient care in complex environments including leadership in the health care environment.

Course Outcomes
- 1. Demonstrate critical thinking skills in conjunction with current trends in nursing.
- 2. Articulate an understanding and appreciation of the nursing profession.
- 3. Reflect through personal behavior an understanding of human and professional values.

And

NURS 492 : Clinical Practicum for Capstone Nursing. (5.5:0:Arr)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Courses in Nursing Semester 5.
DESCRIPTION: Clinical practicum focusing on planning, delivering, and managing patient care in complex environments. Leadership components incorporated into clinical experiences and practices.
NOTE: Requires 230 hours per semester (210 clinical hours; 20 bridging hours, 1.5 hours per week).

Course Outcomes
- 2. Demonstrate critical thinking skills through the understanding, use, and implementation of evidence based nursing practice.
- 1. Act in a responsible and accountable manner while providing safe, efficient, compassionate, evidence based nursing care.
- 3. Demonstrate appropriate, accurate, and effective communication skills with patient/family, health-care team, and faculty.

PSYCH 499R : Independent Research. (.5-3:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.

Course Outcomes
- Student(s) will demonstrate skill in several aspects of the research process: literature review and evaluation, data gathering, data analysis, writing, and publishing.Measurement: Student mastery of the research area will be assessed from a paper prepared by the end of the semester.

RECM 497R : Special Topics and Research. (.5-4:ARR:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

DESCRIPTION: Special topics, mentored research, and learning experiences, including attending professional conferences, Study Abroad participation, and other learning experiences.

Course Outcomes
There are no course outcomes available

SFL 403R : Research/Creative Works Practicum. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

DESCRIPTION: Research/Creative works experience in a project directed by a faculty member.

Course Outcomes
- Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

SOC 497R : Directed Research in Sociology. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Consent of instructor required.

DESCRIPTION: Individualized research program supervised by faculty member. Student selects topic and completes a research project.

Course Outcomes
- Students will develop research project under direction of faculty mentor.
- Students will engage in a mentored research project that may involve reviewing the literature, data collection, data analysis, and/or preparing manuscripts, etc.

2. Complete 6 hours from the following core courses:

EXSC 387 : Lifestyle and Chronic Disease Prevention. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Current scientific evidence demonstrating how lifestyle affects disease processes. Healthy lifestyle concepts specifically needed by wellness professionals, health educators, and health promotion practitioners; influence of unhealthy lifestyle as basis for chronic diseases, i.e., cardiovascular disease, cancer, and diabetes.

Course Outcomes
- Develop an awareness of what constitutes a healthy lifestyle
- Understand the use and interpretation of statistical techniques used in scientific papers on health and lifestyle
- Become familiar with the scientific literature that supports healthy living
- Gain knowledge needed to help others adopt and maintain a healthy lifestyle

HLTH 466 : Health and the Aging Process. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Public health strategies to promote health and functional independence in the context of the inevitable consequence of aging.

Course Outcomes
- Understand the physiological aspects of the normal aging process.
- Understand aging as a pathological process and the factors in both the external and internal milieu, this may contribute to premature aging.
- Relate knowledge about the organic and infectious diseases, common disorders, and disabilities prevalent among the elderly to disease prevention and health promotion among the aged.
- Become exposed to professional literature pertaining to the biological, medical, and health aspects of aging including the use of clinical preventive services as noted by gerontology researchers.
- Understand the physiological aspects of aging and the experimental approaches used in studying the aging process.
- Identify and distinguish the federal, state, and community health programs and services for the aged, including medical care, hospitalization, extended care, rehabilitation, and health maintenance.
- Promote healthy lifestyle behaviors that help prevent premature aging, promote the health of the elderly, and contribute to the extension of the prime of life.
- Understand decision-making related to end-of-life planning.

NURS 291 : Nursing Care of the Older Adult. (2.5:2.5:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Courses in Nursing Semester 1.

DESCRIPTION: Theory and content in the nursing care optimizing the functional status of older adults through health promotion, risk reduction, and disease prevention strategies.

Course Outcomes
- Generate a knowledge base of the processes and issues associated with aging including the needs and functional capabilities of the older adult.

- Use knowledge concepts to solve aging issues recognizing that interdisciplinary care is essential for quality care.
- Compare and connect aging for the individual, caregiver, family, and friends recognizing ethical/legal issues and the importance of culture.
- Compose a personal perspective on aging
- Create a perspective on the aging of God's children that recognizes the potential and the possible and acknowledges that the aging process includes spiritual, physical and psychosocial perspectives
- Reflect on how personal development is connected to professional development as a life-long learner.

And

NURS 292 : Clinical Practicum for Nursing Care of the Older Adult. (1.5:0:Arr.)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Courses in Nursing Semester 1.

DESCRIPTION: Clinical practicum for assessment, communication, critical thinking, and technical skills optimizing the functional status of older adults through health promotion, risk reduction, and disease prevention strategies.

NOTE: 6-hour clinical per week for 11 weeks.

Course Outcomes

- Generate a knowledge base of the processes and issues associated with aging including the needs and functional capabilities of the older adult.
- Use knowledge concepts to solve aging issues recognizing that interdisciplinary care is essential for quality care.
- Compare and connect aging for the individual, caregiver, family, and friends recognizing ethical/legal issues and the importance of culture.
- Compose a personal perspective on aging
- Create a perspective on the aging of God's children that recognizes the potential and the possible and acknowledges that the aging process includes spiritual, physical and psychosocial perspectives
- Reflect on how personal development is connected to professional development as a life-long learner.

NURS 293 : Communication Lab for Nursing Majors. (.5:0:Arr.)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Courses in Nursing Semester 1.

NOTE: Lab is 1.5 hours per week for 10 weeks.

Course Outcomes

- Identify factors that affect interpersonal communication across the lifespan.
- Recognize cultural, gender and disabilities factors that can affect communication.
- Demonstrate appropriate communication skills utilized in nursing practice.
- Formulate strategies to enhance communication that incorporate respect for God's children.

NURS 333 : (Nurs-Soc) End-of-Life Care. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: End-of-life (EOL) care from spiritual, physical, and psychosocial perspectives. Comparisons from various cultural/ethnic backgrounds. Complexities of EOL care including impact on families, health care system, and society. Personal perspectives about death, dying, and bereavement.

Course Outcomes

- Identify societal attitudes toward death
- Outline guiding principles of end-of-life care
- Compare and contrast palliative care versus hospice including historical factors.
- Distinguish between the medical model & patient-centered approach to dying
- Summarize discrepancies in patient and provider end-of-life preferences
- Compose personal attitudes toward death and dying

Or

SOC 333 : (Soc-Nurs) End-of-Life Care. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: End-of-life (EOL) care from spiritual, physical, and psychosocial perspectives. Comparisons from various cultural/ethnic backgrounds. Complexities of EOL care including impact on families, health care system, and society. Personal perspectives about death, dying, and bereavement.

Course Outcomes

There are no course outcomes available

SFL 334 : Adult Development and Aging in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 160

DESCRIPTION: Adjustments to physical, emotional, social, and economic changes. Needs arising from changes in family relationships, living arrangements, and employment; retirement planning.

Course Outcomes

- Interact with older adults (parents, grandparents, neighbors, ward members, research participants, clients, etc.) in an informed (accurate knowledge of relevant issues) and sensitive (aware of "life course" perspective) manner.Apply complex interactions of gerontology concepts to real-life situations,

including current issues in local, national, and world communities.Understand and articulate basic age-related biological, psychological, and sociological processes and learn how to access and evaluate information about those age-related experiences.Synthesize course concepts through observing, serving, and interacting with older adults in the community.

SOC 365 : Sociology of Aging. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Demographic and social factors related to aging: agencies, serving older citizens, and role of community in solving problems of aged.

NOTE: Required for students in gerontology minor and/or certificate programs.

Course Outcomes

There are no course outcomes available

3. Complete 6 hours from the following elective courses:

HLTH 320 : Advanced First Aid and Safety. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: In-depth coverage of first aid procedures for injuries and sudden illness. Leads to first aid and CPR certifications.

Course Outcomes

- Demonstrate the skills involving cardiopulmonary rescuitation (CPR), automated external defibrillation (AED), bandaging, and splinting.
- Identify the importance of first aid and emergency care
- Recognize specific emergency problems (i.e., heart attack, fracture, open wound, burn insect sting) through their signs and symptoms.
- Identify the decisions involved during an emergency.
- Describe proper first aid and emergency care procedures for specific emergency problems.

NDFS 100 : Essentials of Human Nutrition. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

DESCRIPTION: Food-oriented study of nutritional facts and principles as a basis for dietary choices; consequences of choices; scientifically examining controversial topics.

Course Outcomes

- Apply the scientific method to identify and interpret credible nutrition information.
- Identify, interpret, and apply nutrition information.
- Identify functions of nutrients and their major food sources.

PDBIO 205 : Human Biology. (3:3:0)

OFFERED: Independent Study online course.

DESCRIPTION: Body systems and influence of heredity.

NOTE: For nonbiology majors. Currently offered online only.

Course Outcomes

- Demonstrate understanding of the anatomic and physiologic terminology necessary forwritten and oral communication about the body, its functions, and its interaction with allother species on this planet.
- Students will demonstrate understanding of human biology at the chemical, microscopic,anatomical, physiological, and ecological levels.
- Demonstrate the ability to connect understanding of the body and its function with thefunction and survival of the world we live in.

PDBIO 220 : Human Anatomy (with lab). (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Structure and function of the human body. Lab included.

Course Outcomes

- Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.
- Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.
- Students will be able to list the name, location, and function of each of the body's organs and organ systems.

PSYCH 322 : Developmental Psychology: Adulthood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Stability and change in psychological, physiological, and interpersonal processes through early, middle, and late adulthood.

NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

- Students will understand and remember the basic developments that occur during adulthood, the basic patterns of thought, emotion, and behavior characteristic of adults, and the important individual and contextual influences on adult psychology and development.Measurement: Multiple choice and short

essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adult psychology and development.Measurement: Multiple choice and short essay questions.
- Students will be able to more effectively communicate verbally and in writing about adulthood.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adulthood.Measurement: Research papers.
- Students will be able to apply knowledge of adulthood to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 342 : Abnormal Psychology. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders,and current data relevant to such theories.Measurement: Multiple choice, short answer and essay exams; short writing assignments.
- Students will engage in service learning by serving persons diagnosed with psychological disorders.Measurement: Participation assessment/field work report
- Students will critically examine key concepts and theories in abnormal psychology.Measurement: Essay exams, short writing assignments, in-class debates
- Students will examine and critique a topic in abnormal psychology using the current research literature.Measurement: APA style paper

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

SOC W 581 : Social Services for the Aging. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Process and impact of social service delivery systems on the aged.

NOTE: Utah state certificate available.

Course Outcomes
There are no course outcomes available

And other electives approved by the academic advisor.

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete 3 hours from the following Service Learning courses:

EXSC 399R : Exercise and Wellness Internship. (.5-9:0:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Internship coordinator's consent.
DESCRIPTION: On-the-job experience for exercise and wellness majors.

Course Outcomes
- Gain work-related experience through one or more internship experiences
- Apply, in a work-related setting, the skills and abilities attained through required course work in the Exercise and Wellness major

HLTH 496R : Academic Internship. (.5-9:ARR:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: HLTH 439
DESCRIPTION: Senior capstone experience.

Course Outcomes
- Obtain experience, as proctored by an approved internship supervisor, to apply professional competencies in public health as assessed through an internship report and internship supervisor rating

NURS 491 : Nursing Capstone. (2:4:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Courses in Nursing Semester 5.
DESCRIPTION: Seminar in advanced theory and synthesis of concepts for the nursing profession focusing on planning, delivering, and managing patient care in complex environments including leadership in the health care environment.

Course Outcomes
- 1. Demonstrate critical thinking skills in conjunction with current trends in nursing.
- 2. Articulate an understanding and appreciation of the nursing profession.
- 3. Reflect through personal behavior an understanding of human and professional values.

And

NURS 492 : Clinical Practicum for Capstone Nursing. (5.5:0:Arr)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Courses in Nursing Semester 5.
DESCRIPTION: Clinical practicum focusing on planning, delivering, and managing patient care in complex environments. Leadership components incorporated into clinical experiences and practices.
NOTE: Requires 230 hours per semester (210 clinical hours; 20 bridging hours, 1.5 hours per week).

Course Outcomes
- 2. Demonstrate critical thinking skills through the understanding, use, and implementation of evidence based nursing practice.
- 1. Act in a responsible and accountable manner while providing safe, efficient, compassionate, evidence based nursing care.
- 3. Demonstrate appropriate, accurate, and effective communication skills with patient/family, health-care team, and faculty.

PSYCH 399R : Academic Internship. (.5-9:ARR:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310
NOTE: A maximum of 9 credit hours may be taken.

Course Outcomes
- The first and primary objective is the placement of each student in a professionally enhancing work

setting. We intend to continuously improve the quality of internship experiences being offered through a process of continuous assessment of all internships, negotiations with agencies, and internship advisement and counseling of students at the beginning of the contractual process.Measurement: The Internship Profiling Questionnaire (IPQ) has been developed specifically to be used in the on-going process of comparative assessment and improvement of all internship offerings. They are evaluated both by the student participants and also by the internship class instructors.
- Students will critically reflect on the connections between their work experience and the content of psychology and articulate these work-related insights.Measurement:Short essays essay examinations, and applications book review.
- Students will develop professional skills and attitudes through readings on professional etiquette, in-class presentations to classmates, and poster presentation at open house.Measurement:Graded writing assignments, powerpoint presentation, and poster creation and presentation.

RECM 496R : Senior Internship. (.5-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: RECM 486 & RECM 487

DESCRIPTION: Full-time work experience in a recreation or therapeutic recreation agency under the supervision of a recreation or venue management professional or a certified therapeutic recreation specialist. Applying academic skills and knowledge to solve problems and stimulate innovation.

Course Outcomes

There are no course outcomes available

SFL 399R : Academic Internship. (1-9:Arr.:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Internship program coordinator's consent.

DESCRIPTION: Supervised professional experiences linking academic learning with experience in the field.

NOTE: Forty-five internship hours required per credit hour.

Course Outcomes

- Complete a supervised internship in an employment setting or agency related to human development, marriage, home, or family.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

SOC 399R : Academic Internship. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Consent of instructor required.

RECOMMENDED: Soc 307 and related 300-level courses.

DESCRIPTION: Individualized work or volunteer experience in either a research setting or some kind of field placement with an organization.

Course Outcomes

- Establish a lifelong practice of making connections and creating a network of people that will help the student develop professionally
- Develop a professional sense of the work that will help the students identify personal learning outcomes for the semester
- Learn about what sociologists call "interactive service work" or jobs that require working with individuals
- Produce a professional analysis of the organization where the student works
- Complete a research project that addresses some need in the organization for which the student is working

2. Complete 6 hours from the following core courses:

EXSC 387 : Lifestyle and Chronic Disease Prevention. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Current scientific evidence demonstrating how lifestyle affects disease processes. Healthy lifestyle concepts specifically needed by wellness professionals, health educators, and health promotion practitioners; influence of unhealthy lifestyle as basis for chronic diseases, i.e., cardiovascular disease, cancer, and diabetes.

Course Outcomes

- Develop an awareness of what constitutes a healthy lifestyle
- Understand the use and interpretation of statistical techniques used in scientific papers on health and lifestyle
- Become familiar with the scientific literature that supports healthy living
- Gain knowledge needed to help others adopt and maintain a healthy lifestyle

HLTH 466 : Health and the Aging Process. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Public health strategies to promote health and functional independence in the context of the inevitable consequence of aging.

Course Outcomes

- Understand the physiological aspects of the normal aging process.
- Understand aging as a pathological process and the factors in both the external and internal milieu, this may contribute to premature aging.
- Relate knowledge about the organic and infectious diseases, common disorders, and disabilities prevalent among the elderly to disease prevention and health promotion among the aged.
- Become exposed to professional literature pertaining to the biological, medical, and health aspects of

aging including the use of clinical preventive services as noted by gerontology researchers.
- Understand the physiological aspects of aging and the experimental approaches used in studying the aging process.
- Identify and distinguish the federal, state, and community health programs and services for the aged, including medical care, hospitalization, extended care, rehabilitation, and health maintenance.
- Promote healthy lifestyle behaviors that help prevent premature aging, promote the health of the elderly, and contribute to the extension of the prime of life.
- Understand decision-making related to end-of-life planning.

NURS 291 : Nursing Care of the Older Adult. (2.5:2.5:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Courses in Nursing Semester 1.

DESCRIPTION: Theory and content in the nursing care optimizing the functional status of older adults through health promotion, risk reduction, and disease prevention strategies.

Course Outcomes
- Generate a knowledge base of the processes and issues associated with aging including the needs and functional capabilities of the older adult.
- Use knowledge concepts to solve aging issues recognizing that interdisciplinary care is essential for quality care.
- Compare and connect aging for the individual, caregiver, family, and friends recognizing ethical/legal issues and the importance of culture.
- Compose a personal perspective on aging
- Create a perspective on the aging of God's children that recognizes the potential and the possible and acknowledges that the aging process includes spiritual, physical and psychosocial perspectives
- Reflect on how personal development is connected to professional development as a life-long learner.

And

NURS 292 : Clinical Practicum for Nursing Care of the Older Adult. (1.5:0:Arr.)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Courses in Nursing Semester 1.

DESCRIPTION: Clinical practicum for assessment, communication, critical thinking, and technical skills optimizing the functional status of older adults through health promotion, risk reduction, and disease prevention strategies.

NOTE: 6-hour clinical per week for 11 weeks.

Course Outcomes
- Generate a knowledge base of the processes and issues associated with aging including the needs and functional capabilities of the older adult.
- Use knowledge concepts to solve aging issues recognizing that interdisciplinary care is essential for quality care.
- Compare and connect aging for the individual, caregiver, family, and friends recognizing ethical/legal issues and the importance of culture.
- Compose a personal perspective on aging
- Create a perspective on the aging of God's children that recognizes the potential and the possible and acknowledges that the aging process includes spiritual, physical and psychosocial perspectives
- Reflect on how personal development is connected to professional development as a life-long learner.

NURS 293 : Communication Lab for Nursing Majors. (.5:0:Arr.)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Courses in Nursing Semester 1.

NOTE: Lab is 1.5 hours per week for 10 weeks.

Course Outcomes
- Identify factors that affect interpersonal communication across the lifespan.
- Recognize cultural, gender and disabilities factors that can affect communication.
- Demonstrate appropriate communication skills utilized in nursing practice.
- Formulate strategies to enhance communication that incorporate respect for God's children.

NURS 333 : (Nurs-Soc) End-of-Life Care. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: End-of-life (EOL) care from spiritual, physical, and psychosocial perspectives. Comparisons from various cultural/ethnic backgrounds. Complexities of EOL care including impact on families, health care system, and society. Personal perspectives about death, dying, and bereavement.

Course Outcomes
- Identify societal attitudes toward death
- Outline guiding principles of end-of-life care
- Compare and contrast palliative care versus hospice including historical factors.
- Distinguish between the medical model & patient-centered approach to dying
- Summarize discrepancies in patient and provider end-of-life preferences
- Compose personal attitudes toward death and dying

Or

SOC 333 : (Soc-Nurs) End-of-Life Care. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: End-of-life (EOL) care from spiritual, physical, and psychosocial perspectives. Comparisons from various cultural/ethnic backgrounds. Complexities of EOL care including impact on families, health care system, and society. Personal perspectives about death, dying, and bereavement.

Course Outcomes
There are no course outcomes available

SFL 334 : Adult Development and Aging in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 160

DESCRIPTION: Adjustments to physical, emotional, social, and economic changes. Needs arising from changes in family relationships, living arrangements, and employment; retirement planning.

Course Outcomes
- Interact with older adults (parents, grandparents, neighbors, ward members, research participants, clients, etc.) in an informed (accurate knowledge of relevant issues) and sensitive (aware of "life course" perspective) manner.Apply complex interactions of gerontology concepts to real-life situations, including current issues in local, national, and world communities.Understand and articulate basic age-related biological, psychological, and sociological processes and learn how to access and evaluate information about those age-related experiences.Synthesize course concepts through observing, serving, and interacting with older adults in the community.

SOC 365 : Sociology of Aging. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Demographic and social factors related to aging: agencies, serving older citizens, and role of community in solving problems of aged.

NOTE: Required for students in gerontology minor and/or certificate programs.

Course Outcomes
There are no course outcomes available

3. Complete 6 hours from the following elective courses:

HLTH 320 : Advanced First Aid and Safety. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: In-depth coverage of first aid procedures for injuries and sudden illness. Leads to first aid and CPR certifications.

Course Outcomes
- Demonstrate the skills involving cardiopulmonary rescuitation (CPR), automated external defibrillation (AED), bandaging, and splinting.
- Identify the importance of first aid and emergency care
- Recognize specific emergency problems (i.e., heart attack, fracture, open wound, burn insect sting) through their signs and symptoms.
- Identify the decisions involved during an emergency.
- Describe proper first aid and emergency care procedures for specific emergency problems.

NDFS 100 : Essentials of Human Nutrition. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

DESCRIPTION: Food-oriented study of nutritional facts and principles as a basis for dietary choices; consequences of choices; scientifically examining controversial topics.

Course Outcomes
- Apply the scientific method to identify and interpret credible nutrition information.
- Identify, interpret, and apply nutrition information.
- Identify functions of nutrients and their major food sources.

PDBIO 205 : Human Biology. (3:3:0)

OFFERED: Independent Study online course.

DESCRIPTION: Body systems and influence of heredity.

NOTE: For nonbiology majors. Currently offered online only.

Course Outcomes
- Demonstrate understanding of the anatomic and physiologic terminology necessary forwritten and oral communication about the body, its functions, and its interaction with allother species on this planet.
- Students will demonstrate understanding of human biology at the chemical, microscopic,anatomical, physiological, and ecological levels.
- Demonstrate the ability to connect understanding of the body and its function with thefunction and survival of the world we live in.

PDBIO 220 : Human Anatomy (with lab). (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Structure and function of the human body. Lab included.

Course Outcomes

- Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.
- Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.
- Students will be able to list the name, location, and function of each of the body's organs and organ systems.

PSYCH 322 : Developmental Psychology: Adulthood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Stability and change in psychological, physiological, and interpersonal processes through early, middle, and late adulthood.

NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

- Students will understand and remember the basic developments that occur during adulthood, the basic patterns of thought, emotion, and behavior characteristic of adults, and the important individual and contextual influences on adult psychology and development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adult psychology and development.Measurement: Multiple choice and short essay questions.
- Students will be able to more effectively communicate verbally and in writing about adulthood.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adulthood.Measurement: Research papers.
- Students will be able to apply knowledge of adulthood to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 342 : Abnormal Psychology. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders,and current data relevant to such theories.Measurement: Multiple choice, short answer and essay exams; short writing assignments.
- Students will engage in service learning by serving persons diagnosed with psychological disorders.Measurement: Participation assessment/field work report
- Students will critically examine key concepts and theories in abnormal psychology.Measurement: Essay exams, short writing assignments, in-class debates
- Students will examine and critique a topic in abnormal psychology using the current research literature.Measurement: APA style paper

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

SOC W 581 : Social Services for the Aging. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Process and impact of social service delivery systems on the aged.

NOTE: Utah state certificate available.

Course Outcomes

There are no course outcomes available

And other electives approved by the academic advisor.

*Hours include courses that may fulfill university core requirements.

100-Level Courses

SFL 100 : Strengthening Marriage and Family: Proclamation Principles and Scholarship. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Understanding, applying, and sharing principles of successful marriage and family life from the LDS proclamation on the family, using sacred and scholarly perspectives.

Course Outcomes

- Critically understand your testimony of the principles of the Restored Gospel pertaining to marriage, home and family.Synthesize and be able to apply principles from revealed truth and supportive scholarship to strengthen marriage, home, and family life.Be able to confidently share and defend principles of successful marriage, home and family life using support from sacred and scholarly sources.
- Demonstrate improvement in writing skills, speaking, and critical thinking skills to be more effective advocates for marriage, home, and family in a variety of settings.

SFL 101 : Introduction to School of Family Life. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Required seminar for all students entering the major. Overview of curriculum and major requirements, faculty research programs and specialties, campus resources, future opportunities, and career possibilities.

Course Outcomes

- Create a realistic major or minor plan in the School of Family Life.Identify possible post-graduation pathways with a major in the School of Family Life.Participate in and develop a sense of community that includes both faculty and students.Be able to utilize important resources to become an effective learner during college and after.

SFL 102 : Introduction to Interiors. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Interior design, emphasizing history and development of the American home.

Course Outcomes

There are no course outcomes available

SFL 110 : Food Preparation in the Home. (2:1:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Principles of cooking and skill development in food preparation techniques. Lab required.

NOTE: Fee.

Course Outcomes

- Understand food preparation principles and techniques and apply them while mixing, cooking, and baking food products for home use.Identify and prevent food borne illness and safety hazards with appropriate food handling and preparation techniques.Understand and apply knowledge of nutrition to food preparation.Develop confidence in selecting and following recipes.Demonstrate proper use of equipment for baking and cooking.

SFL 160 : Introduction to Family Processes. (3:3:0)

OFFERED: Honors also; Independent Study also.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

Course Outcomes

- Critically examine the main theoretical frameworks used in the family sciences.Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.
- Identify and discuss how researchers uniquely study families and family systems.

SFL 185R : Beginning Clothing Construction. (3:3:5)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Basics of using a sewing machine for making apparel.

NOTE: Student-supplied materials required.

Course Outcomes

- Develop confidence and skill in using a sewing machine and other related items of equipment.Learn and use correct terminology of course content.Practice following instructions, both oral and written.Learn to enjoy sewing and feel satisfaction in creating articles of clothing.Recognize good and poor quality workmanship.Produce garments that are highly/appropriately wearable.Complete a set of samples prior to executing the technique in a project.

200-Level Courses

SFL 202 : Design in the Home. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 102

DESCRIPTION: Intermediate application of elements and principles of design in the home.

Course Outcomes

- Develop or reinforce basic vocabulary of design.Increase awareness of design possibilities and the aesthetic and spiritual effect of different designs.Develop an understanding of design as a problem-solving process.Become a life-long observer of design and the designed environment.

SFL 205 : Home and Family Living. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles for creating an optimal home environment for individual, marital, and family development; secular and sacred significance of temporal activities in the home; the influence of context and family processes on outcomes.

Course Outcomes

There are no course outcomes available

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

SFL 215 : Advanced Food Preparation. (3:2:3)

WHEN TAUGHT: Contact Department.

PREREQUISITE: SFL 110

DESCRIPTION: Lecture, readings, and intense practicum in food preparation, food preservation and storage, presentation, consumerism, equipment usage, and social/familial aspects of food. Lab required.

NOTE: Fee.

Course Outcomes

- Understand advanced food preparation principles and techniques and apply them while mixing, cooking, and baking food products for home and commercial use.Identify and prevent food borne illness and safety hazards with appropriate food handling and preparation techniques.Apply knowledge of nutrition to food preparation.Develop confidence in selecting, presenting, and following recipes.Learn proper use of equipment for baking and cooking.Identify and discuss cultural influences in the use of foods throughout the world.

SFL 221 : Foundations of Developmentally Appropriate Practices in Programs for Young Children. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 210

DESCRIPTION: Historical, philosophical, organizational, and curricular issues related to developmentally appropriate practices in programs for young children.

NOTE: Due to enrollment constraints, SFL 221 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes

- Obtain an historical perspective of early childhood and a philosophical foundation in developmentally appropriate practices.Become conversant with the developmentally appropriate practice standards published by NAEYC (National Association for the Education of Young Children) and understand how they apply to making effective educational decisions that will benefit children and enhance their growth and development.Communicate the principles of developmentally appropriate practices to parents and colleagues.Understand how to create classrooms that incorporate the five guidelines or points of the “Mariner’s

Star":creating a caring community of learnersteaching to enhance development and learningconstructing an appropriate curriculumassessing children's learning and developmentestablishing reciprocal relationships with families.Gain a functional understanding of how teachers within a developmental model implement appropriate guidance and classroom management strategies, function in "lead" and "support" teacher roles, create and modify effective learning environments, facilitate and scaffold learning and, develop strategies to meet the diversity of needs in the children and families they serve.

- Utilize observational opportunities to assess teaching roles, learning environments, and young children's individual and/or group learning.

SFL 222 : Practicum in Developmentally Appropriate Practices. (2:0:12)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SFL 240; SFL 221 (must be taken within 5 years of SFL 222).

DESCRIPTION: Initial practicum with young children to increase understanding of socialization and learning processes, to create meaningful learning opportunities, and to implement developmentally appropriate practices.

NOTE: Due to enrollment constraints, SFL 222 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes

- Demonstrate understanding of how children develop and learn by assisting in and developing learning opportunities that support social, intellectual and personal growth.Develop instructional strategies for teaching children in small group and large group classroom settings.Evaluate and record student learning to assess instructional goals and objectives to drive continuing classroom instructionUse understanding of individual and group behavior to establish a learning environment that encourages active engagement, positive interactions and self motivation.Reflectively evaluate daily and weekly goals, assignment objectives and program expectations to refine personal development in teaching.Demonstrate professional habits that will guide interpersonal and caree choices.

SFL 223 : Preparation for Marriage. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Factors related to quality relationships, mate selection, and the transition into marriage.

Course Outcomes

- Understand the Lord's "divine design" (Proc. ¶ 7) for marriage relationships (e.g., the nature of the marriage covenant, equal partnership, stewardships of husbands & wives, etc).Increase awareness of marriage as a social institution.Become sensitized to the modern threats to marriage.Increase understanding of the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.Increase awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.Enhance spiritual awareness and academic skills in order to help them weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship.Critically explicate your awareness of marriage as a social institution.Identify and be sensitive to modern cultural threats to marriage.Be able to grasp and understand the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.Increase your awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.Enhance your spiritual awareness and academic skills in order to help you critically weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship to "hold fast to that which is good" (1Thess. 5:21).

SFL 224 : Marriage Enhancement. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Enhancing marital communication skills, conflict resolution styles, intimacy, stress management, and developing a shared relationship vision using social science theories and research findings.

NOTE: Married, engaged, and couples seriously dating are encouraged to enroll together.

Course Outcomes

- Set and achieve marital goals in line with one's marital visionBuild virtues of commitment, love, friendship, respect, fairness, generosity, and positivity in their marriageUnderstand themselves, their partner, and their relationship more completelyExpress themselves more clearly and listen more carefully to their partnerDeal more effectively with conflict, disagreements, and relationship issuesUnderstand how family-of-origin dynamics influence their marital behaviorIdentify how children potentially can influence marriage across the marital life cycleRelate sexually in a more fulfilling wayStrengthen marriage as the years pass

SFL 230 : Housing the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Social-psychological, economic, and political aspects of housing families; making selections that will enhance the quality of housing, increase productivity, and protect the health, safety, and well-being of the family across the life cycle.

Course Outcomes

- Become versed in selecting and purchasing homes, including home quality, location and floor plans, building and functional and support systems, evaluation, purchase financing options, responsibilities and obligations of home ownership. This includes online research and in-person examination of model homes to learn about features, benefits and limitations of home layout and quality.Understand theory and application of interior design concepts and the ways these relate to creating a home that meets the physical, emotional and psychological needs of the family.Critically compare features, benefits and pricing and selecting large home expenditures such as appliances, furnishings, lighting, textile products, flooring, window coverings and accessories through book learning, class lectures, on-line comparisons and field trip experiences.Become competent in e-design floor plan software programs in the selection, costing and placement of interior furnishing components, including cross-referencing and sourcing skills.Evaluate equally elements of living the gospel in all housing and family living decisions through preparation of assigned gospel living at home topics presented in class.Demonstrate competency in learning from each other through in class participation, field

trips, in-class presentations, and through interactive teacher presentations.

SFL 240 : Parenting and Child Guidance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Theories and skills related to quality parent-child relationships.

Course Outcomes

- Critically examine theories of overall parenting styles and the impact of these styles upon optimal parenting.Critically examine parenting practices within the overall parenting styles and the impact of these practices upon optimal parenting.Identify effective parenting practices in the context of various life stages.Understand parenting principles that may heighten professional and/or parental potential.
- Synthesize in writing an analysis of parenting styles and practices of your family of origin and how you may modify those styles and practices with the principles obtained in this class.Examine and write in depth a specific area of interest related to parenting styles and practices.

SFL 260 : Family Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Introduction to time value of money, budgeting, saving, credit, taxes, housing, insurance, and investing emphasizing practical application in the home.

Course Outcomes

- Identify areas of financial risk in your personal lives.Differentiate between a good financial decision and a poor financial decision.Use financial calculators or financial equations for time value of money to classify various financial products to determine the most appropriate product for their family given their current financial situation.Generate a family budget and evaluate home and automobile purchasing and financing options.Analyze and plan for present and future needs by understanding investing option available.

SFL 261 : Consumerism and the Marketplace for Secondary Teachers. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: A pre-service preparation course designed to prepare FACSED classroom teachers to teach content regarding dynamics of consumerism and the marketplace and develop skills for implementing a discipline-based approach for teaching consumerism in secondary schools.

Course Outcomes

- Identify consumer rights, responsibilities, and remedies and identify effective practices for purchasing consumer goods and services.
- Synthesize legal and ethical considerations of being an informed consumer in today's market.
- Identify and explain the purposes and features of private and government agencies providing assistance, information, and published materials that are consumer resources for decision making.
- Distinguish the roles of labels, warranties, guarantees, and advocate groups in wise consumer behavior.
- Determine how government, business, and the consumer interact for the mutual benefit of each other in the marketplace.
- Analyze prudent steps in the selection of healthcare, childcare, elder care, repair services, household materials, automobiles, toys, and equipment.
- Describe ways to avoid identity theft, fraud, deceptions, and rip-offs.
- Explain the importance of understanding financial contracts (disclosure information, grace period, payment penalties, method of interest calculation).
- Perform a market analysis exercise and exercise better shopping practices.

SFL 276R : Exploration of Teaching: Family and Consumer Sciences. (3-4:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Major-area preadmission requirements; FBI fingerprint and background clearance.

DESCRIPTION: Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Course Outcomes

There are no course outcomes available

SFL 280 : Dynamics of Clothing. (3:3:0)

WHEN TAUGHT: Fall; Spring

DESCRIPTION: Introduction to the influences, meanings, and dimensions of individual clothing selection processes and its effect on families, communities, and cultures.

Course Outcomes

- · Develop critical judgment about the effects of clothing upon the physical, social, psychological, and economic well-being of individuals, families, and social groups.· Understand the terminology, concepts, and theories in clothing, fashion, and consumer behavior.· Identify and understand the interrelationships among areas in the fashion industry and become aware of related careers.· Learn the history of fashion through the 20th century and influential fashion designers and capitals.· Become acquainted with types of research conducted in the field.· Develop critical thinking skills, and use these skills to communicate ideas related to clothing in the family.

SFL 282 : Textiles. (3:3:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Natural and synthetic textile fibers, yarns, fabric construction, dyes, and finishes. Care and performance of textile fabrics for clothing and household use.

Course Outcomes

- Distinguish between fibers, yarns and fabrics.Predict behavior of fabric based on fiber content, as much as possible without having studied finishes and dying. That is, they will be able to use fiber and yarn and weave or knit properties to predict behavior.Choose among alternatives in the creation of simple yarns for specific purposes.Distinguish a woven fabric from a knitted one.Identify the basic weaves used in woven fabrics, and the 2 basic classes of knits, with several of the subclasses of common knits.Utilize correct terminology for the many items and processes used in the textile industry.Make choices among the many variables to create a particular fabric for a particular use.Identify forty-six common fabrics on sight.

SFL 287 : Intermediate Clothing Construction. (3:3:5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 185R or equivalent sewing skills.

DESCRIPTION: Assessing and executing various construction methods, including construction of several full-scale garments.

NOTE: Student-supplied materials required. Fee.

Course Outcomes

- Increase your ability in making appropriate choices among various construction methods given various fabric and style variablesStrengthen and broaden your experience in apparel construction techniques.Learn and use correct/appropriate construction terminologyRecognize and describe quality characteristics of various construction techniques, understand and apply processes necessary to produce them, and accurately evaluate resulting quality.Create examples of construction techniques which illustrate personal skill improvement over the course of the semester.Assemble a sample portfolio with materials prepared, mounted, and presented professionally.Continue to feel a sense of accomplishment and personal satisfaction in sewing.Understand and apply garment assembly sequencing as it relates to fabric and style variables.Demonstrate the “sample making” teaching approach and the “garment making” teaching approach in order to evaluate and have both in the professional repertoire.

SFL 290 : Critical Inquiry and Research Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Philosophies of critical inquiry. Principles of designing, conducting, and reporting social science investigations.

Course Outcomes

- Evaluate the strengths and weaknesses of different methods of inquiry used in investigating the human contexts of human development, home, and family.
- Conduct a research study and write up the results.
- Gain practical experience in using research methods.
- Use library search engines to identify articles targeted toward a specific research question.

300-Level Courses

SFL 325 : Forming Marital Relationships. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Critical analysis of literature regarding dating, spouse selection, and transition to marriage processes leading to successful marriage. Preparation for research and teaching in the field.

Course Outcomes

- Critically explore and consider ideas and theories about why people form romantic relationships.Critically examine current cultural trends in relationship formation, duration, and dissolution.Synthesize and explore scientific findings about why marriages may succeed or fail.Understand principles that will allow you to integrate the information from class into your personal belief system so that it is useful for you in your professional and personal endeavors while strengthening your beliefs in the gospel.

SFL 328 : History of Interior Design and Architecture 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: History of interior design, architecture, and furnishings from ancient Egypt to beaux arts movement. French, English, and American design.

Course Outcomes

- Identify important motifs, interior, and exterior architectural styles from each of the historical periods covered in class.Identify furniture, designers, and minor/decorative arts from each of the historical periods covered in class.Understand the relationship of the design periods to history and culture.

SFL 329 : History of Interior Design and Architecture 2. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Furniture, interior design, and architecture from Industrial Revolution to present.

Course Outcomes

- Students will identify the popular types of housing styles of 1900-2011. Students will explain how each style was influenced by political and economic factors
- Students will identify the architects that had an impact on the various periods of architecture.
- Students will analyze how the various styles of architecture were influenced by society and culture.

SFL 330 : Preprofessional Preparation for Marriage and Family Therapy. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of profession, licensing, and application to graduate study.

Course Outcomes

- Review and evaluate at least two accredited Marriage and Family Therapy programs.Write a letter of application to an accredited Marriage and Family Therapy program of your choiceHave letter of application to an accredited Marriage and Family Therapy program reviewed by at least one Marriage and Family Therapy faculty member.Become familiar with career options in Marriage and Family Therapy and begin to formulate career choices.

SFL 331 : Infant Development in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Conception, prenatal development, pregnancy. Physical, cognitive, and social development of the first twenty-four months. Implications for guidance and care in the family.

Course Outcomes

There are no course outcomes available

SFL 333 : (SFL-Soc 318) Adolescent Development in the Family and Other Social Contexts. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Examining the developmental and social contexts of adolescents with emphasis on the importance of the family. Other contexts include peers, religion, community, schools, and cross-cultural issues.

Course Outcomes

- Critically examine and discuss selected topics in adolescent development, as well as being able to apply the information and skills learned in this class to your own life.Identify and discuss the major theories of adolescent development, as well as the various research methods used in the study of adolescent development.Understand the important developmental changes that young people experience during this period and during their transition to adulthood.Discuss why at-risk issues are so pronounced during this period and understand prevention and intervention measures that can be taken by families to help them cope with this transition.
- Synthesize (both in thought and writing) information on adolescent development, and apply this information to “real” adolescents with whom you come into contact.

SFL 334 : Adult Development and Aging in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 160

DESCRIPTION: Adjustments to physical, emotional, social, and economic changes. Needs arising from changes in family relationships, living arrangements, and employment; retirement planning.

Course Outcomes

- Interact with older adults (parents, grandparents, neighbors, ward members, research participants, clients, etc.) in an informed (accurate knowledge of relevant issues) and sensitive (aware of “life course” perspective) manner.Apply complex interactions of gerontology concepts to real-life situations, including current issues in local, national, and world communities.Understand and articulate basic age-related biological, psychological, and sociological processes and learn how to access and evaluate information about those age-related experiences.Synthesize course concepts through observing, serving, and interacting with older adults in the community.

SFL 335 : Family Adaptation and Resiliency. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Understanding family resiliency and building family strengths in normative transitions (birth, death, job) and nonnormative transitions (divorce, disability, remarriage, poverty, violence). Developing familial, social, religious, and instrumental resources to adapt positively to these transitions.

Course Outcomes

- Articulate the main conceptual frameworks which help us understand how families cope with stress.Demonstrate how a wide range of life events influence families both positively and negatively.Demonstrate what factors contribute to whether families respond positively or negatively to life events and transitions.Understand and apply how gospel principles regarding the family, charity, faith and trials interconnect with scholarly research on family stress.
- Demonstrate improvement in course content writing skills.

SFL 336 : Theories in Family Perspective. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Introduction of major theoretical perspectives and of philosophical issues. Readings include representative papers applying theoretical and philosophic tenets.

Course Outcomes

- Recognize important philosophical foundations of social research methods and theory.Identify and understand the basic components of eight family theories.Compare and contrast the philosophical underpinnings (assumptions and implications) of theories.
- Apply theory to family focused research.
- Represent your own ideas about family life using theoretical language.Write more clearly about your ideas and the ideas of other family social scientists.

SFL 340 : Family Meal Management. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 110 or instructor's consent.

DESCRIPTION: Organizing and managing time, energy, finance, and nutrition in planning, preparing, and serving family meals; ethnic and cultural diversity in etiquette and meal planning. Lab required.

NOTE: Fee.

Course Outcomes

- Develop a philosophy of why meal preparation and consumption at the family table is an important component in development and stability of families.Plan attractive meals with consideration for nutritional adequacy, income level, social, cultural, psychological, palatability, and aesthetic factors.Employ sanitation standards and safety procedures in food handling and in the use and care of kitchen utensils, equipment, and food storage.Demonstrate an understanding of factors affecting food habits, meal consumption patterns, and trends in food cost.Utilize managerial skills and available resources in food purchasing, and meal planning, preparation, and service

SFL 345 : Family Life in World Religions. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: How families of various faiths live their religion in their homes, with emphasis on practical, day-to-day home and family life rather than on abstract theology.

Course Outcomes

- Critically evaluate how families of other faiths live their faith in their homes.Synthesize and give thoughtful consideration on how to best to live LDS beliefs and practices in day-to-day home life.Evaluate and synthesize how to learn optimal characteristics from people of other faiths.Demonstrate critical thinking skills on practical living.

SFL 351 : Socialization Across Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Processes and sequences of social development across childhood.

Course Outcomes

There are no course outcomes available

SFL 352 : Cognitive Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Development of mental abilities; effects of maturation and learning on memory, perception, attention processes, intelligence, social cognition.

Course Outcomes

- Critically examine and discuss selected topics in cognitive development.Identify and discuss selected theories and theoretical models of cognitive development, as well as the various research methods used in the study of cognitive develop. Understand how cognitive development changes throughout life span.
- Evaluate in empirical research studies a specific topic in cognitive development and synthesize in each study the research questions, methodology, findings, and discussions of the findings.
- Succinctly summarize in writing a collection of empirical studies on a topic in cognitive development of your interest.

SFL 354 : Cross-Cultural Family and Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & SFL 290; SFL 160 or SFL 210 or concurrent enrollment.

DESCRIPTION: Comparative study of familial, social, and other factors in development.

Course Outcomes

- Critically evaluate the importance of considering gender as an important contextual factor for understanding human development and relationships.Develop awareness of one's own cultural and gender-based values and beliefs.Recognize and explicate biases inherent in the perspective of the dominant U.S. culture.Engage in class (and out-of-class) discussions about class topicsBe better positioned as a citizen of the world, in terms of valuing diversity and being able to analyze world cultures for how they might benefit (or cost) individual and family development.

SFL 355 : Language Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Philosophical, social, intellectual, and emotional contexts of language acquisition and usage.

Course Outcomes

There are no course outcomes available

SFL 358 : Media, Family, and Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Aspects of media and their potential effects on family interactions and human development across the lifespan.

Course Outcomes

- Discuss the frequency of use of forms of media.Describe the major theories and associated research that are used to describe media research.Critically examine media theory and research in the field and apply course material to your own experiences.Understand how media may influence human development.Discuss how media can shape the family.
- Demonstrate research skills by researching a topic area relevant to the media.

SFL 359 : Child Life in Healthcare Settings. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 210

RECOMMENDED: SFL 331, 333, 351.

DESCRIPTION: Roles of child life specialists in preparing children and families for healthcare experiences. Content includes psychosocial and developmental needs of children, adolescents, and families in healthcare settings and impact of illness, injury, and hospitalization on the child and family.

Course Outcomes

- Describe the contents of the official documents of the Child Life Council (CLC), including the Code of Ethical Responsibility, Child Life Competencies, and Standards of Clinical Practice, the Child Life Mission, Values and Vision Statements, and the Code of Professional Practice.
- Identify the elements of child life practice in direct and non-direct services in pediatric health care including a historical review of the profession and its development in the evolution of children's healthcare.
- Use developmental theory to assess the impact of illness, injury and health care on patients and families, identifying the stressors and developmental and psychosocial treatment issues that affect the healthcare experience of a child and family including siblings.
- Be able to apply the key principles of patient- and family-centered care, including principles of respect and dignity, information sharing, supporting participation in care, and collaboration in relationship to child life practice.
- Compare both historical and current perspectives on the rationale for, and techniques and outcomes of preparation, as well as accepted preparation methods for healthcare encounters and life-changing events.

SFL 360 : Advanced Family Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 260

DESCRIPTION: Time value of money principles applied to family finance.

Course Outcomes

- Develop advanced critical analytical skills, financial knowledge, and planning capabilities applied to money in the family.Demonstrate knowledge of "best principles and practices" that simplify financial life, and builds wealth in ways that strengthen one's family, community, and financial future.
- Critically evaluate theories and methods used in family and personal finance research as reported in scientific and popular literature.

SFL 361 : Money in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SFL 360

DESCRIPTION: Money attitudes and financial behaviors in the family - distinguishing between living high and living well. Mentored learning course.

Course Outcomes

- Identify gospel truths and principles that can ground and direct the use of money and financial resources in families.Examine current perspectives about family money use, with attention to core assumptions of these perspectives.Inspect and critique current issues regarding the use of money in families that are of concern to family members, family professionals and legislators.Critically evaluate academic literature regarding resource use in families especially regarding adolescent employment, gifting and entitlement.
- Develop skills to critically evaluate and make fine distinctions in the narrative of qualitative data.

SFL 370 : Work, Family, and Community: Exploring Interconnections. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: How family life and employment interact with each other and with other community contexts (school, church, government, recreation, media, the economy, and health care, etc.) in patterns of mutual influence.

Course Outcomes

- Critically examine the reciprocal interactions of the course content concerning marriages, homes, and families.Analyze how current events, trends, and changes in these contexts affect marriages, homes, and families.Demonstrate writing, critical thinking, problem-solving, and presentation skills to be better prepared to personally make a difference in the contexts discussed in class.Understand how to better manage your own marriage, home, and family as they interface with the contexts discussed in class. Analyze how to be an effective advocate for shaping the contexts covered in class to be more supportive of strong marriages, homes, and families.

SFL 377 : Teaching Methods and Instruction in Family and Consumer Sciences Education. (3:6:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 276R

DESCRIPTION: Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Understand the central concepts, tools of inquiry, and structures of the discipline(s} you teach and can create learning experiences that make these aspects of subject matter meaningful for students.
- Understand how children learn and develop, and provide learning opportunities that support students' intellectual social and personal development.
- Understand how students differ in their approaches to learning and create instructional opportunities that are adapted to diverse learners.
- Understand and use a variety of instructional strategies to encourage students' development of critical thinking, problem solving, and performance skills.
- Develop an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interaction, active engagement in learning, and self motivation.
- Utilize knowledge of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom.
- Plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.
- Understand and use formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social and physical development of the learner.
- Critically evaluate the effects of choices and actions on others (students, parents, and other professionals in the learning community} and actively seek out opportunities to grow professionally.
- Understand how to foster relationships with school colleagues, parents, and agencies in the larger community to support students' learning and well- being.

SFL 378 : Practicum in Secondary Education. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: SFL 276R

RECOMMENDED: SFL 110, 185, and 276R.

DESCRIPTION: Field-based teaching experience directed at helping prospective teachers learn to give demonstrations, prepare for lab experiences, and execute the experience using meaningful and engaging instruction for students in the Family and Consumer Sciences content.

Course Outcomes

There are no course outcomes available

SFL 380 : History of Apparel. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Costume, clothing, and textiles as mediums for understanding the stages and states of individuals, families, and societies; apparel diversity and cultural identity.

Course Outcomes

- Critically analyze how western cultural heritage is evidenced in the evolution of clothing through time periods.Be able to distinguish clothing from various points in time by their characteristics and details.Be able to recognize the importance of catalytic events, people and technological developments and how they influenced fashion.Demonstrate how to use vocabulary and terminology specific to particular periods of time in order that we may more accurately express ourselves and communicate clearly.Understand how the value systems and beliefs of societies are reflected in their clothing.Be able to conduct personal research of interest and share those findings in a professional manner with the class.

SFL 387 : Advanced Clothing Studies: Patternmaking. (3:3:5)

WHEN TAUGHT: Fall; Summer

PREREQUISITE: SFL 287

DESCRIPTION: Flat pattern design, basic drafting, and basic draping for women's apparel.

NOTE: Student-supplied materials required.

Course Outcomes

- Understand and apply flat pattern principles and methods to create patterns for women's apparel.Demonstrate how to manipulate fabrics through draping to create basic styles for women's apparel.Demonstrate how to apply basic pattern drafting techniques to create basic patterns from measurements for women.Create a record of work done with accompanying examples of styles made in class.Demonstrate the use of correct terminology.Apply pattern making principles in fabric test items.

SFL 395R : Special Topics in Family Life. (1-3:Arr.:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

DESCRIPTION: Specific topics in home and family living, human development, marriage and family studies, or marriage and family therapy.

Course Outcomes

- Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in human development and family studies.

SFL 399R : Academic Internship. (1-9:Arr.:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Internship program coordinator's consent.

DESCRIPTION: Supervised professional experiences linking academic learning with experience in the field.

NOTE: Forty-five internship hours required per credit hour.

Course Outcomes

- Complete a supervised internship in an employment setting or agency related to human development, marriage, home, or family.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

400-Level Courses

SFL 403R : Research/Creative Works Practicum. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

DESCRIPTION: Research/Creative works experience in a project directed by a faculty member.

Course Outcomes

- Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

SFL 420 : Administering Programs for Young Children. (2:2:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: SFL 222

DESCRIPTION: Strategies for planning and administering quality programs in settings for young children. Budgeting, staffing, accrediting, selecting equipment, etc.

Course Outcomes

- Demonstrate how to operationalize appropriate curriculum based on your understanding of development and be able to critically design early childhood programs.Plan the physical environment including financing and budgeting of an early childhood program.Obtain information and guidelines on nutrition, health, and safety services for young children.
- Develop strategies for assessing, recording, and reporting children's progress as well as evaluating the overall effectiveness of the program.Critically evaluate ways to contribute to the profession by addressing the individual needs of the families; influencing public policy; and becoming involved in research.

SFL 449 : Biological Foundations of Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Biological, genetic, and neurological foundations of human development and their interactions with family socialization processes.

Course Outcomes

- Understand how biological process influences human development.Understand and synthesize the intersections between biology, psychology, and behavior in a developmental context.
- Critically examine and analyze current research in the areas of developmental psychobiology.
- Demonstrate critical thinking/writing skills.

SFL 453 : Moral Development. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Theories and applications of moral development, including moral reasoning, moral emotions, contextual factors, and socialization influences that influence moral decisions and moral behavior.

Course Outcomes

- Critically examine and discuss selected topics in moral development, as well as being able to apply the information and skills learned in this class to your own life.Understand the different constructs that contribute to moral development, such as cognition, emotion, identity, context, and culture.Be able to discuss socialization influences that impact children's moral development, such as parents, peers, teachers, and media.
- Identify and discuss the major theories of moral development, as well as the various research methods used in the study of moral and prosocial development.
- Think and write in a synthesized, analytical fashion, combining information across sources rather than merely summarizing information.

SFL 460 : Advanced Family Processes. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Integrating theory, research, and application of ideas introduced in SFL 160, focusing on key theoretical points, how research is conducted and applied, communication patterns, ritualization, conflict, distance regulation, crises, stress, and building family strengths.

Course Outcomes

- Understand the research on family processesCritically evaluate the research on family processesSynthesize the research on family processes
- Create recommendations for family issues using your understanding, evaluation, and synthesis of the research on family processes.

SFL 461 : The Family and the Law. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Legal environment of the family system, with emphasis on husband-wife and parent-child relationships, rights, and responsibilities.

Course Outcomes

- Critically analyze the historical and practical application of the law to your family.Critically analyze the profound implications that family law has on your relationships.Critically analyze the legitimacy of laws governing unnerving and sometimes painful issues.Be able to discuss sensitive issues different than your own in order to broaden your understanding as well as hone your ability to judge.Understand and synthesize issues addressed in class such as marriage, adoption, infertility, divorce, addiction, etc.

SFL 465 : Marital and Family Therapy/Enrichment Techniques. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Theories and techniques. Professional family enrichment and therapy applied to couples and families.

Course Outcomes

- Analyze and assess marital and family behavior.Describe ways of modifying marital and family systems using both educational/enrichment approaches and therapy approaches.
- Interview and evaluate couples and families.Use appropriately self-report measures.Observe marital and family behavior in meaningful ways.Set intervention goals based on observation and assessment.
- Write reports describing interpersonal dynamics.

SFL 471 : Philosophies of Family Work and Relationships. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Changes in household labor across time, current issues around gender and household labor, and philosophical perspectives of family work and family relationships.

Course Outcomes

- Understand and synthesize the historical evolution of family work and the roots of home management.Demonstrate knowledge of the core assumptions of current theoretical and research perspectives on family work.Analyze gendered perspectives on men's and women's "unique" contributions to family life.Communicate ideas clearly and engage in critical thinking as you write essays, take quizzes, and take exams.Critique and think more clearly about your own family work paradigms.

SFL 472 : Temporal Welfare in Families. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Assumptions, philosophy, and theory accounting for resource allocation, use, and meaning in families.

Course Outcomes

- Critically apply knowledge of principles of provident living as methods of economy in the creation of home as a sacred center for family life.Critically apply knowledge of principles of provident living as methods of economy in treating practical human needs as opportunity for moral and temporal growth in family members.Critically apply knowledge of principles of provident living as methods of economy in helping to establish a vital community.

SFL 476 : Secondary Student Teaching - Consumer Science. (12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

RECOMMENDED: All core and education classes.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

There are no course outcomes available

SFL 480 : Moral Foundations of Family Life. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: How the moral domain is central to human experience; implications for family life of theories and practices that acknowledge agency and the ethical.

Course Outcomes

- 1a. Explain how all theory and research in human science is based on a philosophy of science and a philosophy of human being. 1b. Give examples of specific assumptions we make when we attempt to explain ourselves—when we seek to understand the meaning of our experience.
- 2. Describe and give an example of how our concepts of human being (what it means to be human) connect to how we understand what or who we are and to how we explain our experience.
- 3. Create (or report examples from your experience) of how seeing the moral domain as central to human experience changes how we explain attitudes and behavior. (Or, "Give examples of how we explain human experience when we take the idea of moral agency seriously.")
- 4. Explain (using at least two contrasting philosophies as examples) the implications of how philosophies and assumptions inform how we make sense out of research results and the directions we choose when we intervene in people's lives. [For example, what informs how we do family life education and therapy?]
- 5. Identify and give examples of how the Restored Gospel either strengthens, revises, or obliterates academic philosophies used to understand human experience.

SFL 487 : Advanced Clothing Studies: Construction. (3:3:5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 287 or equivalent sewing skills.

DESCRIPTION: Three-dimensional fitting of apparel and advanced garment construction.

NOTE: Fee.

Course Outcomes

- Apply the four aspects of fit and apply them to create correct fit in the basic garment.Be able to identify a new range of construction and style details and execute them well.Become more independent in sewing activities.Develop and improve skill levels of sewing techniques.Assemble a professional quality planned and organized portfolio of assigned techniques.Demonstrate sewing and fitting vocabulary and use terms correctly.

SFL 488R : Women's Home-Based Entrepreneurs. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Exploration of home-based businesses through interaction with practicing professionals.

Course Outcomes

There are no course outcomes available

SFL 489 : The Family and Public Policy. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Investigation of public policy processes related to legislation and laws affecting home economics/home and family life. Funding and grantsmanship.

Course Outcomes

- Demonstrate an understanding of why we are called to be aware and involved as “responsible citizens” (and “officers of government”) to “strengthen the family as the fundamental unit of society.”
- Demonstrate an in depth understanding of how law and public policy strive—and struggle—to help couples form and sustain healthy marriages and reduce divorce.
- Demonstrate a broader, general understanding of other family related policy and legislation designed to strengthen family life and children’s development.
- Utilize experience gained in the class in preparing to influence family policy bypreparing a legislative testimony or similar document on a chosen topic.
- Become involved in an effort to promote (or oppose) some legal or public policy initiative in an attempt to “strengthen the family as the fundamental unit of society”.

SFL 490 : Advanced Issues in Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Evaluation of research on physical, mental, emotional, and social development.

Course Outcomes

- Critically evaluate issues related to studying developmental processes as well as study and practice critical thinking skills.Critically synthesize information learned from previous human development courses by examining how biological (e.g., temperament) and environmental (e.g., parents and peers) processes interact to shape development.Demonstrate how to examine current issues in human development developmentally.Critically synthesize the information, skills, and abilities learned in the first three units in an examination of the period of development recently termed “emerging adulthood” (ages 18-27).

SFL 498 : Family Life Education: Integrating Theory, Research, and Practice. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Senior standing; instructor's consent.

DESCRIPTION: Integrating theory, research, and practice. Developing competencies to design, implement, and evaluate family flife education programs. Preparing to work preventively with couples, parents, and families in areas such as marriage preparation, marriage enhancement, and parenting.

Course Outcomes

- Develop and articulate a personal philosophy of family life education.
- Critically evaluate the quality of several examples of family life education programs.
- Design a family life education program using scholarly literature and best practices.
- Be able to apply a framework for the development of family life education programs.
- Be able to utilize a variety of approaches to evaluating family life education programs.
- Learn principles and practices for teaching about family life in a variety of traditional and contemporary venues, including workshop and self-directed approaches.
- Practice workshop teaching and receive peer, clientele, and instructor feedback.
- Be able to utilize principles and practices for reaching diverse audiences.
- Be able to utilize principles and strategies for multiplying their reach through collaborative partnerships and social marketing.

Admission to Degree Program

All degree programs in the Department of Geography are open enrollment. However, special limitations apply for teaching majors.

The Discipline

Geography offers a variety of programs centered around spatial analysis and tailored, so far as possible, to meet the future needs of individual students. Our modern computer laboratory allows students to gain practical experience with geographical information systems (GIS), remote sensing, cartography, and other programs in urban and regional planning, travel, and population studies.

Career Opportunities

Graduates are employed in a wide range of private and governmental positions. Job titles include geographer; teacher of geography; city or regional planner; cartographer; photo interpreter; commodities and industrial location analyst; intelligence, travel industry, or environmental and GIS specialist; and many others.

Skills in spatial analysis make geography a valuable minor or supporting field for many other disciplines.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Geography
- **Environmental Studies Emphasis** (Program Outcomes)
- **Geographic Information Systems Emphasis** (Program Outcomes)
- **Geospatial Intelligence Emphasis** (Program Outcomes)
- **Global Studies Emphasis** (Program Outcomes)
- **Tourism Studies Emphasis** (Program Outcomes)
- **Urban and Regional Planning Emphasis** (Program Outcomes)

Minor in Geographic Information Systems
Minor in Geography Teaching
Minor in Global Studies
Minor in Tourism Studies
Minor in Urban and Regional Planning

Students should see their college advisement center for help or information concerning the undergraduate programs.

General Information

1. The Department of Geography offers one major with six emphases. The emphases are designed to enable students to gain an appreciation of our world as well as prepare them for either a career or graduate school. All students are required to take a set of core courses that emphasize basic geographic concepts and ways of knowing that are common to all six emphases. These courses prepare students for specialization in upper-division courses.

   Geography at Brigham Young University focuses on our interdependent world: the spatial relationships between the physical landscape, diverse societies, and current events. The major nourishes a sense of curiosity about the world around us, a desire to serve our local and global communities, and the skills necessary to solve significant problems that are inherently spatial.

   Hundreds of students major in geography to prepare for a professional career, for graduate study, or because of an interest in exploring and understanding the world around them. We emphasize both technical and critical thinking skills, including geographic information systems (GIS) and remote sensing, statistics, data collection, interpretation, and communication

using the written and spoken word and visual data display (maps, charts, and graphs).

2. Prerequisite: all students admitted to one of the geography majors listed above must complete the following courses within one year of declaring a major:
   Geog 100, 101, 110, 120, 130, 211.

3. Exit assessment: Students must complete an exit assessment during their final semester no later than one month before graduating. The assessment is meant to evaluate the department's program goals and student learning outcome. Although the assessment is a formal requirement, the results are anonymous and will not be part of the student's academic records.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following core courses:

GEOG 100 : The Geographic Approach. (1:1:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Overview of the discipline of geography and the faculty and geography major at BYU.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 101 : Global Environment: Understanding Physical Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

Course Outcomes
There are no course outcomes available

*GEOG 110 : Landscapes of Disaster: An Introduction to Natural Hazards. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Exploring natural and social science of disturbances by analyzing causes, consequences, and role of human behavior in causing and mitigating natural disasters.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 120 : Geography and World Affairs. (3:3:0)
OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Survey of the world, stressing geography of major political regions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 130 : Introduction to Human Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 211 : Map Use and Interpretation. (4:4:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Maps as tools for spatial analysis of problems in physical and cultural geography.

Course Outcomes
- Identify each component of the â Big Threeâ when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.
- Complete all typical map scale calculations related to land distance and area including unit conversions.

- Give and take coordinate references in UTM and lat / long and convert between the two. select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS
- Configure a GPS receiver properly to use both with and without a map. Lay-in and follow the course in a GPS receiver.
- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes
- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

*GEOG 222 : Statistics for Geographers 1. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 322 : Statistics for Geographers 2. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: GEOG 222

DESCRIPTION: Advanced techniques in geospatial analysis.

Course Outcomes
- To master an advanced set of quantitative methods that are particularly appropriate for geographers, becoming especially skilled in one statistical area.
- To determine what quantitative methods are appropriate for answering different research questions.
- To apply statistical analysis to geographic problems in a competent and worthwhile way
- To develop and carry out an excellent research project complete with collaborative work and a crisp oral and professional visual presentation.
- To understand and appreciate published academic geographic research that uses a variety of quantitative methods.

2. Complete the following environmental studies core courses:

GEOG 213 : Earth Observation and Image Interpretation. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles of earth observation: primarily air photo/large-scale satellite imagery interpretation, basic field methods, photogrammetry.

Course Outcomes
- Students will be able to perform a simple cultural / physical interpretation of simple monoscopic imagery.
- Students will be able to complete simple measurements from historical air photos including height, distance, area, scale, and coordinate-related problems.
- Students wil be able to complete simple problems related to electromagnetic radiation and atmospheric effects.

GEOG 303 : Biogeography. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Geog 101.

DESCRIPTION: Broad-scale distribution of plants and animals. Theoretical and practical applications to conservation and effects of global environmental change.

Course Outcomes
- Demonstrate an understanding of basic concepts and processes in biogeography
- Recognize and be able to explain patterns of plant and animal life at many different scales
- Explain how humans have affected the distribution and diversity of plants and animals, and apply concepts to decisions regarding human use of the environment
- Demonstrate a knowledge of prominent professional biogeographers and ecologists and their current research themes
- Plan for future changes in species distributions and diversity as a result of environmental and human-induced pressures

GEOG 304 : Geography of Climates. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

DESCRIPTION: Elements, controls, distribution, and classification of the earth's climates.

Course Outcomes

- Gain an understanding of the key determinants of the world's main climates
- Gain an appreciation of the complex nature and implications of human climate change.
- Understand how extreme weather events occur and their potential impacts on humans.
- Understand the methods climatologists use to collect data about past and present climate.
- Improve writing, critical thinking and your ability to apply knowledge to solve geographic problems.

GEOG 306 : Public Land Conservation. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

Course Outcomes

There are no course outcomes available

GEOG 307 : Landscape Ecology. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

RECOMMENDED: Geog 212, 213.

DESCRIPTION: Interaction between spatial patterns and spatial processes in an ecological context. Methods, theories, and practical applications of landscapes at various scales.

Course Outcomes

- Demonstrate an understanding of the basic concepts of landscape ecology
- Understand the relation between pattern and process in landscapes across multiple spatial and temporal scales
- Read, understand, and critique research articles in scholarly journals related to landscape ecology
- Understand and be able to use landscape metrics and associated methodologies and technologies to quantitatively analyze landscapes
- Identify and address a research question in landscape ecology, and effectively communicate the results orally and in writing
- Apply landscape ecology concepts to environmental planning and conservation biology

*PWS 150 : Environmental Biology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

DESCRIPTION: Conservation and management of natural resources concurrent with increasing socioeconomic and human population demands; factors such as soil, water, and air pollution, resources management, bioremediation, nutrient cycles, and global climate changes

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Gain a deep appreciation for the Lord's admonition to Adam and Eve regarding the Earth to dress it and keep it
- Engage others and participate in discussions about major environmental problems, movements, and solutions (e.g., desertification, invasive species, water pollution, green revolution, and renewable energy).
- Understand how “science” is conducted.
- Demonstrate a fundamental knowledge (i.e., scientific literacy) of the environment and current environmental problems facing us locally, regionally, and globally.
- Devise experiments with testable hypotheses based the scientific method—process of making observations and logically integrating those observations into a model of how the world works.
- Foster and promote environmental stewardship within your realm of influence and your community.

3. Complete four elective courses from the following:

BIO 350 : Ecology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: PDBIO 120; or BIO 130

DESCRIPTION: Distribution and abundance of organisms and their interactions with the physical and biotic components of the earth.

Course Outcomes

- Understand the major physical processes that form and characterize the biosphere, including global scale energy flow, the carbon cycle, climate, and soil formation.
- Understand the processes that drive major levels of organization of the biotic world, including energetics in the ecosystem, population dynamics, and species interactions.
- Understand the importance of writing as a way of synthesizing and solidifying critical thought.
- Foster and promote environmental stewardship within your realm of influence and your community.
- Understand the importance of ecology to issues regarding human well-being
- See the connectivity and relevance of ecology to other fields of study

BIO 370 : Bioethics. (2:1:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Introductory biology course.
DESCRIPTION: In-depth lecture and small group discussion of varied bioethical issues. LDS Church positions emphasized when appropriate.

Course Outcomes
- Students will understand the ethical and philosophical underpinnings of bioethics and to develop ethical intuitions on bioethical issues.
- Students will learn the terminology, vocabulary, and objectives of bioethics.
- Students will understand the tools and approaches needed to make a bioethical decision and to communicate that decision in rationally informed ways.
- Students will understand the bioethical primary literature, to understand how to read case studies, and familiarity with the major issues being discussed in bioethics today.

BIO 450 : Conservation Biology. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: BIO 220A & BIO 350; or BIO 220B & BIO 350
DESCRIPTION: Scientific principles of conservation: applying population genetics, and phylogenetic and ecological theory to preservation of biological diversity; developing sustainable ecological systems compatible with human resource use.

Course Outcomes
- Apply an understanding of ecological processes to conservation of populations, species, and ecosystems.
- Foster and promote environmental stewardship within your realm of influence and your community.
- Demonstrate the ability to apply the scientific method and analytical thinking to ecological and conservation issues.
- Demonstrate the ability to synthesize literature relevant to a topic in conservation bioloigy
- Demonstrate the ability to write a scientific term paper

GEOG 305 : Geography of Landforms. (3:3:0)
WHEN TAUGHT: Fall Contact Department
RECOMMENDED: Geog 101.
DESCRIPTION: Elements of landforms: distributions and cultural significance.

Course Outcomes
- Examine the history of landform study and the key individuals in the history of geomorphology.
- Explain the physical processes that produce landforms.
- Examine a physical landscape and describe why it looks the way it does.
- Describe how human settlement and recreation patterns are influenced by landforms.
- Understand dating techniques geomorphologists use to understand earth's history.

GEOG 310 : Introduction to Urban and Regional Planning. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Introduction to the profession and practice of urban and regional planning.

Course Outcomes
There are no course outcomes available

GEOG 311 : Geographic Data Management. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: GEOG 212
DESCRIPTION: Nature of geographic information and its practical management in GIS; design of GIS databases, data collection from primary and secondary sources, manipulating data in preparation for analysis, and data exploration.

Course Outcomes
- Understand the fundamental concepts of geographic information, and use those concepts to explain the core data models and procedures of GIS.
- Create new databases to fulfill a specific GIS need, selecting the appropriate data model (e.g., vector or raster) and data storage strategy (e.g., shapefiles, geodatabases), and designing the necessary layers and attribute tables.
- Obtain existing GIS data that is appropriate for a given need, and transform existing data sets to fit into an enterprise GIS, using tools such as format conversion and reprojection.
- Create new GIS data sets using appropriate source materials and technologies, such as CAD, surveying, GPS, and remote sensing.
- Learn new concepts and technologies as needed to solve novel GIS management problems, with minimal supervision, using a variety of information resources.

GEOG 312 : Cartographic Design. (4:2:4)
WHEN TAUGHT: Fall
PREREQUISITE: GEOG 211 & GEOG 212
DESCRIPTION: Graphic perception, layout, typography, color, statistical methods, and symbolization of thematic maps through computer-aided techniques.

Course Outcomes
- Develop a map-based solution to a need, focusing on purpose and audience.
- Gather and process data needed for a map.
- Design maps to be clear, useful, and attractive, employing appropriate techniques such as thematic map types, composition, symbology, color, and text.

- Continue to learn design skills through map critique and self-training
- Appreciate quality work and put forth the effort necessary to produce quality results

GEOG 313 : Remote Sensing 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 213

DESCRIPTION: Introduction to airborne and spaceborne sensors, including characteristics and image acquisition. Emphasizes land cover mapping applications appropriate for environment monitoring.

Course Outcomes

There are no course outcomes available

GEOG 399R : Academic Internship. (.5-6:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: GEOG 100

DESCRIPTION: On-the-job experience.

NOTE: 3 hours required. No more than 3 hours total in cooperative education may be counted in major.

Course Outcomes

- Complete a supervised internship in an employment setting or agency related to geography.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

GEOG 414 : Applied Urban Environmental Modeling. (3:3:0)

WHEN TAUGHT: Winter Contact Department

RECOMMENDED: Geog 212, 213, 313.

DESCRIPTION: Complexities of urban environment through use of geographic techniques, including remote sensing, GIS, GPS, aerial photo and map interpretation, and fieldwork. Modeling human impact on the physical environment by examining local case studies and completing group projects. Developing and building technical skills as tools in understanding the urban environment.

Course Outcomes

There are no course outcomes available

GEOG 415R : Geographic Field Methods. (1-3:Arr:0)

WHEN TAUGHT: Spring Contact Department; Summer Contact Department

PREREQUISITE: GEOG 101

DESCRIPTION: Learning different methods used by geographers in the field through hands-on involvement in real faculty research.

Course Outcomes

There are no course outcomes available

GEOG 423 : Planning for Unique and Sensitive Lands. (2:2:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310.

DESCRIPTION: Unique aspects of land affecting land-use planning positively or negatively depending on sensitivity of design. Landscape ecological principles introduced and examined for usefulness in land-use planning.

Course Outcomes

- Explain the environmental sciences (biology, ecology, environmental studies) including knowledge about ecological and physical systems in relation to human activity at different geographic scales.

GEOL 411 : Geomorphology and Remote Sensing. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GEOL 111

DESCRIPTION: Interpretive analysis of landforms and their geologic significance. Use of aerial/satellite images of Earth and other planets, topographic/bathymetric maps, multi-wavelength image data. Field trips.

Course Outcomes

- Understand the relationships between landscapes and the processes that created them
- Develop an ability to read and interpret geology and geomorphology from topographic maps, air photos, and satellite data
- Become comfortable with quantitative analyses of landforms and geomorphic processes
- Acquire an appreciation for the unique and complex way the landscapes of Earth and the planets evolved to their present-day morphologies

PWS 225 : Principles of Wildlife and Fisheries Management. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: PWS 115.

DESCRIPTION: Basic principles of fish and wildlife management, their habitats, and their human users. Ecological concepts, population dynamics, nutrition, behavior, population assessment, management strategies, habitat sampling and management.

Course Outcomes

- Learning Outcome #1: Identify and articulate stewardship for the creation as a basis for professional judgment.This course not only provides an understanding of tools used by wildlife and fisheries managers to restore, revive, and maintain wildlife and fish populations, but also discusses our stewardship roles and responsibilities for those aspects of the creation.
- Learning Outcome #2: Identify wildland plants, soils, and wildlife species and understand how they function in the environment.This course introduces students to a number of wildlife and fish species, and basic ecological concepts as they relate to wildlife and fisheries. Students will understand the ecological roles, habitat needs, and interactions of fish and wildlife at various levels in an ecosystem
- Learning Outcome #3: Apply an understanding of ecological processes to wildlife management.This course includes an extensive overview of basic ecological processes and how to use them for fish and wildlife management.
- Learning Outcome #4: Demonstrate the ability to apply the scientific method and analytical thinking to ecological and management issues.In this course students will be rigorously taught the scientific method and given opportunities to demonstrate the understanding through fish and wildlife management problem solving. They will have writing assignments that provide opportunities for the synthesis and expression of the depth of their understanding. The term paper required in this course may be used for one of the "three written papers relating to stewardship ethics and management situations" that will be placed in the student's portfolio required for graduation with a Wildlife and Wildlands Conservation BS degree.

PWS 303 : Soils Conservation and Resources. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PWS 282 & CHEM 105; or PWS 282 & CHEM 101; PWS 100 or equivalent; Math 110 or equivalent.

RECOMMENDED: Geol 111.

DESCRIPTION: Taxonomy of world soils; conservation and management of agricultural, wildland, wetland, and urban soils.

Course Outcomes

- Understand soil physics, chemistry, taxonomy, and water movement to maintain natural resources.
- Apply soil conservation practices and principles to regions sensitive to soil degradation.
- Understand the history, development, and terminology associated with USDA Soil Taxonomy and be familiar with other soil taxonomic systems. Recognize soil orders and suborders from the physical and chemical characteristics of the soil

PWS 305 : Soils and Water Quality. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PWS 282 & CHEM 105; or PWS 282 & CHEM 101; PWS 100 or equivalent; Math 110 or equivalent.

DESCRIPTION: Principles and practices of safe management of agricultural and urban wastes; amendments and nutrients including remediation methods for conservation of soils and water quality.

Course Outcomes

- Evaluate case studies in current topics soil and water quality
- Demonstrate a fundamental knowledge in water quality and water resource conservation as influenced by soil-water-atmosphere interactions
- Enhance critically thinking skills as it relates to issues in water quality management and resource conservation
- Improve mathematical and statistical skills related to nutrient, salinity, sodicity, and toxicity evaluation and management

PWS 340 : Genetics. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: MMBIO 240; or CHEM 481M; or CHEM 481

DESCRIPTION: Genetic mechanisms, their fundamental nature, interactions, and applications to human affairs. Genetics in quantitative terms. Extensive practice in problem solving.

Course Outcomes

- Students can construct two- and three-point linkage maps.
- Students can display fluency in interpreting gene annotation and nomenclature in GenBank records.
- Students can demonstrate ability to analyze and apply Chi-square goodness-of-fit tests to complex geneticdata sets involving segregation and Hardy-Weinberg equilibrium models.
- Students can identify differences between extranuclear, autosomal and sex-linked inheritance patterns.
- Students can use genetic data (DNA or amino acid sequence) to reconstruct basic evolutionary phylogenies.
- Students can dissect quantitative traits into environmental and genetic variance components.

PWS 375 : Environmental Policies and Laws. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Inception, current state, and future directions of seminal environmental policies and laws established in the US to improve environmental quality. Application of policies and laws in resource conservation and management, including a National Environmental Policy Act certification program.

Course Outcomes

- Demonstrate a fundamental understanding of the inception, current state, and future needs of the five seminal developments in environmental policy and law (i.e., Clean Air Act; Clean Water Act; National Environmental Policy Act; Comprehensive Environmental Response, Compensation, and Liability Act or Superfund; and the Endangered Species Act)

Create your own conceptual framework for analyzing policy change in the United States and abroad, and understand the role of government, society, and economics in shaping this framework
- Understand the formal institutional setting in which policy is developed, the major participants involved, and the role of science in shaping policy
- Gain a basic understanding of how environmental laws (e.g., statutes, cases, and common laws) operate to regulate our interaction with the environment and one another
- Write more effectively and concisely

PWS 419 : Forest Management and Ecology. (3:2:3)

WHEN TAUGHT: Fall
DESCRIPTION: Managing forests, emphasizing ecosystem managment.
NOTE: Field trips required.

Course Outcomes

- 1. Articulate their role as stewards over forested environments.
- 2. Appreciate the diversity of forests world-wide and their importance to human populations.
- 3. Apply knowledge of forest structure, function, and process in making management decisions
- 4. Be able to quantify forest structure and production
- 5. Recognize forest pests and diseases and know appropriate control techniques.
- 6. Relate forests to wildlife habitat
- 7. Identify 75 tree species located in Utah and on BYU campus.

4. Complete the exit assessment during the final semester, no later than one month before graduation.

*Hours include courses that may fulfill university core requirements.

1. Complete the following core courses:

GEOG 100 : The Geographic Approach. (1:1:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Overview of the discipline of geography and the faculty and geography major at BYU.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 101 : Global Environment: Understanding Physical Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

Course Outcomes
There are no course outcomes available

*GEOG 110 : Landscapes of Disaster: An Introduction to Natural Hazards. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Exploring natural and social science of disturbances by analyzing causes, consequences, and role of human behavior in causing and mitigating natural disasters.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 120 : Geography and World Affairs. (3:3:0)
OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Survey of the world, stressing geography of major political regions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 130 : Introduction to Human Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 211 : Map Use and Interpretation. (4:4:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Maps as tools for spatial analysis of problems in physical and cultural geography.

Course Outcomes
- Identify each component of the â Big Threeâ when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.
- Complete all typical map scale calculations related to land distance and area including unit conversions.

- Give and take coordinate references in UTM and lat / long and convert between the two. select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS
- Configure a GPS receiver properly to use both with and without a map. Lay-in and follow the course in a GPS receiver.
- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes
- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

*GEOG 222 : Statistics for Geographers 1. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 322 : Statistics for Geographers 2. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: GEOG 222

DESCRIPTION: Advanced techniques in geospatial analysis.

Course Outcomes
- To master an advanced set of quantitative methods that are particularly appropriate for geographers, becoming especially skilled in one statistical area.
- To determine what quantitative methods are appropriate for answering different research questions.
- To apply statistical analysis to geographic problems in a competent and worthwhile way
- To develop and carry out an excellent research project complete with collaborative work and a crisp oral and professional visual presentation.
- To understand and appreciate published academic geographic research that uses a variety of quantitative methods.

2. Complete two physical, regional, or human geography courses from the following:

GEOG 305 : Geography of Landforms. (3:3:0)

WHEN TAUGHT: Fall Contact Department

RECOMMENDED: Geog 101.

DESCRIPTION: Elements of landforms: distributions and cultural significance.

Course Outcomes
- Examine the history of landform study and the key individuals in the history of geomorphology.
- Explain the physical processes that produce landforms.
- Examine a physical landscape and describe why it looks the way it does.
- Describe how human settlement and recreation patterns are influenced by landforms.
- Understand dating techniques geomorphologists use to understand earth's history.

GEOG 306 : Public Land Conservation. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

Course Outcomes
There are no course outcomes available

GEOG 307 : Landscape Ecology. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

RECOMMENDED: Geog 212, 213.

DESCRIPTION: Interaction between spatial patterns and spatial processes in an ecological context. Methods, theories, and practical applications of landscapes at various scales.

Course Outcomes
- Demonstrate an understanding of the basic concepts of landscape ecology

- Understand the relation between pattern and process in landscapes across multiple spatial and temporal scales
- Read, understand, and critique research articles in scholarly journals related to landscape ecology
- Understand and be able to use landscape metrics and associated methodologies and technologies to quantitatively analyze landscapes
- Identify and address a research question in landscape ecology, and effectively communicate the results orally and in writing
- Apply landscape ecology concepts to environmental planning and conservation biology

GEOG 310 : Introduction to Urban and Regional Planning. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Introduction to the profession and practice of urban and regional planning.

Course Outcomes
There are no course outcomes available

GEOG 331 : Economic Geography. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Introduction to economic processes and spatial patterns, emphasizing theoretical approaches, locational strategies, and changing economic land-use patterns.

Course Outcomes
There are no course outcomes available

GEOG 336 : Urban Geography. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: History and theory of urban development, including why cities exist and how cities function.

Course Outcomes
There are no course outcomes available

GEOG 346 : Population Geography. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Spatial perspective on wide field of population studies, focusing on distribution, development, structure, and movement of populations, emphasizing basic demographic measures.

Course Outcomes
There are no course outcomes available

GEOG 410 : Urban Planning Methods. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310.

DESCRIPTION: Applications of methods and techniques commonly used in the urban planning process, emphasizing data collection and analysis, fieldwork, and writing skills.

Course Outcomes
There are no course outcomes available

GEOG 421 : Urban Planning Law. (2-3:Arr:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 310.

DESCRIPTION: The political and legal context within which urban planning takes place.

Course Outcomes
There are no course outcomes available

GEOG 422 : Principles of Urban Design. (2:2:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 310.

DESCRIPTION: Theories and principles of urban design emphasizing specific design criteria. Planning and design tools used within the U.S. by local government. Basic principles of architecture and landscape architecture. Field trips.

Course Outcomes
- Demonstrate knowledge of the design arts (architecture, landscape architecture, art, urban design) including knowledge about the relationship between the design of the built environment and its functional, aesthetic and social precedents and consequences.
- Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations.

GEOG 423 : Planning for Unique and Sensitive Lands. (2:2:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310.
DESCRIPTION: Unique aspects of land affecting land-use planning positively or negatively depending on sensitivity of design. Landscape ecological principles introduced and examined for usefulness in land-use planning.

Course Outcomes
- Explain the environmental sciences (biology, ecology, environmental studies) including knowledge about ecological and physical systems in relation to human activity at different geographic scales.

GEOG 424 : Urban Transportation Planning. (3:3:0)
WHEN TAUGHT: Winter
RECOMMENDED: Geog 310, 410.
DESCRIPTION: Theories and principles of transportation planning emphasizing environmental, energy, economic, and social issues.

Course Outcomes
There are no course outcomes available

GEOG 510 : Professional Planning Studio. (3:3:0)
WHEN TAUGHT: Fall
RECOMMENDED: Geog 410.
DESCRIPTION: Assessing problem and issue identification, goal formulation, data gathering, synthesis and summary, plan concept and format, and public policy adoption while writing a general plan for a community in Utah.

Course Outcomes
- Use problem solving skills to select, diagnose and solve relevant aspects of a complex planning problem including attention to the needs and interests of diverse stakeholders and the guidance provided by conceptual and empirical expertise. (PAB 4.2.3a)Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations. (PAB 4.2.3c)Collaborate with peers in joint learning activities organized to produce a plan or planning product for a relevant professional clientele, to mediate disagreements, to interpret contested purposes, and to negotiate between diverse and competing interests. (PAB 4.2.3e)Use ideas about the creation of plans, programs or projects to prepare an individually crafted product for a specific planning purpose and audience; demonstrating skill and judgment preparing a planning project that meets minimum professional standards. (PAB 4.2.3f)Use techniques for the adoption and implementation of plans including relevant regulations, incentives, techniques and technologies. (PAB 4.2.3h)Work with diverse communities, especially communities consisting of disadvantaged groups and persons and racial and ethnic minorities, or immigrant communities. (PAB 4.2.3i)

3. Complete the following major courses:

GEOG 213 : Earth Observation and Image Interpretation. (2:2:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Principles of earth observation: primarily air photo/large-scale satellite imagery interpretation, basic field methods, photogrammetry.

Course Outcomes
- Students will be able to perform a simple cultural / physical interpretation of simple monoscopic imagery.
- Students will be able to complete simple measurements from historical air photos including height, distance, area, scale, and coordinate-related problems.
- Students wil be able to complete simple problems related to electromagnetic radiation and atmospheric effects.

GEOG 217 : Programming for Geographers. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Object-oriented analysis of geographic information using Visual Basic.

Course Outcomes
There are no course outcomes available

GEOG 311 : Geographic Data Management. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: GEOG 212
DESCRIPTION: Nature of geographic information and its practical management in GIS; design of GIS databases, data collection from primary and secondary sources, manipulating data in preparation for analysis, and data exploration.

Course Outcomes
- Understand the fundamental concepts of geographic information, and use those concepts to explain the core data models and procedures of GIS.
- Create new databases to fulfill a specific GIS need, selecting the appropriate data model (e.g., vector or raster) and data storage strategy (e.g., shapefiles, geodatabases), and designing the necessary layers and attribute tables.
- Obtain existing GIS data that is appropriate for a given need, and transform existing data sets to fit into an enterprise GIS, using tools such as format conversion and reprojection.
- Create new GIS data sets using appropriate source materials and technologies, such as CAD, surveying, GPS, and remote sensing.
- Learn new concepts and technologies as needed to solve novel GIS management problems, with minimal

supervision, using a variety of information resources.

GEOG 312 : Cartographic Design. (4:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 211 & GEOG 212

DESCRIPTION: Graphic perception, layout, typography, color, statistical methods, and symbolization of thematic maps through computer-aided techniques.

Course Outcomes

- Develop a map-based solution to a need, focusing on purpose and audience.
- Gather and process data needed for a map.
- Design maps to be clear, useful, and attractive, employing appropriate techniques such as thematic map types, composition, symbology, color, and text.
- Continue to learn design skills through map critique and self-training
- Appreciate quality work and put forth the effort necessary to produce quality results

GEOG 313 : Remote Sensing 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 213

DESCRIPTION: Introduction to airborne and spaceborne sensors, including characteristics and image acquisition. Emphasizes land cover mapping applications appropriate for environment monitoring.

Course Outcomes

There are no course outcomes available

GEOG 317 : Analytical Cartography. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: GEOG 217

DESCRIPTION: Geocoding, spatial data representation, spatial algorithms, and map based transformations.

Course Outcomes

- Students will be able to express simple data structures and algorithms in computer code. These data structures and algorithms will be illustrative of either raster or vector GIS.
- When given a simple geographic problem specification, students will be able to create computer methods and classes that address the problem or meet the specification.
- When presented with a problem amenable to the application of geographic computer programming (intermediate level difficulty), students will design and implement a software system including computer program(s) to solve the problem.

4. Complete two courses (6 credit hours) from the following:

GEOG 399R : Academic Internship. (.5-6:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: GEOG 100

DESCRIPTION: On-the-job experience.

NOTE: 3 hours required. No more than 3 hours total in cooperative education may be counted in major.

Course Outcomes

- Complete a supervised internship in an employment setting or agency related to geography.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

GEOG 411 : Issues in Computer Cartography. (3:3:0)

WHEN TAUGHT: Winter Contact Department

PREREQUISITE: GEOG 312

DESCRIPTION: Current techniques for compilation, integration, and display of digital map data.

Course Outcomes

There are no course outcomes available

GEOG 412 : Problem Solving with Geographic Information Systems. (3:3:1)

WHEN TAUGHT: Fall Contact Department

PREREQUISITE: GEOG 212

RECOMMENDED: Geog 222.

DESCRIPTION: Solving practical geographic problems and performing scientific research using raster and vector analysis tools in GIS.

Course Outcomes

There are no course outcomes available

GEOG 413 : Remote Sensing 2. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: GEOG 313

DESCRIPTION: Computer processing of low-altitude and satellite images for geographic analysis of physical and cultural phenomena on earth.

Course Outcomes
- Understand and implement remote sensing pre-processing techniques.
- Perform image classification and evaluate classification accuracy.
- Understand and perform change detection.
- Complete an entire remote sensing project from beginning to end.

GEOG 414 : Applied Urban Environmental Modeling. (3:3:0)

WHEN TAUGHT: Winter Contact Department
RECOMMENDED: Geog 212, 213, 313.
DESCRIPTION: Complexities of urban environment through use of geographic techniques, including remote sensing, GIS, GPS, aerial photo and map interpretation, and fieldwork. Modeling human impact on the physical environment by examining local case studies and completing group projects. Developing and building technical skills as tools in understanding the urban environment.

Course Outcomes
There are no course outcomes available

GEOG 495R : Mentored Research. (1-3:Arr.:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Participating in research integrating material learned in major. Emphasizes individual or collaborative research and creative thinking through active learning and reflective analysis.

Course Outcomes
- Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

GEOG 521R : Geographic Information Practicum. (3:3:0)

WHEN TAUGHT: Fall, Contact Department; Winter, Contact Department; Spring Contact Department
PREREQUISITE: GEOG 212 & GEOG 217
RECOMMENDED: Geog 222, 311, 312, 313, 317, 412.
DESCRIPTION: Integration of various geographic technologies to solve a practical problem. Advanced topics in GIS, remote sensing, cartography, and programming as needed.

Course Outcomes
- Students will learn integration of various geographic technologies to solve a practical problem using advanced topics in GIS, remote sensing, cartography, and programming as needed.

5. Complete the exit assessment during the final semester, no later than one month before graduation.

*Hours include courses that may fulfill university core requirements.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following core courses:

GEOG 100 : The Geographic Approach. (1:1:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Overview of the discipline of geography and the faculty and geography major at BYU.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 101 : Global Environment: Understanding Physical Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

Course Outcomes
There are no course outcomes available

*GEOG 110 : Landscapes of Disaster: An Introduction to Natural Hazards. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Exploring natural and social science of disturbances by analyzing causes, consequences, and role of human behavior in causing and mitigating natural disasters.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 120 : Geography and World Affairs. (3:3:0)
OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Survey of the world, stressing geography of major political regions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 130 : Introduction to Human Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 211 : Map Use and Interpretation. (4:4:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Maps as tools for spatial analysis of problems in physical and cultural geography.

Course Outcomes
- Identify each component of the â Big Threeâ when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.
- Complete all typical map scale calculations related to land distance and area including unit conversions.

- Give and take coordinate references in UTM and lat / long and convert between the two. select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS
- Configure a GPS receiver properly to use both with and without a map. Lay-in and follow the course in a GPS receiver.
- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes
- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

GEOG 213 : Earth Observation and Image Interpretation. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles of earth observation: primarily air photo/large-scale satellite imagery interpretation, basic field methods, photogrammetry.

Course Outcomes
- Students will be able to perform a simple cultural / physical interpretation of simple monoscopic imagery.
- Students will be able to complete simple measurements from historical air photos including height, distance, area, scale, and coordinate-related problems.
- Students wil be able to complete simple problems related to electromagnetic radiation and atmospheric effects.

*GEOG 222 : Statistics for Geographers 1. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 271 : Middle East. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Physical and cultural geography of Southwest Asia and North Africa, emphasizing the cultural mosaic, geopolitics, environment, and resources of the region.

Course Outcomes
There are no course outcomes available

GEOG 304 : Geography of Climates. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

DESCRIPTION: Elements, controls, distribution, and classification of the earth's climates.

Course Outcomes
- Gain an understanding of the key determinants of the world's main climates
- Gain an appreciation of the complex nature and implications of human climate change.
- Understand how extreme weather events occur and their potential impacts on humans.
- Understand the methods climatologists use to collect data about past and present climate.
- Improve writing, critical thinking and your ability to apply knowledge to solve geographic problems.

GEOG 313 : Remote Sensing 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 213

DESCRIPTION: Introduction to airborne and spaceborne sensors, including characteristics and image acquisition. Emphasizes land cover mapping applications appropriate for environment monitoring.

Course Outcomes
There are no course outcomes available

GEOG 322 : Statistics for Geographers 2. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: GEOG 222
DESCRIPTION: Advanced techniques in geospatial analysis.

Course Outcomes
- To master an advanced set of quantitative methods that are particularly appropriate for geographers, becoming especially skilled in one statistical area.
- To determine what quantitative methods are appropriate for answering different research questions.
- To apply statistical analysis to geographic problems in a competent and worthwhile way
- To develop and carry out an excellent research project complete with collaborative work and a crisp oral and professional visual presentation.
- To understand and appreciate published academic geographic research that uses a variety of quantitative methods.

GEOG 331 : Economic Geography. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: Geog 100 or instructor's consent.
DESCRIPTION: Introduction to economic processes and spatial patterns, emphasizing theoretical approaches, locational strategies, and changing economic land-use patterns.

Course Outcomes
There are no course outcomes available

GEOG 341 : Political Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Spatial analysis of global politics; focus on geopolitics, territory and conflict, nationalism, and the politics of resources.

Course Outcomes
There are no course outcomes available

2. Complete one course from the following GIS courses:

GEOG 217 : Programming for Geographers. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Object-oriented analysis of geographic information using Visual Basic.

Course Outcomes
There are no course outcomes available

GEOG 311 : Geographic Data Management. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: GEOG 212
DESCRIPTION: Nature of geographic information and its practical management in GIS; design of GIS databases, data collection from primary and secondary sources, manipulating data in preparation for analysis, and data exploration.

Course Outcomes
- Understand the fundamental concepts of geographic information, and use those concepts to explain the core data models and procedures of GIS.
- Create new databases to fulfill a specific GIS need, selecting the appropriate data model (e.g., vector or raster) and data storage strategy (e.g., shapefiles, geodatabases), and designing the necessary layers and attribute tables.
- Obtain existing GIS data that is appropriate for a given need, and transform existing data sets to fit into an enterprise GIS, using tools such as format conversion and reprojection.
- Create new GIS data sets using appropriate source materials and technologies, such as CAD, surveying, GPS, and remote sensing.
- Learn new concepts and technologies as needed to solve novel GIS management problems, with minimal supervision, using a variety of information resources.

GEOG 312 : Cartographic Design. (4:2:4)
WHEN TAUGHT: Fall
PREREQUISITE: GEOG 211 & GEOG 212
DESCRIPTION: Graphic perception, layout, typography, color, statistical methods, and symbolization of thematic maps through computer-aided techniques.

Course Outcomes
- Develop a map-based solution to a need, focusing on purpose and audience.
- Gather and process data needed for a map.
- Design maps to be clear, useful, and attractive, employing appropriate techniques such as thematic map types, composition, symbology, color, and text.
- Continue to learn design skills through map critique and self-training
- Appreciate quality work and put forth the effort necessary to produce quality results

GEOG 317 : Analytical Cartography. (3:3:0)
WHEN TAUGHT: Winter

PREREQUISITE: GEOG 217
DESCRIPTION: Geocoding, spatial data representation, spatial algorithms, and map based transformations.

Course Outcomes
- Students will be able to express simple data structures and algorithms in computer code. These data structures and algorithms will be illustrative of either raster or vector GIS.
- When given a simple geographic problem specification, students will be able to create computer methods and classes that address the problem or meet the specification.
- When presented with a problem amenable to the application of geographic computer programming (intermediate level difficulty), students will design and implement a software system including computer program(s) to solve the problem.

GEOG 412 : Problem Solving with Geographic Information Systems. (3:3:1)
WHEN TAUGHT: Fall Contact Department
PREREQUISITE: GEOG 212
RECOMMENDED: Geog 222.
DESCRIPTION: Solving practical geographic problems and performing scientific research using raster and vector analysis tools in GIS.

Course Outcomes
There are no course outcomes available

GEOG 413 : Remote Sensing 2. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: GEOG 313
DESCRIPTION: Computer processing of low-altitude and satellite images for geographic analysis of physical and cultural phenomena on earth.

Course Outcomes
- Understand and implement remote sensing pre-processing techniques.
- Perform image classification and evaluate classification accuracy.
- Understand and perform change detection.
- Complete an entire remote sensing project from beginning to end.

3. Complete two regional geography courses from the following:

*GEOG 255 : Middle and South America. (3:3:0)
WHEN TAUGHT: Winter Contact Department
DESCRIPTION: Environmental, cultural, economic, and political parameters of Latin American societies.

Course Outcomes
- To link how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to the overall study of the Latin American realm.
- To gain a working knowledge of the connection of the underlying physical "stage" of Latin America to the distributions of people and their activities.
- To gain an understanding of the geographic structure of Latin America’s cultural components including languages, ethnic groups, settlement patterns, and religious beliefs.
- To develop geographic writing and research skills that result in papers that are fluent, relevant, and creative.
- To use other students’ input to effectively enhance Latin American geographic understanding through group work and discussions
- To discover the significance of Latin America's increasing impact on the world's economy, as well as the growing Hispanization of the United States and the Church of Jesus Christ of Latter-day Saints

*GEOG 265 : Russia and the Former Soviet Union. (3:3:0)
DESCRIPTION: Physical features, resources, political issues, economy and industries, population concerns, and role in world affairs.

Course Outcomes
- To use other students input to effectively enhance geographic understanding of the region.
- To comprehend the regional geographic structure of the region's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in the region including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era, including relationship to the European Union and other political entities.
- To grasp how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of this region.
- To demonstrate the connection of the underlying physical "stage" of the region to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To write geographic research that is fluent, relevant, and creative.

*GEOG 272 : East Asia. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Region of monsoon Asia and its basic human (demographics, nations and ethnic groups, settlement patterns, religious beliefs, transportation and communication systems, political structures), and physical geographic characteristics (land forms, physiography, climatic characteristics, and natural resources).

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 273 : Southeast Asia. (3:3.0:0)
WHEN TAUGHT: Fall Contact Department
DESCRIPTION: Fundamental issues of geography relating to Southeast Asia, including the extraction and marketing of natural resources, economic development, neighborly relations, and how diffusion has influenced the unique cultural, religious, and linguistic characteristics of the region.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 285 : Africa South of the Sahara. (3:3:0)
WHEN TAUGHT: Winter Contact Department
DESCRIPTION: Geographical analysis focusing on resource management, political issues, development, environmental problems, economic development, and urban-rural change; case studies from selected countries.

Course Outcomes
There are no course outcomes available

4. Complete the following:

GEOG 441 : Seminar in Geography and Geospatial Intelligence 1. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: Instructor's consent.
DESCRIPTION: Capstone seminar, part 1, for students in geospatial intelligence emphasis, emphasizing synthesis of material learned in major and application of knowledge and skills through research project.

Course Outcomes
- Demonstrate to the student the unending need for Intelligence in a time of endless warfare. Discuss the propriety and honor in being involved in efforts to preserve freedom.
- Demonstrate the encompassing relationship of geography to war, and thus to Intelligence.
- Identify the types of war.
- Survey the types of Intelligence, Imint, Sigint, and Humint.
- Investigate the proper Ethics of an Intelligence Officer.
- Demonstrate the need for All-Source Intelligence.
- Develop skills in oral presentation, including slide design, speaking, and awareness of personal appearance. Develop skills in writing pithy reports in the style used in the intelligence community.

GEOG 442 : Seminar in Geography and Geospatial Intelligence 2. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: GEOG 441
DESCRIPTION: Capstone seminar part 2 for students in geospatial intelligence emphasis, emphasizing synthesis of material learned in major and application of knowledge and skills through research project.

Course Outcomes
- Demonstrate the political processes and attitudes that led to diminished US Intelligence capability in 2001.
- Study the enemy of today's war, and learn to stay abreast of current events and predict future events in other regions of the world.
- Investigate other regional potential (low current day conflict) political/wars for Intelligencestudy and awareness.
- All students will participate as Team Members in completeing major research projects in timely and vital National security issues.

5. Complete the exit assessment during the final semester, no later than one month before graduation.

*Hours include courses that may fulfill university core requirements.

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes
- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

*GEOG 222 : Statistics for Geographers 1. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

2. Complete three regional courses from the following:

GEOG 245 : Geography of Utah. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

RECOMMENDED: Geog 101,120, 130.

DESCRIPTION: Exploring geography of Utah. Topics include land forms, climate, agricultural and recreational economics, historical migration, Mormon cultural landscape, ethnic patterns, and rural-urban contrasts.

Course Outcomes
There are no course outcomes available

GEOG 250 : United States and Canada. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

Course Outcomes
There are no course outcomes available

*GEOG 255 : Middle and South America. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Environmental, cultural, economic, and political parameters of Latin American societies.

Course Outcomes
- To link how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to the overall study of the Latin American realm.
- To gain a working knowledge of the connection of the underlying physical "stage" of Latin America to the distributions of people and their activities.
- To gain an understanding of the geographic structure of Latin America’s cultural components including languages, ethnic groups, settlement patterns, and religious beliefs.
- To develop geographic writing and research skills that result in papers that are fluent, relevant, and creative.
- To use other students' input to effectively enhance Latin American geographic understanding through group work and discussions
- To discover the significance of Latin America's increasing impact on the world's economy, as well as the growing Hispanization of the United States and the Church of Jesus Christ of Latter-day Saints

GEOG 260 : Europe. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Systematic approach to physical base, social and political problems, economic issues, and regional summary.

Course Outcomes
- To use other students input to effectively enhance European geographic understanding.

- To demonstrate the connection of the underlying physical "stage" of Europe to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To comprehend the regional geographic structure of Europe's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in Europe including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era. Emphasis will be given to the formation and spread of the European Union.
- To grasp how the "5 Themes of Geography" [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of the European realm.
- To write geographic research that is fluent, relevant, and creative.

*GEOG 265 : Russia and the Former Soviet Union. (3:3:0)

DESCRIPTION: Physical features, resources, political issues, economy and industries, population concerns, and role in world affairs.

Course Outcomes

- To use other students input to effectively enhance geographic understanding of the region.
- To comprehend the regional geographic structure of the region's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in the region including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era, including relationship to the European Union and other political entities.
- To grasp how the "5 Themes of Geography" [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of this region.
- To demonstrate the connection of the underlying physical "stage" of the region to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To write geographic research that is fluent, relevant, and creative.

*GEOG 271 : Middle East. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Physical and cultural geography of Southwest Asia and North Africa, emphasizing the cultural mosaic, geopolitics, environment, and resources of the region.

Course Outcomes
There are no course outcomes available

*GEOG 272 : East Asia. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Region of monsoon Asia and its basic human (demographics, nations and ethnic groups, settlement patterns, religious beliefs, transportation and communication systems, political structures), and physical geographic characteristics (land forms, physiography, climatic characteristics, and natural resources).

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 273 : Southeast Asia. (3:3.0:0)

WHEN TAUGHT: Fall Contact Department

DESCRIPTION: Fundamental issues of geography relating to Southeast Asia, including the extraction and marketing of natural resources, economic development, neighborly relations, and how diffusion has influenced the unique cultural, religious, and linguistic characteristics of the region.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 285 : Africa South of the Sahara. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Geographical analysis focusing on resource management, political issues, development, environmental problems, economic development, and urban-rural change; case studies from selected countries.

Course Outcomes
There are no course outcomes available

3. Complete three systematic courses from the following:

GEOG 303 : Biogeography. (3:3:0)

WHEN Fall

TAUGHT:
PREREQUISITE: Geog 101.
DESCRIPTION: Broad-scale distribution of plants and animals. Theoretical and practical applications to conservation and effects of global environmental change.

Course Outcomes
- Demonstrate an understanding of basic concepts and processes in biogeography
- Recognize and be able to explain patterns of plant and animal life at many different scales
- Explain how humans have affected the distribution and diversity of plants and animals, and apply concepts to decisions regarding human use of the environment
- Demonstrate a knowledge of prominent professional biogeographers and ecologists and their current research themes
- Plan for future changes in species distributions and diversity as a result of environmental and human-induced pressures

GEOG 304 : Geography of Climates. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: Geog 101.
DESCRIPTION: Elements, controls, distribution, and classification of the earth's climates.

Course Outcomes
- Gain an understanding of the key determinants of the world's main climates
- Gain an appreciation of the complex nature and implications of human climate change.
- Understand how extreme weather events occur and their potential impacts on humans.
- Understand the methods climatologists use to collect data about past and present climate.
- Improve writing, critical thinking and your ability to apply knowledge to solve geographic problems.

GEOG 305 : Geography of Landforms. (3:3:0)
WHEN TAUGHT: Fall Contact Department
RECOMMENDED: Geog 101.
DESCRIPTION: Elements of landforms: distributions and cultural significance.

Course Outcomes
- Examine the history of landform study and the key individuals in the history of geomorphology.
- Explain the physical processes that produce landforms.
- Examine a physical landscape and describe why it looks the way it does.
- Describe how human settlement and recreation patterns are influenced by landforms.
- Understand dating techniques geomorphologists use to understand earth's history.

GEOG 306 : Public Land Conservation. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

Course Outcomes
There are no course outcomes available

GEOG 331 : Economic Geography. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: Geog 100 or instructor's consent.
DESCRIPTION: Introduction to economic processes and spatial patterns, emphasizing theoretical approaches, locational strategies, and changing economic land-use patterns.

Course Outcomes
There are no course outcomes available

GEOG 336 : Urban Geography. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: History and theory of urban development, including why cities exist and how cities function.

Course Outcomes
There are no course outcomes available

GEOG 341 : Political Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Spatial analysis of global politics; focus on geopolitics, territory and conflict, nationalism, and the politics of resources.

Course Outcomes
There are no course outcomes available

GEOG 346 : Population Geography. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Spatial perspective on wide field of population studies, focusing on distribution, development, structure, and movement of populations, emphasizing basic demographic measures.

Course Outcomes
There are no course outcomes available

GEOG 348 : Tourism: Patterns and Analysis. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Patterns in domestic and international tourism; interrelationship between geography and tourism in understanding the patterns and their impact.

Course Outcomes
There are no course outcomes available

GEOG 349 : Global Adventure Travel. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Historical and emerging trends in global adventure travel and tourism. Detailed case studies selected from across world regions.

Course Outcomes
There are no course outcomes available

4. Complete the exit assessment during the final semester, no later than one month before graduation.

*Hours include courses that may fulfill university core requirements.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following geography core courses:

GEOG 100 : The Geographic Approach. (1:1:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Overview of the discipline of geography and the faculty and geography major at BYU.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 101 : Global Environment: Understanding Physical Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

Course Outcomes
There are no course outcomes available

*GEOG 110 : Landscapes of Disaster: An Introduction to Natural Hazards. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Exploring natural and social science of disturbances by analyzing causes, consequences, and role of human behavior in causing and mitigating natural disasters.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 120 : Geography and World Affairs. (3:3:0)
OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Survey of the world, stressing geography of major political regions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 130 : Introduction to Human Geography. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 211 : Map Use and Interpretation. (4:4:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Maps as tools for spatial analysis of problems in physical and cultural geography.

Course Outcomes
- Identify each component of the â Big Threeâ when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.
- Complete all typical map scale calculations related to land distance and area including unit conversions.

- Give and take coordinate references in UTM and lat / long and convert between the two. select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS
- Configure a GPS receiver properly to use both with and without a map. Lay-in and follow the course in a GPS receiver.
- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes
- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

*GEOG 222 : Statistics for Geographers 1. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 250 : United States and Canada. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

Course Outcomes
There are no course outcomes available

2. Complete one regional course from the following:

GEOG 245 : Geography of Utah. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

RECOMMENDED: Geog 101,120, 130.

DESCRIPTION: Exploring geography of Utah. Topics include land forms, climate, agricultural and recreational economics, historical migration, Mormon cultural landscape, ethnic patterns, and rural-urban contrasts.

Course Outcomes
There are no course outcomes available

*GEOG 255 : Middle and South America. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Environmental, cultural, economic, and political parameters of Latin American societies.

Course Outcomes
- To link how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to the overall study of the Latin American realm.
- To gain a working knowledge of the connection of the underlying physical "stage" of Latin America to the distributions of people and their activities.
- To gain an understanding of the geographic structure of Latin America’s cultural components including languages, ethnic groups, settlement patterns, and religious beliefs.
- To develop geographic writing and research skills that result in papers that are fluent, relevant, and creative.
- To use other students’ input to effectively enhance Latin American geographic understanding through group work and discussions
- To discover the significance of Latin America’s increasing impact on the world’s economy, as well as the growing Hispanization of the United States and the Church of Jesus Christ of Latter-day Saints

GEOG 260 : Europe. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Systematic approach to physical base, social and political problems, economic issues, and regional summary.

Course Outcomes
- To use other students input to effectively enhance European geographic understanding.

- To demonstrate the connection of the underlying physical "stage" of Europe to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To comprehend the regional geographic structure of Europe's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in Europe including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era. Emphasis will be given to the formation and spread of the European Union.
- To grasp how the "5 Themes of Geography" [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of the European realm.
- To write geographic research that is fluent, relevant, and creative.

*GEOG 265 : Russia and the Former Soviet Union. (3:3:0)

DESCRIPTION: Physical features, resources, political issues, economy and industries, population concerns, and role in world affairs.

Course Outcomes

- To use other students input to effectively enhance geographic understanding of the region.
- To comprehend the regional geographic structure of the region's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in the region including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era, including relationship to the European Union and other political entities.
- To grasp how the "5 Themes of Geography" [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of this region.
- To demonstrate the connection of the underlying physical "stage" of the region to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To write geographic research that is fluent, relevant, and creative.

*GEOG 271 : Middle East. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Physical and cultural geography of Southwest Asia and North Africa, emphasizing the cultural mosaic, geopolitics, environment, and resources of the region.

Course Outcomes
There are no course outcomes available

*GEOG 272 : East Asia. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Region of monsoon Asia and its basic human (demographics, nations and ethnic groups, settlement patterns, religious beliefs, transportation and communication systems, political structures), and physical geographic characteristics (land forms, physiography, climatic characteristics, and natural resources).

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 273 : Southeast Asia. (3:3.0:0)

WHEN TAUGHT: Fall Contact Department

DESCRIPTION: Fundamental issues of geography relating to Southeast Asia, including the extraction and marketing of natural resources, economic development, neighborly relations, and how diffusion has influenced the unique cultural, religious, and linguistic characteristics of the region.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 285 : Africa South of the Sahara. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Geographical analysis focusing on resource management, political issues, development, environmental problems, economic development, and urban-rural change; case studies from selected countries.

Course Outcomes
There are no course outcomes available

3. Complete the following major courses:

GEOG 347 : Tourism: A Conceptual Framework. (3:3:0)

WHEN Fall

TAUGHT:
DESCRIPTION: Introduction to tourism as a field of study; four elements of tourism: dynamic, service, functional, and consequential.

Course Outcomes
There are no course outcomes available

GEOG 348 : Tourism: Patterns and Analysis. (3:3:0)
WHEN TAUGHT: Winter
DESCRIPTION: Patterns in domestic and international tourism; interrelationship between geography and tourism in understanding the patterns and their impact.

Course Outcomes
There are no course outcomes available

4. Complete four advanced tourism courses from the following:

BUS M 241 : Marketing Management. (3:3:0)
OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Marketing's role in society and the firm, marketing opportunities, the consumer market, and management of marketing mix.

Course Outcomes
- Understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers.
- Describe how specific firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.
- Design a marketing plan for a new venture by applying the appropriate tools and approaches studied

GEOG 322 : Statistics for Geographers 2. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: GEOG 222
DESCRIPTION: Advanced techniques in geospatial analysis.

Course Outcomes
- To master an advanced set of quantitative methods that are particularly appropriate for geographers, becoming especially skilled in one statistical area.
- To determine what quantitative methods are appropriate for answering different research questions.
- To apply statistical analysis to geographic problems in a competent and worthwhile way
- To develop and carry out an excellent research project complete with collaborative work and a crisp oral and professional visual presentation.
- To understand and appreciate published academic geographic research that uses a variety of quantitative methods.

GEOG 349 : Global Adventure Travel. (3:3:0)
WHEN TAUGHT: Fall Odd Yrs.
DESCRIPTION: Historical and emerging trends in global adventure travel and tourism. Detailed case studies selected from across world regions.

Course Outcomes
There are no course outcomes available

GEOG 350 : Tourism Planning. (3:3:0)
WHEN TAUGHT: Contact Department.
RECOMMENDED: Geog 347.
DESCRIPTION: Applying regional development and planning concepts, principles, and approaches to tourism destinations to enhance sustainable economic, ecological, and social development.

Course Outcomes
There are no course outcomes available

GEOG 353 : Heritage and Cultural Tourism. (3:3:0)
WHEN TAUGHT: Winter
RECOMMENDED: Geog 120, 130, 347, 348.
DESCRIPTION: Heritage and culture (places, people, relics, and traditions) as tourism resources examined within the context of supply and demand, conservation, interpretation, management, planning, and politics.

Course Outcomes
There are no course outcomes available

GEOG 399R : Academic Internship. (.5-6:ARR:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: GEOG 100

DESCRIPTION: On-the-job experience.
NOTE: 3 hours required. No more than 3 hours total in cooperative education may be counted in major.

Course Outcomes
- Complete a supervised internship in an employment setting or agency related to geography.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

HIST 369 : Travel and Tourism in America. (3:3:0)
WHEN TAUGHT: Fall Odd Yrs.
DESCRIPTION: The history of travel and tourism in America to the present. Themes include changing technology, consumerism, nationalism, and social identities in contructing the tourist experience.

Course Outcomes
- Understand the theoretical approaches in the field, including concepts such as authenticity, tourist gaze, scripted space, leisure and modernity, and social science approaches to the study of tourism.
- Demonstrate knowledge of the major developments in travel and tourism infrastructure and explain the causal forces driving those changes.
- Explain how social identities of race, class, gender, and nationality have shaped the tourist experience.
- Assess primary sources for historical analysis of tourism and understand the limits and possibilities of each, including travel narratives, ephemera, still images, guides, memoirs, etc.
- Demonstrate historical change in tourism by researching and writing about a specific topic or approach to tourism in a paper that follows conventions of historical scholarship, and by presenting findings to the class.
- Appreciate global impact of tourism on the environment, international relations, and commerce.

RECM 300 : Creating a Good Life through Recreation. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Considering foundational recreation concepts and contemporary issues. Exploring professional opportunities in recreation.

Course Outcomes
There are no course outcomes available

RECM 330 : Hospitality Management. (3:3:0)
WHEN TAUGHT: Winter
DESCRIPTION: Introducing hospitality management; integrating with venue and experience management; considering foundational principles, best professional practices; exploring professional opportunities.

Course Outcomes
There are no course outcomes available

5. Complete the exit assessment during the final semester, no later than one month before graduation.

*Hours include courses that may fulfill university core requirements.

- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes

- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

*GEOG 222 : Statistics for Geographers 1. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

GEOG 322 : Statistics for Geographers 2. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: GEOG 222

DESCRIPTION: Advanced techniques in geospatial analysis.

Course Outcomes

- To master an advanced set of quantitative methods that are particularly appropriate for geographers, becoming especially skilled in one statistical area.
- To determine what quantitative methods are appropriate for answering different research questions.
- To apply statistical analysis to geographic problems in a competent and worthwhile way
- To develop and carry out an excellent research project complete with collaborative work and a crisp oral and professional visual presentation.
- To understand and appreciate published academic geographic research that uses a variety of quantitative methods.

2. Complete the following urban planning core courses:

GEOG 310 : Introduction to Urban and Regional Planning. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Introduction to the profession and practice of urban and regional planning.

Course Outcomes

There are no course outcomes available

GEOG 336 : Urban Geography. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: History and theory of urban development, including why cities exist and how cities function.

Course Outcomes

There are no course outcomes available

GEOG 410 : Urban Planning Methods. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310.

DESCRIPTION: Applications of methods and techniques commonly used in the urban planning process, emphasizing data collection and analysis, fieldwork, and writing skills.

Course Outcomes

There are no course outcomes available

GEOG 421 : Urban Planning Law. (2-3:Arr:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 310.

DESCRIPTION: The political and legal context within which urban planning takes place.

Course Outcomes
There are no course outcomes available

GEOG 422 : Principles of Urban Design. (2:2:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 310.

DESCRIPTION: Theories and principles of urban design emphasizing specific design criteria. Planning and design tools used within the U.S. by local government. Basic principles of architecture and landscape architecture. Field trips.

Course Outcomes
- Demonstrate knowledge of the design arts (architecture, landscape architecture, art, urban design) including knowledge about the relationship between the design of the built environment and its functional, aesthetic and social precedents and consequences.
- Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations.

GEOG 424 : Urban Transportation Planning. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310, 410.

DESCRIPTION: Theories and principles of transportation planning emphasizing environmental, energy, economic, and social issues.

Course Outcomes
There are no course outcomes available

GEOG 510 : Professional Planning Studio. (3:3:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 410.

DESCRIPTION: Assessing problem and issue identification, goal formulation, data gathering, synthesis and summary, plan concept and format, and public policy adoption while writing a general plan for a community in Utah.

Course Outcomes
- Use problem solving skills to select, diagnose and solve relevant aspects of a complex planning problem including attention to the needs and interests of diverse stakeholders and the guidance provided by conceptual and empirical expertise. (PAB 4.2.3a)Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations. (PAB 4.2.3c)Collaborate with peers in joint learning activities organized to produce a plan or planning product for a relevant professional clientele, to mediate disagreements, to interpret contested purposes, and to negotiate between diverse and competing interests. (PAB 4.2.3e)Use ideas about the creation of plans, programs or projects to prepare an individually crafted product for a specific planning purpose and audience; demonstrating skill and judgment preparing a planning project that meets minimum professional standards. (PAB 4.2.3f)Use techniques for the adoption and implementation of plans including relevant regulations, incentives, techniques and technologies. (PAB 4.2.3h)Work with diverse communities, especially communities consisting of disadvantaged groups and persons and racial and ethnic minorities, or immigrant communities. (PAB 4.2.3i)

3. Complete three elective courses from the following list, at least one of which must be Geog 306, 307, or 423:

GEOG 306 : Public Land Conservation. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

Course Outcomes
There are no course outcomes available

GEOG 307 : Landscape Ecology. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

RECOMMENDED: Geog 212, 213.

DESCRIPTION: Interaction between spatial patterns and spatial processes in an ecological context. Methods, theories, and practical applications of landscapes at various scales.

Course Outcomes
- Demonstrate an understanding of the basic concepts of landscape ecology
- Understand the relation between pattern and process in landscapes across multiple spatial and temporal scales
- Read, understand, and critique research articles in scholarly journals related to landscape ecology
- Understand and be able to use landscape metrics and associated methodologies and technologies to quantitatively analyze landscapes
- Identify and address a research question in landscape ecology, and effectively communicate the results orally and in writing
- Apply landscape ecology concepts to environmental planning and conservation biology

GEOG 313 : Remote Sensing 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 213
DESCRIPTION: Introduction to airborne and spaceborne sensors, including characteristics and image acquisition. Emphasizes land cover mapping applications appropriate for environment monitoring.

Course Outcomes
There are no course outcomes available

GEOG 346 : Population Geography. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: Geog 100 or instructor's consent.
DESCRIPTION: Spatial perspective on wide field of population studies, focusing on distribution, development, structure, and movement of populations, emphasizing basic demographic measures.

Course Outcomes
There are no course outcomes available

GEOG 412 : Problem Solving with Geographic Information Systems. (3:3:1)
WHEN TAUGHT: Fall Contact Department
PREREQUISITE: GEOG 212
RECOMMENDED: Geog 222.
DESCRIPTION: Solving practical geographic problems and performing scientific research using raster and vector analysis tools in GIS.

Course Outcomes
There are no course outcomes available

GEOG 414 : Applied Urban Environmental Modeling. (3:3:0)
WHEN TAUGHT: Winter Contact Department
RECOMMENDED: Geog 212, 213, 313.
DESCRIPTION: Complexities of urban environment through use of geographic techniques, including remote sensing, GIS, GPS, aerial photo and map interpretation, and fieldwork. Modeling human impact on the physical environment by examining local case studies and completing group projects. Developing and building technical skills as tools in understanding the urban environment.

Course Outcomes
There are no course outcomes available

GEOG 423 : Planning for Unique and Sensitive Lands. (2:2:0)
WHEN TAUGHT: Winter
RECOMMENDED: Geog 310.
DESCRIPTION: Unique aspects of land affecting land-use planning positively or negatively depending on sensitivity of design. Landscape ecological principles introduced and examined for usefulness in land-use planning.

Course Outcomes
- Explain the environmental sciences (biology, ecology, environmental studies) including knowledge about ecological and physical systems in relation to human activity at different geographic scales.

4. Complete one professonal experience course (three hours required) from the following:

GEOG 399R : Academic Internship. (.5-6:ARR:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: GEOG 100
DESCRIPTION: On-the-job experience.
NOTE: 3 hours required. No more than 3 hours total in cooperative education may be counted in major.

Course Outcomes
- Complete a supervised internship in an employment setting or agency related to geography.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

GEOG 495R : Mentored Research. (1-3:Arr.:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Participating in research integrating material learned in major. Emphasizes individual or collaborative research and creative thinking through active learning and reflective analysis.

Course Outcomes
- Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

5. Complete the exit assessment during the final semester, no later than one month before graduation.

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete the following:

GEOG 211 : Map Use and Interpretation. (4:4:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Maps as tools for spatial analysis of problems in physical and cultural geography.

Course Outcomes

- Identify each component of the â Big Threeâ when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.
- Complete all typical map scale calculations related to land distance and area including unit conversions.
- Give and take coordinate references in UTM and lat / long and convert between the two. select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS
- Configure a GPS receiver properly to use both with and without a map. Lay-in and follow the course in a GPS receiver.
- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes

- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

GEOG 312 : Cartographic Design. (4:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 211 & GEOG 212

DESCRIPTION: Graphic perception, layout, typography, color, statistical methods, and symbolization of thematic maps through computer-aided techniques.

Course Outcomes

- Develop a map-based solution to a need, focusing on purpose and audience.
- Gather and process data needed for a map.
- Design maps to be clear, useful, and attractive, employing appropriate techniques such as thematic map types, composition, symbology, color, and text.
- Continue to learn design skills through map critique and self-training
- Appreciate quality work and put forth the effort necessary to produce quality results

GEOG 412 : Problem Solving with Geographic Information Systems. (3:3:1)

WHEN TAUGHT: Fall Contact Department

PREREQUISITE: GEOG 212

RECOMMENDED: Geog 222.

DESCRIPTION: Solving practical geographic problems and performing scientific research using raster and vector analysis tools in GIS.

Course Outcomes

There are no course outcomes available

2. Complete three courses from the following:

GEOG 213 : Earth Observation and Image Interpretation. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles of earth observation: primarily air photo/large-scale satellite imagery interpretation, basic field methods, photogrammetry.

Course Outcomes

- Students will be able to perform a simple cultural / physical interpretation of simple monoscopic imagery.
- Students will be able to complete simple measurements from historical air photos including height, distance, area, scale, and coordinate-related problems.
- Students wil be able to complete simple problems related to electromagnetic radiation and atmospheric effects.

GEOG 217 : Programming for Geographers. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Object-oriented analysis of geographic information using Visual Basic.

Course Outcomes

There are no course outcomes available

GEOG 313 : Remote Sensing 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 213

DESCRIPTION: Introduction to airborne and spaceborne sensors, including characteristics and image acquisition. Emphasizes land cover mapping applications appropriate for environment monitoring.

Course Outcomes

There are no course outcomes available

GEOG 411 : Issues in Computer Cartography. (3:3:0)

WHEN TAUGHT: Winter Contact Department

PREREQUISITE: GEOG 312

DESCRIPTION: Current techniques for compilation, integration, and display of digital map data.

Course Outcomes

There are no course outcomes available

GEOG 413 : Remote Sensing 2. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: GEOG 313

DESCRIPTION: Computer processing of low-altitude and satellite images for geographic analysis of physical and cultural phenomena on earth.

Course Outcomes

- Understand and implement remote sensing pre-processing techniques.
- Perform image classification and evaluate classification accuracy.
- Understand and perform change detection.
- Complete an entire remote sensing project from beginning to end.

Minor in Geography Teaching (19 hours*)

Show All Course Descriptions
Hide All Course Descriptions

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following:

GEOG 101 : Global Environment: Understanding Physical Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

Course Outcomes
There are no course outcomes available

*GEOG 120 : Geography and World Affairs. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Survey of the world, stressing geography of major political regions.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

*GEOG 130 : Introduction to Human Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 211 : Map Use and Interpretation. (4:4:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Maps as tools for spatial analysis of problems in physical and cultural geography.

Course Outcomes

- Identify each component of the â Big Threeâ when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.
- Complete all typical map scale calculations related to land distance and area including unit conversions.
- Give and take coordinate references in UTM and lat / long and convert between the two. select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS
- Configure a GPS receiver properly to use both with and without a map. Lay-in and follow the course in a GPS receiver.
- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 250 : United States and Canada. (3:3:0)

WHEN Fall Contact Department; Winter Contact Department

TAUGHT:
DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

Course Outcomes
There are no course outcomes available

3. Complete 3 hours of electives. Electives cannot include Geog 222*, 399R, 493R, or any Geog 500 or above courses.

*Hours include courses that may fulfill university core requirements.

1. Complete the following:

*GEOG 120 : Geography and World Affairs. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Survey of the world, stressing geography of major political regions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 347 : Tourism: A Conceptual Framework. (3:3:0)

WHEN TAUGHT: Fall
DESCRIPTION: Introduction to tourism as a field of study; four elements of tourism: dynamic, service, functional, and consequential.

Course Outcomes
There are no course outcomes available

GEOG 348 : Tourism: Patterns and Analysis. (3:3:0)

WHEN TAUGHT: Winter
DESCRIPTION: Patterns in domestic and international tourism; interrelationship between geography and tourism in understanding the patterns and their impact.

Course Outcomes
There are no course outcomes available

2. Complete two courses from the following:

BUS M 241 : Marketing Management. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Marketing's role in society and the firm, marketing opportunities, the consumer market, and management of marketing mix.

Course Outcomes
- Understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers.
- Describe how specific firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.
- Design a marketing plan for a new venture by applying the appropriate tools and approaches studied

*GEOG 130 : Introduction to Human Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

HIST 369 : Travel and Tourism in America. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: The history of travel and tourism in America to the present. Themes include changing technology, consumerism, nationalism, and social identities in contructing the tourist experience.

Course Outcomes
- Understand the theoretical approaches in the field, including concepts such as authenticity, tourist gaze, scripted space, leisure and modernity, and social science approaches to the study of tourism.
- Demonstrate knowledge of the major developments in travel and tourism infrastructure and explain the causal forces driving those changes.
- Explain how social identities of race, class, gender, and nationality have shaped the tourist experience.
- Assess primary sources for historical analysis of tourism and understand the limits and possibilities of each, including travel narratives, ephemera, still images, guides, memoirs, etc.
- Demonstrate historical change in tourism by researching and writing about a specific topic or approach to tourism in a paper that follows conventions of historical scholarship, and by presenting findings to the class.
- Appreciate global impact of tourism on the environment, international relations, and commerce.

RECM 404 : Principles of Recreation Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ACC 200 & BUS M 201 & BUS M 241; or ACC 200 & FIN 201 & BUS M 241

DESCRIPTION: Overview of theories, philosophies, and rationale for recreation, experience, and venue management.

NOTE: If you are taking this course to satisfy the Nonprofit Management minor requirement, you do not need to have the prerequisites completed.

Course Outcomes
There are no course outcomes available

RECM 425 : Advanced Event and Experience Management. (3:3:1)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: RECM 404 & RECM 420 & RECM 430

DESCRIPTION: Advanced understanding and application of event and experience management principles; designing, planning, implementing and evaluating a special event.

Course Outcomes
There are no course outcomes available

3. Complete one regional course from the following:

GEOG 245 : Geography of Utah. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

RECOMMENDED: Geog 101,120, 130.

DESCRIPTION: Exploring geography of Utah. Topics include land forms, climate, agricultural and recreational economics, historical migration, Mormon cultural landscape, ethnic patterns, and rural-urban contrasts.

Course Outcomes
There are no course outcomes available

GEOG 250 : United States and Canada. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

Course Outcomes
There are no course outcomes available

GEOG 255 : Middle and South America. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Environmental, cultural, economic, and political parameters of Latin American societies.

Course Outcomes
- To link how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to the overall study of the Latin American realm.
- To gain a working knowledge of the connection of the underlying physical "stage" of Latin America to the distributions of people and their activities.
- To gain an understanding of the geographic structure of Latin America’s cultural components including languages, ethnic groups, settlement patterns, and religious beliefs.
- To develop geographic writing and research skills that result in papers that are fluent, relevant, and creative.
- To use other students’ input to effectively enhance Latin American geographic understanding through group work and discussions
- To discover the significance of Latin America's increasing impact on the world's economy, as well as the growing Hispanization of the United States and the Church of Jesus Christ of Latter-day Saints

GEOG 260 : Europe. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Systematic approach to physical base, social and political problems, economic issues, and regional summary.

Course Outcomes
- To use other students input to effectively enhance European geographic understanding.
- To demonstrate the connection of the underlying physical "stage" of Europe to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To comprehend the regional geographic structure of Europe's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in Europe including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era. Emphasis will be given to the formation and spread of the European Union.
- To grasp how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of the European realm.
- To write geographic research that is fluent, relevant, and creative.

GEOG 265 : Russia and the Former Soviet Union. (3:3:0)

DESCRIPTION: Physical features, resources, political issues, economy and industries, population concerns, and role in world affairs.

Course Outcomes
- To use other students input to effectively enhance geographic understanding of the region.
- To comprehend the regional geographic structure of the region's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in the region including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era, including relationship to the European Union and other political entities.
- To grasp how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of this region.
- To demonstrate the connection of the underlying physical "stage" of the region to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To write geographic research that is fluent, relevant, and creative.

*GEOG 271 : Middle East. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Physical and cultural geography of Southwest Asia and North Africa, emphasizing the cultural mosaic, geopolitics, environment, and resources of the region.

Course Outcomes
There are no course outcomes available

GEOG 272 : East Asia. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Region of monsoon Asia and its basic human (demographics, nations and ethnic groups, settlement patterns, religious beliefs, transportation and communication systems, political structures), and physical geographic characteristics (land forms, physiography, climatic characteristics, and natural resources).

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 285 : Africa South of the Sahara. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Geographical analysis focusing on resource management, political issues, development, environmental problems, economic development, and urban-rural change; case studies from selected countries.

Course Outcomes
There are no course outcomes available

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete the following core planning courses:

GEOG 310 : Introduction to Urban and Regional Planning. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Introduction to the profession and practice of urban and regional planning.

Course Outcomes
There are no course outcomes available

GEOG 336 : Urban Geography. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: History and theory of urban development, including why cities exist and how cities function.

Course Outcomes
There are no course outcomes available

GEOG 410 : Urban Planning Methods. (3:3:0)
WHEN TAUGHT: Winter
RECOMMENDED: Geog 310.
DESCRIPTION: Applications of methods and techniques commonly used in the urban planning process, emphasizing data collection and analysis, fieldwork, and writing skills.

Course Outcomes
There are no course outcomes available

GEOG 421 : Urban Planning Law. (2-3:Arr:0)
WHEN TAUGHT: Fall
RECOMMENDED: Geog 310.
DESCRIPTION: The political and legal context within which urban planning takes place.

Course Outcomes
There are no course outcomes available

2. Complete two of the following planning elective courses:

GEOG 306 : Public Land Conservation. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

Course Outcomes
There are no course outcomes available

GEOG 422 : Principles of Urban Design. (2:2:0)
WHEN TAUGHT: Fall
RECOMMENDED: Geog 310.
DESCRIPTION: Theories and principles of urban design emphasizing specific design criteria. Planning and design tools used within the U.S. by local government. Basic principles of architecture and landscape architecture. Field trips.

Course Outcomes
- Demonstrate knowledge of the design arts (architecture, landscape architecture, art, urban design) including knowledge about the relationship between the design of the built environment and its functional, aesthetic and social precedents and consequences.

Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations.

GEOG 424 : Urban Transportation Planning. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310, 410.

DESCRIPTION: Theories and principles of transportation planning emphasizing environmental, energy, economic, and social issues.

Course Outcomes

There are no course outcomes available

GEOG 510 : Professional Planning Studio. (3:3:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 410.

DESCRIPTION: Assessing problem and issue identification, goal formulation, data gathering, synthesis and summary, plan concept and format, and public policy adoption while writing a general plan for a community in Utah.

Course Outcomes

- Use problem solving skills to select, diagnose and solve relevant aspects of a complex planning problem including attention to the needs and interests of diverse stakeholders and the guidance provided by conceptual and empirical expertise. (PAB 4.2.3a)Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations. (PAB 4.2.3c)Collaborate with peers in joint learning activities organized to produce a plan or planning product for a relevant professional clientele, to mediate disagreements, to interpret contested purposes, and to negotiate between diverse and competing interests. (PAB 4.2.3e)Use ideas about the creation of plans, programs or projects to prepare an individually crafted product for a specific planning purpose and audience; demonstrating skill and judgment preparing a planning project that meets minimum professional standards. (PAB 4.2.3f)Use techniques for the adoption and implementation of plans including relevant regulations, incentives, techniques and technologies. (PAB 4.2.3h)Work with diverse communities, especially communities consisting of disadvantaged groups and persons and racial and ethnic minorities, or immigrant communities. (PAB 4.2.3i)

Undergraduate Courses

100-Level Courses

GEOG 100 : The Geographic Approach. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of the discipline of geography and the faculty and geography major at BYU.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 101 : Global Environment: Understanding Physical Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

Course Outcomes
There are no course outcomes available

GEOG 110 : Landscapes of Disaster: An Introduction to Natural Hazards. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Exploring natural and social science of disturbances by analyzing causes, consequences, and role of human behavior in causing and mitigating natural disasters.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 120 : Geography and World Affairs. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Survey of the world, stressing geography of major political regions.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 130 : Introduction to Human Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

200-Level Courses

GEOG 211 : Map Use and Interpretation. (4:4:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Maps as tools for spatial analysis of problems in physical and cultural geography.

Course Outcomes

- Identify each component of the â Big Threeâ when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.

- Complete all typical map scale calculations related to land distance and area including unit conversions.
- Give and take coordinate references in UTM and lat / long and convert between the two. select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS
- Configure a GPS receiver properly to use both with and without a map. Lay-in and follow the course in a GPS receiver.
- Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps. Perform a simple statistical analysis of data on a USGS topographic map.
- When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes
- Understand basic spatial concepts and data models that form the foundation of GIS.
- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

GEOG 213 : Earth Observation and Image Interpretation. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles of earth observation: primarily air photo/large-scale satellite imagery interpretation, basic field methods, photogrammetry.

Course Outcomes
- Students will be able to perform a simple cultural / physical interpretation of simple monoscopic imagery.
- Students will be able to complete simple measurements from historical air photos including height, distance, area, scale, and coordinate-related problems.
- Students wil be able to complete simple problems related to electromagnetic radiation and atmospheric effects.

GEOG 217 : Programming for Geographers. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Object-oriented analysis of geographic information using Visual Basic.

Course Outcomes
There are no course outcomes available

GEOG 222 : Statistics for Geographers 1. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 245 : Geography of Utah. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

RECOMMENDED: Geog 101,120, 130.

DESCRIPTION: Exploring geography of Utah. Topics include land forms, climate, agricultural and recreational economics, historical migration, Mormon cultural landscape, ethnic patterns, and rural-urban contrasts.

Course Outcomes
There are no course outcomes available

GEOG 250 : United States and Canada. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

Course Outcomes
There are no course outcomes available

GEOG 255 : Middle and South America. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Environmental, cultural, economic, and political parameters of Latin American societies.

Course Outcomes
- To link how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to the overall study of the Latin American realm.
- To gain a working knowledge of the connection of the underlying physical "stage" of Latin America to the distributions of people and their activities.

- To gain an understanding of the geographic structure of Latin America's cultural components including languages, ethnic groups, settlement patterns, and religious beliefs.
- To develop geographic writing and research skills that result in papers that are fluent, relevant, and creative.
- To use other students' input to effectively enhance Latin American geographic understanding through group work and discussions
- To discover the significance of Latin America's increasing impact on the world's economy, as well as the growing Hispanization of the United States and the Church of Jesus Christ of Latter-day Saints

GEOG 260 : Europe. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Systematic approach to physical base, social and political problems, economic issues, and regional summary.

Course Outcomes

- To use other students input to effectively enhance European geographic understanding.
- To demonstrate the connection of the underlying physical "stage" of Europe to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To comprehend the regional geographic structure of Europe's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in Europe including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era. Emphasis will be given to the formation and spread of the European Union.
- To grasp how the "5 Themes of Geography" [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of the European realm.
- To write geographic research that is fluent, relevant, and creative.

GEOG 265 : Russia and the Former Soviet Union. (3:3:0)

DESCRIPTION: Physical features, resources, political issues, economy and industries, population concerns, and role in world affairs.

Course Outcomes

- To use other students input to effectively enhance geographic understanding of the region.
- To comprehend the regional geographic structure of the region's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in the region including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era, including relationship to the European Union and other political entities.
- To grasp how the "5 Themes of Geography" [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of this region.
- To demonstrate the connection of the underlying physical "stage" of the region to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To write geographic research that is fluent, relevant, and creative.

GEOG 271 : Middle East. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Physical and cultural geography of Southwest Asia and North Africa, emphasizing the cultural mosaic, geopolitics, environment, and resources of the region.

Course Outcomes

There are no course outcomes available

GEOG 272 : East Asia. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Region of monsoon Asia and its basic human (demographics, nations and ethnic groups, settlement patterns, religious beliefs, transportation and communication systems, political structures), and physical geographic characteristics (land forms, physiography, climatic characteristics, and natural resources).

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

GEOG 273 : Southeast Asia. (3:3.0:0)

WHEN TAUGHT: Fall Contact Department

DESCRIPTION: Fundamental issues of geography relating to Southeast Asia, including the extraction and marketing of natural resources, economic development, neighborly relations, and how diffusion has influenced the unique cultural, religious, and linguistic characteristics of the region.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

GEOG 285 : Africa South of the Sahara. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Geographical analysis focusing on resource management, political issues, development, environmental problems, economic development, and urban-rural change; case studies from selected countries.

Course Outcomes
There are no course outcomes available

300-Level Courses

GEOG 303 : Biogeography. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Geog 101.

DESCRIPTION: Broad-scale distribution of plants and animals. Theoretical and practical applications to conservation and effects of global environmental change.

Course Outcomes
- Demonstrate an understanding of basic concepts and processes in biogeography
- Recognize and be able to explain patterns of plant and animal life at many different scales
- Explain how humans have affected the distribution and diversity of plants and animals, and apply concepts to decisions regarding human use of the environment
- Demonstrate a knowledge of prominent professional biogeographers and ecologists and their current research themes
- Plan for future changes in species distributions and diversity as a result of environmental and human-induced pressures

GEOG 304 : Geography of Climates. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

DESCRIPTION: Elements, controls, distribution, and classification of the earth's climates.

Course Outcomes
- Gain an understanding of the key determinants of the world's main climates
- Gain an appreciation of the complex nature and implications of human climate change.
- Understand how extreme weather events occur and their potential impacts on humans.
- Understand the methods climatologists use to collect data about past and present climate.
- Improve writing, critical thinking and your ability to apply knowledge to solve geographic problems.

GEOG 305 : Geography of Landforms. (3:3:0)

WHEN TAUGHT: Fall Contact Department

RECOMMENDED: Geog 101.

DESCRIPTION: Elements of landforms: distributions and cultural significance.

Course Outcomes
- Examine the history of landform study and the key individuals in the history of geomorphology.
- Explain the physical processes that produce landforms.
- Examine a physical landscape and describe why it looks the way it does.
- Describe how human settlement and recreation patterns are influenced by landforms.
- Understand dating techniques geomorphologists use to understand earth's history.

GEOG 306 : Public Land Conservation. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

Course Outcomes
There are no course outcomes available

GEOG 307 : Landscape Ecology. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

RECOMMENDED: Geog 212, 213.

DESCRIPTION: Interaction between spatial patterns and spatial processes in an ecological context. Methods, theories, and practical applications of landscapes at various scales.

Course Outcomes
- Demonstrate an understanding of the basic concepts of landscape ecology
- Understand the relation between pattern and process in landscapes across multiple spatial and temporal scales
- Read, understand, and critique research articles in scholarly journals related to landscape ecology
- Understand and be able to use landscape metrics and associated methodologies and technologies to quantitatively analyze landscapes
- Identify and address a research question in landscape ecology, and effectively communicate the results orally and in writing
- Apply landscape ecology concepts to environmental planning and conservation biology

GEOG 310 : Introduction to Urban and Regional Planning. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Introduction to the profession and practice of urban and regional planning.

Course Outcomes

There are no course outcomes available

GEOG 311 : Geographic Data Management. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: GEOG 212

DESCRIPTION: Nature of geographic information and its practical management in GIS; design of GIS databases, data collection from primary and secondary sources, manipulating data in preparation for analysis, and data exploration.

Course Outcomes

- Understand the fundamental concepts of geographic information, and use those concepts to explain the core data models and procedures of GIS.
- Create new databases to fulfill a specific GIS need, selecting the appropriate data model (e.g., vector or raster) and data storage strategy (e.g., shapefiles, geodatabases), and designing the necessary layers and attribute tables.
- Obtain existing GIS data that is appropriate for a given need, and transform existing data sets to fit into an enterprise GIS, using tools such as format conversion and reprojection.
- Create new GIS data sets using appropriate source materials and technologies, such as CAD, surveying, GPS, and remote sensing.
- Learn new concepts and technologies as needed to solve novel GIS management problems, with minimal supervision, using a variety of information resources.

GEOG 312 : Cartographic Design. (4:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 211 & GEOG 212

DESCRIPTION: Graphic perception, layout, typography, color, statistical methods, and symbolization of thematic maps through computer-aided techniques.

Course Outcomes

- Develop a map-based solution to a need, focusing on purpose and audience.
- Gather and process data needed for a map.
- Design maps to be clear, useful, and attractive, employing appropriate techniques such as thematic map types, composition, symbology, color, and text.
- Continue to learn design skills through map critique and self-training
- Appreciate quality work and put forth the effort necessary to produce quality results

GEOG 313 : Remote Sensing 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GEOG 213

DESCRIPTION: Introduction to airborne and spaceborne sensors, including characteristics and image acquisition. Emphasizes land cover mapping applications appropriate for environment monitoring.

Course Outcomes

There are no course outcomes available

GEOG 317 : Analytical Cartography. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: GEOG 217

DESCRIPTION: Geocoding, spatial data representation, spatial algorithms, and map based transformations.

Course Outcomes

- Students will be able to express simple data structures and algorithms in computer code. These data structures and algorithms will be illustrative of either raster or vector GIS.
- When given a simple geographic problem specification, students will be able to create computer methods and classes that address the problem or meet the specification.
- When presented with a problem amenable to the application of geographic computer programming (intermediate level difficulty), students will design and implement a software system including computer program(s) to solve the problem.

GEOG 322 : Statistics for Geographers 2. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: GEOG 222

DESCRIPTION: Advanced techniques in geospatial analysis.

Course Outcomes

- To master an advanced set of quantitative methods that are particularly appropriate for geographers, becoming especially skilled in one statistical area.
- To determine what quantitative methods are appropriate for answering different research questions.
- To apply statistical analysis to geographic problems in a competent and worthwhile way
- To develop and carry out an excellent research project complete with collaborative work and a crisp oral and professional visual presentation.
- To understand and appreciate published academic geographic research that uses a variety of quantitative methods.

GEOG 331 : Economic Geography. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Introduction to economic processes and spatial patterns, emphasizing theoretical approaches, locational strategies, and changing economic land-use patterns.

Course Outcomes
There are no course outcomes available

GEOG 336 : Urban Geography. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: History and theory of urban development, including why cities exist and how cities function.

Course Outcomes
There are no course outcomes available

GEOG 341 : Political Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Spatial analysis of global politics; focus on geopolitics, territory and conflict, nationalism, and the politics of resources.

Course Outcomes
There are no course outcomes available

GEOG 346 : Population Geography. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Spatial perspective on wide field of population studies, focusing on distribution, development, structure, and movement of populations, emphasizing basic demographic measures.

Course Outcomes
There are no course outcomes available

GEOG 347 : Tourism: A Conceptual Framework. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Introduction to tourism as a field of study; four elements of tourism: dynamic, service, functional, and consequential.

Course Outcomes
There are no course outcomes available

GEOG 348 : Tourism: Patterns and Analysis. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Patterns in domestic and international tourism; interrelationship between geography and tourism in understanding the patterns and their impact.

Course Outcomes
There are no course outcomes available

GEOG 349 : Global Adventure Travel. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Historical and emerging trends in global adventure travel and tourism. Detailed case studies selected from across world regions.

Course Outcomes
There are no course outcomes available

GEOG 350 : Tourism Planning. (3:3:0)

WHEN TAUGHT: Contact Department.

RECOMMENDED: Geog 347.

DESCRIPTION: Applying regional development and planning concepts, principles, and approaches to tourism destinations to enhance sustainable economic, ecological, and social development.

Course Outcomes
There are no course outcomes available

GEOG 353 : Heritage and Cultural Tourism. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 120, 130, 347, 348.

DESCRIPTION: Heritage and culture (places, people, relics, and traditions) as tourism resources examined within the context of supply and demand, conservation, interpretation, management, planning, and politics.

Course Outcomes
There are no course outcomes available

GEOG 399R : Academic Internship. (.5-6:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: GEOG 100

DESCRIPTION: On-the-job experience.

NOTE: 3 hours required. No more than 3 hours total in cooperative education may be counted in major.

Course Outcomes

- Complete a supervised internship in an employment setting or agency related to geography.Link academic learning with these professional experiences.Complete a minimum of 45 hands-on hours per credit.

400-Level Courses

GEOG 410 : Urban Planning Methods. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310.

DESCRIPTION: Applications of methods and techniques commonly used in the urban planning process, emphasizing data collection and analysis, fieldwork, and writing skills.

Course Outcomes

There are no course outcomes available

GEOG 411 : Issues in Computer Cartography. (3:3:0)

WHEN TAUGHT: Winter Contact Department

PREREQUISITE: GEOG 312

DESCRIPTION: Current techniques for compilation, integration, and display of digital map data.

Course Outcomes

There are no course outcomes available

GEOG 412 : Problem Solving with Geographic Information Systems. (3:3:1)

WHEN TAUGHT: Fall Contact Department

PREREQUISITE: GEOG 212

RECOMMENDED: Geog 222.

DESCRIPTION: Solving practical geographic problems and performing scientific research using raster and vector analysis tools in GIS.

Course Outcomes

There are no course outcomes available

GEOG 413 : Remote Sensing 2. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: GEOG 313

DESCRIPTION: Computer processing of low-altitude and satellite images for geographic analysis of physical and cultural phenomena on earth.

Course Outcomes

- Understand and implement remote sensing pre-processing techniques.
- Perform image classification and evaluate classification accuracy.
- Understand and perform change detection.
- Complete an entire remote sensing project from beginning to end.

GEOG 414 : Applied Urban Environmental Modeling. (3:3:0)

WHEN TAUGHT: Winter Contact Department

RECOMMENDED: Geog 212, 213, 313.

DESCRIPTION: Complexities of urban environment through use of geographic techniques, including remote sensing, GIS, GPS, aerial photo and map interpretation, and fieldwork. Modeling human impact on the physical environment by examining local case studies and completing group projects. Developing and building technical skills as tools in understanding the urban environment.

Course Outcomes

There are no course outcomes available

GEOG 415R : Geographic Field Methods. (1-3:Arr:0)

WHEN TAUGHT: Spring Contact Department; Summer Contact Department

PREREQUISITE: GEOG 101

DESCRIPTION: Learning different methods used by geographers in the field through hands-on involvement in real faculty research.

Course Outcomes

There are no course outcomes available

GEOG 421 : Urban Planning Law. (2-3:Arr:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 310.

DESCRIPTION: The political and legal context within which urban planning takes place.

Course Outcomes
There are no course outcomes available

GEOG 422 : Principles of Urban Design. (2:2:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 310.

DESCRIPTION: Theories and principles of urban design emphasizing specific design criteria. Planning and design tools used within the U.S. by local government. Basic principles of architecture and landscape architecture. Field trips.

Course Outcomes
- Demonstrate knowledge of the design arts (architecture, landscape architecture, art, urban design) including knowledge about the relationship between the design of the built environment and its functional, aesthetic and social precedents and consequences.
- Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations.

GEOG 423 : Planning for Unique and Sensitive Lands. (2:2:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310.

DESCRIPTION: Unique aspects of land affecting land-use planning positively or negatively depending on sensitivity of design. Landscape ecological principles introduced and examined for usefulness in land-use planning.

Course Outcomes
- Explain the environmental sciences (biology, ecology, environmental studies) including knowledge about ecological and physical systems in relation to human activity at different geographic scales.

GEOG 424 : Urban Transportation Planning. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: Geog 310, 410.

DESCRIPTION: Theories and principles of transportation planning emphasizing environmental, energy, economic, and social issues.

Course Outcomes
There are no course outcomes available

GEOG 441 : Seminar in Geography and Geospatial Intelligence 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Instructor's consent.

DESCRIPTION: Capstone seminar, part 1, for students in geospatial intelligence emphasis, emphasizing synthesis of material learned in major and application of knowledge and skills through research project.

Course Outcomes
- Demonstrate to the student the unending need for Intelligence in a time of endless warfare. Discuss the propriety and honor in being involved in efforts to preserve freedom.
- Demonstrate the encompassing relationship of geography to war, and thus to Intelligence.
- Identify the types of war.
- Survey the types of Intelligence, Imint, Sigint, and Humint.
- Investigate the proper Ethics of an Intelligence Officer.
- Demonstrate the need for All-Source Intelligence.
- Develop skills in oral presentation, including slide design, speaking, and awareness of personal appearance. Develop skills in writing pithy reports in the style used in the intelligence community.

GEOG 442 : Seminar in Geography and Geospatial Intelligence 2. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: GEOG 441

DESCRIPTION: Capstone seminar part 2 for students in geospatial intelligence emphasis, emphasizing synthesis of material learned in major and application of knowledge and skills through research project.

Course Outcomes
- Demonstrate the political processes and attitudes that led to diminished US Intelligence capability in 2001.
- Study the enemy of today's war, and learn to stay abreast of current events and predict future events in other regions of the world.
- Investigate other regional potential (low current day conflict) political/wars for Intelligencestudy and awareness.
- All students will participate as Team Members in completeing major research projects in timely and vital National security issues.

GEOG 493R : Special Problems. (.5-3:ARR:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Geography major or departmental approval.

Course Outcomes
- Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in geography.

GEOG 495R : Mentored Research. (1-3:Arr.:0)

WHEN Fall; Winter; Spring; Summer

TAUGHT:

DESCRIPTION: Participating in research integrating material learned in major. Emphasizes individual or collaborative research and creative thinking through active learning and reflective analysis.

Course Outcomes

- Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

500-Level Graduate Courses (available to advanced undergraduates)

GEOG 501R : Seminar in Geography. (.5-3:ARR:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Detailed investigation of selected systematic and regional geographic topics.

Course Outcomes

No outcomes are available at this time.

GEOG 503 : Geographic Information Systems. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring Contact Department

PREREQUISITE: Graduate standing.

DESCRIPTION: Using geographic information for solving advanced spatial problems. Introduction to using and producing maps and computer-based geographic information systems (GIS) as geographic tools. Hands-on research applications in the students' disciplines.

NOTE: For nonmajors who have not taken Geog 211 or 212 or equivalent.

Course Outcomes

There are no course outcomes available

GEOG 510 : Professional Planning Studio. (3:3:0)

WHEN TAUGHT: Fall

RECOMMENDED: Geog 410.

DESCRIPTION: Assessing problem and issue identification, goal formulation, data gathering, synthesis and summary, plan concept and format, and public policy adoption while writing a general plan for a community in Utah.

Course Outcomes

- Use problem solving skills to select, diagnose and solve relevant aspects of a complex planning problem including attention to the needs and interests of diverse stakeholders and the guidance provided by conceptual and empirical expertise. (PAB 4.2.3a)Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations. (PAB 4.2.3c)Collaborate with peers in joint learning activities organized to produce a plan or planning product for a relevant professional clientele, to mediate disagreements, to interpret contested purposes, and to negotiate between diverse and competing interests. (PAB 4.2.3e)Use ideas about the creation of plans, programs or projects to prepare an individually crafted product for a specific planning purpose and audience; demonstrating skill and judgment preparing a planning project that meets minimum professional standards. (PAB 4.2.3f)Use techniques for the adoption and implementation of plans including relevant regulations, incentives, techniques and technologies. (PAB 4.2.3h)Work with diverse communities, especially communities consisting of disadvantaged groups and persons and racial and ethnic minorities, or immigrant communities. (PAB 4.2.3i)

GEOG 521R : Geographic Information Practicum. (3:3:0)

WHEN TAUGHT: Fall, Contact Department; Winter, Contact Department; Spring Contact Department

PREREQUISITE: GEOG 212 & GEOG 217

RECOMMENDED: Geog 222, 311, 312, 313, 317, 412.

DESCRIPTION: Integration of various geographic technologies to solve a practical problem. Advanced topics in GIS, remote sensing, cartography, and programming as needed.

Course Outcomes

- Students will learn integration of various geographic technologies to solve a practical problem using advanced topics in GIS, remote sensing, cartography, and programming as needed.

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

Admission to Degree Program

All degree programs in the Department of History are open enrollment. However, special limitations apply for teaching majors.

The Discipline

History stands at the heart of a liberal arts bridge between the humanities and social sciences. Historical understanding is thus basic to the life of an educated human being. As such, it is the ideal major for the student who wants the broad educational background for entrance into professions such as law, government service, or business, or who wants a liberal arts education. History can also be valuable training for someone who plans to teach.

Career Opportunities

In recognition of the broad range of uses to which historical education can be put, the field of public history has emerged in recent years. Today people whom others would consider bankers, lawyers, corporate executives, or public servants view themselves as historians—public historians. They are the people with analytical skills provided by their historical education who work outside the university but who consider themselves historians by virtue of the value of the training they have received. A significant percentage of the jobs listed by firms and agencies with BYU's Employment Office specify no major. Many of these will be taken by public historians anxious to serve their employers with the valuable skills learned in their history major.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BA in Family History-Genealogy (Program Outcomes)
BA in History (Program Outcomes)
BA in History Teaching (Program Outcomes)
BS in Teaching Social Science (composite teaching major) (Program Outcomes)

Minor in Family History-Genealogy
Minor in History
Minor in History Teaching
Minor in Native American Studies

Certificate in Family History-Genealogy

Students should see their college advisement center for help or information concerning the undergraduate programs.

Program Requirements | View MAP | View Program Outcomes

1. Complete one course from the following in fulfillment of the university core First-Year Writing requirement:

WRTG 150 : Writing and Rhetoric. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
NOTE: Fulfills General Education First-Year Writing requirement.

Course Outcomes
- Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.
- Critically read texts. This includesanalyzing how a text functions in a specific situation, community, or public;analyzing the nuances of language (diction, figures of speech, tone, etc.);identifying and evaluating the elements of an argument—claims, reasons, assumptions, and ethical, emotional, and logical appeals.
- Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.
- Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.
- Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

PHIL 150 : Reasoning and Writing. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Recommended for philosophy majors and minors.
DESCRIPTION: Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.
NOTE: Fulfills GE First-Year Writing requirement. No course challenges accepted.

Course Outcomes
There are no course outcomes available

Note: Waivers based on Advanced Placement (AP) or other test scores do not apply to this requirement. Students with AP credit for Engl 115 should take Wrtg 150 or Phil 150.

2. Complete one course from the following in fulfillment of the university core Languages of Learning requirement:

HONRS 250 : Math Modeling--Toward a Personal Understanding of the World. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Developing skills in arriving at quantitative models for the world as we see it. Some math skills reviewed and some new ones introduced.

Course Outcomes
There are no course outcomes available

PHIL 305 : Intermediate Formal Logic. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: PHIL 205
DESCRIPTION: History and use of first-order logic and second-order logic; natural-deduction and axiomatic proofs; modal logic; set theory and foundations of mathematics.
NOTE: Fulfills GE Languages of Learning requirement.

Course Outcomes
- Master first order logic including the correct use of symbols and the construction of proofs.
- Learn to construct proofs within axiom systems in such areas as identity, set theory, arithmetic, and

modal logic.
- Understand key historical developments such as Cantor's theory of transfinite numbers, Frege's attempt to reduce arithmetic to logic, the logical paradoxes, and Gödel's theorems.

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: MATH 110 or equivalent.
DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes
- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

An approved culminating foreign language course.

Note: These courses, and their prerequisites, impart linguistic or quantitative skills advantageous to historical research.

3. Complete the following in fulfillment of the university core Civilization 1 and 2 requirements:

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.
- Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.
- Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).
- Improve the clarity and grace of analytical writing.

- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

4. Complete the following (may be used as partial fulfillment of the university core doctrinal foundation and religion requirement):

REL C 261 : Introduction to Family History (Genealogy). (2:2:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Introduction to the doctrinal significance, necessary skills, and available resources dealing with family history and genealogy.

Course Outcomes
There are no course outcomes available

REL C 293R : Specialized Studies in Family History (Genealogy). (1:1.0:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Using documents from specific regional and organizational sources to identify ancestors and submit their names for temple ordinances.

Course Outcomes
No outcomes are available at this time.

: LDS Family History.

Course Outcomes

: United States and Canada Family History.

Course Outcomes

: British Family History.

Course Outcomes

: Scandinavian Family History.

Course Outcomes

: Native American Family History.

Course Outcomes

: French and Italian Family History.

Course Outcomes

: Latin American, Spanish, and Portuguese Family History.

Course Outcomes

: Slavic Family History.

Course Outcomes

: Germanic Family History.

Course Outcomes

5. Complete the following:

HIST 200 : The Historian's Craft. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: History within the broader framework of liberal education; nature of history; questions historians ask; skills and resources needed to study, understand, and write history.
NOTE: Required of all history majors.

Course Outcomes
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources.
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

HIST 217 : The Family Historian's Craft. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Introduction to genealogical methods applicable in American and international research. Discussion of technology in genealogical research and introduction to censuses and vital records

(US and international).

Course Outcomes
There are no course outcomes available

HIST 220 : The United States Through 1877. (3:3:0)
OFFERED: Independent study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 317 : The Family and the Law in American History. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: HIST 217
DESCRIPTION: The interaction of families with law and government as illustrated in original American sources; individual family histories reconstructed in the broader perspective of history.

Course Outcomes
There are no course outcomes available

Note: Hist 200, 217, and 317 should be completed no later than the sophomore year or in the first semester/term after the major is declared. Majors should consult with the family history coordinator soon after declaring. Hist 200 and 490 combined satisfy the university core Advanced Written and Oral Communications requirement.

6. Complete one course from the following:
HIST 280 : Northern US Family, Local, and Social History Research Since 1790. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of invididual families and development of family history studies in the northern states, including New England, the Midwest, and some Mid-Atlantic states in the 19th and 20th centuries.

Course Outcomes
There are no course outcomes available

HIST 281 : Southern US Family, Local, and Social History Research Since 1790. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: HIST 217
DESCRIPTION: 19th and 20th century records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in the southern states.

Course Outcomes
There are no course outcomes available

HIST 282 : Colonial US Family, Local and Social History Research. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in colonial American studies.

Course Outcomes
There are no course outcomes available

7. Complete three courses from the following:
HIST 280 : Northern US Family, Local, and Social History Research Since 1790. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of invididual families and development of family history studies in the northern states, including New England, the Midwest, and some Mid-Atlantic states in the 19th and 20th centuries.

Course Outcomes
There are no course outcomes available

HIST 281 : Southern US Family, Local, and Social History Research Since 1790. (3:3:0)
WHEN TAUGHT: Winter

TAUGHT:
PREREQUISITE: HIST 217
DESCRIPTION: 19th and 20th century records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in the southern states.

Course Outcomes
There are no course outcomes available

HIST 282 : Colonial US Family, Local and Social History Research. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in colonial American studies.

Course Outcomes
There are no course outcomes available

HIST 350 : British Family, Local and Social History Research. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methods for reconstruction of individual families and development of demographic and family history studies in England, Scotland, and Wales.

Course Outcomes
- Students will be able to explain and use fundamental genealogical (and some historical) resources and methodologies for English and Welsh research since 1700
- Students will evaluate, analyze, and corroborate genealogical information from both original and compiled sources. Students will know and use established citation standards.
- Students will explain how various pieces of information are combined in order to trace the same individual over various records and across the lifespan
- Students demonstrate how evidence is used to prove the links between generations

HIST 351 : Germanic Family, Local, and Social History Research. (3:3:0)
WHEN TAUGHT: Winter Odd Yrs.
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Germanic areas of Europe.

Course Outcomes
There are no course outcomes available

HIST 352 : Scandinavian Family, Local, and Social History Research. (3:3:0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Denmark, Norway, Iceland, Sweden, and/or Finland.

Course Outcomes
There are no course outcomes available

HIST 353 : Southern European and Latin American Family, Local, and Social History Research. (3:3:0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: HIST 217
DESCRIPTION: Records, geo-historical background, paleography, and methods for reconstruction of individual families; development of demographic and family history studies which may include Portugal, Spain, France, and Italy and their colonies in the Americas.

Course Outcomes
There are no course outcomes available

HIST 354 : Slavic Family, Local, and Social History Research. (3:3:0)
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families; development of family history studies in Slavic areas of Europe.

Course Outcomes
- Students will be able to describe the key content of major family history sources in Slavic research.
- Students will become somewhat proficient at reading old Slavic documents.
- Students will become acquainted with actually using family history primary and secondary sources, on film or otherwise available, at the world's largest genealogical repository, the Family History Library in Salt Lake City

HIST 390R : Special Topics in History. (.5-3:Arr:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

Course Outcomes
There are no course outcomes available

: Family History Research.

Course Outcomes

: Family History Research in Ireland. (.5-3:Arr:Arr)

Course Outcomes

: Family History Research in the Netherlands.

Course Outcomes

: Advanced Southern European Family History Research.

Course Outcomes

: Advanced British Family History Research.

Course Outcomes

: Native American Family History Research. (.5-3:Arr:Arr)

Course Outcomes

(Family History section only.)

HIST 396 : Historical Narrative: A Writing Workshop. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

RECOMMENDED: Hist 200, 220, 221.

DESCRIPTION: Workshop in writing narrative history, emphasizing the problems of writing historical narrative. Theories and examples of narrative history.

Course Outcomes
- Students will demonstrate an understanding of the genres of historical writing and their historiography
- Students will be able to critically evaluate primary and secondary sources
- Students will be able to write historical narratives in several different genres
- Students will be able to identify and critically respond to arguments of historical monographs, articles, and primary sources

HIST 434 : Computers in Family Historical Research and Publication. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Use of computer programs and the internet in researching family, local, and social history; including programs and techniques for publishing.

Course Outcomes
- Students will be able to stay current on newly published historical materials by using RSS feeds and Google Alerts to notify them of changes in websites, podcasts, weblogs, etc.
- Students will be able to communicate the findings of their historical research and demonstrate a high level of analytical skill through the use of a variety of computerized and online resources.
- Students will be able to locate and use primary source material online, as it continues to be made more available.
- Students will be able to design and use basic, custom relational databases for historical research and analysis.

Note: Hist 280, 281, or 282 may be used to fulfill this requirement only if not fulfilling requirement 6.

8. Complete one course from the following:

HIST 420 : Latin Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Interpretation of handwriting within historical contexts in Latin ecclesiastical and notarial documents useful in family, local, and social history research, including church registers, notarial settlements of estates, probate records, and inventories; medieval to modern periods.

Course Outcomes
- Students will learn the most common Latin scripts
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 421 : English Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Interpretation of handwriting within historical contexts in vernacular scripts in the British Isles, sixteenth through eighteenth centuries, in sources useful in family, local, and social history research.

Course Outcomes
- Students will learn the most common scripts (hands) and documents in use in Britain and its colonies between 1500 and 1850.
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 422 : Germanic Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the German kingdoms, sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to: 1. Use various types of German reference and research tools 2. Recognize different types of German written and printed documents 3. Understand important historical and cultural aspects of Germany 4. Know the procedures for resolving difficult genealogical and historical research problems

HIST 423 : Slavic Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Slavic language areas of Eastern Europe, sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
There are no course outcomes available

HIST 424 : Romance Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Romance languages of Europe (especially Spanish, French, and Italian), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to read with fluency documents in italic style handwriting;
- Students will be able to recognize and use documents and understand the legal, ecclesiastical and civil systems behind them;
- Students will be able to understand basic concepts of paleography and the impacts of language on the historical development of handwriting
- Students will be able to develop familiarity with secretary (cortesana or procesal) handwriting

HIST 425 : Scandinavian Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of old Gothic script handwriting in Scandinavian areas of Europe (including Denmark, Norway, Sweden, Finland, and Iceland), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to read at a basic level, old gothic-script Norwegian, Danish, Swedish and Finnish documents, from the 1600s on up.
- Students will be able to use Scandinavian conversion calendars, to convert Latin feast dates to regular Julian calendar dates.
- Students will be able to read, at a basic level for content from Scandinavian printed documents. of the 1700s and 1800s.

9. Complete the following:

HIST 439 : Seminar on Professional Family History Research. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: HIST 217

DESCRIPTION: Practicum in professional client research exploring advanced genealogical methodologies.

Course Outcomes
- Students will learn the key methods of family history research in US sources, to solve difficult research problems from the 1700s and 1800s.
- Students will learn, on an advanced level, to analyze sources and read between the lines, to reconstitute complete families from records of the 1700s and 1800s in US sources.
- Students will be able to write and/or compile a variety of research reports for clients, namely, analytical, crossing the pond, bibliographic, and the like, for persons who (in theory) hire them to conduct research on an ancestral family or families.

HIST 496R : Academic Internship: Family, Local, and Social History. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Work-study involving family, local, and/or social history at one or more archives, libraries, publishers, data providers, or research organizations on the international, national, state, or local level, under supervision of a professional genealogist, historian, archivist, or librarian.

Course Outcomes
There are no course outcomes available

10. Complete one course from the following list of social and cultural history courses. Seek faculty advice in choosing electives:

HIST 244 : Jewish History: A.D. 70 to the Present. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Jewish diaspora, Jewish life in Moslem and Christian countries; Jewish religious movements; development of Zionism; Jewish communities in modern Israel and the United States.

Course Outcomes
- Gain a historical consciousness by demonstrating an understanding of major developments in Jewish and history, and understand key historical terms and theories.
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately and distinguish between questionable and valid historical assertions.
- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using interdisciplinary prinary and secondary sources.
- Skillfully integrate sources into a coherent argument expressed through a clear, well-written style and throrough oral communication.
- Recognize anti-Semitic arguments.
- Gain an understanding of the complexities of modern Jewish identity.
- Appreciate the contribution of Jewish people to the world.

HIST 290 : Nature and History: The Earth's Environmental Past. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Human historical interactions with animals, plants, and landscapes. Global histories of climate, population, whaling, fossil fuels, the car, animal rights, suburban sprawl, eco-theology, environmentalism, ecotourism, etc.

Course Outcomes
- Students will become academically conversant with the major historical developments in our global relationship with nature.
- Students will be able to analyze and evaluate the content and meaning of primary sources, and through critical interpretation, draw reasonable conclusions.
- Students will be able to formulate historical questions and answer them by careful and systematic research in primary and secondary sources.
- Students will be able to write history that is coherent and persuasive by following discipline's norms for writing and careful documentation.

HIST 318 : European Women's History. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

RECOMMENDED: Hist 200.

DESCRIPTION: European women and gender from 1400 to the present.

Course Outcomes
- Students will be able to understand and explain major trends in European women's experiences and history since 1400
- Students will be able to analyze and synthesize historiographyof women's history, gender history, and feminism
- Students will read, analyze, and write about primary and secondary sources and explain their connections to one another
- Students will interpret important shifts or trends in the experience of women and attitudes about gender. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends
- Working in tandem with each other students will have opportunities to question, investigate, and interrogate contemporary attitudes to women and men's history and gender and how these affect interpretations of the past.

HIST 319 : The Family in Europe. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Nature and development of marriage and family life and structure from the ancient to modern era.

NOTE: Independent Study also.

Course Outcomes
- Students will be able to understand and explain major trends in European family life, relationships, and law between 1100 and the present
- Students will be able to analyze and synthesize historiography of family history
- Students will read, analyze, and write about primary and secondary sources and explain their connections to one another.
- Students will interpret important shifts or trends in the experience of family functions and relationships and their connections with the law. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends.
- Working in tandem with each other students will have opportunities to question, investigate, and interrogate historical experiences and historiographic interpretations

HIST 320 : Society in Europe. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Common life in Europe from 1500 to the present: family problems, social customs, marriage,

superstition, death, diet, work, hardships, migration, and childhood.

Course Outcomes
- Students will be able to explain and analyze themes and trends in European social history in both the early modern and modern periods.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to analyze and interpret secondary source documents
- Students will be able to interpret and debate the meanings and historical value of primary and secondary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 358 : Gender and History in Latin America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: How gender roles have been defined legally, socially, and culturally in Latin America from the colonial period to the present, emphasizing the nineteenth and twentieth centuries.

Course Outcomes
- To understand how gender relations and gender roles developed in Latin America from colonial times to the present.
- To be able to discuss and explain those developments through the written and spoken word with clarity, persuasiveness, and proper use of evidence.
- To write a well written, organized, and developed term paper using the critical thinking and writing skills of a historian.
- To be able to read primary sources and discuss their utility in constructing historical arguments.

HIST 378 : American Family History. (3:3:0)

DESCRIPTION: History of American families from colonial period to the present.

Course Outcomes
- Students will be able to explain and analyze the major intellectual, economic, religious, social, cultural, and political developments affecting changes in American families of various races, classes, and regions from 1607 to the present.
- Students will be able to analyze an important historical question in the history of American families
- Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.
- Students will be able to isolate the theses and supporting arguments of secondary sources on the history of American families.

HIST 379 : U.S. Religious History to 1860. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Religious developments from colonial times to 1860.

Course Outcomes
There are no course outcomes available

HIST 380 : U.S. Religious History Since 1860. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Examines religious people, institutions, beliefs, and practices in U.S. history since the Civil War.

Course Outcomes
There are no course outcomes available

HIST 384 : United States Women's History. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Survey course of women's experience in American culture and society from the Puritans to the present.

Course Outcomes
- Students will be able to explain and analyze the experiences of women in America from the colonial period to the present, the ways that ideas about gender have shaped American life, and significant issues and debates in U.S. Women's history.
- Students will be able to analyze, interpret, and evaluate primary sources.
- Students will be able to interpret and debate the meanings and historical value of primary sources with their peers.
- Students will be able to analyze and create historical questions and place them in a historiographical context.
- Students will demonstrate proficiency in using historical methods of research and in integrating data into a coherent argument expressed through a clear, well-written style.
- Students will be able to apply their understanding of American women's history to current issues and events.

11. Complete one course from list of history courses that (1) does not appear above and (2) relates to your selected geographical area of emphasis. Seek faculty advice in choosing electives.

12. Complete the following capstone course:

HIST 490 : Capstone Research Seminar. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: HIST 200

DESCRIPTION: Research seminar; critical, analytical, and writing skills in preparation of a senior thesis.
NOTE: Required of all history majors.

Course Outcomes

- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid assertions;
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Note: It is recommended that students select the section designated for family history majors only; offered annually.

*Hours include courses that may fulfill university core requirements.

Program Requirements | View MAP | View Program Outcomes

1. The History Department requires a minimum of 24 hours of history credit to be taken in residency at BYU's Provo campus for this degree program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Complete one of the following courses in fulfillment of the university core First-Year Writing requirement:

   WRTG 150 : Writing and Rhetoric. (3:3:0)

   OFFERED: Honors also.
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
   NOTE: Fulfills General Education First-Year Writing requirement.

   Course Outcomes
   - Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.
   - Critically read texts. This includesanalyzing how a text functions in a specific situation, community, or public;analyzing the nuances of language (diction, figures of speech, tone, etc.);identifying and evaluating the elements of an argument—claims, reasons, assumptions, and ethical, emotional, and logical appeals.
   - Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.
   - Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.
   - Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

   PHIL 150 : Reasoning and Writing. (3:3:0)

   OFFERED: Honors also.
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   RECOMMENDED: Recommended for philosophy majors and minors.
   DESCRIPTION: Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.
   NOTE: Fulfills GE First-Year Writing requirement. No course challenges accepted.

   Course Outcomes
   There are no course outcomes available

   Note: Waivers based on Advanced Placement (AP) or other test scores do not apply to this requirement. Students with AP credit for Engl 115 should take Wrtg 150 or Phil 150.

3. Complete one course from the following in fulfillment of the university core Languages of Learning requirement:

   HONRS 250 : Math Modeling--Toward a Personal Understanding of the World. (3:3:0)

   WHEN TAUGHT: Fall; Winter
   DESCRIPTION: Developing skills in arriving at quantitative models for the world as we see it. Some math skills reviewed and some new ones introduced.

   Course Outcomes
   There are no course outcomes available

   PHIL 305 : Intermediate Formal Logic. (3:3:0)

   WHEN TAUGHT: Fall; Winter
   PREREQUISITE: PHIL 205
   DESCRIPTION: History and use of first-order logic and second-order logic; natural-deduction and axiomatic proofs; modal logic; set theory and foundations of mathematics.

NOTE: Fulfills GE Languages of Learning requirement.

Course Outcomes
- Master first order logic including the correct use of symbols and the construction of proofs.
- Learn to construct proofs within axiom systems in such areas as identity, set theory, arithmetic, and modal logic.
- Understand key historical developments such as Cantor's theory of transfinite numbers, Frege's attempt to reduce arithmetic to logic, the logical paradoxes, and Gödel's theorems.

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

RECOMMENDED: MATH 110 or equivalent.

DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes
- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

An approved culminating foreign language course.

Note: These courses, and their prerequisites, impart linguistic or quantitative skills advantageous to historical research.

4. Complete the following:

HIST 200 : The Historian's Craft. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: History within the broader framework of liberal education; nature of history; questions historians ask; skills and resources needed to study, understand, and write history.

NOTE: Required of all history majors.

Course Outcomes
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources.
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Note: For majors Hist 200 should be completed prior to elective courses. It must be completed no later than the sophomore year or in the first semester/term after the major is declared. Hist 200 and 490 combined satisfy the university core Advanced Written and Oral Communications requirement.

5. Complete the following core courses:

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.

- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.
- Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.
- Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

HIST 220 : The United States Through 1877. (3:3:0)

OFFERED: Independent study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 221 : The United States Since 1877. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Industrialization, immigration, urbanization, political and social movements, and foreign policy.

Course Outcomes
There are no course outcomes available

Note: Majors must complete all four core courses in history at the college level. University core Civilization courses (201/202) offered by other departments are not equivalent. Advanced Placement U.S. history courses are not equivalent.

6. Complete seven electives (21 total hours) from the approved list. Seek faculty advice in choosing electives. Students must not present all their preparation in a single region. Complete three electives (9 hours) by taking at least one course in three of the following areas of study: Asia, Europe, Latin America, Near East, United States, Africa, or the world. (Course regions are identified on the approved list.) Majors are urged to focus their remaining four electives on a single theme, region, or period.

Note: No more than 6 combined hours of 199R, 495R, and 498R will count toward elective credit.

7. Complete the following capstone course:

HIST 490 : Capstone Research Seminar. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: HIST 200
DESCRIPTION: Research seminar; critical, analytical, and writing skills in preparation of a senior thesis.
NOTE: Required of all history majors.

Course Outcomes

- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid assertions;
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Recommended

REL C 261 : Introduction to Family History (Genealogy). (2:2:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Introduction to the doctrinal significance, necessary skills, and available resources dealing with family history and genealogy.

Course Outcomes
There are no course outcomes available

Majors are strongly encouraged to minor in a field that further enhances their preparation for employment or graduate school. Consult with faculty.

*Hours include courses that may fulfill university core requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements | View MAP | View Program Outcomes

1. The History Department requires a minimum of 18 hours of history credit to be taken in residency at BYU's Provo campus for this degree program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

3. Complete one of the following courses in fulfillment of the university core First-Year Writing requirement:

   WRTG 150 : Writing and Rhetoric. (3:3:0)

   OFFERED: Honors also.
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
   NOTE: Fulfills General Education First-Year Writing requirement.

   Course Outcomes
   - Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.
   - Critically read texts. This includesanalyzing how a text functions in a specific situation, community, or public;analyzing the nuances of language (diction, figures of speech, tone, etc.);identifying and evaluating the elements of an argument—claims, reasons, assumptions, and ethical, emotional, and logical appeals.
   - Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.
   - Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.
   - Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

   PHIL 150 : Reasoning and Writing. (3:3:0)

   OFFERED: Honors also.
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   RECOMMENDED: Recommended for philosophy majors and minors.
   DESCRIPTION: Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.
   NOTE: Fulfills GE First-Year Writing requirement. No course challenges accepted.

   Course Outcomes
   There are no course outcomes available

   Note: Waivers based on Advanced Placement (AP) or other test scores do not apply to this requirement. Students with AP credit for Engl 115 should take Wrtg 150 or Phil 150.

4. Complete one course from the following in fulfillment of the university core Languages of Learning requirement:

   HONRS 250 : Math Modeling--Toward a Personal Understanding of the World. (3:3:0)

   WHEN TAUGHT: Fall; Winter
   DESCRIPTION: Developing skills in arriving at quantitative models for the world as we see it. Some math skills reviewed and some new ones introduced.

   Course Outcomes
   There are no course outcomes available

PHIL 305 : Intermediate Formal Logic. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PHIL 205

DESCRIPTION: History and use of first-order logic and second-order logic; natural-deduction and axiomatic proofs; modal logic; set theory and foundations of mathematics.

NOTE: Fulfills GE Languages of Learning requirement.

Course Outcomes

- Master first order logic including the correct use of symbols and the construction of proofs.
- Learn to construct proofs within axiom systems in such areas as identity, set theory, arithmetic, and modal logic.
- Understand key historical developments such as Cantor's theory of transfinite numbers, Frege's attempt to reduce arithmetic to logic, the logical paradoxes, and Gödel's theorems.

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

RECOMMENDED: MATH 110 or equivalent.

DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes

- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

An approved culminating foreign language course.

Note: These courses, and their prerequisites, impart linguistic or quantitative skills advantageous to historical research.

5. Complete the following:

HIST 200 : The Historian's Craft. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: History within the broader framework of liberal education; nature of history; questions historians ask; skills and resources needed to study, understand, and write history.

NOTE: Required of all history majors.

Course Outcomes

- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources.
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Note: For majors Hist 200 should be taken prior to elective courses. It must be completed no later than the sophomore year or in the first semester/term after the major is declared. Hist 200 and 490 combined satisfy the university core Advanced Written and Oral Communications requirement.

6. Complete the following core courses:

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes

- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and

through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.

- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

HIST 220 : The United States Through 1877. (3:3:0)

OFFERED: Independent study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 221 : The United States Since 1877. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Industrialization, immigration, urbanization, political and social movements, and foreign policy.

Course Outcomes
There are no course outcomes available

Note: Majors must complete all four core courses in history at the college level. University core Civilization courses (201/202) offered by other departments are not equivalent. Advanced Placement U.S. history courses are not equivalent.

7. Complete the following:

HIST 364 : Utah. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Contributions of Native Americans, explorers, mountain men, miners, government officials, Mormons, and other groups in the nineteenth century. Impact of national movements, various peoples, politics, economics, and social and cultural change in the twentieth century.

Course Outcomes
There are no course outcomes available

8. Complete four electives (12 total hours) from the approved list. Seek faculty advice in choosing electives. Students must not present all their preparation in a single region. Complete no more than two electives (6 hours) in each of the following areas of study: Asia, Europe, Latin America, Near East, United States, Africa, or the world. (Course regions are identified on the approved list.)

Note: No more than 6 combined hours of 199R, 495R, and 498R will count toward elective credit.

9. Complete the following capstone course:
   HIST 490 : Capstone Research Seminar. (3:3:0)
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   PREREQUISITE: HIST 200
   DESCRIPTION: Research seminar; critical, analytical, and writing skills in preparation of a senior thesis.
   NOTE: Required of all history majors.

   Course Outcomes
   - Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources
   - Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid assertions;
   - Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

10. A teaching minor is strongly recommended.

11. Complete the Professional Education Component:
    - Complete the following:
      CPSE 402 : Educating Students with Disabilities in Secondary Classrooms. (2:2:0)
      WHEN TAUGHT: Fall; Winter; Spring
      PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or comparable major course; FBI fingerprint background clearance.
      DESCRIPTION: Issues, policies, and methods in teaching secondary students with disabilities in general education classrooms. Lab.

      Course Outcomes
      - Demonstrate sensitivity to individuals with disabilities.
      - Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
      - Describe the steps in the Individual Education Program (IEP) process, including Individualized Transition Plans for students aged 14-22.
      - Use research-supported methods for academic instruction of individuals with disabilities including explicit instruction, learning strategies, task analysis, and active participation.
      - Describe models and strategies of consultation and collaboration including co-planning and co-teaching.
      - Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act (IDEA).
      - Develop a personal philosophy of special education which includes an understanding of the implications of Least Restrictive Environment as defined in IDEA.
      - Demonstrate knowledge of basic classroom management theories and an understanding of teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs.
      - Describe the characteristics and educational implications of students with high and low incidence disabilities
      - Demonstrate ability to identify and prioritize areas of the general curriculum and provide accommodations for individuals with exceptional learning needs

      HIST 477 : History Teaching Methods and Instruction. (3:3:0)
      WHEN TAUGHT: Fall; Winter
      PREREQUISITE: Sc Ed 276R; Fingerprinting and FBI clearance; major-specific program requirements.
      DESCRIPTION: Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

      Course Outcomes
      - Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning.
      - Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.
      - Students will consider variuos methods of assessing student learning.
      - Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
      - Students will consider various types of resources including texts, technology, primary source documents and litertaure that they might use to teach social studies to students with diverse backgrounds and learning styles.
      - Students will coordinate and reflect on clinical experiences.

      HIST 478 : Practicum in Secondary Education. (1:0:3)
      WHEN TAUGHT: Fall; Winter
      PREREQUISITE: Sc Ed 276R; Concurrent enrollment in Hist 477 or comparable major course.
      DESCRIPTION: Implementing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

      Course Outcomes
      - Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning
      - Students will study and apply research-supported teaching methods that foster students' content

knowledge, content and literacy skills, and learning and democratic dispositions.
- Students will consider various methods of assessing student learning.
- They will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- The course will provide a forum to coordinate and reflect on the prospective teachers' clinical experiences.

IP&T 286 : Instructional Technology in Teaching. (1:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

Course Outcomes
There are no course outcomes available

SC ED 276R : Exploration of Teaching. (3-4:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Major-area preadmission requirements; FBI fingerprint and background clearance.

DESCRIPTION: Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Course Outcomes
No outcomes are available at this time.

SC ED 350 : Adolescent Development in an Education Context. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Adolescent development and its implications for integrated school culture, curriculum design, instructional practices, and assessment.

Course Outcomes
- The students will demonstrate how the stages of development impact instructional practices.
- The students will understand the social, physical, and cognitive developmental stages of adolescence in relation to the tasks of automony, identity and intimacy.
- The students will demonstrate how the stages of development impact classroom environments and management.

SC ED 353 : Multicultural Education. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Designing and adapting instruction for diverse learners; collaborating with families, cultures, and communities in promoting and sustaining learning.

Course Outcomes
- Students will examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavio through a process of reflection.
- Acknowledge the dynamics of culture and diversity in school success and teachers' teaching. This includes recognizing and overcoming deficit thinking.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.
- Recognize and acknowledge racism, discrimination and other forms of inquity and privilege in themselves, in others, and within institutions.
- Recognize and use a personal moral spiritual framework along with principles and concepts of social science to guide educational accomplishments for diverse learners.

SC ED 379 : Classroom Management. (1:1:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Concurrent enrollment in Sc Ed 377R and 378, or equivalent major courses; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Current theory, research, and application in classroom management; creating positive teacher-student and peer relationships; developing optimal learning environments.

Course Outcomes
- The student will create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.
- The student will plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.
- The student will be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

Note: FBI fingerprinting and background clearance must be completed prior to enrollment in Sc Ed 276R.

- Complete 12 hours of one of the following:

SC ED 476R : Secondary Student-Teaching. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes
- Students will put into practice the theories they have learned in content and pedagogy courses including planning lessons, assessing students of all abilities and cultural backgrounds, using a variety of instructional strategies, and collaborating with other teachers and with the community.

: Secondary Student Teaching - Art.

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following:

GEOG 120 : Geography and World Affairs. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Survey of the world, stressing geography of major political regions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

3. Complete the following:

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.
- Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between

them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.
- Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

HIST 220 : The United States Through 1877. (3:3:0)

OFFERED: Independent study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 221 : The United States Since 1877. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Industrialization, immigration, urbanization, political and social movements, and foreign policy.

Course Outcomes
There are no course outcomes available

Note: Majors must complete all four courses in history at the college level. Advanced placement (AP) U.S. history courses are not equivalent.

4. Complete the following:

HIST 364 : Utah. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Contributions of Native Americans, explorers, mountain men, miners, government officials, Mormons, and other groups in the nineteenth century. Impact of national movements, various peoples, politics, economics, and social and cultural change in the twentieth century.

Course Outcomes
There are no course outcomes available

(must be completed before Sc Ed 476R/496R).

5. Complete one course from 300-level or above history courses.

6. Complete one course from the following:

GEOG 101 : Global Environment: Understanding Physical Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

Course Outcomes
There are no course outcomes available

GEOG 130 : Introduction to Human Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Culture distributions and their relationship to existing geographic phenomena.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

GEOG 212 : Introduction to Geographic Information Systems. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

Course Outcomes
- Understand basic spatial concepts and data models that form the foundation of GIS.

- Acquire geospatial data from common sources and manipuate them for a specific application.
- Analyze data using GIS to solve real world problems.
- Describe several applications in which GIS is used to solve geographic problems.
- Design and use maps to explore and communicate geospatial information.

GEOG 245 : Geography of Utah. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

RECOMMENDED: Geog 101,120, 130.

DESCRIPTION: Exploring geography of Utah. Topics include land forms, climate, agricultural and recreational economics, historical migration, Mormon cultural landscape, ethnic patterns, and rural-urban contrasts.

Course Outcomes

There are no course outcomes available

GEOG 250 : United States and Canada. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

Course Outcomes

There are no course outcomes available

GEOG 336 : Urban Geography. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: History and theory of urban development, including why cities exist and how cities function.

Course Outcomes

There are no course outcomes available

GEOG 341 : Political Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Spatial analysis of global politics; focus on geopolitics, territory and conflict, nationalism, and the politics of resources.

Course Outcomes

There are no course outcomes available

GEOG 346 : Population Geography. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Spatial perspective on wide field of population studies, focusing on distribution, development, structure, and movement of populations, emphasizing basic demographic measures.

Course Outcomes

There are no course outcomes available

7. Complete one course from the following:

GEOG 250 : United States and Canada. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

Course Outcomes

There are no course outcomes available

GEOG 255 : Middle and South America. (3:3:0)

WHEN TAUGHT: Winter Contact Department

DESCRIPTION: Environmental, cultural, economic, and political parameters of Latin American societies.

Course Outcomes

- To link how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to the overall study of the Latin American realm.
- To gain a working knowledge of the connection of the underlying physical "stage" of Latin America to the distributions of people and their activities.
- To gain an understanding of the geographic structure of Latin America’s cultural components including languages, ethnic groups, settlement patterns, and religious beliefs.
- To develop geographic writing and research skills that result in papers that are fluent, relevant, and creative.
- To use other students’ input to effectively enhance Latin American geographic understanding through group work and discussions
- To discover the significance of Latin America's increasing impact on the world's economy, as well as the growing Hispanization of the United States and the Church of Jesus Christ of Latter-day Saints

GEOG 260 : Europe. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Systematic approach to physical base, social and political problems, economic issues, and regional summary.

Course Outcomes

- To use other students input to effectively enhance European geographic understanding.
- To demonstrate the connection of the underlying physical "stage" of Europe to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To comprehend the regional geographic structure of Europe's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in Europe including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era. Emphasis will be given to the formation and spread of the European Union.
- To grasp how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of the European realm.
- To write geographic research that is fluent, relevant, and creative.

GEOG 265 : Russia and the Former Soviet Union. (3:3:0)

DESCRIPTION: Physical features, resources, political issues, economy and industries, population concerns, and role in world affairs.

Course Outcomes

- To use other students input to effectively enhance geographic understanding of the region.
- To comprehend the regional geographic structure of the region's cultural components including languages, demographics, ethnic groups, and religious beliefs.
- To explicate and define the important historical and contemporary geographic linkages in the region including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).
- To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era, including relationship to the European Union and other political entities.
- To grasp how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of this region.
- To demonstrate the connection of the underlying physical "stage" of the region to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.
- To write geographic research that is fluent, relevant, and creative.

GEOG 271 : Middle East. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Physical and cultural geography of Southwest Asia and North Africa, emphasizing the cultural mosaic, geopolitics, environment, and resources of the region.

Course Outcomes

There are no course outcomes available

GEOG 272 : East Asia. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Region of monsoon Asia and its basic human (demographics, nations and ethnic groups, settlement patterns, religious beliefs, transportation and communication systems, political structures), and physical geographic characteristics (land forms, physiography, climatic characteristics, and natural resources).

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

GEOG 304 : Geography of Climates. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 101.

DESCRIPTION: Elements, controls, distribution, and classification of the earth's climates.

Course Outcomes

- Gain an understanding of the key determinants of the world’s main climates
- Gain an appreciation of the complex nature and implications of human climate change.
- Understand how extreme weather events occur and their potential impacts on humans.
- Understand the methods climatologists use to collect data about past and present climate.
- Improve writing, critical thinking and your ability to apply knowledge to solve geographic problems.

GEOG 305 : Geography of Landforms. (3:3:0)

WHEN TAUGHT: Fall Contact Department

RECOMMENDED: Geog 101.

DESCRIPTION: Elements of landforms: distributions and cultural significance.

Course Outcomes
- Examine the history of landform study and the key individuals in the history of geomorphology.
- Explain the physical processes that produce landforms.
- Examine a physical landscape and describe why it looks the way it does.
- Describe how human settlement and recreation patterns are influenced by landforms.
- Understand dating techniques geomorphologists use to understand earth's history.

GEOG 331 : Economic Geography. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Introduction to economic processes and spatial patterns, emphasizing theoretical approaches, locational strategies, and changing economic land-use patterns.

Course Outcomes
There are no course outcomes available

GEOG 336 : Urban Geography. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: History and theory of urban development, including why cities exist and how cities function.

Course Outcomes
There are no course outcomes available

GEOG 341 : Political Geography. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Spatial analysis of global politics; focus on geopolitics, territory and conflict, nationalism, and the politics of resources.

Course Outcomes
There are no course outcomes available

GEOG 346 : Population Geography. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Spatial perspective on wide field of population studies, focusing on distribution, development, structure, and movement of populations, emphasizing basic demographic measures.

Course Outcomes
There are no course outcomes available

8. Complete the following:

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

and

Either any 200-level or above economics course
Or one of the following courses:

BUS M 241 : Marketing Management. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Marketing's role in society and the firm, marketing opportunities, the consumer market, and management of marketing mix.

Course Outcomes
- Understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers.
- Describe how specific firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.
- Design a marketing plan for a new venture by applying the appropriate tools and approaches studied

BUS M 372 : Basic Entrepreneurship Skills. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Practical aspects of business formation and growth; key skills and principles needed to successfully start up and grow a business.

NOTE: For non-Marriott School of Management students.

Course Outcomes

- Participate effectively on an entrepreneurial founding team and help create a start-up business.
- Formulate strategies to overcome common start-up business challenges.
- Write self-reflective papers on a variety of business topics, articles, and books in order to help them discover their entrepreneurial spirit.
- Understand and apply entrepreneurial terminology, global enterprise issues, and ethical decision-making to business cases.

GEOG 331 : Economic Geography. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Geog 100 or instructor's consent.

DESCRIPTION: Introduction to economic processes and spatial patterns, emphasizing theoretical approaches, locational strategies, and changing economic land-use patterns.

Course Outcomes

There are no course outcomes available

**MANEC 300 : Economics of Market Systems. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 110; Major status.

DESCRIPTION: Decision making, price formation, and economic organization of the firm in market environments.

Course Outcomes

There are no course outcomes available

**MANEC 376 : Government and Business. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ECON 110; Major status.

DESCRIPTION: Interaction of political and economic forces in determining product and asset prices and the distribution of income and wealth.

Course Outcomes

There are no course outcomes available

PL SC 344 : Comparative Political Economy. (3:3:0)

PREREQUISITE: Pl Sc 150, 200.

DESCRIPTION: Overview of political economy from a comparative perspective. Classic theorists (Smith, Marx, Schumpeter, etc.); classic questions (industrialization, national economic policy, property, globalization, law, and economics).

Course Outcomes

- Understand the relationship (factual/theoretical) between political/economic outcomes and political/economic structures/institutions
- Develop writing skills through various activities such as regular, short writing assignments in response to readings or topics we cover in class, as well as undertaking a significant research paper that includes the extension of a theory and some form of empirical testing applied to political economy topics.
- You will also be exposed to how international forces affect domestic political economy and how normative considerations shape policy outcomes of interest in this class.
- All of the above items also contribute to the development of this skill.

PL SC 372 : International Political Economy. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Political implications of international trade, investment, and monetary policies within an increasingly interdependent global context; transnationalism.

Course Outcomes

- Demonstrate understanding of how International Relations theory applies to the subject matter of International Political Economy.
- Demonstrate understanding of key theories of international political economy.
- Demonstrate understanding of different issue areas in international political economy.
- Complete a research paper that uses IPE theory to explain aspects of global political and economic interaction.
- Demonstrate the ability to write a well-crafted, persuasive research paper.
- Demonstrate the ability to apply different theories of international political economy.
- Learn the consequences of plagiarism and how to avoid it.In written assignments,

correctly acknowledge the words and/or ideas of other authors.

**Go to 480 TNRB to receive permission to register for these courses.

9. Complete the following:

PL SC 110 : American Government and Politics. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Origin and development of federal Constitution; national, state, and local governments and politics.

Course Outcomes
- Analyze current events in American politics using Political Science concepts.
- Describe the most important constitutional provisions in American national government and how they have changed over time.
- Explain the role individuals play in American government and what factors influence their behavior.
- Assess the functions and interactions of American political institutions.
- Evaluate how you as an individual can effectively participate in the political process.

10. Complete the following:

Either

PL SC 150 : Comparative Government and Politics. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Patterns of European, Asian, Latin American, and other political systems.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate a familiarity with the subfield of comparative politics
- Possess a factual and conceptual knowledge of countries and political processes
- Begin to develop skills of effective research, analysis and writing in social science
- Think critically, analytically and synthetically
- Bring honesty and integrity to daily life, public affairs and professional activities and in their academic work
- Reflect on the way that religion affects politics in their own lives and in the lives of others
- Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought

Or any 300-level or higher political science course.

11. Complete the following:

PSYCH 111 : Introduction to Psychological Science. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Basic course in modern scientific psychology.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Objective: Apply psychological principles to personal and social issues and problems.Measurement:Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.
- Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Pyychology 111 sections.
- Objective: Understand the basic research methods used in psychology, including classical and current experiments.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

12. Complete one course from the following:

PSYCH 321 : Developmental Psychology: Adolescence. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Development and maturation during adolescence; research methodology.
NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
- Students will understand and remember the basic developments that occur during adolescence, the basic patterns of thought, emotion, and behavior characteristic of adolescents, and the important individual and contextual influences on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- 3. Students will be able to more effectively communicate verbally and in writing about adolescence.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adolescence.Measurement: Research papers.
- Students will be able to apply knowledge of adolescence to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 341 : Personality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Individual patterns of behavior, thought, and emotion; personality theories and their associated strategies of research, assessments, and personality change.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and distinguish the major personality theories of psychology.Measurement:Multiple choice/Short essay.
- Students will identify and give examples of contemporary research or applications of these theories.Measurement:Multiple choice/Short essay.
- Students will identify the theoretical assumptions that underlie these personality theories.Measurement:Multiple choice.
- Students will articulate some of the practical and religious implications of these theories.Measurement:Essay assignments.

PSYCH 342 : Abnormal Psychology. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders,and current data relevant to such theories.Measurement: Multiple choice, short answer and essay exams; short writing assignments.
- Students will engage in service learning by serving persons diagnosed with psychological disorders.Measurement: Participation assessment/field work report
- Students will critically examine key concepts and theories in abnormal psychology.Measurement: Essay exams, short writing assignments, in-class debates
- Students will examine and critique a topic in abnormal psychology using the current research literature.Measurement: APA style paper

PSYCH 350 : (Psych-Soc) Introduction to Social Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able toidentify the unique contribution of social psychology to social science, situating the discipline within the larger domain of psychology and contrasting it with related disciplines, such as sociology.Measurement: Multiple choice tests, short essays.
- Students will be able to understand the use of surveys, laboratory and field experiments in conducting social psychological research, and understand the ethical principles of informed consent, deception and debriefing when conducting research with human participants.Measurement: Multiple choice tests, short essays.
- Students will be able to identify substantive areas of social psychological inquiry, including the self, person perception, attitudes and persuasion, group processes, stereotyping and prejudice, interpersonal attraction, helping behavior and aggression.Measurement: Multiple choice tests, short essays.
- Students will be able to identify and explain the contributions of major thinkers and contributors of classic and contemporary theory and research in social psychology, such as Leon Festinger and Stanley Milgram.Measurement: Multiple choice tests, short essays.
- Students will be able to identify how social psychological theory and research have been applied to domains outside the discipline, such as in health settings and the law.Measurement: Multiple choice tests, short essays.

PSYCH 361 : Principles of Learning. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Principles of learning; representative experiments.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will develop their understanding of and facility with the concepts by which behavior analysis makes sense of selected learning phenomena.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will connect the concepts to the behavior of a virtual laboratory rat.Measurement: Individual- and team-based written reports and in-class presentations of the results of virtual experiments. Team-based manuscripts in multiple drafts both peer- and instructor- reviewed.
- Students will apply the concepts to human behavior, including one's own.Measurement: Out-of-class team-based application activities summarized in written reports. Essay exams that emphasize applications to real-life phenomena.

PSYCH 365 : Motivation. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Determinants of motivation, relationship of motives to emotion, cognition, personality, and action. Implications for understanding self and others.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will compare and contrast a wide range of theories and research findings within the subdiscipline of the psychology of motivation.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will categorize and apply theories and concepts to specific fictional characters and settings in film.Measurement: Out-of-class application activities that focus on four films shown in class and that require application of specific concepts to the characters, plots, and themes of the films.
- Students will analyze connections between the subject matter and one's own experience of motivation.Measurement: Individual essays and essay exams that focus on the personal application of concepts to one's experience.

13. Complete one course from the following:

SOC 111 : Introductory Sociology. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Social group influence; social interaction, processes, organization, and change; family, religion, government, population, culture, race relations.

Course Outcomes

There are no course outcomes available

ANTHR 101 : Social/Cultural Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.Acquire an informed awareness of other cultural worlds—an appreciation of other ways of being human—of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.— Learn to see personal beliefs, values, attitudes, and conduct—including kinship organization and ritual, economic and political practices—from the perspective of people with different ideas about the way the world works.Develop an increased ability to write effectively.

ANTHR 110 : Introduction to Archaeology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Studying past human behaviors and cultures by applying scientific principles and reasoning; exploring case studies concerning archaeological discoveries.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- This course should help students to demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. Students will learn to appreciate the excitement of discovery that has accompanied important scientific developments as well as demonstrate how scientific methodology can be used to analyze real-world science-related problems. Students will become adept at evaluating scientific data and claims in order to make rational decisions on public-policy science issues that affect their community. As students complete the course they will learn to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, as well as reflect rationally upon the interface between science and religion.

14. Complete the Professional Education Component:
    - Complete the following:

CPSE 402 : Educating Students with Disabilities in Secondary Classrooms. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or comparable major course; FBI fingerprint background clearance.

DESCRIPTION: Issues, policies, and methods in teaching secondary students with disabilities in general education classrooms. Lab.

Course Outcomes

- Demonstrate sensitivity to individuals with disabilities.
- Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- Describe the steps in the Individual Education Program (IEP) process, including Individualized Transition Plans for students aged 14-22.
- Use research-supported methods for academic instruction of individuals with disabilities including explicit instruction, learning strategies, task analysis, and active participation.
- Describe models and strategies of consultation and collaboration including co-planning and co-teaching.

- Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act (IDEA).
- Develop a personal philosophy of special education which includes an understanding of the implications of Least Restrictive Environment as defined in IDEA.
- Demonstrate knowledge of basic classroom management theories and an understanding of teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs.
- Describe the characteristics and educational implications of students with high and low incidence disabilities
- Demonstrate ability to identify and prioritize areas of the general curriculum and provide accommodations for individuals with exceptional learning needs

HIST 477 : History Teaching Methods and Instruction. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Sc Ed 276R; Fingerprinting and FBI clearance; major-specific program requirements.

DESCRIPTION: Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning.
- Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.
- Students will consider variuos methods of assessing student learning.
- Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- Students will consider various types of resources including texts, technology, primary source documents and litertaure that they might use to teach social studies to students with diverse backgrounds and learning styles.
- Students will coordinate and reflect on clinical experiences.

HIST 478 : Practicum in Secondary Education. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Sc Ed 276R; Concurrent enrollment in Hist 477 or comparable major course.

DESCRIPTION: Implementing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning
- Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.
- Students will consider various methods of assessing student learning.
- They will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- The course will provide a forum to coordinate and reflect on the prospective teachers' clinical experiences.

IP&T 286 : Instructional Technology in Teaching. (1:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

Course Outcomes

There are no course outcomes available

SC ED 276R : Exploration of Teaching. (3-4:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Major-area preadmission requirements; FBI fingerprint and background clearance.

DESCRIPTION: Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Course Outcomes

No outcomes are available at this time.

(4 hours)

SC ED 350 : Adolescent Development in an Education Context. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or HIth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Adolescent development and its implications for integrated school culture, curriculum design, instructional practices, and assessment.

Course Outcomes

- The students will demonstrate how the stages of development impact instructional practices.
- The students will understand the social, physical, and cognitive developmental stages of adolescence in relation to the tasks of automony, identity and intimacy.
- The students will demonstrate how the stages of development impact classroom environments and management.

SC ED 353 : Multicultural Education. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or HIth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Designing and adapting instruction for diverse learners; collaborating with families, cultures, and communities in promoting and sustaining learning.

Course Outcomes

- Students will examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavio through a process of reflection.
- Acknowledge the dynamics of culture and diversity in school success and teachers' teaching. This includes recognizing and overcoming deficit thinking.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.
- Recognize and acknowledge racism, discrimination and other forms of inquity and privilege in themselves, in others, and within institutions.
- Recognize and use a personal moral spiritual framework along with principles and concepts of social science to guide educational accomplishments for diverse learners.

SC ED 379 : Classroom Management. (1:1:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Concurrent enrollment in Sc Ed 377R and 378, or equivalent major courses; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or HIth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Current theory, research, and application in classroom management; creating positive teacher-student and peer relationships; developing optimal learning environments.

Course Outcomes

- The student will create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.
- The student will plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.
- The student will be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

Note: FBI fingerprint and backgound clearance must be completed before enrollment in Sc Ed 276R.

- Complete 12 hours of one of the following:

SC ED 476R : Secondary Student Teaching - Social Science. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

- Students will put into practice the theories they have learned in content and pedagogy courses including planning lessons, assessing students of all abilities and cultural backgrounds, using a variety of instructional strategies, and collaborating with other teachers and with the community.

SC ED 496R : Academic Internship: Secondary Education. (12:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

- Students will demonstrate that they can teach, manage, and assess content area knowledge and skills in the 7-12 classroom.
- Foster relationships with school colleagues, parents, and the larger community.

: Academic Internship: Social Sciences.

Course Outcomes

: Academic Internship: English.

Course Outcomes

: Academic Internship: Mathematics.

Course Outcomes

: Academic Internship: Biological Sciences.

Course Outcomes

: Academic Internship: Physical Sciences.

Course Outcomes

: French and Italian Family History.

Course Outcomes

: Latin American, Spanish, and Portuguese Family History.

Course Outcomes

: Slavic Family History.

Course Outcomes

: Germanic Family History.

Course Outcomes

Note: Minors should consult with the family history coordinator soon after declaring.

2. Complete 2 courses (6 credit hours) from the following:

HIST 280 : Northern US Family, Local, and Social History Research Since 1790. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of invidiual families and development of family history studies in the northern states, including New England, the Midwest, and some Mid-Atlantic states in the 19th and 20th centuries.

Course Outcomes
There are no course outcomes available

HIST 281 : Southern US Family, Local, and Social History Research Since 1790. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: HIST 217

DESCRIPTION: 19th and 20th century records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in the southern states.

Course Outcomes
There are no course outcomes available

HIST 282 : Colonial US Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in colonial American studies.

Course Outcomes
There are no course outcomes available

HIST 350 : British Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methods for reconstruction of individual families and development of demographic and family history studies in England, Scotland, and Wales.

Course Outcomes
- Students will be able to explain and use fundamental genealogical (and some historical) resources and methodologies for English and Welsh research since 1700
- Students will evaluate, analyze, and corroborate genealogical information from both original and compiled sources. Students will know and use established citation standards.
- Students will explain how various pieces of information are combined in order to trace the same individual over various records and across the lifespan
- Students demonstrate how evidence is used to prove the links between generations

HIST 351 : Germanic Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Germanic areas of Europe.

Course Outcomes
There are no course outcomes available

HIST 352 : Scandinavian Family, Local, and Social History Research. (3:3:0)

WHEN Contact Department.

TAUGHT:
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Denmark, Norway, Iceland, Sweden, and/or Finland.

Course Outcomes
There are no course outcomes available

HIST 353 : Southern European and Latin American Family, Local, and Social History Research. (3:3:0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: HIST 217
DESCRIPTION: Records, geo-historical background, paleography, and methods for reconstruction of individual families; development of demographic and family history studies which may include Portugal, Spain, France, and Italy and their colonies in the Americas.

Course Outcomes
There are no course outcomes available

HIST 354 : Slavic Family, Local, and Social History Research. (3:3:0)
PREREQUISITE: HIST 217
DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families; development of family history studies in Slavic areas of Europe.

Course Outcomes
- Students will be able to describe the key content of major family history sources in Slavic research.
- Students will become somewhat proficient at reading old Slavic documents.
- Students will become acquainted with actually using family history primary and secondary sources, on film or otherwise available, at the world's largest genealogical repository, the Family History Library in Salt Lake City

HIST 390R : Special Topics in History. (.5-3:Arr:0)
WHEN TAUGHT: Contact Department.
DESCRIPTION: Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

Course Outcomes
There are no course outcomes available

: Family History Research.
Course Outcomes

: Family History Research in Ireland. (.5-3:Arr:Arr)
Course Outcomes

: Family History Research in the Netherlands.
Course Outcomes

: Advanced Southern European Family History Research.
Course Outcomes

: Advanced British Family History Research.
Course Outcomes

: Native American Family History Research. (.5-3:Arr:Arr)
Course Outcomes

HIST 396 : Historical Narrative: A Writing Workshop. (3:3:0)
WHEN TAUGHT: Winter Even Yrs.
RECOMMENDED: Hist 200, 220, 221.
DESCRIPTION: Workshop in writing narrative history, emphasizing the problems of writing historical narrative. Theories and examples of narrative history.

Course Outcomes
- Students will demonstrate an understanding of the genres of historical writing and their historiography
- Students will be able to critically evaluate primary and secondary sources
- Students will be able to write historical narratives in several different genres
- Students will be able to identify and critically respond to arguments of historical monographs, articles, and primary sources

HIST 434 : Computers in Family Historical Research and Publication. (3:3:0)
WHEN TAUGHT: Fall Odd Yrs.
PREREQUISITE: HIST 217
DESCRIPTION: Use of computer programs and the internet in researching family, local, and social history;

including programs and techniques for publishing.

Course Outcomes
- Students will be able to stay current on newly published historical materials by using RSS feeds and Google Alerts to notify them of changes in websites, podcasts, weblogs, etc.
- Students will be able to communicate the findings of their historical research and demonstrate a high level of analytical skill through the use of a variety of computerized and online resources.
- Students will be able to locate and use primary source material online, as it continues to be made more available.
- Students will be able to design and use basic, custom relational databases for historical research and analysis.

3. Complete one course from the following:

HIST 420 : Latin Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Interpretation of handwriting within historical contexts in Latin ecclesiastical and notarial documents useful in family, local, and social history research, including church registers, notarial settlements of estates, probate records, and inventories; medieval to modern periods.

Course Outcomes
- Students will learn the most common Latin scripts
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 421 : English Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Interpretation of handwriting within historical contexts in vernacular scripts in the British Isles, sixteenth through eighteenth centuries, in sources useful in family, local, and social history research.

Course Outcomes
- Students will learn the most common scripts (hands) and documents in use in Britain and its colonies between 1500 and 1850.
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 422 : Germanic Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the German kingdoms, sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to: 1. Use various types of German reference and research tools 2. Recognize different types of German written and printed documents 3. Understand important historical and cultural aspects of Germany 4. Know the procedures for resolving difficult genealogical and historical research problems

HIST 423 : Slavic Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Slavic language areas of Eastern Europe, sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
There are no course outcomes available

HIST 424 : Romance Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Romance languages of Europe (especially Spanish, French, and Italian), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to read with fluency documents in italic style handwriting;
- Students will be able to recognize and use documents and understand the legal, ecclesiastical and civil systems behind them;
- Students will be able to understand basic concepts of paleography and the impacts of language on the historical development of handwriting
- Students will be able to develop familiarity with secretary (cortesana or procesal) handwriting

HIST 425 : Scandinavian Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of old Gothic script handwriting in Scandinavian areas of Europe (including Denmark, Norway, Sweden, Finland, and Iceland), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to read at a basic level, old gothic-script Norwegian, Danish, Swedish and Finnish

documents, from the 1600s on up.
- Students will be able to use Scandinavian conversion calendars, to convert Latin feast dates to regular Julian calendar dates.
- Students will be able to read, at a basic level for content from Scandinavian printed documents. of the 1700s and 1800s.

4. Complete one course from the following social and cultural history courses. Seek faculty advice in choosing electives:

HIST 244 : Jewish History: A.D. 70 to the Present. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Jewish diaspora, Jewish life in Moslem and Christian countries; Jewish religious movements; development of Zionism; Jewish communities in modern Israel and the United States.

Course Outcomes
- Gain a historical consciousness by demonstrating an understanding of major developments in Jewish and history, and understand key historical terms and theories.
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately and distinguish between questionable and valid historical assertions.
- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using interdisciplinary prinary and secondary sources.
- Skillfully integrate sources into a coherent argument expressed through a clear, well-written style and throrough oral communication.
- Recognize anti-Semitic arguments.
- Gain an understanding of the complexities of modern Jewish identity.
- Appreciate the contribution of Jewish people to the world.

HIST 290 : Nature and History: The Earth's Environmental Past. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Human historical interactions with animals, plants, and landscapes. Global histories of climate, population, whaling, fossil fuels, the car, animal rights, suburban sprawl, eco-theology, environmentalism, ecotourism, etc.

Course Outcomes
- Students will become academically conversant with the major historical developments in our global relationship with nature.
- Students will be able to analyze and evaluate the content and meaning of primary sources, and through critical interpretation, draw reasonable conclusions.
- Students will be able to formulate historical questions and answer them by careful and systematic research in primary and secondary sources.
- Students will be able to write history that is coherent and persuasive by following discipline's norms for writing and careful documentation.

HIST 318 : European Women's History. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

RECOMMENDED: Hist 200.

DESCRIPTION: European women and gender from 1400 to the present.

Course Outcomes
- Students will be able to understand and explain major trends in European women's experiences and history since 1400
- Students will be able to analyze and synthesize historiographyof women's history, gender history, and feminism
- Students will read, analyze, and write about primary and secondary sources and explain their connections to one another
- Students will interpret important shifts or trends in the experience of women and attitudes about gender. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends
- Working in tandem with each other students will have opportunities to question, investigate, and interrogate contemporary attitudes to women and men's history and gender and how these affect interpretations of the past.

HIST 319 : The Family in Europe. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Nature and development of marriage and family life and structure from the ancient to modern era.

NOTE: Independent Study also.

Course Outcomes
- Students will be able to understand and explain major trends in European family life, relationships, and law between 1100 and the present
- Students will be able to analyze and synthesize historiography of family history
- Students will read, analyze, and write about primary and secondary sources and explain their connections to one another.
- Students will interpret important shifts or trends in the experience of family functions and relationships and their connections with the law. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends.
- Working in tandem with each other students will have opportunities to question, investigate, and interrogate historical experiences and historiographic interpretations

HIST 320 : Society in Europe. (3:3:0)

WHEN Fall Even Yrs.

TAUGHT:
DESCRIPTION: Common life in Europe from 1500 to the present: family problems, social customs, marriage, superstition, death, diet, work, hardships, migration, and childhood.

Course Outcomes
- Students will be able to explain and analyze themes and trends in European social history in both the early modern and modern periods.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to analyze and interpret secondary source documents
- Students will be able to interpret and debate the meanings and historical value of primary and secondary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 358 : Gender and History in Latin America. (3:3:0)
WHEN TAUGHT: Winter Even Yrs.
DESCRIPTION: How gender roles have been defined legally, socially, and culturally in Latin America from the colonial period to the present, emphasizing the nineteenth and twentieth centuries.

Course Outcomes
- To understand how gender relations and gender roles developed in Latin America from colonial times to the present.
- To be able to discuss and explain those developments through the written and spoken word with clarity, persuasiveness, and proper use of evidence.
- To write a well written, organized, and developed term paper using the critical thinking and writing skills of a historian.
- To be able to read primary sources and discuss their utility in constructing historical arguments.

HIST 378 : American Family History. (3:3:0)
DESCRIPTION: History of American families from colonial period to the present.

Course Outcomes
- Students will be able to explain and analyze the major intellectual, economic, religious, social, cultural, and political developments affecting changes in American families of various races, classes, and regions from 1607 to the present.
- Students will be able to analyze an important historical question in the history of American families
- Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.
- Students will be able to isolate the theses and supporting arguments of secondary sources on the history of American families.

HIST 379 : U.S. Religious History to 1860. (3:3:0)
WHEN TAUGHT: Fall Even Yrs.
DESCRIPTION: Religious developments from colonial times to 1860.

Course Outcomes
There are no course outcomes available

HIST 380 : U.S. Religious History Since 1860. (3:3:0)
WHEN TAUGHT: Winter Odd Yrs.
DESCRIPTION: Examines religious people, institutions, beliefs, and practices in U.S. history since the Civil War.

Course Outcomes
There are no course outcomes available

HIST 384 : United States Women's History. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Survey course of women's experience in American culture and society from the Puritans to the present.

Course Outcomes
- Students will be able to explain and analyze the experiences of women in America from the colonial period to the present, the ways that ideas about gender have shaped American life, and significant issues and debates in U.S. Women's history.
- Students will be able to analyze, interpret, and evaluate primary sources.
- Students will be able to interpret and debate the meanings and historical value of primary sources with their peers.
- Students will be able to analyze and create historical questions and place them in a historiographical context.
- Students will demonstrate proficiency in using historical methods of research and in integrating data into a coherent argument expressed through a clear, well-written style.
- Students will be able to apply their understanding of American women's history to current issues and events.

5. Complete one course (3 credit hours) from the following advanced skills courses:
HIST 434 : Computers in Family Historical Research and Publication. (3:3:0)
WHEN TAUGHT: Fall Odd Yrs.
PREREQUISITE: HIST 217

DESCRIPTION: Use of computer programs and the internet in researching family, local, and social history; including programs and techniques for publishing.

Course Outcomes

- Students will be able to stay current on newly published historical materials by using RSS feeds and Google Alerts to notify them of changes in websites, podcasts, weblogs, etc.
- Students will be able to communicate the findings of their historical research and demonstrate a high level of analytical skill through the use of a variety of computerized and online resources.
- Students will be able to locate and use primary source material online, as it continues to be made more available.
- Students will be able to design and use basic, custom relational databases for historical research and analysis.

HIST 439 : Seminar on Professional Family History Research. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: HIST 217

DESCRIPTION: Practicum in professional client research exploring advanced genealogical methodologies.

Course Outcomes

- Students will learn the key methods of family history research in US sources, to solve difficult research problems from the 1700s and 1800s.
- Students will learn, on an advanced level, to analyze sources and read between the lines, to reconstitute complete families from records of the 1700s and 1800s in US sources.
- Students will be able to write and/or compile a variety of research reports for clients, namely, analytical, crossing the pond, bibliographic, and the like, for persons who (in theory) hire them to conduct research on an ancestral family or families.

HIST 496R : Academic Internship: Family, Local, and Social History. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Work-study involving family, local, and/or social history at one or more archives, libraries, publishers, data providers, or research organizations on the international, national, state, or local level, under supervision of a professional genealogist, historian, archivist, or librarian.

Course Outcomes

Hide All Course Descriptions

Program Requirements

1. The History Department requires a minimum of 9 hours of history credit to be completed in residency at BYU's Provo campus for this minor program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Complete the following core courses:

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes

- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.
- Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.
- Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

HIST 220 : The United States Through 1877. (3:3:0)

OFFERED: Independent study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 221 : The United States Since 1877. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Industrialization, immigration, urbanization, political and social movements, and foreign policy.

Course Outcomes
There are no course outcomes available

Note: Minors must complete all four core courses in history at the college level. University core Civilization courses (201/202) offered by other departments are not equivalent. Advanced Placement U.S. history courses are not equivalent.

3. Complete 9 hours from the approved list of elective courses.

*Hours include courses that may fulfill university core requirements.

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements

1. The History Department requires a minimum of 6 hours of history credit to be completed in residency at BYU's Provo campus for this minor program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

3. Complete the following core courses:

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.
- Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.
- Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).

- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

HIST 220 : The United States Through 1877. (3:3:0)

OFFERED: Independent study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 221 : The United States Since 1877. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Industrialization, immigration, urbanization, political and social movements, and foreign policy.

Course Outcomes
There are no course outcomes available

HIST 364 : Utah. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Contributions of Native Americans, explorers, mountain men, miners, government officials, Mormons, and other groups in the nineteenth century. Impact of national movements, various peoples, politics, economics, and social and cultural change in the twentieth century.

Course Outcomes
There are no course outcomes available

Note: Minors must complete all core courses in history at the college level. University core Civilization courses (201/202) offered by other departments are not equivalent. Advanced Placement U.S. history courses are not equivalent.

4. Complete 6 hours from the approved list of elective courses.

*Hours include courses that may fulfill university core requirements.

Hide All Course Descriptions

The certificate is administered by the History Department at the BYU-Provo campus; however, courses can also be taken at the Salt Lake Center or through Independent Study.

Certificate Requirements

1. Complete the following:

HIST 217 : The Family Historian's Craft. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to genealogical methods applicable in American and international research. Discussion of technology in genealogical research and introduction to censuses and vital records (US and international).

Course Outcomes
There are no course outcomes available

HIST 317 : The Family and the Law in American History. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: HIST 217

DESCRIPTION: The interaction of families with law and government as illustrated in original American sources; individual family histories reconstructed in the broader perspective of history.

Course Outcomes
There are no course outcomes available

Note: Certificate candidates should consult with the family history coordinator soon after selecting the certificate program.

2. Complete one course from the following:

HIST 421 : English Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Interpretation of handwriting within historical contexts in vernacular scripts in the British Isles, sixteenth through eighteenth centuries, in sources useful in family, local, and social history research.

Course Outcomes
- Students will learn the most common scripts (hands) and documents in use in Britain and its colonies between 1500 and 1850.
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 422 : Germanic Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the German kingdoms, sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to: 1. Use various types of German reference and research tools 2. Recognize different types of German written and printed documents 3. Understand important historical and cultural aspects of Germany 4. Know the procedures for resolving difficult genealogical and historical research problems

HIST 423 : Slavic Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Slavic language areas of Eastern Europe,

sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
There are no course outcomes available

HIST 424 : Romance Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Romance languages of Europe (especially Spanish, French, and Italian), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to read with fluency documents in italic style handwriting;
- Students will be able to recognize and use documents and understand the legal, ecclesiastical and civil systems behind them;
- Students will be able to understand basic concepts of paleography and the impacts of language on the historical development of handwriting
- Students will be able to develop familiarity with secretary (cortesana or procesal) handwriting

HIST 425 : Scandinavian Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of old Gothic script handwriting in Scandinavian areas of Europe (including Denmark, Norway, Sweden, Finland, and Iceland), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes
- Students will be able to read at a basic level, old gothic-script Norwegian, Danish, Swedish and Finnish documents, from the 1600s on up.
- Students will be able to use Scandinavian conversion calendars, to convert Latin feast dates to regular Julian calendar dates.
- Students will be able to read, at a basic level for content from Scandinavian printed documents. of the 1700s and 1800s.

3. Complete two courses (6 credit hours) from the following:

HIST 280 : Northern US Family, Local, and Social History Research Since 1790. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of invididual families and development of family history studies in the northern states, including New England, the Midwest, and some Mid-Atlantic states in the 19th and 20th centuries.

Course Outcomes
There are no course outcomes available

HIST 281 : Southern US Family, Local, and Social History Research Since 1790. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: HIST 217

DESCRIPTION: 19th and 20th century records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in the southern states.

Course Outcomes
There are no course outcomes available

HIST 282 : Colonial US Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in colonial American studies.

Course Outcomes
There are no course outcomes available

HIST 350 : British Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methods for reconstruction of individual families and development of demographic and family history studies in England, Scotland, and Wales.

Course Outcomes
- Students will be able to explain and use fundamental genealogical (and some historical) resources and methodologies for English and Welsh research since 1700
- Students will evaluate, analyze, and corroborate genealogical information from both original and compiled sources. Students will know and use established citation standards.
- Students will explain how various pieces of information are combined in order to trace the same individual over various records and across the lifespan
- Students demonstrate how evidence is used to prove the links between generations

HIST 351 : Germanic Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Germanic areas of Europe.

Course Outcomes
There are no course outcomes available

HIST 352 : Scandinavian Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Denmark, Norway, Iceland, Sweden, and/or Finland.

Course Outcomes
There are no course outcomes available

HIST 353 : Southern European and Latin American Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geo-historical background, paleography, and methods for reconstruction of individual families; development of demographic and family history studies which may include Portugal, Spain, France, and Italy and their colonies in the Americas.

Course Outcomes
There are no course outcomes available

HIST 354 : Slavic Family, Local, and Social History Research. (3:3:0)

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families; development of family history studies in Slavic areas of Europe.

Course Outcomes
- Students will be able to describe the key content of major family history sources in Slavic research.
- Students will become somewhat proficient at reading old Slavic documents.
- Students will become acquainted with actually using family history primary and secondary sources, on film or otherwise available, at the world's largest genealogical repository, the Family History Library in Salt Lake City

HIST 390R : Special Topics in History. (.5-3:Arr:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

Course Outcomes
There are no course outcomes available

: Family History Research.

Course Outcomes

: Family History Research in Ireland. (.5-3:Arr:Arr)

Course Outcomes

: Family History Research in the Netherlands.

Course Outcomes

: Advanced Southern European Family History Research.

Course Outcomes

: Advanced British Family History Research.

Course Outcomes

: Native American Family History Research. (.5-3:Arr:Arr)

Course Outcomes

HIST 396 : Historical Narrative: A Writing Workshop. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

RECOMMENDED: Hist 200, 220, 221.

DESCRIPTION: Workshop in writing narrative history, emphasizing the problems of writing historical narrative.

Theories and examples of narrative history.

Course Outcomes
- Students will demonstrate an understanding of the genres of historical writing and their historiography
- Students will be able to critically evaluate primary and secondary sources
- Students will be able to write historical narratives in several different genres
- Students will be able to identify and critically respond to arguments of historical monographs, articles, and primary sources

HIST 434 : Computers in Family Historical Research and Publication. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Use of computer programs and the internet in researching family, local, and social history; including programs and techniques for publishing.

Course Outcomes
- Students will be able to stay current on newly published historical materials by using RSS feeds and Google Alerts to notify them of changes in websites, podcasts, weblogs, etc.
- Students will be able to communicate the findings of their historical research and demonstrate a high level of analytical skill through the use of a variety of computerized and online resources.
- Students will be able to locate and use primary source material online, as it continues to be made more available.
- Students will be able to design and use basic, custom relational databases for historical research and analysis.

4. Complete one course from the following:

HIST 434 : Computers in Family Historical Research and Publication. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Use of computer programs and the internet in researching family, local, and social history; including programs and techniques for publishing.

Course Outcomes
- Students will be able to stay current on newly published historical materials by using RSS feeds and Google Alerts to notify them of changes in websites, podcasts, weblogs, etc.
- Students will be able to communicate the findings of their historical research and demonstrate a high level of analytical skill through the use of a variety of computerized and online resources.
- Students will be able to locate and use primary source material online, as it continues to be made more available.
- Students will be able to design and use basic, custom relational databases for historical research and analysis.

HIST 439 : Seminar on Professional Family History Research. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: HIST 217

DESCRIPTION: Practicum in professional client research exploring advanced genealogical methodologies.

Course Outcomes
- Students will learn the key methods of family history research in US sources, to solve difficult research problems from the 1700s and 1800s.
- Students will learn, on an advanced level, to analyze sources and read between the lines, to reconstitute complete families from records of the 1700s and 1800s in US sources.
- Students will be able to write and/or compile a variety of research reports for clients, namely, analytical, crossing the pond, bibliographic, and the like, for persons who (in theory) hire them to conduct research on an ancestral family or families.

HIST 481R : Directed Research in Family History. (.5-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Student research directed by faculty member on family history topic of mutual interest.

Course Outcomes
- Students will identify and clearly articulate a substantive family history research problem.
- Students will produce a written report, project or portfolio demonstrating knowledge of the studied material.

HIST 496R : Academic Internship: Family, Local, and Social History. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Work-study involving family, local, and/or social history at one or more archives, libraries, publishers, data providers, or research organizations on the international, national, state, or local level, under supervision of a professional genealogist, historian, archivist, or librarian.

Course Outcomes
There are no course outcomes available

Note: The certificate program can help prepare for certification or accreditation but should not be confused with these two separate, private methods of credentialing professional genealogists.

Undergraduate Courses

100-Level Courses

HIST 190R : Thetean Publication. (1-2:0:Arr)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: HIST 200
DESCRIPTION: Editing, production, and publication of student academic journal "The Thetean."

Course Outcomes
No outcomes are available at this time.

HIST 199R : Academic Internship. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Department chair's and cooperative education coordinator's consent
DESCRIPTION: Work experience evaluated by supervisor and posted on student's transcript.

Course Outcomes
- Together with internship and academic supervisors, students will develop individual learning objectives based on internship assignment or position
- Students will master the skills and abillities required during the internship experience.
- Students will write interim and final reports demonstrating historical knowledge, analysis and application during the internship experience.

200-Level Courses

HIST 200 : The Historian's Craft. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: History within the broader framework of liberal education; nature of history; questions historians ask; skills and resources needed to study, understand, and write history.
NOTE: Required of all history majors.

Course Outcomes
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources.
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history

(pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.
- Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.
- Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

HIST 217 : The Family Historian's Craft. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Introduction to genealogical methods applicable in American and international research. Discussion of technology in genealogical research and introduction to censuses and vital records (US and international).

Course Outcomes
There are no course outcomes available

HIST 220 : The United States Through 1877. (3:3:0)

OFFERED: Independent study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 221 : The United States Since 1877. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Industrialization, immigration, urbanization, political and social movements, and foreign policy.

Course Outcomes
There are no course outcomes available

HIST 225 : In Quest of the American Character. (3:3:0)

WHEN TAUGHT: Fall
PREREQUISITE: HIST 200 & HIST 220 & HIST 221
DESCRIPTION: An exploration of the American character and the idea of a distinctive American culture.

Course Outcomes
There are no course outcomes available

HIST 231 : Introduction to East Asian History. (3:3:0)

WHEN TAUGHT: Fall
DESCRIPTION: Major themes in the history, thought, and culture of Asian societies from antiquity to the present.

Course Outcomes
- Students will be able to explain and analyze the major political, economic, and social developments in the history of China, Korea, and Japan from antiquity to the present
- Students will be able to analyze and interpret primary source documents.
- Students will be able to interpret and discuss the meaning and significance of historical events on contemporary identity and foreign relations.
- Students will be able to analyze historical arguments.

HIST 232 : Introduction to the History of Christianity. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Survey of major developments in Christianity from its origins in the ancient Roman Empire to its global presence today.

Course Outcomes

There are no course outcomes available

HIST 238 : Ancient Near East to 330 BC. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Ancient cultures of the Near East (Egypt, Mesopotamia, Syro-Palestine, Anatolia, Iran) from the beginnings of civilization to the conquests of Alexander the Great.

Course Outcomes

- Students will gain a historical consciousness of the Ancient Near East by demonstrating a critical literacy of major developments in Ancient Near East history, key historical terms, primary sources, and narratives of Ancient Near East history up to Alexander.
- Students will develop an ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions about ancient Near East primary sources.
- Students will develop use of the historical method of research effectively by skillfully and honestly using primary and secondary sources in the formation of answers to major questions surrounding the narratives of the ancient Near East
- Students will develop their writing ability through a range of pre-writing and writing assignments.

HIST 239 : Ancient Near East, 330 BC - 640 AD. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Cultures and empires of the Near East (Persia, Hellenistic kingdoms, Judaism, early Christianity, Rome, and Byzantium) from Alexander the Great to the Arab conquests.

Course Outcomes

- Gain a firsthand understanding of the Hellenistic and Christian Near East through studying and analyzing primary sources, using a template of (suggested) questions
- Understand basic issues of faith and reason, as they relate to Christianity and Judaism in the formative period of the former
- Master an early Christian primary source well enough to present, as a group, its gist, meaning, and significance
- Understand how the political and social changes in the Eastern Mediterranean in the Hellenistic period contributed to the development of science, technology, philosophy, and religion
- Understand the basic historical issues surrounding the origin of Christianity
- Understand the development of the Christian Roman Empire (Byzantium)

HIST 240 : Middle East History to 1800. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: History of the Middle East from the rise of of Islam until 1800.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, cultural and religious developments in the Islamic Near East between approximately AD 640-1800.
- Students will be able to analyze and interpret translations of primary source documents from the Islamic Near East.
- Students will be able to analyze historical questions and place them in a historiographical context..

HIST 241 : Middle East History from 1800. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: History of the Middle East in the modern period form 1800; rise of nation states, relationship with West, role of Islam.

Course Outcomes

- Gain a historical consciousness by demonstrating a knowledge of major developments in Middle East and world history and understand key historical terms and theories.
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions by using the historical method of research effectively by skillfully and honestly using primary and secondary sources.
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.
- Demonstrate how faith and reason intersect.

HIST 242R : (Hist-NES 347R) Arab and Islamic Civilization. (1-2:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Social science/humanities core course covering Arab and Islamic civilization; historical evolution of Middle East to present. Overview of modern Palestinian society.

NOTE: Elective credit for major and minor in Near Eastern Studies. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.

Course Outcomes

No outcomes are available at this time.

HIST 243R : (Hist-NES 349R) Jewish Civilization. (1-2:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Social science/humanities core course; broad introduction to Jewish self-understanding and history, focusing on relationships among people, faith, and land.

NOTE: Elective credit for major and minor. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.

Course Outcomes

No outcomes are available at this time.

HIST 244 : Jewish History: A.D. 70 to the Present. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Jewish diaspora, Jewish life in Moslem and Christian countries; Jewish religious movements; development of Zionism; Jewish communities in modern Israel and the United States.

Course Outcomes

- Gain a historical consciousness by demonstrating an understanding of major developments in Jewish and history, and understand key historical terms and theories.
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately and distinguish between questionable and valid historical assertions.
- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using interdisciplinary prinary and secondary sources.
- Skillfully integrate sources into a coherent argument expressed through a clear, well-written style and throrough oral communication.
- Recognize anti-Semitic arguments.
- Gain an understanding of the complexities of modern Jewish identity.
- Appreciate the contribution of Jewish people to the world.

HIST 247 : (Hist-ClCv 304) Greek History. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Political, economic, social, and intellectual history of Greece from Mycenaean times to the Hellenistic period.

Course Outcomes

- Successful students will be exposed to selections of Greek literature and be able to evaluate those texts as sources for Greek history; critical skills will be improved by the careful treatment of historiographical texts.
- Successful students will consider available primary sources of information for ancient Greek history and be able to evaluate the reliability of those sources.
- Successful students will discuss critical theories that are relevant to the texts treated in class and be able to evaluate and judge the rhetorical complexities facing the various authors discussed and how those authors resolved those complexities as they composed their historical narratives.
- Successful students will be able to locate the historical texts treated in class in the context of Classical literature generally and of ancient historiography specifically.
- Successful students will demonstrate a basic understanding of Greek History from the Bronze Age to the Hellenistic Age

HIST 248 : (Hist-ClCv 307) Roman History. (3:3:0)

DESCRIPTION: Political, economic, social, and intellectual history of Rome from the foundation of the city to Constantine.

Course Outcomes

- Successful students will be exposed to selections of Latin and Greek literature and be able to evaluate those texts as sources for Roman history; students' critical skills will be improved by the careful treatment of historiographical texts.
- Successful students will consider available primary sources of information for ancient Roman history and be able to evaluate the reliability of those sources
- Successful students will discuss critical theories that are relevant to the texts treated in class and be able to evaluate the rhetorical complexities facing the various authors discussed and how those authors resolved those complexities as they composed their historical narratives.
- Successful students will demonstrate a basic knowledge of Roman history from the Regal period to the decline of the Roman Empire.
- Successful students will be able to locate the historical texts treated in class in the context of Classical literature generally and of ancient historiography specifically.

HIST 249 : History of the Byzantine Empire and Civilization. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Origins, development, and importance of the East Roman or Byzantine Empire in the Middle Ages (AD 330-1453). The empire's intellectual and cultural legacy, imperial institutions, practices, technology, art and architecture, literature, and theology.

Course Outcomes

- To understand the overall development and decline of the Byzantine Empire, and how the Byzantine Empire became a major source of the European Renaissance, as well as how the Byzantine Empire was a Christian Empire, a bridge between the ancient, medieval and the early modern worlds, and how, on multiple occasions, as with the alarming spread of Islam, its defenses protected the rest of Europe from conquest, and eventually it was itself sacrificed to save the West.
- Understand how ideology and cultural/linguistic orientation profoundly affects historical interpretation
- Gain a firsthand understanding of Byzantium through studying and analyzing primary sources, using a template of (suggested) questions
- Use the historical tools and cultural understanding acquired in the course to discuss a work of art (broadly defined)

- Gain an firsthand appreciation of a living cultural tradition that traces its descent from Byzantium
- Master Byzantine primary source well enough to present, as a group, its gist, meaning, and significance
- Grasp basic theological issues as they relate to questions of faith and reason in an Orthodox Christian (Byzantine)context

HIST 251 : Conquest and Colonization of Latin America. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Pre-Columbian civilizations, Iberian exploration and conquest of the New World, and colonial development of Hispanic and Portuguese America from 1492 to 1823.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, religious, and cultural characteristics of Spanish and Portuguese colonialism in the Americas between 1492 and 1825.
- Students will be able to analyze and interpret primary source documents.
- Students will gain experience in historical research and improve writing skills.
- Students will analyze historical questions and place them in historiographical context.

HIST 252 : Modern Latin America. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: National period (1810 to present): independence, institutional development, culture, and inter-American relations.

Course Outcomes

- Students will be exposed to the major economic, political, and cultural shifts that shaped the "modern" Latin American state in the nineteenth and twentieth century, as well as its variants, notably the cult of caudillo rule and its twentieth century offshoots
- Students will become conversant with major theoretical arguments and approaches to Latin American history in the contemporary era.
- Students will gain oral proficiency in discussing historiographical and thematic issues in modern Latin America during weekly discussion.
- Students will either broaden their understanding of literature on one topic in Latin American history by way of an intensive literature survey or deepen their knowledge on a particular topic in Latin American history by way of an original research paper.
- Students will make connections between cultural and polotico-economic issues by way of a wide variety of course readings that expose students to literature, as well as traditional historical themes.

HIST 261 : Modern Africa. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Survey of the history of the African continent from circa 1800, focusing on experiences and perspectives of Africans. Topics may include culture and identity, colonialism, independence movements, religion, gender relations, the environment, and economic development.

Course Outcomes

- Students will gain a greater knowledge of major events, developments, and questions in modern African history
- Students will develop a historical understanding of African societies, cultures, and peoples
- Students will improve their ability to weigh evidence, assess conflicting viewpoints, and evaluate arguments
- Students will improve their ability to write clearly and organize evidence to build an argument
- Students will gain a greater understanding of how Africa has related to the rest of the world

HIST 280 : Northern US Family, Local, and Social History Research Since 1790. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of invididual families and development of family history studies in the northern states, including New England, the Midwest, and some Mid-Atlantic states in the 19th and 20th centuries.

Course Outcomes

There are no course outcomes available

HIST 281 : Southern US Family, Local, and Social History Research Since 1790. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: HIST 217

DESCRIPTION: 19th and 20th century records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in the southern states.

Course Outcomes

There are no course outcomes available

HIST 282 : Colonial US Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in colonial American studies.

Course Outcomes

There are no course outcomes available

HIST 290 : Nature and History: The Earth's Environmental Past. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Human historical interactions with animals, plants, and landscapes. Global histories of climate, population, whaling, fossil fuels, the car, animal rights, suburban sprawl, eco-theology, environmentalism, ecotourism, etc.

Course Outcomes

- Students will become academically conversant with the major historical developments in our global relationship with nature.
- Students will be able to analyze and evaluate the content and meaning of primary sources, and through critical interpretation, draw reasonable conclusions.
- Students will be able to formulate historical questions and answer them by careful and systematic research in primary and secondary sources.
- Students will be able to write history that is coherent and persuasive by following discipline's norms for writing and careful documentation.

HIST 291 : History of Science. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Graeco-Islamic scientific tradition. Ideas, practice, and social impact from Greek, Islamic, and Medieval European civilizations and science to eve of Scientific Revolution. Examines cross-cultural exchange, transformation of ideas.

Course Outcomes

- Understand how science developed out of ancient thought disciplines
- Understand the continuity of Greek-style scientific thinking through Arabic/Islamic and Latin/Christian civilizations
- Grasp the overall development of science as an intellectual and social practice, from pre-Greek times, down through the Scientific "Revolution" and to the modern period.
- To question the reality of a Scientific "Revolution"
- To gain a hand-on understanding of the ancient practices of astronomy/astrology, and understand how they drove much other scientific research
- To master one topic or technology from the pre- Scientific "Revolution" period

HIST 292 : Food and History. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: History of tomatoes, potatoes, sugar, and spice. How food and foodways engage broader historical questions and illuminate aspects of human cultures.

Course Outcomes

- Students will be able to discuss the theoretical underpinnings of the study of food, and will be able to discuss key aspects of the impact of food on human history.
- Students will refine and improve historical research, writing and analytical skills.
- Students will refine and improve oral presentation skills.

HIST 293 : World War II: A Global Perspective, 1939-1945. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Causes, flow, and consequences of World War II emphasizing the American experience at home and abroad.

Course Outcomes

- Students will be able to explain and analyze the history and memory of the global conflict of 1939 to 1945.
- Students will be able to analyze and interpret primary and secondary source documents.
- Students will be able to interpret and discuss the meanings and history and memory.
- Students will be able to formulate historical arguments based on primary sources and place them in a historiographical context.

HIST 294 : Eighteenth-Century Revolutions: America, France, and Haiti. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: The American, French, and Haitian revolutions. Readings include primary and secondary sources on revolutionary politics and culture.

Course Outcomes

- Students will be able to explain and assess the major events and processes that shaped the American, French and Haitian revolutions.
- Students will be able to analyze and contextualize primary documents from the late eighteenth and early nineteenth centuries.
- Students will be able to debate historical questions and historiographical issues related to the American, French, and Haitian revolutions.

HIST 295 : Latin America in the Age of Revolution, 1750-1850. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: HIST 200 & HIST 252

DESCRIPTION: Examine the origins of the Latin American revolutions for independence, the course of the wars, and the struggles to form new nations. The course considers the issues new nations confronted and the concepts of cultural continuity, including ramifications today.

Course Outcomes

There are no course outcomes available

300-Level Courses

HIST 300 : The Early Middle Ages. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Decline of Rome and the early formative stages of early medieval civilization; analysis of political, economic, and social changes from A.D. 285 to 950.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments in the Early Middle Ages.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to analyze historical questions and place them in a historiographical context.
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers

HIST 301 : The Late Middle Ages. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Europe from 950 to 1350; maturation of medieval civilization; failure of German, success of French leadership; economic, religious, cultural, intellectual trends.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments in the Late Middle Ages.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to analyze historical questions and place them in a historiographical context.
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers

HIST 302 : The Italian Renaissance. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Major political, social, and cultural events in Italy from 1200 to 1530, emphasizing concept of the Renaissance in modern historiography.

Course Outcomes

- Students will understand and be able to analyze the major political, economic, social, and religious developments in Italian Renaissance history
- Students will be able to trace the historiographical evolution of the Italian Renaissance and analyze historical questions within this historiographical context
- Students will refine and improve historical research, writing and analytical skills

HIST 303 : The Reformation: Age of Turmoil. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Sixteenth-century religious upheaval; ideological, cultural, political, and socioeconomic struggles to mid-seventeenth century.

Course Outcomes

- Students will be able to explain and analyze the major religious developments in Europe during the Reformation (1500-1700).
- Students will be able to analyze and interpret primary source documents.
- Students will be able to analyze and interpret secondary source documents
- Students will be able to interpret and debate the meanings and historical value of primary and secondary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 304 : The Expansion of Europe, 1400-1800. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Early voyages of discovery and the actions of Europeans in the wider world from about 1400 to 1800.

Course Outcomes

There are no course outcomes available

HIST 305 : The Age of Enlightenment. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Developments in Europe from 1650 to the French Revolution, emphasizing political thought, science, and philosophy in the Enlightenment.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, intellectual, and cultural developments in Europe between 1650 and 1815.
- Students will be able to analyze and interpret primary source documents.
- Students will gain experience in historical research and improve writing skills
- Students will analyze historical questions and place them in historiographical context
- Students will understand the ideas central to the Enlightenment.

HIST 306 : Nineteenth-Century Europe. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Political, economic, social, and intellectual history of Europe from 1815 to 1914.

Course Outcomes

- Students will understand and be able to explain and analyze the international affairs and the political, intellectual, social, and economic history of Europe from 1815-1914
- Students will understand how to use and will be able to analyze and interpret primary source documents.
- Students will be able to review, critique, and evaluate historiographical works from a variety of European nations, as well as analyze historical questions and place them in a historiographical context.
- Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts.

HIST 307 : Europe Since 1914. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: International affairs and political and economic history of major European countries (including Russia) from World War I to the present.

Course Outcomes

- Students will understand and be able to explain and analyze the international affairs and the political, cultural, military, social, and economic history of Europe from the two world wars until the present
- Students will understand how to use and will be able to analyze and interpret primary source documents.
- Students will be able to review, critique, and evaluate historiographical works.
- Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts.
- Students will be able to analyze historical questions and place them in a historiographical context.
- Students will be able to analyze and discuss current events from more than one national viewpoint.

HIST 308 : The Mediterranean. (3:3:0)

DESCRIPTION: Examining the historiography and key political, cultural, economic, and social developments of the Mediterranean in the medieval and/or early modern periods.

Course Outcomes

- Students will understand and be able to analyze the major political, economic, social, and religious developments in Mediterranean history
- Students will be able to trace the historiographical evolution of Mediterranean history and analyze historical questions within this historiographical context
- Students will refine and improve historical research, writing and analytical skills.
- Students will refine and improve oral presentation skills.

HIST 309 : European Revolutions Since 1500. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Social and political revolutions in European history since 1500. Successful and unsuccessful cases of state breakdown; the Dutch Revolt, English Revolution, French Revolution, Revolution of 1848, and Russian Revolution.

Course Outcomes

- Students will gain a historical consciousness by demonstrating knowledge about crisis and change in European societies.
- Students will acquire the ability to evaluate and analyze historical documents
- Students will understand the way evidence is used to construct historical arguments.
- Students will gain experience collaborating with each other in formulating and carrying out a research project using historical research skills.

HIST 310 : European Economic History. (3:3:0)

WHEN TAUGHT: Spring Odd Yrs.

DESCRIPTION: Economic development of Europe from antiquity to the early twentieth century; impact of the economy on social and political institutions.

Course Outcomes

- Students will acquire content knowledge about the economic history of Europe from antiquity to the present
- Students will master the skills necessary to summarize, evaluate, and critique historical arguments.
- Students will understand the way evidence is used to construct historical arguments.
- Students will pose historical questions and support them with appropriate evidence
- Students will gain experience collaborating with each other in formulating and carrying out a research project using historical research skills.

HIST 312 : History of Ideas. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Interrelationship of influential ideas and historical events from the end of the eighteenth century to the present.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Recognize the usefulness, but also the problematic nature of historical periodization.
- Develop interdisciplinary, synthetic, thinking skills, particularly in being able to see history in cultural artifacts and then identify and place these into discursive contexts.
- Relate and trace how ideas continue to influence societies and their institutions
- Awaken in you the realization of how certain modes of modern thought that you might have taken for granted

as having existed "forever" can be seen as developments in response to specific historical circumstances.
- Explain how ideas, when extended to their logical conclusions, may challenge your personal world view and consider, as well as articulate, how to resolve such conflicts.
- Write an intellectual history research paper.
- Identify broadly how different approaches to intellectual history operate, e.g. Lovejoy, Cambridge School (Skinner), Berlin, Koselleck, Strauss, etc.

HIST 314 : European Fascisms, 1914 to Present. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Political, cultural, and social bases of fascist movements, especially in Italy, Germany, and Spain. Rise to power, family policies, warfare, propaganda, racism, genocide, neofascisms.

Course Outcomes
- Students will understand and be able to explain and analyze the origins, impacts, foreign policy, theories, and legacy of Fascism, Nazism, and other competing political ideologies
- Students will understand how to use and will be able to analyze and interpret primary source documents and secondary historiographical works.
- Students will understand how to research and write.
- Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 315 : European Jews and the Holocaust. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Attempted genocide of European Jews by Hitler's Third Reich; motives, methods, and implications.

Course Outcomes
- Study the genocide of European Jews by Hitler's Third Reich and to explore the motives, methods, and implications of this, as well as the fundamental questions thrown into relief by it.
- Analyze key issues that informed the Holocaust, the context and processees related to it, and to engage with the debates ignited by its legacy. Further develop proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources.
- Foster specific skills of critical thinking, argumentative and narrative writing, as well as careful reading. Analyze historical questions and issues clearly, assess historical information accurately and distinguish between questionable and valid historical assertions.
- Skillfully integrate data into coherent arguments expressed through a clear, well-written style in exams, papers, and class discussion.

HIST 317 : The Family and the Law in American History. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: HIST 217

DESCRIPTION: The interaction of families with law and government as illustrated in original American sources; individual family histories reconstructed in the broader perspective of history.

Course Outcomes
There are no course outcomes available

HIST 318 : European Women's History. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

RECOMMENDED: Hist 200.

DESCRIPTION: European women and gender from 1400 to the present.

Course Outcomes
- Students will be able to understand and explain major trends in European women's experiences and history since 1400
- Students will be able to analyze and synthesize historiographyof women's history, gender history, and feminism
- Students will read, analyze, and write about primary and secondary sources and explain their connections to one another
- Students will interpret important shifts or trends in the experience of women and attitudes about gender. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends
- Working in tandem with each other students will have opportunities to question, investigate, and interrogate contemporary attitudes to women and men's history and gender and how these affect interpretations of the past.

HIST 319 : The Family in Europe. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Nature and development of marriage and family life and structure from the ancient to modern era.

NOTE: Independent Study also.

Course Outcomes
- Students will be able to understand and explain major trends in European family life, relationships, and law between 1100 and the present
- Students will be able to analyze and synthesize historiography of family history
- Students will read, analyze, and write about primary and secondary sources and explain their connections to one another.
- Students will interpret important shifts or trends in the experience of family functions and relationships and their connections with the law. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends.
- Working in tandem with each other students will have opportunities to question, investigate, and interrogate historical experiences and historiographic interpretations

HIST 320 : Society in Europe. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Common life in Europe from 1500 to the present: family problems, social customs, marriage, superstition, death, diet, work, hardships, migration, and childhood.

Course Outcomes

- Students will be able to explain and analyze themes and trends in European social history in both the early modern and modern periods.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to analyze and interpret secondary source documents
- Students will be able to interpret and debate the meanings and historical value of primary and secondary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 322 : English History to 1689. (3:3:0)

OFFERED: Independent Study also.

DESCRIPTION: Political, social, and cultural developments from prehistoric times to the Glorious Revolution. Medieval, Tudor, and Stuart periods.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments inengland to 1689.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 323 : English History Since 1689. (3:3:0)

DESCRIPTION: Emergence of Britain as a great colonial and industrial power, as well as more recent decline of Britain's influence. Emphasis also on cultural developments.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments in England Since 1689.
- Students will be able to analyze and interpret primary source documents
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 324 : France. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: French history from Roman times to the present, emphasizing the French Revolution, Napoleon, and subsequent developments.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments in French history between approximately 700 and 1950.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 325 : Spain. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Political, social, and economic factors in Spanish history from Roman times to present. Emphasis on Reconquest, Golden Age, and Civil War.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, intellectual, and cultural developments in Spain from Roman times to the late twentieth century
- Students will be able to analyze and interpret primary source documents.
- Students will gain experience in historical research and improve writing skills.
- Students will analyze historical questions and place them in historiographical context.

HIST 326 : The History of Mexico. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: The historical evolution of Mexico including pre-Colombian civilizations, the Spanish conquest, the colonial era, national formation, and the modern Mexican state. The impact of foreign relations on Mexican society.

Course Outcomes

- Students will gain an understanding of the challenges Mexico faced during the transitions from pre-Colomiban empires to the colonial period, as well as from the colonial period to the national era.
- Students will gain an understanding of the principle factors that created and transformed modern Mexican society, principally the Porfiriato, the Mexican Revolution, and the modern Mexican state structure (twentieth century).
- By way of supplementary readings and writing assignments, students will gain a stronger understanding of the

social andcultural issues in Mexican history that have been shaped by the nation's unique political and economic conditions.
- Students will explore the scholarship and sources for a single issue in Mexican history, producing a research paper based on primary and secondary sources
- Students will develop oral proficiency in debating controversialhistorical and contemporary issues during class discussion, including debates on decisive factors in the Spanish conquest, immigration, and bi-national solutions to drug trafficking.

HIST 327 : Italy in the Modern World Since 1848. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Political, social, economic, and cultural history of Italians and the Italian peninsula in Europe and the world, including nationalism, church and state, migration, Mafia, fascism, and European union.

Course Outcomes
- Students will understand and be able to explain and analyze contemporary Italian history, including themes of economic development, state formation, fascism, internationalism, and church/state relations.
- Students will understand and will be able to analyze and interpret primary source documents and secondary historiographical works.
- Students will understand how to research and write.
- Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts.
- Students will be able to analyze historical questions and place them in a historiographical context.
- Students will be able to present a topic and argument in class with multimedia and discussion

HIST 328 : Modern Germany. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, military, economic and cultural development of Germany during the nineteenth and twentieth centuries.

Course Outcomes
- Understand how historians interpret the German past.
- Alert you to how historians construct their narratives.
- Read and dismantle primary and secondary sources.
- Synthesize material from interdisciplinary sources.
- Show essay skills by writing timed essays on a set of primary and secondary sources.
- Demonstrate your ability to use primary sources in a research project.

HIST 330 : Tsarist Russia. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Political, economic, social, and cultural trends and events in Russian history to 1917.

Course Outcomes
There are no course outcomes available

HIST 331 : Soviet Union and Post-Soviet Russia. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: History of the Soviet Union and post-Soviet developments in Russia and other successor states; governing structures and ideology and the relationship between state and society.

Course Outcomes
There are no course outcomes available

HIST 332 : Scandinavian History. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Political, social, religious, cultural, and economic factors in Denmark, Finland, Iceland, Norway, and Sweden from Viking era to present highly developed society.

Course Outcomes
- Students will be able to learn about Scandinavian history from prehistoric times through to the Viking Age, Middle Ages/Renaissance to the Era of Swedish Great Power Politics and Great Northern War, in the 1600s and early 1700s.

secondary sources.
- Skillfully integrate evidence into a coherent argument or narrative expressed through a clear, well-written style and through oral communication.

HIST 335 : Crusades. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Age of Holy Wars in the eastern Mediterranean and Near East, 1050-1300. Focus on both Europe and Near East.

Course Outcomes
- Students will be able to explain and analyze the major political, economic, social, cultural and religious developments during the crusades, c. AD 1050-1300
- Students will be able to analyze and interpret translations of primary source documents from the age of the Crusades.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 336 : South African Liberation Movements. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Reading and discussion on the history of the struggle for human rights in South Africa, particularly during the time of apartheid (1948-1990).

Course Outcomes
There are no course outcomes available

HIST 337 : Pre-modern Korea. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, economic, and social history of Korea from antiquity to 1850.

Course Outcomes
- An understanding of the major features of Korean history and culture both in breadth and in depth.
- An understanding of Korean history contextualized both within the framework of Korean history and in relationship to other histories and other constructions of history.
- The ability to think and write about issues in Korean history in a critical and compelling manner.

HIST 338 : Modern Korea. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Political, economic, and social history of Korea from 1850 to the present.

Course Outcomes
- Students will be able to describe the most significant aspects of the polity, economy, society and ideology of Korea from 1850 to the present.
- Students will be able to recognize and analyze change over time in East Asia
- Students will be able to evaluate and apply primary source texts to broad historical themes
- Students will be able to conduct individual research and situate it in the broader historical context

HIST 340 : Traditional China. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: From a loose federation of Neolithic societies, Chinese civilization emerges as East Asia's dominant political and cultural force; developments to ca. 1500.

Course Outcomes
- Students will be able to explain and analyze the major social, political, economic, intellectual and cultural developments in the history of Early China (ca. 5000 BC–220 AD
- Students will demonstrate a basic geographical knowledge of China, including significant geological features and major historical cities Moreover, they will be able to discuss how geographical and environmental realities have impacted historical development.
- Students will be able to analyze and interpret primary source documents, both in writing and in class discussions
- Students ability to identify arguments (assertions, claims, theses) and analyze supporting evidence in secondary scholarship should improve.

HIST 341 : China Since 1200. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Economic and political foundations of modernity during high Imperial China; challenge of new order from the West; rise of Chinese nationalism, revolution, and development to the present.

Course Outcomes
There are no course outcomes available

HIST 343 : Traditional Japan. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Political, social, religious, and cultural developments to ca. 1700.

Course Outcomes
- Students will be able to explain and analyze the major political, economic, social, and cultural developments in Japanese history until around 1600.

Students will be able to analyze and interpret primary source documents.
- Students will be able to interpret and discuss the meanings and historical and historiographical value of primary and secondary source texts.
- Students will be able to analyze historical arguments and place them in a historiographical context.

HIST 344 : Modern Japan. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Main themes in Japanese history from Tokugawa times to the present.

Course Outcomes
- Students will be able to explain and analyze the major political, economic, social, and cultural developments in Japanese history from approximately 1600 to the present.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to interpret and discuss the meanings and historical and historiographical value of primary and secondary source texts.
- Students will be able to analyze historical arguments and place them in a historiographical context.

HIST 347 : Chinese Cultural History. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Methods and approaches of the cultural historian; in-depth investigation of a selected topic in Chinese cultural history. Topics may include women, Silk Roads, material culture, etc.

Course Outcomes
- Students will be able to explain and understand the methods and approaches of the cultural historian through an investigation of select topics in Chinese cultural history.
- Students will be able to analyze and interpret primary source documents, both in writing and in class discussions
- Students ability to identify arguments (assertions, claims, theses) and analyze supporting evidence in secondary scholarship should improve

HIST 348 : Modern South East Asia. (3:3:0)

DESCRIPTION: Complex history of the varied nations of this vast area: religion, colonialism, nationalism, independence.

Course Outcomes
- Gain a historical consciousness by demonstrating a knowledge of major developments in South East Asia and world history and understand key historical terms and theories.
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions by using the historical method of research effectively by skillfully and honestly using primary and secondary sources.
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

HIST 349 : History of Asian Religions and Thought. (3:3:0)

DESCRIPTION: Major themes in religion, philosophy, and ideas in Asia.

Course Outcomes
- Students will be able to understand and analyze key concepts in Chinese thought and religion as well as the logic behind core beliefs and practices
- Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.

HIST 350 : British Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methods for reconstruction of individual families and development of demographic and family history studies in England, Scotland, and Wales.

Course Outcomes
- Students will be able to explain and use fundamental genealogical (and some historical) resources and methodologies for English and Welsh research since 1700
- Students will evaluate, analyze, and corroborate genealogical information from both original and compiled sources. Students will know and use established citation standards.
- Students will explain how various pieces of information are combined in order to trace the same individual over various records and across the lifespan
- Students demonstrate how evidence is used to prove the links between generations

HIST 351 : Germanic Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Germanic areas of Europe.

Course Outcomes
There are no course outcomes available

HIST 352 : Scandinavian Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Denmark, Norway, Iceland, Sweden, and/or Finland.

Course Outcomes
There are no course outcomes available

HIST 353 : Southern European and Latin American Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geo-historical background, paleography, and methods for reconstruction of individual families; development of demographic and family history studies which may include Portugal, Spain, France, and Italy and their colonies in the Americas.

Course Outcomes
There are no course outcomes available

HIST 354 : Slavic Family, Local, and Social History Research. (3:3:0)

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families; development of family history studies in Slavic areas of Europe.

Course Outcomes
- Students will be able to describe the key content of major family history sources in Slavic research.
- Students will become somewhat proficient at reading old Slavic documents.
- Students will become acquainted with actually using family history primary and secondary sources, on film or otherwise available, at the world's largest genealogical repository, the Family History Library in Salt Lake City

HIST 355 : History of Argentina. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Rise of modern Argentina from colonial times, focusing on the dynamic political, economic, social, and cultural developments since independence.

Course Outcomes
- Learn and understand more about the historical processes that have shaped the nation of Argentina from colonial times up to the present.
- To be able to discuss and explain those processes through the written and spoken word with clarity, persuasiveness, and proper use of evidence
- To write a well written, organized, and developed term paper using the critical thinking and writing skills of a historian
- To be able to read primary sources and discuss their utility in constructing historical arguments.

HIST 356 : Brazil. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: From 1500 to present, emphasizing relationship between colonial patterns and twentieth-century reality and dilatory transformation of Brazil's political and economic culture.

Course Outcomes
- Students will become academically conversant in the major social, economic, and cultural developments of Brazil’s history since 1500.
- Students will be able to analyze and evaluate the content and meaning of primary sources, and through critical interpretation, draw reasonable conclusions.
- Students will be able to formulate original historical questions and answer them by careful and systematic research in primary and secondary sources.
- Students will be able to write history that is coherent and persuasive by following discipline's norms for writing and careful documentation.

HIST 357 : The Indian in Latin American History. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: History of Latin American Indians from preconquest days to the present; achievements, contributions, and problems.

Course Outcomes
- Students will be able to explain and analyze the political, economic, social, religious, and cultural structures of the Mayas, Aztecs, and Incas, how they were transformed by the Spanish conquest, and how they developed in reaction to European colonialism.
- Students will be able to analyze and interpret primary source documents.
- Students will gain experience in historical research and improve writing skills.
- Students will analyze historical questions and place them in historiographical context.

HIST 358 : Gender and History in Latin America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: How gender roles have been defined legally, socially, and culturally in Latin America from the colonial period to the present, emphasizing the nineteenth and twentieth centuries.

Course Outcomes

- To understand how gender relations and gender roles developed in Latin America from colonial times to the present.
- To be able to discuss and explain those developments through the written and spoken word with clarity, persuasiveness, and proper use of evidence.
- To write a well written, organized, and developed term paper using the critical thinking and writing skills of a historian.
- To be able to read primary sources and discuss their utility in constructing historical arguments.

HIST 359 : Inter-American Relations. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Decline of Europe's American empires, legacies bequeathed to the new republics by their European heritage, and how those legacies have affected relations among the various American republics.

Course Outcomes

- Students will gain an understanding of the major historiographical schools of thought in Inter-American relations
- Students will gain an in-depth understanding of at least one major figure in Inter-American relations each term the class is taught by way of reading primary sources and writing about the legacy of that individual.
- Students will be exposed to a variety of thematic approaches to Inter-American relations, including gender, health and the environment, culture, tourism, film, and literature. It is expected that these alternatives to traditional diplomatic relations will inform their selection of a research topic for the course.
- Students will write a research paper focusing on one of the thematic approaches presented in class and informed by primary sources, as well as secondary literature, in order to arrive at a stronger understanding of Inter-American relations.
- Students will obtain a stronger cross-cultural understanding of Inter-American relations by debating and discussing issues, informed by our class readings, during our weekly discussions. At times students will be asked to embrace perspectives that they may not entirely agree with or understand.
- Students will become conversant with the watershed events of the Haitian Revolution, the Latin American Revolutions, the Spanish American War, the Cuban Revolution, and the Washington Consensus,and why they have been critical to the tenor of Inter-American Relations.

HIST 360 : American West to 1900. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: The American West as a place of great diversity. Topics include Native American societies, European colonization, explorations, the fur trade, overland migrations, Indian relations, mining, settlement, and the environment.

Course Outcomes

- Students will be able to explain and interpret major developments and historical terms in the history of the American West before 1900.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

HIST 361 : The American West Since 1900. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Pivotal developments in the twentieth-century West, including urbanization, Sun Belt migration, political protest, labor history, Native American history, immigration, water policy, tourism, military-industrial complex, Hollywood.

Course Outcomes

- Students will be able to explain and interpret major developments and historical terms in the history of the American West since 1900.
- Students will be able to interpret primary documents and use evidence from those documents to support historical assertions and interpretive generalizations.
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

HIST 362 : France and the Atlantic World to 1804. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: French exploration and colonization; relations with native peoples; colonial societies in the Caribbean, Louisiana, the Mississippi Valley, and Canada; slavery and the Haitian Revolution; persistence of French territories and francophone populations.

Course Outcomes

- Students will be able to explain and assess the major events and processes related to the evolution of the French empire from the medieval period through the early nineteenth century
- Students will be able to interpret primary source documents related to the French, African, and Native American actors within French imperial history.
- Students will become familiar with the historiographical debates surrounding the French presence in the New World.

HIST 363 : The Spanish Frontier in North America. (3:3:0)

DESCRIPTION: Spanish exploration, occupation, and institutions of northern Mexico, the American southwest, and Florida, 1521-1821; Mexican period to 1848.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments in the history of the Spanish and Mexican northern frontier in North America between approximately 1492 and 2011
- Students will be able to analyze and interpret primary source documents

- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

HIST 364 : Utah. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Contributions of Native Americans, explorers, mountain men, miners, government officials, Mormons, and other groups in the nineteenth century. Impact of national movements, various peoples, politics, economics, and social and cultural change in the twentieth century.

Course Outcomes

There are no course outcomes available

HIST 365 : American South. (3:3:0)

DESCRIPTION: Political, economic, and cultural history of the southern states from colonial times to the present.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, cultural, religious, and intellectual developments in the history of the American South from European contact to the present
- Students will able to analyze an important historical question in the history of the South.
- Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.
- Students will be able to isolate the theses and supporting arguments of secondary sources on the history of the South.
- Students will be able to analyze primary sources on the history of the South.

HIST 366 : Slavery and the Slave Trade in Africa and the Atlantic World. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Major social, political, economic, and cultural developments in the history of slavery in Africa and the Americas between the 15th and 19th centuries, taking the lands and the people of the Atlantic Ocean region as a geographical unit.

Course Outcomes

- Students will be able to explain and analyze the major social, political, economic, and cultural developments in the history of slavery in the Atlantic World between the 15th and 19th centuries.
- Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.
- History teaching majors will start to apply information and ideas from the course to future teaching.

HIST 367 : Slavery in the United States. (3:3.0:0.0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Historical themes and developments of slavery in the U.S.

Course Outcomes

- Students will be able to explain and analyze the major social, political, economic, and cultural developments in the history of slavery in North America from the 17th century through 1865
- Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.
- History teaching majors will start to apply information and ideas from the course to future teaching.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 368 : Sport, Society, and American Culture. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Development of sports in American society, emphasizing ethnic and racial groups, social classes, gender, gambling, politics, and social mobility.

Course Outcomes

- Students will be able to explain the major social, cultural, and historical developments in American sport history.
- Students will be able to evaluate the relationship between sports and race, class, and gender issues in American history.
- Students will understand the major historiographical debates in American sport history.

HIST 369 : Travel and Tourism in America. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: The history of travel and tourism in America to the present. Themes include changing technology, consumerism, nationalism, and social identities in contructing the tourist experience.

Course Outcomes

- Understand the theoretical approaches in the field, including concepts such as authenticity, tourist gaze, scripted space, leisure and modernity, and social science approaches to the study of tourism.
- Demonstrate knowledge of the major developments in travel and tourism infrastructure and explain the causal forces driving those changes.
- Explain how social identities of race, class, gender, and nationality have shaped the tourist experience.
- Assess primary sources for historical analysis of tourism and understand the limits and possibilities of each, including travel narratives, ephemera, still images, guides, memoirs, etc.
- Demonstrate historical change in tourism by researching and writing about a specific topic or approach to tourism in a paper that follows conventions of historical scholarship, and by presenting findings to the class.

- Appreciate global impact of tourism on the environment, international relations, and commerce.

HIST 370 : Colonial America. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Establishment, growth, and development of the American colonies to 1763.

Course Outcomes

- Students will demonstrate an understanding of the major events and issues in colonial American history and historiography.
- Students will be able to identify, evaluate and locate appropriate primary and secondary sources for colonial American history.
- Students will be able to create and support an argument based on a major issue in colonial American historiography, using primary and secondary sources.
- Students will be able to identify and critically respond to the argument of a historical monograph.

HIST 371 : Revolutionary America. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Causes and consequences of the American Revolution, the confederation era, and the framing of the Constitution.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments in Revolutionary America.
- Students will be able to analyze and interpret primary source documents.
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 373 : Civil War Era, 1848-1877. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Causes of the war, major military events (leaders, campaigns, soldiers), war on the home fronts, why the South lost, Reconstruction, the legacy of the war.

Course Outcomes

- Students will be able to explain and analyze the main themes and developments of the Civil War and Reconstruction, as well as their roots and legacy.
- Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.
- History teaching majors will start to apply information and ideas from the course to future teaching.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 374 : U.S. History from 1890 to 1945. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: HIST 220 & HIST 221

DESCRIPTION: Political, economic, and social movements and ideas that trace rise of U.S. as a world power in first half of twentieth century.

Course Outcomes

- Students will be able to explain and interpret major developments and historical terms in the history of the United States between 1890 and 1945.
- Students will be able to interpret primary documents and use evidence from those documents to support historical assertions and interpretive generalizations
- Students will hone their ability to skillfully and honestly evaluate historical arguments in secondary sources.

HIST 375 : Joseph Smith in Mormon History and Historiography. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Exploring the life and thought of Joseph Smith and crucial moments in Mormon history through primary source documents and subsequent historiography.

Course Outcomes

- Students will be able to summarize and assess key aspects of the historiography of Joseph Smith.
- Students will be able to contextualize and explain primary source documents relating to Joseph Smith.
- Using their knowledge of both secondary and primary sources, students will be able to critique competing interpretations of Joseph Smith's life.
- Students will enhance their verbal communication skills through participation in class discussion.

HIST 376 : U.S. History from 1945 to 2000. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Movements and ideas that shaped society, politics, economy, and diplomacy of the United States from 1945 to 2000.

Course Outcomes

- Students will be able to explain and analyze the major political, social, diplomatic, economic, cultural, and constitutional developments in U.S. history from 1945 to the present.
- Students will be able to analyze, interpret, and debate the meanings and historical significance of primary source documents.
- Students will be able to produce an original, analytical, and primary source based historical essay examining a key issue, theme, or individual from U.S. history since 1945.

HIST 378 : American Family History. (3:3:0)

DESCRIPTION: History of American families from colonial period to the present.

Course Outcomes

- Students will be able to explain and analyze the major intellectual, economic, religious, social, cultural, and political developments affecting changes in American families of various races, classes, and regions from 1607 to the present.
- Students will be able to analyze an important historical question in the history of American families
- Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.
- Students will be able to isolate the theses and supporting arguments of secondary sources on the history of American families.

HIST 379 : U.S. Religious History to 1860. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Religious developments from colonial times to 1860.

Course Outcomes

There are no course outcomes available

HIST 380 : U.S. Religious History Since 1860. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Examines religious people, institutions, beliefs, and practices in U.S. history since the Civil War.

Course Outcomes

There are no course outcomes available

HIST 382 : Mormonism in the American Experience. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Social, economic, political, intellectual, and religious environment in which Mormonism flourished; contributions of Mormon men and women to American culture and history.

Course Outcomes

- Students will be able to summarize and assess key aspects of how Mormonism has been situated in the larger cultural and religious geography of America
- Students will learn how particular primary sources provide key building blocks in prominent interpretations of the place of Mormonism in American history
- Students will become acquainted with, and learn to assess the academic conversation concerning Mormonism
- Students will enhance their verbal communication skills through participation in class discussion.

HIST 383 : African-American History, 1865 to Present. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

RECOMMENDED: Hist 200, 220, 221.

DESCRIPTION: Social, economic, intellectual, political factors; struggle for racial equality; race and gender relationships; how changing ideas of race affect American life and politics.

Course Outcomes

- Students will be able to identify and analyze major themes in African-American History from emancipation and the rise of Jim Crow to the beginning of the 21st century. They will also be able to recognize the ways that shifting notions of race have shaped (and continue to shape) American life and politics.
- Students will be able to analyze, interpret, and evaluate primary sources
- Students will be able to interpret and debate the meanings and historical value of primary sources with their peers.
- Students will be able to analyze and create historical questions and place them in a historiographical context.
- Students will demonstrate proficiency in using historical methods of research and in integrating data into a coherent argument expressed through a clear, well-written style.
- Students will be able to use their training in African American history to serve their community.

HIST 384 : United States Women's History. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Survey course of women's experience in American culture and society from the Puritans to the present.

Course Outcomes

- Students will be able to explain and analyze the experiences of women in America from the colonial period to the present, the ways that ideas about gender have shaped American life, and significant issues and debates in U.S. Women's history.
- Students will be able to analyze, interpret, and evaluate primary sources.
- Students will be able to interpret and debate the meanings and historical value of primary sources with their peers.
- Students will be able to analyze and create historical questions and place them in a historiographical context.
- Students will demonstrate proficiency in using historical methods of research and in integrating data into a coherent argument expressed through a clear, well-written style.
- Students will be able to apply their understanding of American women's history to current issues and events.

HIST 385 : Latinos in the United States. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: The place of Latin Americans within the context of U.S. history. The growth and development of the largest Latino communities from pre-colonial times to present day and how Latinos may influence future policies within the U.S.

Course Outcomes
- Students will learn the history of Latinos in this country beginning with the circumstances which brought them to this country, the ways they have integrated or resisted integration, and the efforts they have made to claim their rights as citizens.
- Students will learn to interpret the documents and rhetoric of this community which will help them understand the intellectual, cultural and political thought of Latinos over the last 100 years.
- Students will learn the current state of Latino social and cultural integration in the Utah community.
- Students will learn to write a major essay on the history of Latinos in order to understand the literature as well as the primary sources available on this community.

HIST 386 : Nineteenth-Century American Indian History. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: History of various Indian tribes, their cultures, and their relationships with European nations and the United States, including military campaigns.

Course Outcomes
- Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.
- Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture.
- Learn to communicate effectively both orally and in writing about Native American topics
- Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges

HIST 387 : Twentieth-Century American Indian History. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Sociocultural factors that affect twentieth-century native Americans in both urban and reservation settings, including current challenges facing Indian communities.

Course Outcomes
- Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations.
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.
- Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture
- Learn to communicate effectively both orally and in writing about Native American topics.
- Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges.

HIST 388 : Indians in Colonial America. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: North American Indian culture, Indian/European interactions, demographic, social, political factors among Indians prior to contact with Europeans through colonization and the American Revolutionary War.

Course Outcomes
- Students will demonstrate an understanding of the major issues and events in colonial Native American historiography and their modern-day consequences.
- Students will be able to identify, evaluate and locate appropriate primary sources for colonial Native American history
- Students will be able to use primary sources to support an argument based on a major issue in colonial Native American historiography.
- Students will be able to identify and critically respond to the arguments of historical monographs.

HIST 389 : Mormonism Among Christian Theologies: A Comparative History. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Comparison of the historical development and varying constructions of key aspects of Mormon and other Christian thought.

Course Outcomes
There are no course outcomes available

HIST 390R : Special Topics in History. (.5-3:Arr:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

Course Outcomes

There are no course outcomes available

: Family History Research.

Course Outcomes

: Family History Research in Ireland. (.5-3:Arr:Arr)

Course Outcomes

: Family History Research in the Netherlands.

Course Outcomes

: Advanced Southern European Family History Research.

Course Outcomes

: Advanced British Family History Research.

Course Outcomes

: Native American Family History Research. (.5-3:Arr:Arr)

Course Outcomes

HIST 391 : U.S. in Vietnam, 1945-1975. (3:3:0)

DESCRIPTION: U.S. involvement in the wars in Vietnam from both a domestic and international perspective, focusing on the conflict independently and in context of the broader Cold War.

Course Outcomes

- Students will be able to explain and analyze political, social, cultural, diplomatic, and military developments; short- and long-term influences; and ramifications or "lessons" deriving from the U.S. experience during the Vietnam War from 1945 to 1975 from both a domestic and international perspective.
- Students will be able to analyze, interpret, and debate the meanings and historical significance of primary source documents.
- Students will be able to produce an original, analytical, and primary source based historical essay examining a key issue, theme, or individual from the U.S. experience in Vietnam.

HIST 392 : U.S. Constitutional History. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Constitutional traditions and constitution making, federalism, and constitutional notions of political equity and social justice, from the colonial period to the present.

Course Outcomes

- Students will be able to explain and analyze the major political, economic, social, and religious developments that led to the U.S. Constitution
- Students will be able to analyze and interpret primary source documents.
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.
- Students will be able to analyze historical questions and place them in a historiographical context.

HIST 393 : U.S. Foreign Relations. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: U.S. diplomatic history from the American revolution to the present; examines major themes and critical events within both domestic and international contexts.

Course Outcomes

- Students will be able to explain and analyze the major themes and problems in the making, implementation, and evolution of U.S. foreign relations from 1776 to the present.
- Students will be able to analyze, interpret, and debate the meanings and historical significance of primary source documents.
- Students will be able to produce an original, analytical, and primary source based historical essay examining a key issue, theme, or individual from the history of U.S. foreign relations.

HIST 394 : Scripture in American History. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Scriptural texts in U.S. history across various religious traditions and across time, with attention to questions of authority, translation, interpretation, and reception.

Course Outcomes

There are no course outcomes available

HIST 395 : Technology in America. (3:3:0)

DESCRIPTION: Benefits and liabilities of technological complexity.

Course Outcomes

- Students will be able to explain and analyze how machines have shaped American society from the age of exploration to the present.
- Students will be able to analyze and critique secondary sources in a coherent and well-written argument.
- Students will be able to isolate the theses and supporting arguments of secondary sources on the history of

technology.

HIST 396 : Historical Narrative: A Writing Workshop. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

RECOMMENDED: Hist 200, 220, 221.

DESCRIPTION: Workshop in writing narrative history, emphasizing the problems of writing historical narrative. Theories and examples of narrative history.

Course Outcomes

- Students will demonstrate an understanding of the genres of historical writing and their historiography
- Students will be able to critically evaluate primary and secondary sources
- Students will be able to write historical narratives in several different genres
- Students will be able to identify and critically respond to arguments of historical monographs, articles, and primary sources

HIST 397 : Historical Literacies in United States History. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Historical literacy within the context of U.S. history; preparation of instructional materials and field experiences for elementary and secondary education students.

Course Outcomes

- Prospective teachers will identify methods for helping their pupils develop a more sophisticated understanding of the nature of hisotyr as a discipline.
- Prospective teachers will identify instructional strategies that help students approach historical inquiry from a more mature epistemic stance.
- Prospective teachers will consider the heuristics historians use in engaging in historical inquiry and how students can be taught to use these heuristics.
- Prospective teachers will consider the wide variety of textual genres that historians and archeologists use as evidence about the past.
- Prospective teachers will consider second order concepts, or metaconcepts, that pupils must understand in order to become historically literate.
- Prospective teachers will practice instructional methods that biuild students' ability to make inferences, engage in historical empathy, and engage in perspective taking, and other skills associated with historical literacy.
- Prospective teachers will explore instructional strategies that help students use historical evidence to support their independently developed historical interpretations.
- Prospective teachers will engage, as students, in model activities designed to build the participants' ability to read, reason, and write with historical texts.
- Prospective teachers will create a series of text sets, including primary sources, that they will be able to use to build their students' historical literacies.
- Prospective teachers will construct lesson plans and will execute these plans in elementary and/or secondary classrooms.
- Prospective teachers will reflect on methods for improving their instructional activities.
- Prospective teachers will review through documents and artifacts major themes in US history.
- Prospective teachers will explore options for curriculum mapping in developing a scope and sequence for a US history course.

400-Level Courses

HIST 420 : Latin Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Interpretation of handwriting within historical contexts in Latin ecclesiastical and notarial documents useful in family, local, and social history research, including church registers, notarial settlements of estates, probate records, and inventories; medieval to modern periods.

Course Outcomes

- Students will learn the most common Latin scripts
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 421 : English Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Interpretation of handwriting within historical contexts in vernacular scripts in the British Isles, sixteenth through eighteenth centuries, in sources useful in family, local, and social history research.

Course Outcomes

- Students will learn the most common scripts (hands) and documents in use in Britain and its colonies between 1500 and 1850.
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 422 : Germanic Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the German kingdoms, sixteenth through eighteenth centuries, in family history sources.

Course Outcomes

- Students will be able to: 1. Use various types of German reference and research tools 2. Recognize different types of German written and printed documents 3. Understand important historical and cultural aspects of Germany 4. Know the procedures for resolving difficult genealogical and historical research problems

HIST 423 : Slavic Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Slavic language areas of Eastern Europe, sixteenth through eighteenth centuries, in family history sources.

Course Outcomes

There are no course outcomes available

HIST 424 : Romance Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of handwriting in vernacular scripts in the Romance languages of Europe (especially Spanish, French, and Italian), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes

- Students will be able to read with fluency documents in italic style handwriting;
- Students will be able to recognize and use documents and understand the legal, ecclesiastical and civil systems behind them;
- Students will be able to understand basic concepts of paleography and the impacts of language on the historical development of handwriting
- Students will be able to develop familiarity with secretary (cortesana or procesal) handwriting

HIST 425 : Scandinavian Language Handwriting and Documents. (3:3:0)

DESCRIPTION: Interpretation of old Gothic script handwriting in Scandinavian areas of Europe (including Denmark, Norway, Sweden, Finland, and Iceland), sixteenth through eighteenth centuries, in family history sources.

Course Outcomes

- Students will be able to read at a basic level, old gothic-script Norwegian, Danish, Swedish and Finnish documents, from the 1600s on up.
- Students will be able to use Scandinavian conversion calendars, to convert Latin feast dates to regular Julian calendar dates.
- Students will be able to read, at a basic level for content from Scandinavian printed documents. of the 1700s and 1800s.

HIST 430R : (Hist-Clscs) Topics in Greek and Roman History. (3:3:0)

PREREQUISITE: ClCv-Hist 304 and Greek 201 (Greek topics) or ClCv-Hist 307 and Latin 201 (Roman topics).

DESCRIPTION: Topics vary (e.g., rise of the Greek city-state, Greek political thought, classical historiography, Rome and the Etruscans, imperial Rome).

Course Outcomes

- By approaching primary historiographical texts and secondary scholarship treating the History of Greece or Rome (depending upon the special topic chosen for the course), successful students will come to understand the history of Greece and Rome. Topics may fall anywhere within the range of events from Bronze Age Greece to the end of the Roman Empire.
- Successful students will consider available primary sources for Greek and Roman history, both prose and verse literature, and learn how to evaluate the reliability of those sources.
- Through oral reports, examinations, and research papers successful students will demonstrate the ability to critically evaluate complex historical issues and to develop original interpretations of those issues.

: (Hist-Clscs) Topics in Greek and Roman History.

Course Outcomes

: Archaic Greece.

Course Outcomes

: Greek City-State.

Course Outcomes

: Classical Historiography.

Course Outcomes

: Hellenistic World.

Course Outcomes

: Greek Political Thought.

Course Outcomes

: Rome and Etruscans.

Course Outcomes

: Rise of Rome.

Course Outcomes

: Roman Revolution.

Course Outcomes

: Imperial Rome.

Course Outcomes

: Roman Politics.

Course Outcomes

: Roman Religion.

Course Outcomes

: Augustan Rome.

Course Outcomes

: Archaic Greece.

Course Outcomes

: Athens: Rise and Fall.

Course Outcomes

: 4th Century Greece.

Course Outcomes

: Late Roman Empire.

Course Outcomes

: World of New Testament.

Course Outcomes

: Early Chrisitanity.

Course Outcomes

: Julio-Claudians.

Course Outcomes

HIST 431 : Public History. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Preparing for public history careers by discussing opportunities and responsibilities outside the academy. Examining areas such as museums, archives, film, government, business, and historic preservation. Developing a product and working on a client-based project.

Course Outcomes

There are no course outcomes available

HIST 433 : Writing Narrative Biographies. (3:3:0)

OFFERED: Independent Study also.

DESCRIPTION: Workshop in writing narrative family, local, and social history, emphasizing the problems of writing biographical narrative.

Course Outcomes

There are no course outcomes available

HIST 434 : Computers in Family Historical Research and Publication. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Use of computer programs and the internet in researching family, local, and social history; including programs and techniques for publishing.

Course Outcomes

- Students will be able to stay current on newly published historical materials by using RSS feeds and Google Alerts to notify them of changes in websites, podcasts, weblogs, etc.
- Students will be able to communicate the findings of their historical research and demonstrate a high level of analytical skill through the use of a variety of computerized and online resources.
- Students will be able to locate and use primary source material online, as it continues to be made more available.
- Students will be able to design and use basic, custom relational databases for historical research and analysis.

HIST 439 : Seminar on Professional Family History Research. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: HIST 217

DESCRIPTION: Practicum in professional client research exploring advanced genealogical methodologies.

Course Outcomes

- Students will learn the key methods of family history research in US sources, to solve difficult research problems from the 1700s and 1800s.
- Students will learn, on an advanced level, to analyze sources and read between the lines, to reconstitute complete families from records of the 1700s and 1800s in US sources.

- Students will be able to write and/or compile a variety of research reports for clients, namely, analytical, crossing the pond, bibliographic, and the like, for persons who (in theory) hire them to conduct research on an ancestral family or families.

HIST 477 : History Teaching Methods and Instruction. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Sc Ed 276R; Fingerprinting and FBI clearance; major-specific program requirements.

DESCRIPTION: Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning.
- Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.
- Students will consider variuos methods of assessing student learning.
- Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- Students will consider various types of resources including texts, technology, primary source documents and litertaure that they might use to teach social studies to students with diverse backgrounds and learning styles.
- Students will coordinate and reflect on clinical experiences.

HIST 478 : Practicum in Secondary Education. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Sc Ed 276R; Concurrent enrollment in Hist 477 or comparable major course.

DESCRIPTION: Implementing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning
- Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.
- Students will consider various methods of assessing student learning.
- They will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.
- The course will provide a forum to coordinate and reflect on the prospective teachers' clinical experiences.

HIST 481R : Directed Research in Family History. (.5-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Student research directed by faculty member on family history topic of mutual interest.

Course Outcomes

- Students will identify and clearly articulate a substantive family history research problem.
- Students will produce a written report, project or portfolio demonstrating knowledge of the studied material.

HIST 482 : Capstone Seminar: Writing and Professional Paths in Family History. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: HIST 439

DESCRIPTION: Research seminar; evidentiary analysis and writing skills in preparing a compiled lineage and exploring professional alternatives in family history, including professional accreditation or certification.

Course Outcomes

There are no course outcomes available

HIST 485 : Topical Readings Seminar. (3:3:0)

DESCRIPTION: Reading, discussing, and writing about selected historical issues.

Course Outcomes

- Students will learn and practice fundamental analytical tools for analyzing secondary sources more deeply than is possible in most upper-level history courses
- Better understand how a work of History is put together, learn how to make a fair and detailed judgment of historical work (the act of criticism), all of which will make you better prepared to create History yourself
- Students will, by learning more deeply how a work of history is put together, be better prepared for writing an original research paper in History 490 and for graduate school in either History or a related discipline
- Students will increase their knowledge of the substantive theme of the course, which will rotate (the theme for Fall 2011, for instance, is Changes in Religious Cultures)

HIST 487 : Philosophies of History. (3:3:0)

DESCRIPTION: Fundamental problems and types of historical analysis and interpretation, philosophies of history, and work of outstanding historians.

Course Outcomes

- Demonstrate an understanding of major developments in the history of historical writing
- Learn key historical terms and theories associated with the philosophy of history
- Distinguish between analytical and speculative philosophies of history
- Consider how philosophies of history inform debates in public history and develop oral skills
- Understand debates surrounding reconciling the historians craft and religious belief and develop insights into

how universities sponsored by religious institutions can contribute to higher education

HIST 490 : Capstone Research Seminar. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: HIST 200

DESCRIPTION: Research seminar; critical, analytical, and writing skills in preparation of a senior thesis.

NOTE: Required of all history majors.

Course Outcomes

- Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources
- Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid assertions;
- Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

HIST 495R : Directed Research. (3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's prior consent.

DESCRIPTION: Student research directed by faculty member on topic of mutual interest.

NOTE: Research assistants must do additional work for credit.

Course Outcomes

- Students will identify and clearly articulate a substantive academic research problem.
- Students will produce a bibliography for reading and research using historical standards.
- Students will produce a written report demonstrating knowledge of the studied material.

HIST 496R : Academic Internship: Family, Local, and Social History. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Work-study involving family, local, and/or social history at one or more archives, libraries, publishers, data providers, or research organizations on the international, national, state, or local level, under supervision of a professional genealogist, historian, archivist, or librarian.

Course Outcomes

There are no course outcomes available

HIST 497R : Honors Readings. (.5-3:0:ARR)

WHEN TAUGHT: Contact Department.

Course Outcomes

- Students will read assigned books and articles critically, thoughtfully, and carefully.
- Students will write a review of each book and article demonstrating knowledge and analysis of the studied material.

HIST 498R : Directed Readings. (.5-3:3:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes

- Students will read assigned books and articles critically, thoughtfully, and carefully.
- Students will write a review of each book and article demonstrating knowledge and analysis of the studied material.

500-Level Graduate Courses (available to advanced undergraduates)

HIST 500R : Special Studies in History. (1-3:3:0)

NOTE: Directed by visiting or resident faculty. Check with department secretary for current topics and instructor.

Course Outcomes

There are no course outcomes available

HIST 564 : Sources and Problems in Western U.S. History. (3:3:0)

DESCRIPTION: Lecture, discussion, readings, and student writing on historians' sources and points of view regarding the American West.

Course Outcomes

There are no course outcomes available

HIST 565 : Sources and Problems in Latter-day Saint History. (3:3:0)

DESCRIPTION: Lecture, discussion, readings, and student writing on historians' sources and points of view regarding Latter-day Saint history.

Course Outcomes

There are no course outcomes available

HIST 566 : Sources and Problems in Utah History. (3:3:0)

DESCRIPTION: Lecture, discussion, readings, and student writing on historians' sources and points of view regarding Utah history.

Course Outcomes
There are no course outcomes available

HIST 587 : Philosophies of History. (3:3:0)

DESCRIPTION: Fundamental problems and types of historical analysis and interpretation, philosophies of history, and work of outstanding historians.

Course Outcomes
There are no course outcomes available

HIST 590R : Special Topics. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Western American, religious, family, Asian, Latin American, and Near Eastern history.

Course Outcomes
There are no course outcomes available

HIST 598R : Special Readings in History. (1-3:0:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes
There are no course outcomes available

Native American Studies

Many American Indian and non-Indian students graduating from Brigham Young University in studies such as anthropology, English, education, sociology, history, business, and political science will be brought into contact with Native Americans through their occupations.

The Native American Studies minor is designed to supplement students of various disciplines so that they may become more culturally aware of the heritage of American Indians, thus promoting better understanding and cooperation.

The minor has been designed so that students may select classes from a variety of interdepartmental courses, if desiring a general background, or a combination of classes for an in-depth study in a specific discipline.

At Brigham Young University students can major in American Studies with course work designed to emphasize American Indian history.

Make application to or obtain further information from the History Department.

Hide All Course Descriptions

Program Requirements

1. Complete at least two of the following core courses:

HIST 386 : Nineteenth-Century American Indian History. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: History of various Indian tribes, their cultures, and their relationships with European nations and the United States, including military campaigns.

Course Outcomes

- Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.
- Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture.
- Learn to communicate effectively both orally and in writing about Native American topics
- Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges

HIST 387 : Twentieth-Century American Indian History. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Sociocultural factors that affect twentieth-century native Americans in both urban and reservation settings, including current challenges facing Indian communities.

Course Outcomes

- Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations.
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.
- Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture
- Learn to communicate effectively both orally and in writing about Native American topics.
- Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges.

HIST 388 : Indians in Colonial America. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: North American Indian culture, Indian/European interactions, demographic, social, political factors among Indians prior to contact with Europeans through colonization and the American Revolutionary War.

Course Outcomes

- Students will demonstrate an understanding of the major issues and events in colonial Native American historiography and their modern-day consequences.
- Students will be able to identify, evaluate and locate appropriate primary sources for colonial Native American history
- Students will be able to use primary sources to support an argument based on a major issue in colonial Native American historiography.
- Students will be able to identify and critically respond to the arguments of historical monographs.

2. Complete 15 hours from at least three disciplines:

ANTHR 317 : Native Peoples of North America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

TAUGHT:
DESCRIPTION: Indian groups at the time of the European arrival; social organization, beliefs, values, economy, and adaptation to environment.

Course Outcomes
- Through course assignments, students will gain an introductory knowledge of the major Native American cultures at the time of European contact including but not limited to social organization, belief systems, values, economies, and adaptations to environments.
- Through course assignments and hands-on access to the collections of the BYU Museum of Peoples and Cultures, students will gain a greater depth of knowledge concerning the diverse range of material culture represented by the indigenous peoples of North America.
- Through course assignments, students will increase their skill sets in critical thinking, research, analysis, and writing skills in the disciplines of anthropology and archaeology.

ANTHR 350 : Archaeological Cultures of North America. (3:3:0)
WHEN TAUGHT: Winter
DESCRIPTION: Cultural developments of North American Indians (Canada, U.S., and northern Mexico) before Columbus.

Course Outcomes
- Students will gain an introductory level comprehension of the diverse cultural developments of North American indigenous peoples as well as selected examples from Canada and Northern Mexico through the study of archaeological evidence and material culture.
- Students will gain a more in-depth comprehension of the diversity and complexity of data sets regarding archaeological evidence via material cultural remains by hands-on interactions with the collections of the Museum of Peoples and Cultures at BYU.
- Through course assignments, students will increase their skills in critical thinking, research, analysis, and writing. Emphasis will be placed on writing in the discipline.

ANTHR 530 : Great Basin Archaeology. (3:3:0)
WHEN TAUGHT: Winter Even Yrs.
PREREQUISITE: Anthr 350 or equivalent.
DESCRIPTION: Overview of ethnography, history of research, and prehistory of the Great Basin culture area. Current issues in archaeological research emphasized.

Course Outcomes
- Students will gain archaeological and cultural knowledge of the major native peoples of the Great Basin Region from pre-history through European contact through a study of their archaeologial remains and ethnographic studies.
- Students will have hands-on experiences with the collections of the Museum of Peoples and Cultures that are representative of the cultures of the Great Basin Region.

ANTHR 535 : Southwest Seminar. (3:3:0)
WHEN TAUGHT: Winter Odd Yrs.
PREREQUISITE: Anthr 350 or equivalent.
DESCRIPTION: Overview of ethnography and prehistory of American Southwest. Current issues in archaeological research emphasized.

Course Outcomes
There are no course outcomes available

ENGL 358R : Ethnic, Regional, and Other Literatures in English. (3:3:0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: ENGL 251 & ENGL 295
DESCRIPTION: Sections stressing Native American, African American, Chicano, third-world, regional, or other literatures in English.

Course Outcomes
- Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of a given American region or ethnic group.
- Demonstrate a knowledge of the history, nature, aesthetics, and broadly defined thematic concerns of the literature at the center of the course.
- Compare and contrast the literature in question with larger or "mainstream" American literature.
- Form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop a focused and effective written argument.
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines

: Ethnic, Regional, and Other Literatures in English.

Course Outcomes

: Native American Literature.

Course Outcomes

: African American Literature.

Course Outcomes

: Asian American Literature.

Course Outcomes

: Latino/a American Literature.

Course Outcomes

: Post-Colonial Literature.

Course Outcomes

(Native American topics only)

FLANG 102R : First-Year Language Study. (4:5:1)

WHEN TAUGHT: Contact Department.
PREREQUISITE: FLANG 101R
DESCRIPTION: Second-semester speaking, listening, reading, and writing skills.
NOTE: Teacher may waive prerequisite based on prior experience.

Course Outcomes
No outcomes are available at this time.

(Navajo or Shoshone)

HIST 357 : The Indian in Latin American History. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.
DESCRIPTION: History of Latin American Indians from preconquest days to the present; achievements, contributions, and problems.

Course Outcomes
- Students will be able to explain and analyze the political, economic, social, religious, and cultural structures of the Mayas, Aztecs, and Incas, how they were transformed by the Spanish conquest, and how they developed in reaction to European colonialism.
- Students will be able to analyze and interpret primary source documents.
- Students will gain experience in historical research and improve writing skills.
- Students will analyze historical questions and place them in historiographical context.

HIST 360 : American West to 1900. (3:3:0)

WHEN TAUGHT: Fall
DESCRIPTION: The American West as a place of great diversity. Topics include Native American societies, European colonization, explorations, the fur trade, overland migrations, Indian relations, mining, settlement, and the environment.

Course Outcomes
- Students will be able to explain and interpret major developments and historical terms in the history of the American West before 1900.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

HIST 361 : The American West Since 1900. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.
DESCRIPTION: Pivotal developments in the twentieth-century West, including urbanization, Sun Belt migration, political protest, labor history, Native American history, immigration, water policy, tourism, military-industrial complex, Hollywood.

Course Outcomes
- Students will be able to explain and interpret major developments and historical terms in the history of the American West since 1900.
- Students will be able to interpret primary documents and use evidence from those documents to support historical assertions and interpretive generalizations.
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

HIST 363 : The Spanish Frontier in North America. (3:3:0)

DESCRIPTION: Spanish exploration, occupation, and institutions of northern Mexico, the American southwest, and Florida, 1521-1821; Mexican period to 1848.

Course Outcomes
- Students will be able to explain and analyze the major political, economic, social, and religious developments in the history of the Spanish and Mexican northern frontier in North America between approximately 1492 and 2011
- Students will be able to analyze and interpret primary source documents
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

**HIST 495R : Directed Research. (3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's prior consent.
DESCRIPTION: Student research directed by faculty member on topic of mutual interest.

NOTE: Research assistants must do additional work for credit.

Course Outcomes
- Students will identify and clearly articulate a substantive academic research problem.
- Students will produce a bibliography for reading and research using historical standards.
- Students will produce a written report demonstrating knowledge of the studied material.

**HIST 498R : Directed Readings. (.5-3:3:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes
- Students will read assigned books and articles critically, thoughtfully, and carefully.
- Students will write a review of each book and article demonstrating knowledge and analysis of the studied material.

REL C 293R : Specialized Studies in Family History (Genealogy). (1:1.0:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Using documents from specific regional and organizational sources to identify ancestors and submit their names for temple ordinances.

Course Outcomes
No outcomes are available at this time.

: LDS Family History.
Course Outcomes

: United States and Canada Family History.
Course Outcomes

: British Family History.
Course Outcomes

: Scandinavian Family History.
Course Outcomes

: Native American Family History.
Course Outcomes

: French and Italian Family History.
Course Outcomes

: Latin American, Spanish, and Portuguese Family History.
Course Outcomes

: Slavic Family History.
Course Outcomes

: Germanic Family History.
Course Outcomes

(Native American topics only)
SOC 113 : Multicultural America. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Diverse cultural heritages in the United States. Cultures studied scientifically will include African American, Hispanic, Asian American, and Native American.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

SOC 323 : Racial and Minority-Group Relations. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Social psychological and social structural analysis of racial and ethnic relations; prejudice, discrimination, responses, protests, current issues.

Course Outcomes
- Demonstrate how the continuing influence and changing meaning of ethnic heritage is bound up in contemporary western culture, both as experienced by others and in their own lives.
- Describe the role of childhood in the construction of moral adulthood, and identify the community consequences of connections and continuity in the life course, as opposed to alienation and boundedness.
- Identify sources of intellectual and personal balance and of communal and personal strength in dealing with problems of cultural identity and social diversity.
- Identify strengths and weaknesses in varying subcultures, including our own, to highlight sources of self deception, and to propose personal and community actions whereby our â woundsâ may be

healed.

- Describe relationships between Americaâ s history of slavery, our own attitudes toward essential work and those who perform it, and existing racist and sexist attitudes.
- Offer proposals whereby the harmonizing of social opposites can be achieved.
- Understand the consequences, positive and negative, of ethnic contact and interaction on social creativity and problem solving, and to identify consequences of such contact in their own lives.
- Identify historical examples of positive and negative ethnic contact, in terms of social innovation and creativity, and apply them to contemporary situations
- Describe the complexities of social change and social engineering, cite historical examples in which efforts at social improvement generated unanticipated and sometimes counterproductive effects, and anticipate such effects in their own efforts at personal and social improvement.
- Clarify the differences between race and ethnicity, and the effects of so categorizing our fellow humans.
- Portray the â crisisâ contemporary civilizations face in terms of the age-old tension between settled and tribal peoples, and propose actions to ameliorate the negative effects of detribalization and the continuing increase in social diversity.
- Have a working understanding of the nature and limitations of prevailing worldviews, especially modernism and postmodernism, and their relation to social morality. Students understand the present-day significance of the Holocaust and other instances of genocide in terms of their lessons for humanity. They can identify the advantages and limits of reason and rationality, and understand that rationality and ethics may point in opposite directions, with potentially disastrous consequences for minorities.
- Demonstrate a basic familiarity with the ethnic structure of American society, how it is changing, and its implications for the future.

**SOC 390R : Special Topics in Contemporary Sociology. (.5-3:3:0)

PREREQUISITE: Instructor's consent.

DESCRIPTION: Course content varies from year to year.

Course Outcomes

- Students will be able to recognize the ways in which social structure and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.
- Students will begin to gain an appreciation of the contributions of women throughout history and internationally.
- Students will be able to perform and present research related to women's studies in oral, written, and/or multi-media formats.
- Students will be able to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.
- Students will be able to define and use in speech and writing the critical vocabulary basic to the field of women's studies.

**Requires approval by NAS coordinator.

*Hours include courses that may fulfill university core requirements.

Admission to Degree Program

All degree programs in the Department of Political Science are open enrollment.

The Discipline

The political science major is designed to fulfill the admonition of the Doctrine and Covenants (88:79–80) to teach one another "things which are at home, things which are abroad; the wars and the perplexities of the nations, and the judgments which are on the land; and a knowledge also of countries and of kingdoms that ye may be prepared in all things."

Politics extends far beyond the immediate concerns of politicians or pollsters; it is essential to the human condition. Since we are all shaped by the institutions we inhabit, political science helps us to understand not only our world but ourselves. It involves fundamental choices concerning our life in communities whether locally, nationally, or globally. Without politics there could be only chaos and conflict. With politics there is the chance for order and thus the opportunity to seek prosperity and fulfillment. Often conflictual but just as often cooperative, politics reflects our basic needs and interests, our highest aspirations, and the often harsh requirements of power.

Political science involves this full range of inquiry, including questions of "who gets what," questions of the best or most just political order, and questions of the nature, uses, and abuses of power. Political science students will be exposed to a broad range of perspectives or great ideas about politics to better understand questions such as "Why is campaign finance reform so difficult?" "Why did the Soviet Union fall?" "Were the Athenians justified in condemning Socrates to death?" and "Do democracies fight fewer wars?" Students will learn a variety of methods ranging from statistical analysis of quantifiable data to historical comparison of institutions to reflection on influential texts. Before graduating, students will not only better define their own values and ideas about politics but also develop their own significant research project as political scientists. Students will be prepared "in all things" to influence their communities for the better.

Career Opportunities

The Political Science Department offers an undergraduate degree in political science for students who are preparing for graduate study in related fields, professional degrees (law or business), or a wide variety of public service occupations, or for liberal arts students who are interested in an undergraduate major that focuses on challenging questions facing modern society.

Students may emphasize the subfields of American politics, comparative politics, international politics, political philosophy, or public policy.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BA in Political Science (Program Outcomes)

Minor in Political Science
Minor in Political Science Teaching

Students should see their college advisement center for help or information concerning the undergraduate programs.

Internships

All political science students should enrich their undergraduate education and enhance their career prospects with an off-campus internship experience. Several high-quality opportunities are available for which credit may be earned toward the major or minor.

Washington Seminar. Students from any academic discipline spend a semester or term in Washington, D.C., working in

government, business, communications, or the arts. Complementing course work involving readings and briefings on contemporary national issues is part of the curriculum. From 6 to 12 hours of upper-division credit may be earned.

Utah State Legislature Internship. During each winter semester students from any academic discipline may work as interns in the Utah State Legislature. Students interested in legislative and public policy processes will particularly benefit from the experience. Complementing course work on state government can be taken in conjunction with the internship. From 6 to 12 hours of upper-division credit may be earned.

State and Local Government Internships. Throughout the year students may intern with city, county, or state governments, as well as the district offices of U.S. senators and representatives (availability of positions may vary). From 3 to 6 hours of upper-division credit may be earned.

International Internships. The International Internship Program at the David M. Kennedy Center places students in a variety of internships with foreign governments and international institutions. Some of these internships are eligible for credit towards the major.

Requirements

1. Internships should be completed during the junior or senior year. Prior to the internship students should have completed Pl Sc 110 and 200.
2. Students must have a cumulative grade point average of 2.7 or better (Washington Seminar requires a 3.0) and be in good academic standing. Strong research and writing skills are important qualifications.
3. All internship programs have a strong and complementing academic component to help students gain the most from their experience. Students completing any of the above internships must be enrolled for credit.

Career Opportunities

Career choices open to graduates in political science include careers in law, teaching, business, journalism, the media, and libraries, as well as with interest groups and associations. In addition, majors are also placed with federal, state, and local governments and are found in elective politics. A number of these options do require additional graduate training.

Program Requirements | View MAP | View Program Outcomes

1. The Political Science Department requires a minimum of 27 hours of political science courses to be taken in residency at BYU for this degree program (BYU Independent Study courses do not meet this requirement). These hours may also go toward BYU's 30-hour residency requirement for graduation.
2. Pl Sc 101R and 297 do not count toward the major or minor.
3. Only 6 hours of 399R may count toward the major.
4. No cooperative education (internship) credit from other universities or colleges will be accepted toward the major.
5. Majors are strongly encouraged to take Phil 150 to complete the GE First-Year Writing requirement.
6. Pl Sc 200 is prerequisite to many upper-division courses and must be taken no later than the sophomore year. Pl Sc 328 is a prerequisite to many capstone courses and should be taken in the semester following Pl Sc 200.
7. Complete the following:

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

8. Complete two of the following foundation courses before higher-numbered courses (they do not need to be taken in order):

PL SC 110 : American Government and Politics. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Origin and development of federal Constitution; national, state, and local governments and politics.

Course Outcomes
- Analyze current events in American politics using Political Science concepts.
- Describe the most important constitutional provisions in American national government and how they have changed over time.
- Explain the role individuals play in American government and what factors influence their behavior.
- Assess the functions and interactions of American political institutions.
- Evaluate how you as an individual can effectively participate in the political process.

PL SC 150 : Comparative Government and Politics. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Patterns of European, Asian, Latin American, and other political systems.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate a familiarity with the subfield of comparative politics
- Possess a factual and conceptual knowledge of countries and political processes
- Begin to develop skills of effective research, analysis and writing in social science
- Think critically, analytically and synthetically
- Bring honesty and integrity to daily life, public affairs and professional activities and in their academic work
- Reflect on the way that religion affects politics in their own lives and in the lives of others
- Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought

PL SC 170 : Introduction to International Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Basic forces, practices, institutions, and foreign policies of major powers; problem areas in international politics.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Demonstrate and understanding of basic concepts of International Relations.
- Demonstrate understanding of key actors and processes in international politics.
- Demonstrate understanding of causes of war and causes of international cooperation.
- Demonstrate understanding of different theories of the study of international politics, including Realism and Idealism
- Demonstrate understanding of how different theories lead to different interpretations of key events and processes in international politics
- Be better prepared to participate as a national and global citizen

Note: Students who do not take one of these three foundation courses must take a corresponding upper-division elective course. If you do not take Pl Sc 110, you must take one course selected from Pl Sc 310–319R, 320, 321, 322, 323, or 410. If you do not take Pl Sc 150, you must take one course selected from Pl Sc 341–349R, 350–359R, 444, or 450–458. If you do not take Pl Sc 170, you must take one course selected from Pl Sc 370–379R, 380–388, or 470–476.

9. Complete one of the following foundation courses before higher-numbered courses:

PL SC 202 : Western Political Heritage 2. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Western civilization from Renaissance to present, primarily from perspective of political philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

PHIL 202 : History of Philosophy 2. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Western civilization from Renaissance to present, primarily from perspective of philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

Course Outcomes
- Know milestones of Western history and culture from the Renaissance and Reformation through the present.
- Acquire a basic understanding of the most important philosophical figures, texts, and issues in late modern and contemporary philosophy.
- Write a clear and cogent philosophical essay.

Note: If students do not take Pl Sc 201 or Phil 201, they must take an upper-division elective course selected from Pl Sc 300–309, 400–409, or 322, 334, 336, 364, 374, 473.

10. Complete the following methodology courses in sequential order:

PL SC 200 : Political Inquiry. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Methodology of political science, including theory and techniques of qualitative and quantitative research design.

NOTE: Prerequisite to all upper-division courses.

Course Outcomes
- Write multiple papers correctly using the Turabian style of citation.
- Learn and understand the consequences of plagiarism and write multiple papers without plagiarizing sources.
- Students will understand and be able to discuss the differences between secular and spiritual learning
- Write and receive feedback on at least fifty pages of writing. Write and receive feedback on at least five different papers.Learn the principles of effective revision and practice those principles on at least one major writing assignment. Learn how to write a research design and practice writing a design. Learn how to write a report of research and practice writing a report.

- Learn the basic principles of statistical analysis, including statistical significance, fit, and substantive significance.Understand how to interpret statistical analyses, including regressions. Understand limitations on research and be able to write research designs that show an awareness of those limitations. Understand differences in qualitative and quantitative methods, and be able to write research designs that show an awareness of differences in qualitative and quantitative methods. Understand the importance of case selection and principles that should guide case selection in both qualitative and quantitative methods

PL SC 328 : Quantitative Political Methodology. (4:3:1)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PL SC 200

DESCRIPTION: Quantitative techniques in political research.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Analyze political and social behavior using statistical skills.
- Learn how to read and interpret statistical evidence.
- Produce your own rigorous statistical arguments that you explain carefully and clearly.

Note: Pl Sc 200, along with a capstone seminar, fulfills the University Core Advanced Written and Oral Communication requirement. Pl Sc 328 fulfills the University Core Languages of Learning requirement (math option).

11. Complete one of the following theory courses during the junior year (note prerequisites in course descriptions):

PL SC 300 : Contemporary Political Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Pl Sc 201, 202; or Phil 201, 202.

DESCRIPTION: History of political science, including the moral and ethical dimensions of politics.

Course Outcomes

- Students will have a factual and theoretical knowledge of contemporary normative political theory from the standpoint of the question of the relationship between theory and practice.
- Students will attend to the deeper question of the nature and limits of theory (or “reason,” or “philosophy”) as it functions in the political-moral realm.
- Students will examine the risks both of a postmodern celebration of irrationalism and those inherent in the ongoing project of constructing a purely “rational” politics and morality.
- See the practical consequences of abstract philosophical ideas, think more deeply and coherently about their own moral and political commitments
- To learn to address significant, complex and challenging ideas in clear, correct, and strong English, based upon a careful engagement with textual sources

PL SC 310 : Theories of American Politics. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

PREREQUISITE: Pl Sc 110, 200.

DESCRIPTION: Major theories and approaches used to explain American politics.

Course Outcomes

- Understand important theoretical traditions in the study of (American) politics.
- Craft your own effective and insightful argument using clear and engaging prose that is analytically sound.
- Apply theories of politics to explain current practices in American Politics.

PL SC 330 : Theories of Public Policy. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Econ 110, Pl Sc 110, 200.

DESCRIPTION: Major theories used in assessing public policies, including policy formation, interaction of politics and economics, institutions of policy making, and policy.

Course Outcomes

- Students will develop an understanding of normative theory: How are different alternative ethical frameworks used to rationalize public policies?
- Students will develop an understanding of positive theory: How do political forces (identities, interests and institutions) determine the types of public policies that actually occur?
- Students will apply policy theories: How are the theoretical ideas discussed in the class used to support real policy positions?
- Student will gain an ability to engage in civic discourse: Can students participate intelligently in three vital areas?: a) critical reading; b) persuasive writing: c) public speaking

PL SC 350 : Theories of Comparative Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Pl Sc 150, 200.

DESCRIPTION: Selected issues of comparative politics such as crisis and discontinuity; development; political infrastructure (e.g., political culture and social structure); political institutions.

Course Outcomes

- In this course, you will learn how to complete a research project
- In this course, you will learn how to critique and construct theories in comparative politics through a number of individual, group, oral and written exercises.
- Thus, you will deepen your familiarity with the research traditions and theoretical paradigms of comparative politics and of political science more broadly.

- All of the above items also contribute to the development of this skill.

PL SC 370 : Theory of International Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Pl Sc 170 and Pl Sc 200.

DESCRIPTION: Most influential traditions of thought in international relations; includes realism, idealism, Marxism, neorealism, complex interdependence, etc.

Course Outcomes
- Possess a knowledge of important concepts and theories in international relations
- Think critically, analytically, and synthetically in the context of international relations theories

12. Complete 24 additional hours of political science electives, except 400, 410, 430, 450, 470. Only one 100-level course and one 200-level course may be counted.

13. Complete one of the following capstone seminars during the senior year. A completed capstone paper with at least a C– grade is required to receive a final grade in all capstone classes and fulfill the University Core Advanced Written and Oral Communication requirement (note prerequisites in course descriptions):

PL SC 400 : Capstone Seminar in Political Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 200 & PL SC 201 & PL SC 300; or PL SC 200 & PL SC 202 & PL SC 300

DESCRIPTION: Seminar in political theory for students in their senior year.

Course Outcomes
- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 410 : Capstone Seminar in American Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 110 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in American politics and government for students in their senior year.

NOTE: For political science majors only.

Course Outcomes
- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 430 : Capstone Seminar in Public Policy. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 110 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in public policy for students in their senior year.

NOTE: For political science majors only.

Course Outcomes
- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 450 : Capstone Seminar in Comparative Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 150 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in comparative politics and government for students in their senior year.

Course Outcomes
- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 470 : Capstone Seminar in International Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 170 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in international relations and politics for students in their senior year.

Course Outcomes

- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

14. All students are strongly encouraged to complete an internship. Established programs are available through Washington Seminar, Utah State Legislature, or the Kennedy Center. Up to 6 hours of credit earned from an internship (399R) may be counted toward the major.

15. Students who plan no formal education beyond the bachelor's degree should add a minor or develop adequate skills through other courses that will enhance their employment opportunities. Consult the college advisement center or department Web site.

    Students who plan to seek MA or PhD degrees are strongly encouraged to strengthen their quantitative and analytical skills. These students should consult with faculty about other skills that specific graduate programs might require.

16. Students scoring a 5 on the American Government and/or Comparative Government AP exams may substitute AP credit for Pl Sc 110 or Pl Sc 150, respectively. However, they are required to take at least one upper-division elective in each subfield in which they substitute AP credit for American Government and Politics or Comparative Government and Politics.

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete the following:

PL SC 110 : American Government and Politics. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Origin and development of federal Constitution; national, state, and local governments and politics.

Course Outcomes

- Analyze current events in American politics using Political Science concepts.
- Describe the most important constitutional provisions in American national government and how they have changed over time.
- Explain the role individuals play in American government and what factors influence their behavior.
- Assess the functions and interactions of American political institutions.
- Evaluate how you as an individual can effectively participate in the political process.

PL SC 150 : Comparative Government and Politics. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Patterns of European, Asian, Latin American, and other political systems.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Demonstrate a familiarity with the subfield of comparative politics
- Possess a factual and conceptual knowledge of countries and political processes
- Begin to develop skills of effective research, analysis and writing in social science
- Think critically, analytically and synthetically
- Bring honesty and integrity to daily life, public affairs and professional activities and in their academic work
- Reflect on the way that religion affects politics in their own lives and in the lives of others
- Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought

PL SC 170 : Introduction to International Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Basic forces, practices, institutions, and foreign policies of major powers; problem areas in international politics.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Demonstrate and understanding of basic concepts of International Relations.
- Demonstrate understanding of key actors and processes in international politics.
- Demonstrate understanding of causes of war and causes of international cooperation.
- Demonstrate understanding of different theories of the study of international politics, including Realism and Idealism
- Demonstrate understanding of how different theories lead to different interpretations of key events and processes in international politics
- Be better prepared to participate as a national and global citizen

2. Complete one course from the following:

PL SC 202 : Western Political Heritage 2. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Western civilization from Renaissance to present, primarily from perspective of political philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

PHIL 202 : History of Philosophy 2. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Western civilization from Renaissance to present, primarily from perspective of philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

Course Outcomes

- Know milestones of Western history and culture from the Renaissance and Reformation through the present.
- Acquire a basic understanding of the most important philosophical figures, texts, and issues in late modern and contemporary philosophy.
- Write a clear and cogent philosophical essay.

3. Complete three additional upper-division courses.
4. Pl Sc 101 and 297 cannot be counted toward the minor.
5. Students scoring a 5 on the American Government and/or Comparative Government AP exams may substitute AP credit for Pl Sc 110 or Pl Sc 150, respectively. However, they are required to take at least one upper-division elective in each subfield in which they substitute AP credit for American Government and Politics or Comparative Government and Politics.

*Hours include courses that may fulfill university core requirements.

Minor in Political Science Teaching (21 hours*)

Show All Course Descriptions
Hide All Course Descriptions

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following:

PL SC 110 : American Government and Politics. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Origin and development of federal Constitution; national, state, and local governments and politics.

Course Outcomes

- Analyze current events in American politics using Political Science concepts.
- Describe the most important constitutional provisions in American national government and how they have changed over time.
- Explain the role individuals play in American government and what factors influence their behavior.
- Assess the functions and interactions of American political institutions.
- Evaluate how you as an individual can effectively participate in the political process.

PL SC 150 : Comparative Government and Politics. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
DESCRIPTION: Patterns of European, Asian, Latin American, and other political systems.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Undergraduate Courses

100-Level Courses

PL SC 101R : Current Events and Political Science. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: An introduction to political science using both national and international current events. Introduces faculty and academic expectations. Appropriate for non-majors.

Course Outcomes

- Read The Economist weekly, as well as another source of news, and learn about important national and international events.
- Learn the historical context, theories, arguments, and data that illuminate discussions of the most important political issues
- Meet professors in the Political Science Department and learn about their areas of specialization.

PL SC 110 : American Government and Politics. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Origin and development of federal Constitution; national, state, and local governments and politics.

Course Outcomes

- Analyze current events in American politics using Political Science concepts.
- Describe the most important constitutional provisions in American national government and how they have changed over time.
- Explain the role individuals play in American government and what factors influence their behavior.
- Assess the functions and interactions of American political institutions.
- Evaluate how you as an individual can effectively participate in the political process.

PL SC 150 : Comparative Government and Politics. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Patterns of European, Asian, Latin American, and other political systems.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Demonstrate a familiarity with the subfield of comparative politics
- Possess a factual and conceptual knowledge of countries and political processes
- Begin to develop skills of effective research, analysis and writing in social science
- Think critically, analytically and synthetically
- Bring honesty and integrity to daily life, public affairs and professional activities and in their academic work
- Reflect on the way that religion affects politics in their own lives and in the lives of others
- Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought

PL SC 170 : Introduction to International Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Basic forces, practices, institutions, and foreign policies of major powers; problem areas in international politics.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Demonstrate and understanding of basic concepts of International Relations.
- Demonstrate understanding of key actors and processes in international politics.
- Demonstrate understanding of causes of war and causes of international cooperation.
- Demonstrate understanding of different theories of the study of international politics, including Realism and Idealism
- Demonstrate understanding of how different theories lead to different interpretations of key events and processes in international politics
- Be better prepared to participate as a national and global citizen

200-Level Courses

PL SC 200 : Political Inquiry. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Methodology of political science, including theory and techniques of qualitative and quantitative research design.

NOTE: Prerequisite to all upper-division courses.

Course Outcomes

- Write multiple papers correctly using the Turabian style of citation.
- Learn and understand the consequences of plagiarism and write multiple papers without plagiarizing sources.
- Students will understand and be able to discuss the differences between secular and spiritual learning
- Write and receive feedback on at least fifty pages of writing. Write and receive feedback on at least five different papers.Learn the principles of effective revision and practice those principles on at least one major writing assignment. Learn how to write a research design and practice writing a design. Learn how to write a report of research and practice writing a report.
- Learn the basic principles of statistical analysis, including statistical significance, fit, and substantive significance.Understand how to interpret statistical analyses, including regressions. Understand limitations on research and be able to write research designs that show an awareness of those limitations. Understand differences in qualitative and quantitative methods, and be able to write research designs that show an awareness of differences in qualitative and quantitative methods. Understand the importance of case selection and principles that should guide case selection in both qualitative and quantitative methods

PL SC 201 : Western Political Heritage 1. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Western civilization from Greek antiquity to Renaissance, primarily from perspective of political philosophy and scriptures; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

: Western Political Heritage 1.

Course Outcomes

: Honors Western Political Heritage 1.

Course Outcomes

PL SC 202 : Western Political Heritage 2. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

DESCRIPTION: Western civilization from Renaissance to present, primarily from perspective of political philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

PL SC 249R : Introductory Topics in Politics. (1-3:Arr:0)

DESCRIPTION: Special topics course; unique topic for each section is chosen by the professor.

Course Outcomes

There are no course outcomes available

PL SC 297R : Internship Program Preparation. (1-2:ARR:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Preparatory seminar for students who will be participating in departmental internship programs.

Course Outcomes

There are no course outcomes available

PL SC 298 : Speaker Series on Political Careers. (1:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Networking and career guidance through a series of lectures by career professionals.

Course Outcomes

- demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.
- participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought
- want to serve the communities and organizations to which they belong

300-Level Courses

PL SC 300 : Contemporary Political Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Pl Sc 201, 202; or Phil 201, 202.

DESCRIPTION: History of political science, including the moral and ethical dimensions of politics.

Course Outcomes

- Students will have a factual and theoretical knowledge of contemporary normative political theory from the standpoint of the question of the relationship between theory and practice.
- Students will attend to the deeper question of the nature and limits of theory (or “reason,” or “philosophy”) as it functions in the political-moral realm.
- Students will examine the risks both of a postmodern celebration of irrationalism and those inherent in the ongoing project of constructing a purely “rational” politics and morality.
- See the practical consequences of abstract philosophical ideas, think more deeply and coherently about their own moral and political commitments
- To learn to address significant, complex and challenging ideas in clear, correct, and strong English, based upon a careful engagement with textual sources

PL SC 301 : Philosophy of the Social Sciences. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Comparative analysis of the philosophy of scientific and normative inquiry.

Course Outcomes

- Identify the differences between social and natural sciences.
- Distinguish the different approaches to research in the social sciences.
- Consider whether and how social sciences can address normative concerns.
- Analyze, think, and write critically about social research.

PL SC 302 : Experimental Research Methods. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Pl Sc 200.

RECOMMENDED: Pl Sc 328.

DESCRIPTION: Students will learn how to conduct experiments in the social sciences. All students will conduct an original experiment, learn how to analyze the data, and present their results in a publishable format.

Course Outcomes

There are no course outcomes available

PL SC 303 : Qualitative Methods. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: PL SC 200

DESCRIPTION: Qualitative methods for gathering data and analyzing theories, including concept formation, textual analysis, interviewing, archival research, case studies, and comparative historical analysis.

Course Outcomes

There are no course outcomes available

PL SC 305 : Survey Research Methods. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: Pl Sc 328 or concurrent enrollment.

DESCRIPTION: Teaches principles of survey research methods from a ?Total Survey Error? perspective. Topics and assignments include sampling, non-response, coverage, measurement, and analysis. Course project will conduct a survey for a client from start to finish.

Course Outcomes

There are no course outcomes available

PL SC 307 : Reason, Revelation, and Politics. (3:3:0)

RECOMMENDED: Pl Sc 201 or 202 or a class in philosophy.

DESCRIPTION: The fruitful tension between the authority of reason and that of revelation in the Western tradition and in contemporary politics.

Course Outcomes

- Recognize and intelligently employ a number of terms of philosophical and political analysis.
- Understand the main ideas of each author considered, and be able to compare and contrast the various authors
- Summarize and independently critique important philosophical arguments bearing on religion and contemporary issues, and write about them in a clear and orderly fashion.
- Be critically aware of conventional assumptions regarding religion, reason and politics that limit much current thought
- See the practical consequences of abstract philosophical ideas, think more deeply and coherently about their own moral and political commitments

PL SC 308 : Theories of Human Freedom. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Scope of human freedom at the metaphysical, individual, social, and political levels.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- This course will address the writings of a variety of thinkers who ask what does it mean to be free? We will look at canonical writers of political philosophy, as well as pieces about the play of power and the political and moral challenges presented by the Nazi Holocaust.

PL SC 309R : Topics in Political Philosophy. (3:3:0)

Course Outcomes

There are no course outcomes available

PL SC 310 : Theories of American Politics. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

PREREQUISITE: Pl Sc 110, 200.

DESCRIPTION: Major theories and approaches used to explain American politics.

Course Outcomes

- Understand important theoretical traditions in the study of (American) politics.
- Craft your own effective and insightful argument using clear and engaging prose that is analytically sound.
- Apply theories of politics to explain current practices in American Politics.

PL SC 311 : State and Local Government and Politics. (3:3:0)

WHEN TAUGHT: Contact Department.

RECOMMENDED: Pl Sc 110.

DESCRIPTION: Relation of state and national governments, forms of state governments and politics, types of municipal governments and their operation.

Course Outcomes

- Students will understand why state and local governments matter
- Students will understand how state and local politics compare to national politics
- Students will understand which states govern best and if states produce better (or worse) governance than Washington
- Students will understand how do political institutions and policies vary from state to state and if it matters.
- Students will discuss religion and politics in the context of the course.
- Students will observe local government in action during this course.

PL SC 313 : Interest Groups. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 110, 200.

DESCRIPTION: Theories on formation and maintenance of interest groups; tactics of groups in legislative, executive, bureaucratic, and court settings; influence of groups on elections and public policy.

Course Outcomes

- Students will be introduced to interest groups and their role in American politics.
- Students will understand how to evaluate interest groups systematically and rigorously
- Students will write a professional paper that focuses on a political science question

PL SC 314 : The United States Presidency. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 110, 200.

DESCRIPTION: Presidential power in the United States, focusing on major roles of the American presidency.

Course Outcomes

- To become familiar with the major research approaches to the study of the American presidency and the intellectual history of the American presidency
- To gain a thorough understanding of the role of the American president in the political system
- To focus on one American President using specified research questions.

PL SC 315 : Congress and the Legislative Process. (3:3:0)

WHEN TAUGHT: Contact Department.

RECOMMENDED: Pl Sc 110, 200.

DESCRIPTION: Election process; structure, organization, and procedures of legislative bodies; relations with pressure groups, the president, and executive branch.

Course Outcomes

- Students will obtain a general working knowledge of the U.S. Congress, and where possible other legislative bodies
- Students will apply academic literature on Congress to current Congressional politics
- Students will be able to discuss the role and effectiveness of Congress in particular and representative democracy in general
- Students will gain new perspectives that will shape their future attempts to critically evaluate Congress and its members

PL SC 316 : American Political Parties. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Electoral and policy-making roles of American political parties today and their future in American politics.

Course Outcomes

- Students should understand and appreciate: the origins of American political parties, the nature of the two party system, particularly in comparison with other party systems, the role of third and minor parties, the organization of political parties, the role of political parties in campaigns and elections, the importance of political parties to the electorate, the role of parties in American governance, and the ongoing reforms of political parties.

PL SC 317 : Public Opinion and Voting Behavior. (3-4:3:Arr.)

WHEN TAUGHT: Contact Department.

PREREQUISITE: PL SC 200

RECOMMENDED: Pl Sc 328.

DESCRIPTION: Relationship between attitudes, opinion, and voting behavior in American politics and institutions.

Course Outcomes

- Students will acquire a minimum of two theoretical perspectives to explain why voters choose a particular candidate.
- Students will learn the fundamentals of survey research design and analysis, including an understanding and appreciation for the concept of "Total Survey Error."
- Students will use statistics to make inferences about the relationships between variables that affect voting behavior or public opinion.
- Students will be able to articulate the relationship between public opinion and democracy.

PL SC 318 : Campaigns and Elections. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Analyzes electoral process in the United States, including history, significance in governance, campaign strategy, finance, media role, etc.

Course Outcomes

- Students will understand the role of campaigns and elections today in American politics.
- Students will examine the historical development of campaigns and elections over the past 200 years and the nature of various players in campaigns and elections today including the electorate, candidates, parties, the media, and interest groups
- Students will assess three levels of elections – presidential, congressional, and state and local.
- Students will discuss and evaluate proposed electoral reforms.
- Students will be expected to spend time observing an electoral campaign, designing a campaign plan for a future campaign, and even working in a local electoral campaign.

PL SC 319R : Topics in American Government and Politics. (.5-3:3:0)

Course Outcomes

There are no course outcomes available

PL SC 320 : American Politics Through Literature. (3:3:0)

DESCRIPTION: American politics through the novel and other literary works. Developing political concepts and themes that come from significant political novels.

Course Outcomes

- We will focus on the main question that should be asked of each novel we read, namely, "How can literature aid our understanding of politics?"
- Each of you should become familiar with the political consequences of all 10 of the novels read.
- Given these ten novels and the multiple research topics generated from each of them, you will become conversant with the subject matter in your discourse with others outside the classroom.

PL SC 321 : The Media in American Politics. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: News media's role in processes of American politics, including electoral process, legislative process, and public policy-making.

Course Outcomes

- Students will analyze media's relationship with political institutions and organizations, policies, and the public.
- Understand how the media's role in American politics has evolved over time.
- Know what criteria the press uses for newsworthiness and how others attempt to use that criteria for their political ends
- Students will analyze the basis for the media's power
- Students will discuss the historical relationship between the press and political institutions and processes, the news gathering process, the role of the news media in electoral campaigns, the legislative process, presidential decision making, and judicial behavior.
- Appreciate how the media/political system in the United States compares and contrasts with media/political systems in other nations.
- Understand the legal structure of media regulation of the press.
- Know how news media affect electoral campaigns.
- Understand media role in shaping individual's political attitudes and behavior.
- See how the news media's interact with institutions in order to shape public policy.
- Appreciate the varying sides of current debates over the role of the news media

PL SC 322 : Early American Political Thought: 1620-1865. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Core principles and seminal texts of American politics from Colonial times through the Lincoln administration.

Course Outcomes

- Students will understand the ideals and institutions the contributed to the founding of America
- Students will consider some of the major themes/issues that emerge in studies of the American founding--with brief considerations of the earliest English settlements in America, America's colonial history, America's post-Constitutional history, Manifest Destiny, and the Civil War. We will examine the American Revolution and the Constitutional period in greater detail.

PL SC 323 : Modern American Political Thought: 1865-Present. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Core principles and seminal texts of American politics from Reconstruction to the present.

Course Outcomes

There are no course outcomes available

PL SC 324 : Political Psychology. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 200.

RECOMMENDED: Pl Sc 328.

DESCRIPTION: Survey of classic and contemporary research in political psychology. Special focus on how citizens think and feel about politics and the ways in which those beliefs shape their interactions with the political world.

Course Outcomes

- Students will become familiar with basic theories and controversies in political psychology by reading a selection of classic and contemporary works in the field.
- Because reading assignments include journal articles and book chapters with heavy theoretical and empirical emphasis, they will gain a better understanding of how to read contemporary work in political psychology and evaluate the theory, empirical results, and substantive implications of the work.
- Because the course is structured as a seminar, students will be expected to come to class prepared and participate actively in class discussions. The goals of class discussions include a better understanding of the course reading, critical evaluation of the strengths and weaknesses of each reading, and increased understanding of the implications of the reading for contemporary democracy.
- Students will read, evaluate, and discuss a selection of the most important works in political psychology, with a special focus on the psychology of mass political behavior. Because much of this work is quantitative, students will gain experience understanding and critically assessing research design and quantitative results.
- Students will better understand the strengths and weaknesses of various research methods, including in-depth interviews, surveys, lab and field experiments, and other approaches found in political psychology.
- Students will complete a major paper as part of the course requirements. This paper will include a full experimental research design that addresses a meaningful research question in political psychology.
- Students will critically evaluate, assess, and discuss both empirical results of classic and contemporary work in political psychology and their implications for our understanding of democracy.
- Students will practice the skills of attentive reading, thoughtful questioning, meaningful group discussion, and compelling writing.
- In completing the course paper, students will cite sources properly.
- Because a major theme of the course is the political psychology of political participation, students will better understand why individuals do (or do not) participate in politics. Students will gain a greater appreciation for the role of political participation in contemporary democracy.

PL SC 325 : Game Theory in Political Science. (3:3:0)

DESCRIPTION: Introduction to game theory, concentrating on applications in politics.

Course Outcomes

No outcomes are available at this time.

PL SC 328 : Quantitative Political Methodology. (4:3:1)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PL SC 200

DESCRIPTION: Quantitative techniques in political research.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Analyze political and social behavior using statistical skills.
- Learn how to read and interpret statistical evidence.
- Produce your own rigorous statistical arguments that you explain carefully and clearly.

PL SC 330 : Theories of Public Policy. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Econ 110, Pl Sc 110, 200.

DESCRIPTION: Major theories used in assessing public policies, including policy formation, interaction of politics and economics, institutions of policy making, and policy.

Course Outcomes

- Students will develop an understanding of normative theory: How are different alternative ethical frameworks used to rationalize public policies?
- Students will develop an understanding of positive theory: How do political forces (identities, interests and institutions) determine the types of public policies that actually occur?
- Students will apply policy theories: How are the theoretical ideas discussed in the class used to support real policy positions?
- Student will gain an ability to engage in civic discourse: Can students participate intelligently in three vital areas?: a) critical reading; b) persuasive writing: c) public speaking

PL SC 333 : Politics of Bureaucracy. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Theory and nature of bureaucracy; sources of power; political executives; staffs and agency personnel; conflicts with elected officials; public interest and bureaucratic control.

Course Outcomes
There are no course outcomes available

PL SC 334 : Public Ethics. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: PL Sc 200.

DESCRIPTION: Sources of values, areas of conflict with government policy, means of value accommodation.

Course Outcomes
- The goal of this class is to help you develop your critical analytical skills in assessing public policy debates and in formulating your own views about what policies governments should undertake.
- The focus here is on how some of the most prominent theories and conceptual frameworks and normative theories from political philosophy can help illuminate the values and assumptions underlying policy choices and serve as criteria for choosing policy options.

PL SC 336 : Government and Religion. (3:3:0)

PREREQUISITE: PL Sc 200.

DESCRIPTION: Christian-Hebraic concepts of state. American experience with church-state relations (First Amendment problems). Policy issues of concern to contemporary religions.

Course Outcomes
There are no course outcomes available

PL SC 339R : Topics in Public Policy. (3:3:0)

PREREQUISITE: Pl Sc 200 or equivalent.

Course Outcomes
- Possess a knowledge of current literature in the topic area.

PL SC 341 : Western European Politics. (3:3:0)

RECOMMENDED: Pl Sc 200.

DESCRIPTION: Politics and policy in western Europe. State-building, party systems, nationalism, and cooperation among advanced industrial countries in comparative, historical perspective. Social and Christian democracy; European Union.

Course Outcomes
- Students will develop a factual and theoretical knowledge of the politics of contemporary Europe by looking at selected countries.
- Student will come away from the semester with a new set of ideas about how capitalist democracies work and where and how they are struggling to adapt to new challenges.
- Students will improve their ability to communicate their knowledge through writing essays and oral presentation

PL SC 342 : Gender and Politics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Theories of representation; gender and citizenship; gender and political candidacy; gender and leadership; gendered political issues.

Course Outcomes
There are no course outcomes available

PL SC 343 : Comparative Institutional Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Pl Sc 150.

RECOMMENDED: Pl Sc 328.

DESCRIPTION: Studies the rich variety of political institutions around the world, in both developed and developing countries, democracies, and dictatorships, and their implications for policy decisions and political, social and economic outcomes such as political violence, economic development, and democratization.

Course Outcomes
No outcomes are available at this time.

PL SC 344 : Comparative Political Economy. (3:3:0)

PREREQUISITE: Pl Sc 150, 200.

DESCRIPTION: Overview of political economy from a comparative perspective. Classic theorists (Smith, Marx, Schumpeter, etc.); classic questions (industrialization, national economic policy, property, globalization, law, and economics).

Course Outcomes
- Understand the relationship (factual/theoretical) between political/economic outcomes and political/economic structures/institutions
- Develop writing skills through various activities such as regular, short writing assignments in response to readings or topics we cover in class, as well as undertaking a significant research paper that includes the

extension of a theory and some form of empirical testing applied to political economy topics.
- You will also be exposed to how international forces affect domestic political economy and how normative considerations shape policy outcomes of interest in this class.
- All of the above items also contribute to the development of this skill.

PL SC 347 : Russia/Former Soviet Politics. (3:3:0)

DESCRIPTION: Comparative politics of Russia and Soviet successor states. Development of political systems from common Soviet heritage, emphasizing post-independence politics and institution building.

Course Outcomes
- Demonstrate strong understanding of political and economic changes in former Soviet countries since 1991.Demonstrate strong understanding of the political institutions and political processes in Russia and other former Soviet countries.Demonstrate strong understanding of the patterns of interaction between Russia and its neighbors.
- Complete a research paper that uses effective comparison to explain political institutions or processes in former Soviet countries.
- Demonstrate the ability to write a well-crafted, persuasive research paper.
- Demonstrate the ability to apply theories of comparative politics to patterns of politics in former Soviet countries.
- Learn the consequences of plagiarism and how to avoid it.In written assignments, correctly acknowledge the words and/or ideas of other authors.

PL SC 348 : Government and Politics of Asia. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Comparative analysis of political developments of the major countries of Asia not covered in other country-specific classes.

Course Outcomes
- The course first considers the historical background of government and politics in Asia by looking at pre-colonial systems of government, encounters with the West,Colonialism, and national liberation movements. We then proceed thematically and comparatively by topic: States and Regimes, Political Executives, Governments, Legislatures, Bureaucracies, Political Economy, Parties, Elections, Participation and Power, Ideologies, Identities, Modernization and Democracy, and Globalization and regionalism. Finally, we will cover the “diplomatic history” of a selection of countries.

PL SC 349R : Topics in Politics. (.5-3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 200 or equivalent.

Course Outcomes
There are no course outcomes available

PL SC 350 : Theories of Comparative Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Pl Sc 150, 200.

DESCRIPTION: Selected issues of comparative politics such as crisis and discontinuity; development; political infrastructure (e.g., political culture and social structure); political institutions.

Course Outcomes
- In this course, you will learn how to complete a research project
- In this course, you will learn how to critique and construct theories in comparative politics through a number of individual, group, oral and written exercises.
- Thus, you will deepen your familiarity with the research traditions and theoretical paradigms of comparative politics and of political science more broadly.
- All of the above items also contribute to the development of this skill.

PL SC 351 : British Government and Politics. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Examination of the origin and contemporary operation of British political institutions as they relate to British society.

Course Outcomes
- Possess a factual and theoretical knowledge of British government and politics

PL SC 352 : African Politics. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Processes of change and development of nation states; African regionalism and relations with other nations; contemporary political issues.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Possess a factual and theoretical knowledge of the themes, issues, and trends that shape politics in Africa.

PL SC 353 : China: Government and Politics. (3:3:0)

DESCRIPTION: Structure and behavior of politics; contemporary problems.

Course Outcomes

- Possess a factual and analytical knowledge of China, its political processes, political theories, and society
- We will develop and understanding of three general areas: the Communists' rise to power, the party/state structure and policy process, and state-society relations.

PL SC 354 : Japan: Government and Politics. (3:3:0)

DESCRIPTION: Structure and behavior of politics; contemporary problems.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Students will study and analyze moral issues such as colonialism, paternalism, government transparency, using immoral means to accomplish moral ends, corruption, pacifism, and war crimes.
- Students will explicitly compare the American political system to the Japanese political system as a case study of the comparative political method. In addition, students will be encouraged to research and write on a comparison of Japan to other countries.
- A third of the course is devoted to learning the historical context of Japanese politics. The remaining two thirds of the course explores theories and political processes in Japan. Students will show their mastery of these materials in exams and papers.
- Required course readings will use both qualitative and quantitative methods and students will learn how to interpret and criticize both types of research. A significant portion of the readings will also use historical comparison, and students will also be expected to use interdisciplinary studies, especially from the fields of sociology, history, and anthropology.
- Students will have the option of writing a high quality research paper that requires significant research and argumentation or translating and discussing current news accounts of relevant Japanese events written in Japanese newspapers.
- Students will be given specific questions to prepare in advance of each day's assigned readings, and they will be expected in class to answer and discus those questions.
- By analyzing important ethical decision such as Hara Kei's lukewarm defense of democracy in the 1910s, the US decision to use information gained from illegal medical experiments, the US decision to extensively censor Occupation publications, and motivations surrounding Japan's 1994 electoral reforms, students will better understand the role that ethics plays in the daily decisions and activities of any political leader or citizen.
- Students will learn how the Japanese experience informs many of the pressing political issues that we face in the United States. They will make connections between Japan and these issues and be able to discuss how the Japanese experience sheds light on these important topics of current political discourse.

PL SC 355 : Canadian Government and Politics. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Growth and development of Canada and its government; Canada's role in the contemporary world

Course Outcomes

- Possess a factual and theoretical knowledge of Canadian Government and politics. Special emphasis will be placed on the Canadian political heritage, federal-provincial relations, the formulation and implementation of Canadian policy, the individuals, groups, and institutions involved in this process, and Canada's role in the contemporary world, including its relationship with the United States

PL SC 357 : Middle East: Political Systems. (3:3:0)

WHEN TAUGHT: Fall; Winter

RECOMMENDED: Pl Sc 200.

DESCRIPTION: Social, philosophical, and religious impact on Middle East political institutions in an era of modernization and conflict.

Course Outcomes

- The class is designed to help the student gain a basic knowledge of Middle Eastern politics and the social pressures that underlie political forces, to study several countries in depth and to gain an understanding of the culturally-based and traditional political structures and forces that operate in these governmental systems.
- We will concentrate on problems of political development, leadership, political institutions and religion
- We will study the conflicts of political legitimacy and Islamic activism.
- Students will develop analytical and logical writing abilities with an emphasis on critical reading and writing skills.

PL SC 358 : Latin American Politics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Pl Sc 200 or Lt Am 211.

DESCRIPTION: Conceptual and contemporary issues in Latin America's search for political order and economic development.

Course Outcomes

- In this course you develop a general understanding of Latin American politics and how politics in the region compares with that of the rest of the world. You also develop expert knowledge of at least one Latin American country, and you learn about databases and other sources of information on the region.
- You will learn how to apply theories in order to understand the facts. Beyond learning facts, you will improve your ability to identify patterns in Latin American politics and explain them. This analytical knowledge will allow you to make predictions and prescriptions .
- You will develop broader skills of research, writing, and "numeracy." These basic skills are taught in most Political Science classes, and you have several opportunities here to improve them.

PL SC 359R : Topics in Comparative Politics. (3:3:0)

PREREQUISITE: Pl Sc 200 or equivalent.

Course Outcomes

There are no course outcomes available

PL SC 360 : Constitutional Law - American Federal System. (3:3:0)

WHEN TAUGHT: Contact Department.

Course Outcomes

- Students will discuss the institutional issues surrounding US government structures, specifically the rights and powers of the President, Congress, the judiciary, states, and individuals.
- Students will learn both the detailed arguments of important US Supreme Court decisions and the context surrounding those decisions.
- Through our daily analysis of Court decisions, we will practice textual analysis as it is done by legal professionals. In addition, the oral presentation, papers, and exams will also require a high level of competency at legal textual analysis, testing how well students have acquired this skill from the daily reading and discussion of cases.
- Students will learn about some of the US Supreme Court and its decisions as well as the historical development of the most important legal doctrines of the Supreme Court.
- Students will write a specialized legal research paper that will require mastery of case law precedent and relevant law review articles, characteristics of high quality legal research.
- Each student's oral presentation will encourage the development of the following skills: asking critical questions, formulating persuasive answers immediately, simplifying difficult topics, and arguing persuasively. These presentations will differ significantly from the typical oral presentation made in a class and will practice a different set of presentation skills than the typical classroom oral presentation.
- In our daily discussion, in oral presentations, in exams, and in research writing, students will practice analyzing and evaluating the logic and arguments used in past Supreme Court decisions.
- Students will be expected to adhere to the highest standards of intellectual honesty in writing both research papers and in their use of materials for their oral presentations. Students will also be introduced to the ABA citation style in addition to the Turabian citation style.
- Students will become more informed voters and participants in political processes by learning the history of US Supreme Court decisions as well as the legal and political logic that underpins those same decisions.

PL SC 361 : Constitutional Law - Rights and Immunities. (3:3:0)

WHEN TAUGHT: Contact Department.

Course Outcomes

- Students will discuss the moral issues surrounding the constitutional decisions about the death penalty, abortion, death (including a right to die and assisted suicide), discrimination, privacy rights, the free exercise of religion, the establishment of religion, hate speech, and free speech rights.
- Students will learn about some of the most important parts of American politics, the US Supreme Court and its decisions as well as the historical development of the most important legal doctrines of the Supreme Court.
- Students will learn both the detailed arguments of important US Supreme Court decisions and the context surrounding those decisions.
- Through our daily analysis of Court decisions, we will practice textual analysis as it is done by legal professionals. In addition, the oral presentation, papers, and exams will also require a high level of competency at legal textual analysis, testing how well students have acquired this skill from the daily reading and discussion of cases.
- Students will write two specialized types of legal research papers, a legal brief for a mock argument before the US Supreme Court and a mock decision from the same Court. Both papers will require significant legal research and argumentation that is expected in a high quality legal research.
- Each student will participate in two oral presentations in class, either as a party to a case brought before the Supreme Court or as a judge of the same Court questioning counsel in a mock Supreme Court case. These presentations will develop the skills of asking critical questions, formulating persuasive answers immediately, simplifying difficult topics, and arguing persuasively. These presentations will differ significantly from the typical oral presentation made in a class and will practice a different set of presentation skills than the typical classroom oral presentation.
- In our daily discussion, in mock trial presentations, and exams, and in writing briefs or court decisions, students will practice analyzing and evaluating the logic and arguments used in past Supreme Court decisions.
- Students will be expected to adhere to the highest standards of intellectual honesty in writing both research papers and in their use of materials for their mock legal presentations. Students will also be introduced to the ABA citation style in addition to the Turabian citation style.
- Students will become more informed voters and participants in political processes by learning the history of US Supreme Court decisions as well as the legal and political logic that underpins those same decisions.

PL SC 364 : Jurisprudence. (3:3:0)

DESCRIPTION: Problem approach to ancient and modern legal philosophies, emphasizing the nature of justice and the relation of law to morality.

Course Outcomes

- Students will understand key historical and contemporary approaches to the philosophy of law.
- Students will articulate, compare, and evaluate the specific ways in which different jurisprudential approaches understand and appreciate the rule of law.
- Students will analyze, evaluate, and respond critically to Letwin's assessment of a particular philosopher in an oral presentation and in a term paper.
- Students will work effectively in groups to help colleagues prepare their individual term papers, providing and receiving peer review at each stage and sharing research efforts.

PL SC 370 : Theory of International Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Pl Sc 170 and Pl Sc 200.

DESCRIPTION: Most influential traditions of thought in international relations; includes realism, idealism, Marxism, neorealism, complex interdependence, etc.

Course Outcomes

- Possess a knowledge of important concepts and theories in international relations
- Think critically, analytically, and synthetically in the context of international relations theories

PL SC 371 : Foreign Policy Analysis. (3:3:0)

WHEN Contact Department.

TAUGHT:

PREREQUISITE: Pl Sc 200, 370.

DESCRIPTION: Survey of research regarding multiple levels of foreign policy analysis: individual, group, bureaucratic, societal, economic, systemic.

Course Outcomes

- Students will understand the genesis, evolution, and current status of the field of Foreign Policy Analysis.
- Students will understand what is meant by "foreign policy," "foreign policy behavior," and "foreign policy decisionmaking."
- Students will appreciate explanations of foreign policy/behavior/decisionmaking on a variety of levels - individual, group, organizational, societal, systemic, etc.
- Students will examine the various methodologies employed in Foreign Policy Analysis, such as event data, psychobiography, content analysis, and so forth.
- Student will begin integration of these diverse types of explanation through case studies and model formalization.
- Students will probe the limits of the comparative approach and of the idiosyncratic approach to explanation in foreign policy analysis.
- Students will learn to write a substantial piece of original research, and to have experience writing a book review.

PL SC 372 : International Political Economy. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Political implications of international trade, investment, and monetary policies within an increasingly interdependent global context; transnationalism.

Course Outcomes

- Demonstrate understanding of how International Relations theory applies to the subject matter of International Political Economy.
- Demonstrate understanding of key theories of international political economy.
- Demonstrate understanding of different issue areas in international political economy.
- Complete a research paper that uses IPE theory to explain aspects of global political and economic interaction.
- Demonstrate the ability to write a well-crafted, persuasive research paper.
- Demonstrate the ability to apply different theories of international political economy.
- Learn the consequences of plagiarism and how to avoid it.In written assignments, correctly acknowledge the words and/or ideas of other authors.

PL SC 373 : International Law. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Nature and function of international law; recognition, succession, jurisdiction rights, and immunities of states; nationality and jurisdiction over nations.

Course Outcomes

- Students will discuss the moral issues surrounding issue of international law.
- Students will learn the role of legal norms in international relations and will be able to discuss the relative importance of international law in constraining the actions of states.
- Students will learn the legal perspective of important events of world history and current issues of international conflict and cooperation.
- Students will write either a legal brief for a mock argument before an international tribunal or a research paper that conforms to the conventional expectations for a research paper in a political science class.
- In class discussions, writing, and course readings, students will practice analyzing and evaluating the logic and arguments used in international legal decisions themselves and discussions of international legal issues.
- Students will learn the history of the development of international legal norms and how those norms affect important political issues in the United States.

PL SC 374 : Ethics and International Affairs. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Ethical considerations in study and practice of international politics. Realism, idealism, and other theories of state behavior subjected to ethical standards.

Course Outcomes

- Within a historical and theoretical context, students will demonstrate understanding of the ethical challenges confronting international policymakers and the challenge of including ethical analysis in foreign policy decision-making.
- Students will acquire analytical tools with which to address international issues having ethical implications, focusing on realism and idealism, and be able to apply these tools to a variety of significant case studies.
- Students will become acquainted with and analyze the concept of just and unjust wars, drawing on historical and contemporary examples as illustrations.
- In the context of the course's overarching themes, students will survey war, international law, war crimes and crimes against humanity, genocide, human rights, human trafficking, torture, humanitarian intervention, democratization, reconciliation, economic justice, and other concepts lending themselves to ethics-based understanding.
- Students will demonstrate knowledge and understanding of the watershed historical and current events that lend themselves most readily to ethical analyses.
- Students will demonstrate increased confidence in their abilities to assess and express the ethical implications of international relations.
- Course participants will inquire into how Latter-day Saint perspectives might contribute to better understanding of ethics and international relations.

PL SC 375 : International Organizations. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 200.

DESCRIPTION: International institutions; transnational relations; rise of newer political organizations: League of Nations, United

Nations, European communities, world religions, multinational corporations, terrorist groups, global regimes.

Course Outcomes
- You will know the proper terminology to describe and define the major theoretical traditions in international relations.
- You will understand the inner logic of each approach and its implications.
- You will be able to compare, contrast, and critique these approaches and begin developing your own ideas.
- You will be able to begin testing the propositions of the theories.
- In addition, it is hoped that you will better appreciate the importance of, and apply high ethical standards of academic conduct, including proper source citation, calibrating conclusions to evidence honestly, and working alone without help when required.

PL SC 376 : U.S. Foreign Policy. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Formation, implementation, analysis, and criticism of themes in American foreign policy.

Course Outcomes
- Demonstrate strong background in important developments and events in U.S. foreign policy history.
- Demonstrate ability to explain U.S. foreign policy-making process.
- Demonstrate understanding of key current foreign policy issues facing U.S., and be able to discuss how history and policy process shape U.S. response to those issues.
- Complete a research paper that explains some aspect of U.S. foreign policy.
- Demonstrate the ability to write a well-crafted, persuasive research paper.
- Demonstrate the ability to analyze U.S. foreign policy in a specific policy area.
- Learn the consequences of plagiarism and how to avoid it.In written assignments, correctly acknowledge the words and/or ideas of other authors.
- Be better prepared to participate as a national and global citizen.

PL SC 377 : National Security Affairs. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Foreign policy, defense strategy, and intelligence.

Course Outcomes
- Students will understand Security Studies
- Students will understand the evolution of American national security policy since WWII, especially since 9/11
- Throughout the course, students will integrate moral perspectives on American national security policy with secular perspectives thereof
- Students will write a Policy Position Paper
- Students will be familiar with the primary institutions and processes of American national security policy making

PL SC 378 : International Conflict. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 150 or Pl Sc 170; Pl Sc 200.

DESCRIPTION: Causes of war; alliances and empires; military innovation; civil-military relations; fungibility of forces; terrorism; security studies methods; use and misuse of history.

Course Outcomes
- We will seek to deepen our understanding of war through a theoretical analysis of the causes of war by focusing attention on war as an outcome of the nature of the international system, war a result of the nature of the state, and war as a product of human nature.

PL SC 379R : Topics in International Relations. (.5-3:3:0)

PREREQUISITE: Pl Sc 200 or equivalent.

Course Outcomes
- Gain a better understanding of current intenational relation issues.
- Develop critical thinking and communication skills as you analyzeproblems and policies and develop and defend new policy idea.
- Prepare for and participate in a student conference analyzing humansecurity issues.

PL SC 380 : International Relations of Latin America. (3:3:0)

PREREQUISITE: Pl Sc 200 or Lt Am 211.

DESCRIPTION: Factors that affect foreign relations of Latin American countries, including the U.S. role, emphasizing intervention, democracy, development, and trade.

Course Outcomes
- In this course you will build your repertoire of facts and theories for understanding international politics in Latin America. Specifically, you will learn the history of wars and diplomacy in Latin America (particularly with reference to the United States) and recent patterns of economic development and democratization
- This course will help you improve your reasoning
- This course will help you improve your research skills
- This course will help you improve your writing skills.

PL SC 381 : International Relations of the Middle East. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Interregional relations and conflicts, political economics, Arab nationalism, processes of political change, alliances, and superpower relations.

Course Outcomes

- Analyze the international relations of the Middle East from a historical, theoretical, and contemporary perspective

PL SC 382 : International Relations of North America. (3:3:0)

DESCRIPTION: Examination and analysis of factors that affect foreign relations of Canada, U.S., and Mexico, emphasizing trade, security, migration, environment.

Course Outcomes

- This course will examine the major foreign and domestic policy issues facing the United States,Canada, and Mexico. It will look at the development of North American relations, especially the implementation of NAFTA, and the special challenges facing all three nations in increasingly complex and interdependent regional and global settings.

PL SC 385 : International Relations of Asia. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Foreign policies and international relations of China, Japan, and Northeast and Southeast Asia; historical and contemporary review and analysis.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Possess a factual and analytical knowledge of East Asia and its international relations, political theories and political processes
- Understand the extent to which Asian states have not simply “reacted” to the West, but have “interacted” with it
- Developing an appreciation for the diversity and dynamism of the Asia Pacific
- Interpret contemporary developments by reference to past traditions and history
- Understand the extend to which Asian States have not simply "reacted" to the West, but have "interacted" with it in an increasingly globalized world.

PL SC 386 : Japanese Foreign Policy. (3:3:0)

DESCRIPTION: Process and outcomes of Japan's foreign policy; analysis of its relations with other nations in a historical and contemporary setting.

Course Outcomes

- Students will articulate and discuss the moral issues surrounding the US decision to use nuclear weapons against Japan, decisions to wage war in East Asia, imposition of the Western international system on East Asian countries, dealing with war guilt and war atrocities, pacifism, foreign aid, and human rights.
- Students will study important theories of international relations as applied to Japan’s relations with other countries.
- Students will learn the facts, events, personalities, and ideas that have animated Japan’s relations with other countries from about 1850 to the present.
- In each class period students will be asked to identify the main points of the assigned readings as well as the evidence presented to support those main points. This method will exposestudents to each of the methods of analysis and research described above, seeing how eachmethods is used in the context of well-regarded research. Students will also be expected to critique each article, including its methods used.
- Students will write two separate research papers, both on topics of their own choosing. The papers will requireoriginal research, organized and clear presentation of ideas, and adherence to high standards of grammar and style.
- Each student will present his or her research to the rest of the class in a carefully evaluated oralpresentation. In addition, each student will participate in evaluating the presentations of other students.
- Students will have a rare opportunity in this course to set the topics for each day’s discussions based on their own analysis of theassigned readings. In each class period one or two students will be called on to lead a discussion of the implications of that day’s readings, and the implications identified by the students will be the topics that occupy the bulk of each class day’s discussions.
- Students will reinforce professional honesty and integrity by learning about the real world consequences of deceit in international relations, especially as they relate to Japan’s relationswith other countries.
- Students will be expected to adhere to the highest standards of intellectual honesty in writing both research papers and in theiruse of materials for their oral presentation.
- Students will become more informed voters and participants in political processes by learning the history of US involvement in China,Japan, Korea, and in war, imperialism, trade disputes, democratization, reparations, and the United Nations and East Asia.

PL SC 388 : Chinese Foreign Policy. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Structure and process of foreign policy of the People's Republic of China.

Course Outcomes

- Students will become familiar with the formulation and implementation of China’s foreign policy
- Develop skills in policy analysis—examining historical, cultural, international, and domestic factors that influence Chinese foreign relations.

PL SC 391 : Advanced Seminar on Current Issues. (3:3:0)

PREREQUISITE: Acceptance to Washington Seminar.

DESCRIPTION: Briefings and lectures from government officials and agencies, as well as directed readings on current issues.

NOTE: For students interning in Washington, D.C.

Course Outcomes

- Students will be expected to examine policies and institutions with the intent of seeing how the overall policy-making processes and institutions might be ameliorated.
- During the course of this semester, we intend to identify some best practices which might improve both the overall U.S. system of governance and the ability of government officials in Washington, D.C. to represent the

citizens of the United States of America more effectively.
- Students should always remember what is cited in the Doctrine and Covenants, Section 134: 1: "We believe that governments were instituted of God for the benefit of man; and that He holds men accountable for their acts in relation to them, both in making laws and administering them, for the good and safety of society," and apply this to studies.

PL SC 397 : Utah Legislative Politics. (2:2:0)

DESCRIPTION: Preparatory seminar for students in the Utah State Legislature internship. Utah history and political structure. Relations between legislature and other branches of government. Challenges of legislative service.

Course Outcomes
There are no course outcomes available

PL SC 399R : Academic Internship. (.5-9:0:0)

PREREQUISITE: Acceptance into program.

DESCRIPTION: Work-study on the international, national, state, and local level.

Course Outcomes
- Enhance and build upon study in the discipline
- Help build skills useful for future course work and, eventually, professional life
- Encourage students to explore career possibilities and enhance their prospects for future employment.

: Academic Internship.

Course Outcomes

: Washington DC Internship.

Course Outcomes

: International Internship.

Course Outcomes

: Congressional Internship.

Course Outcomes

: State Government Internship.

Course Outcomes

: City Government Intership.

Course Outcomes

: Pre-Law Internship.

Course Outcomes

: Utah Legislature Internship.

Course Outcomes

: Campaign Internship.

Course Outcomes

400-Level Courses

PL SC 400 : Capstone Seminar in Political Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 200 & PL SC 201 & PL SC 300; or PL SC 200 & PL SC 202 & PL SC 300

DESCRIPTION: Seminar in political theory for students in their senior year.

Course Outcomes
- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 402 : Plato's Political Thought. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Plato's dialogues that contain political teachings or implications.

Course Outcomes
No outcomes are available at this time.

PL SC 405 : Federalist Papers. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: The primary defense of the Constitution of the United States, which also constitutes the major commentary on that document.

Course Outcomes
There are no course outcomes available

PL SC 406 : Tocqueville on America. (3:3:0)

DESCRIPTION: Alexis de Tocqueville's *Democracy in America*.

Course Outcomes
- To gain a thorough familiarity with the text of Democracy in America, including an understanding of its basic structure and main parts, and its most significant themes and there interconnections
- To understand the deepest questions that arise from a selection on the themes of Democracy in America with the help of the best commentators on Tocqueville's text, such as Harvey Mansfield and Delba Winthrop, Pierre Manent, and Peter Lawler
- To understand the permanent interest of the challenging questions framed by Tocqueville, and their relevance to contemporary political and ethical issues
- To learn to write significant ideas in clear, correct, and strong English, based upon a careful engagement with Tocqueville's text
- See the practical consequences of abstract philosophical ideas, think more deeply and coherently about their own moral and political commitments

PL SC 410 : Capstone Seminar in American Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 110 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in American politics and government for students in their senior year.

NOTE: For political science majors only.

Course Outcomes
- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 422 : Interests and Ideas in the American Founding. (3:3:0)

WHEN TAUGHT: Contact Department.

RECOMMENDED: Pl Sc 202.

DESCRIPTION: A systematic investigation of the American founding, focusing on key interests and ideas represented at the Federal Convention of 1787 (and in other seminal events) emphasizing historical and empirical literature.

Course Outcomes
There are no course outcomes available

PL SC 430 : Capstone Seminar in Public Policy. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 110 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in public policy for students in their senior year.

NOTE: For political science majors only.

Course Outcomes
- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 444 : The Political Economy of Development. (3:3:0)

WHEN TAUGHT: Contact Department.

RECOMMENDED: Econ 110, Pl Sc 200.

DESCRIPTION: Political foundations of growth, providing public goods, and political reform in developing countries. Development and how institutions and culture shape it.

Course Outcomes
- Possess a factual and theoretical knowledge of international development
- Learn how to answer pressing but unanswered questions in international development
- Understand the most important concepts within the subfield of development as discussed by leading authorities
- Become up-to-date on the theoretical advances in the subfield
- Learn a good deal about all substantive areas of development (economic adjustment, social welfare, political reform)
- Become an "expert" in a single major aspect of development
- Connect development theory routinely to real-world examples
- Develop ability to work collaboratively with peers
- Become able to organize and help develop a major research project in a professional format
- Improve ability to write clear and engaging prose

PL SC 450 : Capstone Seminar in Comparative Politics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 150 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in comparative politics and government for students in their senior year.

Course Outcomes

- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 452 : Islam and Politics. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Tensions and accommodations between religion and politics in Muslim nations.

Course Outcomes

- This course will introduce students to the study of Islamic fundamentalism through taking up the question of the relationship of Islam and politics in the contemporary world.
- It will focus on the political implications of the emergence of Islam as a major world religion and on its use as a force in politics by Islamist groups by examining its rise, teachings, practices, metamorphoses, debates, and polemics.

PL SC 470 : Capstone Seminar in International Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: PL SC 170 & PL SC 200; Some sections also require Pl Sc 328.

DESCRIPTION: Seminar in international relations and politics for students in their senior year.

Course Outcomes

- In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.
- You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.
- Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.
- You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

PL SC 472 : International Political Economy of Women. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Effects upon national, international, and developmental policies when women are rendered visible and valued.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Students will understand the roles women play in the world society as producers, reproducers, agencies of cultural continuity and change.
- Students will explore in greater depth women's choices about education, family, and work in the developing world.
- Students will investigate transnational issues directly concerning women's lives and their societies.
- Students will discuss the dynamics of change in women's lives and in their societies, including the dynamics of religious beliefs, and to learn about programs for change that already exists

PL SC 473 : Human Rights. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Causes of human rights violations and societal and state responses; nature, history, and impacts of international human rights norms; ways to define and promote rights.

Course Outcomes

There are no course outcomes available

PL SC 474 : Arab-Palestinian-Israeli Conflict. (3:3:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Emphasizes historical background, current situation, and alternatives leading to conflict resolution.

Course Outcomes

- Students will have an increased understanding of the Arab-Israeli conflict and of the peoples, governments, and cultures it involves. Some of us enter this class with prior knowledge of the conflict; none of us enter with perfect knowledge
- Students will have an increased understanding of political and social analysis, terms, and ideas. We will discuss political science topics like "deterrence" and "conflict."
- Students will have an increased ability to think, read, and write clearly.

PL SC 475 : Civil Wars and Ethnic Violence. (3:3:0)

PREREQUISITE: Pl Sc 200.

RECOMMENDED: Pl Sc 150, 170, 328.

DESCRIPTION: Foundations of ethnic and nationalist identities and how they related to civil wars worldwide, emphasizing theoretical explanations of civil wars and their resolution. Key civil war cases examined.

Course Outcomes
- Students will think critically, analytically and synthetically
- Students will gain a knowledge of countries and wars, theoretically and factually
- Students will write a professional research paper.

PL SC 476 : Terrorism. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Pl Sc 200.

RECOMMENDED: Pl Sc 150, 170, 328.

DESCRIPTION: Defining and conceptualizing terrorism; causes and varieties of terrorism; counterterrorism; the future of terrorism.

Course Outcomes
- Students will gain a knowledge of countries and wars, theoretically and factually
- Students will write professional research papers
- Students will communicate effectively in a high quality oral presentation
- Students will think critically, analytically, and synthetically.

PL SC 497R : Mentored Research. (1-6:0:0)

PREREQUISITE: Pl Sc 200.

DESCRIPTION: Original research under the guidance of a faculty mentor. Proposals must be approved by the department curriculum coordinator.

Course Outcomes
There are no course outcomes available

PL SC 498R : Directed Readings. (.5-3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Political science major status; senior status; department chair's and instructor's consent.

Course Outcomes
There are no course outcomes available

PL SC 499 : Honors Thesis. (.5-3:ARR:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Completion of lower-division political science major requirements.

Course Outcomes
There are no course outcomes available

500-Level Graduate Courses (available to advanced undergraduates)

PL SC 539R : Advanced Topics in Public Policy. (3:3:0)

Course Outcomes
- Effective Research and Analysis
- Effective and Professional Writing
- Critical thinking and analysis
- Effective Citation

PL SC 545 : Social Policy. (3:3:0)

DESCRIPTION: Justifications for government intervention in families and individual lives, effectiveness of social policies.

Course Outcomes
- To recognize the relationship between public policy and the dimension of choice in service and practice methods.
- To have knowledge and understanding of the impact of social welfare policies on the nation's minorities and other more vulnerable populations (e.g. r ace, culture, class, gender , sexual orientation, religion, physical or mental abilities).
- To develop knowledge of our social welfare policies in the context of the systems theory to show how they are interdependent and influenced by various factors and forces in our multiple and complex society .
- Recognize the extent to which a culture' s structures and values may oppress, marginalize alienate, or create or enhance privilege and power
- Understand the forms and mechanisms of oppression and discrimination

PL SC 579R : Topics on World Politics. (3:3:0)

Course Outcomes
No outcomes are available at this time.

PL SC 599R : Academic Internship. (.5-9:0:0)

PREREQUISITE: Acceptance into program.

DESCRIPTION: Internships for master's candidates.

Course Outcomes
There are no course outcomes available

: Academic Internship.

Course Outcomes

: Graduate Internship.

Admission to Degree Program

All undergraduate degree programs in the Department of Psychology are open enrollment.

The Discipline

Psychology is a traditional discipline in the liberal arts and sciences and is rooted in the Western intellectual tradition. Since its founding in the late nineteenth century, psychology has distinguished itself primarily as a science with a wide scope of interests. Many psychologists also provide treatment for a broad range of disorders, and others work to solve pressing social issues. The diverse world community of academic and professional psychologists is devoted to expanding our understanding of individual and collective behavior and applying that understanding toward improving the human condition.

The department joins students and faculty together to make a scientific and applied contribution to the discipline of psychology. Its faculty members and administrators are committed to an educational experience that excites learning and understanding in personal and collaborative settings. At the same time the department honors the restored gospel as vital for psychological theory, as a guide for professional conduct, and as a source of unique insight. Aware of the history of psychology and as active participants therein, faculty members hold students to high standards of individual and collective performance and understanding. Students are expected to respond to multiple styles of teaching and broad opportunities for engagement in research and application with serious and sustained interest and effort. In this way the department distinguishes itself as a community of scholarship, moral principle, and devotion to the elevation of humankind.

Career Opportunities

The psychology major is a gateway to professional employment and to advanced study in psychology. Psychologists engage in a variety of academic roles as teachers, researchers, and administrators and also provide counseling, clinical, and consulting services to individuals and organizations. Psychologists are employed by colleges and universities, public and private schools, clinics, and hospitals. They work in private practice and for corporations and government entities. The study of psychology has particular value for family life and for civic and cultural roles generally. The psychology major provides a well-informed perspective on human and organizational behavior in preparation for occupations in law enforcement, law, or business.

Most professional positions require a master's or doctoral degree, although a bachelor's degree may be sufficient to gain employment in mental health care, detention and probation services, auxiliary social work, personnel, or human resources. Further, the psychology major gives students a particularly strong background leading to graduate study in business, law, or medicine.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Program Requirements | View MAP | View Program Outcomes

1. At least 36 of the total major credits must be 300-level or above. (Students can enroll in 500-level courses on a space-available basis.)
2. The Psychology Department requires a minimum of 23 hours of psychology major credit to be taken in residence at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.
3. A maximum of 13 hours may be taken as Independent Study (only 8 of which may count as departmental residence hours).
4. Complete one course from the following:

PHIL 150 : Reasoning and Writing. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Recommended for philosophy majors and minors.
DESCRIPTION: Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.
NOTE: Fulfills GE First-Year Writing requirement. No course challenges accepted.

Course Outcomes
There are no course outcomes available

WRTG 150 : Writing and Rhetoric. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
NOTE: Fulfills General Education First-Year Writing requirement.

Course Outcomes

- Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.
- Critically read texts. This includesanalyzing how a text functions in a specific situation, community, or public;analyzing the nuances of language (diction, figures of speech, tone, etc.);identifying and evaluating the elements of an argument—claims, reasons, assumptions, and ethical, emotional, and logical appeals.
- Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.
- Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.
- Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

5. Complete the following prerequisite courses:

PSYCH 101 : Orientation to the Psychology Major. (1:1:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Overview of curriculum and major requirements, faculty research programs and specialties, campus resources, and career possibilities.
NOTE: Required seminar for all students entering major.

Course Outcomes

- Students will demonstrate familiarity with the undergraduate psychology curriculum and requirements of the psychology major in terms of the American Psychological Association standards and their implementation at BYU.Measurement: In-class quizzes from assigned textbook reading; individual exams that apply the reading personally.
- Students will classify the major post-baccalaureate occupational and academic opportunities available to psychology majors.Measurement: In-class quizzes from assigned textbook reading; individual exams that apply the reading personally. Design, production, and presentation of a poster that describes an opportunity of interest.
- Students will develop a personal plan for transitioning from student to career professional.Measurement:

Produce a personal plan in multiple drafts.

PSYCH 111 : Introduction to Psychological Science. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Basic course in modern scientific psychology.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Objective: Apply psychological principles to personal and social issues and problems.Measurement:Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.
- Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Pyychology 111 sections.
- Objective: Understand the basic research methods used in psychology, including classical and current experiments.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

PSYCH 210 : A History of Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 111
RECOMMENDED: May be taken concurrently with Psych 301.
DESCRIPTION: Overview of psychological thinking from Ancient Greece to the present. Emphasizes a critical stance toward the assumptions and implications of major psychological theories.
NOTE: This course contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
There are no course outcomes available

Note: These courses must be completed prior to enrollment in the courses listed in item 7 below.

6. Complete one multicultural issues course from the following:

ANTHR 101 : Social/Cultural Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.Acquire an informed awareness of other cultural worlds—an appreciation of other ways of being human—of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.— Learn to see personal beliefs, values, attitudes, and conduct—including kinship organization and ritual, economic and political practices—from the perspective of people with different ideas about the way the world works.Develop an increased ability to write effectively.

SFL 354 : Cross-Cultural Family and Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SFL 101 & SFL 290; SFL 160 or SFL 210 or concurrent enrollment.
DESCRIPTION: Comparative study of familial, social, and other factors in development.

Course Outcomes

- Critically evaluate the importance of considering gender as an important contextual factor for understanding human development and relationships.Develop awareness of one's own cultural and gender-based values and beliefs.Recognize and explicate biases inherent in the perspective of the dominant U.S. culture.Engage in class (and out-of-class) discussions about class topicsBe better positioned as a citizen of the world, in terms of valuing diversity and being able to analyze world cultures for how they might benefit (or cost) individual and family development.

SOC 113 : Multicultural America. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Diverse cultural heritages in the United States. Cultures studied scientifically will include African American, Hispanic, Asian American, and Native American.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

7. Complete the following prerequisite courses:

PSYCH 307 : Writing Within Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 101 & PSYCH 111 & WRTG 150; or equivalents.

DESCRIPTION: Processes of research-oriented writing and presentation for psychology majors.

NOTE: Must be taken prior to or concurrently with Psych 308. Fulfills GE Advanced Written and Oral Communication requirement. Engl 315 will substitute for this course.

Course Outcomes

- Students will demonstrate that they can write clearly, focus on a well-defined purpose in writing, use conventions of format and structure appropriate to their discipline, and adopt a voice, tone, and level of formality suited to multiple purposes and audiences, including audiences both within and outside the discipline in which the course is offered.Measurement: Informal in-class writing assignments will be given and formal writing assignments will be assigned in multiple drafts with peer- and instructor-review. Genres could include a personal writing journal, letter of intent, letter to the editor, literature review, research proposal, book review, and poster presentation. Explicit focus on the Publication Manual of the American Psychological Association.
- Students will demonstrate an understanding of the roles that writing plays in their particular discipline, major, or career as a way of learning, as a way of demonstrating and evaluating what one has learned, and as a way of communicating with others.Measurement: See (1).
- Students will develop productive and flexible individual and collaborative writing processes, including prewriting, drafting, revising, editing, and proofreading. These processes could include the following: collecting data, finding supporting evidence, and creating good arguments; organizing the materials for a paper, writing successive drafts of the same paper; group writing, seeking and using peer responses; revising; editing grammar, usage, and punctuation; and using conventional formats. These processes will reflect processes of inquiry within the student's discipline.Measurement: See (1).
- Students will demonstrate the ability to use appropriate research tools and processes of research within their particular discipline, including library research. Students will demonstrate their ability to identify and evaluate sources, retrieve and evaluate data, take notes, and follow conventions of quoting, paraphrasing, and summarizing. They will cite sources properly and demonstrate an understanding of ethical issues related to research, including how to avoid plagiarism.Measurement: Complete the library-usage module provided by the Lee Library.
- Students will understand the genres, forms, styles, and documentation conventions of writing for their discipline. They will also demonstrate knowledge of edited syntax, grammar, punctuation, and spelling.Measurement: See (1).

(May be taken concurrently with Psych 302 or 304.)

PSYCH 308 : Psychological Statistics. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 210 & MATH 110

DESCRIPTION: Descriptive and inferential statistical analysis and hypothesis testing applied to psychological research data.

NOTE: Psych 307 must be taken prior to or concurrently with Psych 308. Stat 121 will not substitute for this course. Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able to recognize and understand basic statistical notation, formulae, and concepts.Measurement: Multiple choice and short answer exams
- Students will be able to accurately speak and write about statistical formulae, concepts, analyses, and results.Measurement: Short essays.
- Students will be able to correctly select and use basic statistical formulae and appropriately interpret the results.Measurement: Multiple choice tests, short essays.

PSYCH 309 : Psychological Testing. (3:2.5:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 210 & PSYCH 307 & PSYCH 308

DESCRIPTION: Construction and validation of standardized psychological tests.

NOTE: Must be taken prior to or concurrently with Psych 310. Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

- Students will effectively evaluate the psychometric strengths and weaknesses of individual psychological tests and measurements, using both conceptual and applied metrics.Measurement: This will be measured by instructors and teaching assistants based on a) multiple choice exams; b) case study evaluations of existing psychological measures; c) application of conceptual and statistical measures to students own course projects.
- Students will create their own psychological measurements suited to specific theories and hypotheses.Measurement: This will be measured by instructor evaluation of semester-long course projects that require integration of all course material including a) study design; b) creation of a measure; c) data collection and analysis; and d) written and oral presentation of study findings.

PSYCH 310 : Psychological Research Design and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 210 & PSYCH 307 & PSYCH 308

DESCRIPTION: Basic principles of designing, conducting, and reporting psychological investigations.

NOTE: Psych 309 must be taken prior to or concurrently with Psych 310. Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able to critically review the literature to generate a testable hypothesis based on a summation of current research findings and scientific thought.Measurement: Writing assignment.
- Students will be able to distinguish between methodological designs and implement and execute an appropriate design to test the hypothesis, demonstrating an understanding of and sensitivity to relevant

ethical considerations, including how to identify and measure dependent variables and measure or control for independent and other variables critical to the design of the study.Measurement: Multiple choice tests, short essays.
- Students will be able to prepare a written report of the research project adhering to APA style in all aspects of presentation (e.g., format, figures/tables, referencing) in a format that would be suitable to submit to an APA journal.Measurement: Writing assignment.
- Students will be able to present the research orally to an audience of peers in either a paper or poster format.Measurement: Presentation assignment.
- Students will be able to critically evaluate the quality of published research.Measurement: Writing assignment.

Note 1: Psych 307 may be taken concurrently with Psych 308.

Note 2: Psych 308 is prerequisite to both Psych 309 and 310 and may be taken concurrently with 210.

Note 3: Psych 309 and 310 may be taken concurrently.

Note 4: Students considering application to graduate study are strongly encouraged to take Psych 300.

8. Complete one gender issues course from the following:

PL SC 472 : International Political Economy of Women. (3:3:0)

WHEN TAUGHT: Contact Department.
DESCRIPTION: Effects upon national, international, and developmental policies when women are rendered visible and valued.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will understand the roles women play in the world society as producers, reproducers, agencies of cultural continuity and change.
- Students will explore in greater depth women's choices about education, family, and work in the developing world.
- Students will investigate transnational issues directly concerning women's lives and their societies.
- Students will discuss the dynamics of change in women's lives and in their societies, including the dynamics of religious beliefs, and to learn about programs for change that already exists

PSYCH 306 : Psychology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Biological and social contributions to sex role development, sexual self-concept, and complementarity of sex roles.
NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
There are no course outcomes available

SOC 367 : Sociology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Gender in social institutions: family, social hierarchies, economics, education, organizations, religion, and science.

Course Outcomes
There are no course outcomes available

WS 222 : (WS-Soc) Introduction to Women's Studies. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Survey of scholarship about women's lives; new historical, sociological, psychological, and literary approaches that inform our understanding of women's experience.

Course Outcomes
- 1. Students will be able to define and use the critical vocabulary basic to the field of women's studies.
- 2. Students will be able to recognize the ways in which social structures and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.
- 3. Students will begin to gain an appreciation of the contributions of women throughout history and internationally.
- 4. Students will be able to perform and present research related to women's studies in oral and written formats.
- 5. Students will begin to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.

Note: If Psych 306 is selected to fill this requirement, it cannot also be used to fill the requirement listed in item 11 (Cluster B).

9. Complete one course from the following:

PSYCH 320 : Developmental Psychology: Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Physical, mental, emotional, and social development of the child.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will describe current theories and research in human development from pre-natal development through late childhood, demonstrating an understanding of developmental processes that lead to normative development, including perceptual, cognitive, biological, genetic, and social domains, as well as factors that lead to psychopathology and mental illness.Measurement:Multiple choice tests, quizzes.
- Students will assess and critique a key issue in a group format presented to the class.Measurement:Assessment of presentation.
- Students will assess critical issues in early childhood development, integrating current research studies on topics in developmental psychology.Measurement:APA style paper.

PSYCH 342 : Abnormal Psychology. (3:3:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders,and current data relevant to such theories.Measurement: Multiple choice, short answer and essay exams; short writing assignments.
- Students will engage in service learning by serving persons diagnosed with psychological disorders.Measurement: Participation assessment/field work report
- Students will critically examine key concepts and theories in abnormal psychology.Measurement: Essay exams, short writing assignments, in-class debates
- Students will examine and critique a topic in abnormal psychology using the current research literature.Measurement: APA style paper

Note: Psych 320 or 342 cannot be double-counted here and in Cluster A.

10. Complete the following:

PSYCH 350 : (Psych-Soc) Introduction to Social Psychology. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will be able toidentify the unique contribution of social psychology to social science, situating the discipline within the larger domain of psychology and contrasting it with related disciplines, such as sociology.Measurement: Multiple choice tests, short essays.
- Students will be able to understand the use of surveys, laboratory and field experiments in conducting social psychological research, and understand the ethical principles of informed consent, deception and debriefing when conducting research with human participants.Measurement: Multiple choice tests, short essays.
- Students will be able to identify substantive areas of social psychological inquiry, including the self, person perception, attitudes and persuasion, group processes, stereotyping and prejudice, interpersonal attraction, helping behavior and aggression.Measurement: Multiple choice tests, short essays.
- Students will be able to identify and explain the contributions of major thinkers and contributors of classic and contemporary theory and research in social psychology, such as Leon Festinger and Stanley Milgram.Measurement: Multiple choice tests, short essays.
- Students will be able to identify how social psychological theory and research have been applied to domains outside the discipline, such as in health settings and the law.Measurement: Multiple choice tests, short essays.

PSYCH 381 : Behavioral Neurobiology. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent. (Neuro 205 will substitute for Psych 310.)
DESCRIPTION: Basic physiological, anatomical, and chemical foundations of psychology.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will develop their understanding of how the brain influences one's experience of the world and one's behavior in it.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.
- Students will identify scientific methods, especially those of cognitive neuroscience, that are valuable in behavioral neurobiology.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.
- Students will extend concepts and research findings to diseases, trauma, drug usage, hormones, and genes.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.

11. Complete three courses in one of the following clusters. In addition, complete one additional course listed in the other clusters (Psych 307, 308, 309, and 310 are required prerequisites):

Cluster A — Developmental and Clinical Psychology:
Complete three courses from the following:

PSYCH 311 : Critical Issues in Psychology. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Critical and comparative examination of underlying theoretical and philosophical issues relavant to contemporary social, personality, and cognitive psychology, neuroscience, and psychotherapy.

Course Outcomes
- Students will identify and describe basic assumptions (and the implications of those assumptions) that underlie the major theories, methods, practices, and schools of contemporary psychology.Measurement:Multiple choice quizzes or short essay assignments.
- Students will identify and critically evaluate these basic assumptions in the published writings of psychologists.Measurement:Multiple choice reading quizzes and short paper essay assignments.
- Students will compare and contrast alternative assumptions (and the implications of those assumptions) to those associated with the major theories, methods, practices, and schools of contemporary psychology, especially as they may be relevant to a Christian perspective.Measurement:Short paper essay assignments.

PSYCH 320 : Developmental Psychology: Childhood. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Physical, mental, emotional, and social development of the child.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will describe current theories and research in human development from pre-natal development through late childhood, demonstrating an understanding of developmental processes that lead to normative development, including perceptual, cognitive, biological, genetic, and social domains, as well as factors that lead to psychopathology and mental illness.Measurement:Multiple choice tests, quizzes.
- Students will assess and critique a key issue in a group format presented to the class.Measurement:Assessment of presentation.
- Students will assess critical issues in early childhood development, integrating current research studies on topics in developmental psychology.Measurement:APA style paper.

(will not double-count with item 9 above)
PSYCH 321 : Developmental Psychology: Adolescence. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Development and maturation during adolescence; research methodology.
NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
- Students will understand and remember the basic developments that occur during adolescence, the basic patterns of thought, emotion, and behavior characteristic of adolescents, and the important individual and contextual influences on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- 3. Students will be able to more effectively communicate verbally and in writing about adolescence.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adolescence.Measurement: Research papers.
- Students will be able to apply knowledge of adolescence to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 322 : Developmental Psychology: Adulthood. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Stability and change in psychological, physiological, and interpersonal processes through early, middle, and late adulthood.
NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
- Students will understand and remember the basic developments that occur during adulthood, the basic patterns of thought, emotion, and behavior characteristic of adults, and the important individual and contextual influences on adult psychology and development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adult psychology and development.Measurement: Multiple choice and short essay questions.
- Students will be able to more effectively communicate verbally and in writing about adulthood.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adulthood.Measurement: Research papers.
- Students will be able to apply knowledge of adulthood to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 341 : Personality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Individual patterns of behavior, thought, and emotion; personality theories and their associated strategies of research, assessments, and personality change.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and distinguish the major personality theories of psychology.Measurement:Multiple choice/Short essay.
- Students will identify and give examples of contemporary research or applications of these theories.Measurement:Multiple choice/Short essay.
- Students will identify the theoretical assumptions that underlie these personality theories.Measurement:Multiple choice.
- Students will articulate some of the practical and religious implications of these theories.Measurement:Essay assignments.

PSYCH 342 : Abnormal Psychology. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders,and current data relevant to such theories.Measurement: Multiple choice, short answer and essay exams; short writing assignments.
- Students will engage in service learning by serving persons diagnosed with psychological disorders.Measurement: Participation assessment/field work report
- Students will critically examine key concepts and theories in abnormal psychology.Measurement: Essay exams, short writing assignments, in-class debates
- Students will examine and critique a topic in abnormal psychology using the current research literature.Measurement: APA style paper

(will not double-count with item 9 above)

PSYCH 343 : Child Psychopathology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Mental disorders of childhood.

Course Outcomes

- Students will identify and describe the etiology, assessment, diagnosis, and treatment of common psychological and developmental disorders in children and adolescents.Measurement:Multiple choice exams, quizzes.
- Students will demonstrate familiarity with current issues in child psychopathology.Measurement:Presentations, short writing assignments.
- Students will examine and critique a topic using the current research literature.Measurement:APA style paper.

PSYCH 348 : Clinical Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Personality theories, psychopathology, diagnostic interviewing and testing, psychotherapy techniques; research methods.

NOTE: Not a practicum.

Course Outcomes

- Students will identify and describe the theories, practices, and critical issues in clinical psychology.Measurement:Multiple choice exams, quizzes.
- Students will summarize and explain a current topic in clinical psychology to the class and/or engage in role play and interview activities.Measurement:Class presentations, role plays.
- Students will assess and evaluate personal career/educational opportunities in the field of clinical psychology.Measurement:Short writing assignments.
- Students will examine and critique current psychotherapies and describe their personal views about therapy.Measurement:APA style paper.

Cluster B — Social Psychology:

Complete three courses from the following:

PSYCH 306 : Psychology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Biological and social contributions to sex role development, sexual self-concept, and complementarity of sex roles.

NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
There are no course outcomes available

PSYCH 311 : Critical Issues in Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Critical and comparative examination of underlying theoretical and philosophical issues relavant to contemporary social, personality, and cognitive psychology, neuroscience, and psychotherapy.

Course Outcomes

- Students will identify and describe basic assumptions (and the implications of those assumptions) that underlie the major theories, methods, practices, and schools of contemporary psychology.Measurement:Multiple choice quizzes or short essay assignments.
- Students will identify and critically evaluate these basic assumptions in the published writings of psychologists.Measurement:Multiple choice reading quizzes and short paper essay assignments.
- Students will compare and contrast alternative assumptions (and the implications of those assumptions) to those associated with the major theories, methods, practices, and schools of contemporary psychology, especially as they may be relevant to a Christian perspective.Measurement:Short paper essay assignments.

PSYCH 330 : Organizational Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Personal, interactional, and structural aspects of organizations; motivation, decision making, problem-solving communication, leadership, organizational structure, change.

NOTE: Org B 321 will not substitute for this course.

Course Outcomes

- Students will demonstrate a basic understanding of the major areas of organizational and industrial psychology, including human resources; leadership development; employee training, motivation, and satisfaction; group dynamics, organizational climate; and team-building.Measurement:Multiple choice tests, short essays.
- Students will learn to apply organizational theory to specific organizational situations.Measurement:Writing assignment.
- Students will acquire skill in collaborative teamwork, time management, self-motivation, and project planning.Measurement:Evaluation of cooperative class assignments.

PSYCH 338 : Sport Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Application of psychological principles to sporting activities.

Course Outcomes

- Students will demonstrate a basic understanding of the current status of the discipline of sport psychology and of the psychological theories that inform it, including behavioral principles and applications, social psychology, personality psychology, assessment, special athletic populations, coaching, and exercise psychology.Measurement: In-class exams on assigned textbook reading.
- Students will demonstrate familiarity with selected sport- psychology journals.Measurement: Author a paper that combines a literature review with application to a sport-performance environment.
- Students will identify and discuss current events related to sport psychology.Measurement: In-class reports and discussion of video clips or other media reports relevant to sport psychology.

PSYCH 341 : Personality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Individual patterns of behavior, thought, and emotion; personality theories and their associated strategies of research, assessments, and personality change.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and distinguish the major personality theories of psychology.Measurement:Multiple choice/Short essay.
- Students will identify and give examples of contemporary research or applications of these theories.Measurement:Multiple choice/Short essay.
- Students will identify the theoretical assumptions that underlie these personality theories.Measurement:Multiple choice.
- Students will articulate some of the practical and religious implications of these theories.Measurement:Essay assignments.

PSYCH 352 : Applied Social Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 310; or instructor's consent.
DESCRIPTION: Applying social psychological theory, research, and methods to such domains as law, business, education, the media, mental health, and physical health.

Course Outcomes
- Students will be able tounderstand how one defines something as a "social problem".Measurement: Multiple choice tests, short essays.
- Students will be able to compare and contrast basic and applied social psychology.Measurement: Multiple choice tests, short essays.
- Students will be able to identify substantive areas of social psychological application, such as education, physical health, mental health, the environment, and business.Measurement: Multiple choice tests, short essays.
- Students will be able to apply social psychological methods to an intervention designed to understand or ameliorate a social problem.Measurement: Evaluation of project

PSYCH 353 : LDS Perspectives and Psychology. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Relationships between theories of psychology and LDS thought.

Course Outcomes
There are no course outcomes available

PSYCH 354 : Psychology of Religion. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Classification of religious behavior and experience; source of religious motivation; religion and the growth process.

Course Outcomes
- Students will define psychology, religion, and spirituality and compare and contrast their key assumptions.Measurement:Multiple choice/Analytic essays.
- Students will critically examine the implications of psychological perspectives on religion and spirituality, as well as the implications of religious and spiritual perspectives on psychology.Measurement:Analytic essays.
- Students will identify alternative psychological, religious, and spiritual perspectives, examine their assumptions, and consider the value of their alternative implications to the relationship between these three worldviews.Measurement:Multiple choice/Analytical essays.
- Students will critically examine their own assumptions about the relationship between psychology, religion, and spirituality.Measurement:Analytical essays.

PSYCH 356 : Introduction to Health Psychology. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Psychology focusing on the Biopsychological Model, i.e., health issues from standpoint of biological, psychological, and social factors.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will identify and describe key concepts and theories in health psychology.Measurement: Multiple choice and brief response exams; quizzes.
- Students will examine the contributions of health psychology to the understanding of acute and chronic illness.Measurement: Multiple choice and brief response exams; group assignments and presentation.
- Students will critique current news articles about health using principles and concepts from class.Measurement: Writing assignments.
- Students will explain how principles of health psychology operate in everyday life.Measurement: Writing assignments.

PSYCH 358 : Leadership Development. (3:2:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Principles and practices of successful leadership: decision making, communications, planning, team building, motivation, and interpersonal skills.

Course Outcomes
There are no course outcomes available

PSYCH 376 : Language Development. (3:3:0)
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Principles of language acquisition including communicative development in infancy, sematic and syntactic development, language and literacy in the school years, and effects of brain damage.

Course Outcomes
- Students will demonstrate knowledge of early communicative behaviors and the emergence of language.Measurement:Multiple choice tests, short essays.

- Students will demonstrate knowledge of the components of language – specifically phonology, semantics, grammar, and pragmatics.Measurement:Multiple choice tests, short essays.
- Students will show knowledge of how language continues to develop in school age children as well as adulthood.Measurement:Multiple choice tests, short essays.
- Students will have a basic knowledge of various language disorders.Measurement:Multiple choice tests, short essays.
- Students will be able to describe the basic neurological components of language – including the effects of strokes and dementia on language and speech.Measurement:Short essays.

Cluster C — Behavior, Brain, and Cognition:
Complete three courses from the following:

PSYCH 311 : Critical Issues in Psychology. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Critical and comparative examination of underlying theoretical and philosophical issues relavant to contemporary social, personality, and cognitive psychology, neuroscience, and psychotherapy.

Course Outcomes
- Students will identify and describe basic assumptions (and the implications of those assumptions) that underlie the major theories, methods, practices, and schools of contemporary psychology.Measurement:Multiple choice quizzes or short essay assignments.
- Students will identify and critically evaluate these basic assumptions in the published writings of psychologists.Measurement:Multiple choice reading quizzes and short paper essay assignments.
- Students will compare and contrast alternative assumptions (and the implications of those assumptions) to those associated with the major theories, methods, practices, and schools of contemporary psychology, especially as they may be relevant to a Christian perspective.Measurement:Short paper essay assignments.

PSYCH 361 : Principles of Learning. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Principles of learning; representative experiments.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will develop their understanding of and facility with the concepts by which behavior analysis makes sense of selected learning phenomena.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will connect the concepts to the behavior of a virtual laboratory rat.Measurement: Individual- and team-based written reports and in-class presentations of the results of virtual experiments. Team-based manuscripts in multiple drafts both peer- and instructor- reviewed.
- Students will apply the concepts to human behavior, including one's own.Measurement: Out-of-class team-based application activities summarized in written reports. Essay exams that emphasize applications to real-life phenomena.

PSYCH 365 : Motivation. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Determinants of motivation, relationship of motives to emotion, cognition, personality, and action. Implications for understanding self and others.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will compare and contrast a wide range of theories and research findings within the subdiscipline of the psychology of motivation.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will categorize and apply theories and concepts to specific fictional characters and settings in film.Measurement: Out-of-class application activities that focus on four films shown in class and that require application of specific concepts to the characters, plots, and themes of the films.
- Students will analyze connections between the subject matter and one's own experience of motivation.Measurement: Individual essays and essay exams that focus on the personal application of concepts to one's experience.

PSYCH 370 : Sensation and Perception. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.
DESCRIPTION: Sensory basis of perception and principles of perceptual organization.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will gain an understanding of how our brains interact with our external environment and give rise to our perceptions.Measurement: Students will demonstrate this understanding on quizzes and on exams.
- Students will develop an understanding of how we know what we know about sensation

and perception, i.e., research methods in cognitive neuroscience and the scientific method.Measurement: Students will demonstrate this understanding through in-class discussion, on quizzes/exams, and through coming to class ready to learn. Being ready to learn includes completing the assigned readings and assessments, participating in lecture and discussion, and completing outside assignments (e.g., labs).
- Students will be able to apply the principles discussed in class to the world around them.Measurement: Students will demonstrate this through lab assignments.
- Students will be able to critically reflect on the content of psychology as well as on disciplinary values in light of their knowledge of and commitment to the restored gospel of Jesus Christ and to sustain personal values that are true to the gospel while maintaining their serious study of psychology and neuroscience.Measurement:Multiple choice exams, quizzes.

PSYCH 375 : Cognition. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.

DESCRIPTION: Perceptual organization; information processing; cognitive development; relationships between sensory analysis, perception, memory, learning, language, and problem solving.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will recognize and understand the cognitive processes of perception, memory, language, reasoning, and problem solving.Measurement: This will be assessed on multiple choice and essay quizzes and exams.
- Students will assess and develop ways to apply the principles of cognitive psychology.Measurement: This will be assessed with a design proposal that implements the principles of cognitive psychology.

PSYCH 382 : Stress Psychobiology. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent. (Neuro 205 will substitute for Psych 310.)

DESCRIPTION: Behavioral neurobiology of stress.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will describe how stress affects physiology and physical health outcomes.Measurement:Multiple choice exams, quizzes.
- Students will integrate their knowledge of stress and health by analyzing a health condition in the context of stress.Measurement:APA style paper.
- Students will experiment with stress management techniques and assess their effectiveness using a stress management journal.Measurement:Journal entries, critique of experience.

PSYCH 387 : Introduction to Primate Behavior. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.

DESCRIPTION: Overview of primate behavior; the role of parental care on developmental outcome, functional neurobiology, and psychopathology.

Course Outcomes
- Students will recognize the diversity of primate species and environments, and examine representative species in detail.Measurement: In-class quizzes and exams on the assigned reading.
- Students will examine specific aspects of behavior, including emotion, cognition, language, parental care, sociality, functional neurobiology, and psychopathology.Measurement: In-class quizzes and exams on the assigned reading.
- Students will compare and contrast nonhuman-primate and human behavior and environments, and consider the implications for personal beliefs about human behavior.Measurement: Literature review on a self-selected topic in multiple drafts with peer-, Writing Center-, and instructor-review.

12. Complete 3 hours from the following capstone seminars:

PSYCH 410R : Senior Practicum: Teaching of Psychology. (1-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Capstone experience as an undergraduate teaching assistant or Psych Central tutor or in other teaching-related activities, including research.

Course Outcomes
- Students will demonstrate skill in grading, mentoring, and /or teaching one or more areas of psychology. In addition to their applied work under a faculty mentor, they will be instructed in a “teaching of psychology” class.Measurement: Student academic performance in this capstone will be assessed using multiple choice and short essay exams on the material from the class. Student application of teaching and grading practices and principles will be assessed through mentor evaluation of performance.

PSYCH 420R : Senior Practicum: Community Projects. (1-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Capstone experience in community-based service learning related to practice of psychology. Structured record of student's experience required.

Course Outcomes

- Students will demonstrate knowledge of the application of the principles of psychology within a community setting.Measurement: Application of psychological principles in a community setting will be assessed through a mentor evaluation.

PSYCH 430R : Senior Practicum: Research in Psychology. (1-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Capstone experience in psychological research -- laboratory-based, field-based, or otherwise. Student typically works with a research team.

Course Outcomes

- Students will demonstrate skill in several aspects of the research process: literature review and evaluation, data gathering, data analysis, writing, and publishing.Measurement: Student mastery of the research process will be assessed from a paper prepared by the end of the semester in proper format for publication.

Note 1: To enroll in a capstone seminar students must have completed Psych 101, 111, 210, 308, 309, and 310 (or be concurrently enrolled in 309 or 310); one core course from Cluster A, B, or C; and three other 300-level psychology courses (or be concurrently enrolled in the third course).

Note 2: Enrollment in Psych 399R will also meet the capstone seminar requirement.

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete the following:

PSYCH 111 : Introduction to Psychological Science. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Basic course in modern scientific psychology.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Objective: Apply psychological principles to personal and social issues and problems.Measurement:Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.
- Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Pyychology 111 sections.
- Objective: Understand the basic research methods used in psychology, including classical and current experiments.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

PSYCH 308 : Psychological Statistics. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 210 & MATH 110
DESCRIPTION: Descriptive and inferential statistical analysis and hypothesis testing applied to psychological research data.
NOTE: Psych 307 must be taken prior to or concurrently with Psych 308. Stat 121 will not substitute for this course. Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able to recognize and understand basic statistical notation, formulae, and concepts.Measurement: Multiple choice and short answer exams
- Students will be able to accurately speak and write about statistical formulae, concepts, analyses, and results.Measurement: Short essays.
- Students will be able to correctly select and use basic statistical formulae and appropriately interpret the results.Measurement: Multiple choice tests, short essays.

2. Complete 12 elective hours from remaining undergraduate and 500-level courses; 9 hours must be 300-level or above. No more than 6 hours of Independent Study credit may count toward the minor. Students may enroll in 500-level courses with instructor's consent.

*Hours include courses that may fulfill university core requirements.

Minor in Psychology Teaching (21 hours*)

Show All Course Descriptions
Hide All Course Descriptions

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following:

PSYCH 111 : Introduction to Psychological Science. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Basic course in modern scientific psychology.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Objective: Apply psychological principles to personal and social issues and problems.Measurement:Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.
- Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Pyychology 111 sections.
- Objective: Understand the basic research methods used in psychology, including classical and current experiments.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

PSYCH 321 : Developmental Psychology: Adolescence. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Development and maturation during adolescence; research methodology.
NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

- Students will understand and remember the basic developments that occur during adolescence, the basic patterns of thought, emotion, and behavior characteristic of adolescents, and the important individual and contextual influences on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- 3. Students will be able to more effectively communicate verbally and in writing about adolescence.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adolescence.Measurement: Research papers.
- Students will be able to apply knowledge of adolescence to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 361 : Principles of Learning. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Principles of learning; representative experiments.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will develop their understanding of and facility with the concepts by which behavior analysis makes sense of selected learning phenomena.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will connect the concepts to the behavior of a virtual laboratory rat.Measurement: Individual- and team-based written reports and in-class presentations of the results of virtual experiments. Team-

based manuscripts in multiple drafts both peer- and instructor- reviewed.
- Students will apply the concepts to human behavior, including one's own.Measurement: Out-of-class team-based application activities summarized in written reports. Essay exams that emphasize applications to real-life phenomena.

3. Complete 12 elective hours from remaining undergraduate and 500-level courses (Psych 240, 320, 350 are recommended); 9 hours must be 300-level or above. No more than 6 hours of Independent Study credit may count toward the minor. Students may enroll in 500-level courses with instructor's consent.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

PSYCH 101 : Orientation to the Psychology Major. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of curriculum and major requirements, faculty research programs and specialties, campus resources, and career possibilities.

NOTE: Required seminar for all students entering major.

Course Outcomes

- Students will demonstrate familiarity with the undergraduate psychology curriculum and requirements of the psychology major in terms of the American Psychological Association standards and their implementation at BYU.Measurement: In-class quizzes from assigned textbook reading; individual exams that apply the reading personally.
- Students will classify the major post-baccalaureate occupational and academic opportunities available to psychology majors.Measurement: In-class quizzes from assigned textbook reading; individual exams that apply the reading personally. Design, production, and presentation of a poster that describes an opportunity of interest.
- Students will develop a personal plan for transitioning from student to career professional.Measurement: Produce a personal plan in multiple drafts.

PSYCH 111 : Introduction to Psychological Science. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Basic course in modern scientific psychology.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Objective: Apply psychological principles to personal and social issues and problems.Measurement:Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.
- Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Pyychology 111 sections.
- Objective: Understand the basic research methods used in psychology, including classical and current experiments.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

PSYCH 170 : Understanding and Improving Your Memory. (1:0:0)

OFFERED: Independent Study only.

DESCRIPTION: Principles of human learning and memory; study skills and methods for improving memory.

Course Outcomes

There are no course outcomes available

200-Level Courses

PSYCH 210 : A History of Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 111

RECOMMENDED: May be taken concurrently with Psych 301.

DESCRIPTION: Overview of psychological thinking from Ancient Greece to the present. Emphasizes a critical stance toward the assumptions and implications of major psychological theories.

NOTE: This course contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

There are no course outcomes available

PSYCH 212R : Special Topics in Psychology. (.5-3:ARR:ARR)

DESCRIPTION: Small-group seminar focusing on a classical text or on readings related to a contemporary issue in theory and research.

Course Outcomes
There are no course outcomes available

PSYCH 220 : Human Development: Life Span. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Interaction of psychological, biological, and social influences on behavior and psychological development through the life span.

Course Outcomes
- Students will understand and remember the basic developments that occur across the lifespan, the basic patterns of thought, emotion, and behavior characteristic of individuals at each stage of the lifespan, and the important individual and contextual influences on human development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on human development.Measurement: Multiple choice and short essay questions.
- Students will be able to more effectively communicate verbally and in writing about human development.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about human development.Measurement: Research papers.
- Students will be able to apply knowledge of human development to addressing real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 240 : Personal and Social Adjustment. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Concepts of adjustment and application of psychological principles for coping with stress and interpersonal, emotional, and psychosexual difficulties.

Course Outcomes
There are no course outcomes available

PSYCH 270 : Improving Mental Skills. (3:3:0)

DESCRIPTION: Improving one or more of the following skills: remembering, studying, problem solving, or rapid reading.

Course Outcomes
There are no course outcomes available

300-Level Courses

PSYCH 300 : Applying to Graduate School. (1:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Overview of graduate programs in psychology; preparing application materials, including the Graduate Record Examination. (GRE).

Course Outcomes
- Students will demonstrate an awareness of the steps and timetable associated with applying to graduate school.Measurement: Multiple choice tests, short essays.
- Students will be able to identify appropriate graduate programs based on their academic record and relevant experiences.Measurement: Multiple choice tests, short essays.
- Students will be able to solicit and obtain letters of recommendation.Measurement: Writing assignment.
- Students will be able to write a statement of intent/interest.Measurement: Writing assignment.
- Students will demonstrate knowledge of what occurs during graduate school interviews.Measurement:Writing assignment.

PSYCH 306 : Psychology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Biological and social contributions to sex role development, sexual self-concept, and complementarity of sex roles.

NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
There are no course outcomes available

PSYCH 307 : Writing Within Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 101 & PSYCH 111 & WRTG 150; or equivalents.

DESCRIPTION: Processes of research-oriented writing and presentation for psychology majors.

NOTE: Must be taken prior to or concurrently with Psych 308. Fulfills GE Advanced Written and Oral Communication requirement. Engl 315 will substitute for this course.

Course Outcomes

- Students will demonstrate that they can write clearly, focus on a well-defined purpose in writing, use conventions of format and structure appropriate to their discipline, and adopt a voice, tone, and level of formality suited to multiple purposes and audiences, including audiences both within and outside the discipline in which the course is offered.Measurement: Informal in-class writing assignments will be given and formal writing assignments will be assigned in multiple drafts with peer- and instructor-review. Genres could include a personal writing journal, letter of intent, letter to the editor, literature review, research proposal, book review, and poster presentation. Explicit focus on the Publication Manual of the American Psychological Association.
- Students will demonstrate an understanding of the roles that writing plays in their particular discipline, major, or career as a way of learning, as a way of demonstrating and evaluating what one has learned, and as a way of communicating with others.Measurement: See (1).
- Students will develop productive and flexible individual and collaborative writing processes, including prewriting, drafting, revising, editing, and proofreading. These processes could include the following: collecting data, finding supporting evidence, and creating good arguments; organizing the materials for a paper, writing successive drafts of the same paper; group writing, seeking and using peer responses; revising; editing grammar, usage, and punctuation; and using conventional formats. These processes will reflect processes of inquiry within the student's discipline.Measurement: See (1).
- Students will demonstrate the ability to use appropriate research tools and processes of research within their particular discipline, including library research. Students will demonstrate their ability to identify and evaluate sources, retrieve and evaluate data, take notes, and follow conventions of quoting, paraphrasing, and summarizing. They will cite sources properly and demonstrate an understanding of ethical issues related to research, including how to avoid plagiarism.Measurement: Complete the library-usage module provided by the Lee Library.
- Students will understand the genres, forms, styles, and documentation conventions of writing for their discipline. They will also demonstrate knowledge of edited syntax, grammar, punctuation, and spelling.Measurement: See (1).

PSYCH 308 : Psychological Statistics. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 210 & MATH 110

DESCRIPTION: Descriptive and inferential statistical analysis and hypothesis testing applied to psychological research data.

NOTE: Psych 307 must be taken prior to or concurrently with Psych 308. Stat 121 will not substitute for this course. Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able to recognize and understand basic statistical notation, formulae, and concepts.Measurement: Multiple choice and short answer exams
- Students will be able to accurately speak and write about statistical formulae, concepts, analyses, and results.Measurement: Short essays.
- Students will be able to correctly select and use basic statistical formulae and appropriately interpret the results.Measurement: Multiple choice tests, short essays.

PSYCH 309 : Psychological Testing. (3:2.5:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 210 & PSYCH 307 & PSYCH 308

DESCRIPTION: Construction and validation of standardized psychological tests.

NOTE: Must be taken prior to or concurrently with Psych 310. Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

- Students will effectively evaluate the psychometric strengths and weaknesses of individual psychological tests and measurements, using both conceptual and applied metrics.Measurement: This will be measured by instructors and teaching assistants based on a) multiple choice exams; b) case study evaluations of existing psychological measures; c) application of conceptual and statistical measures to students own course projects.
- Students will create their own psychological measurements suited to specific theories and hypotheses.Measurement: This will be measured by instructor evaluation of semester-long course projects that require integration of all course material including a) study design; b) creation of a measure; c) data collection and analysis; and d) written and oral presentation of study findings.

PSYCH 310 : Psychological Research Design and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 210 & PSYCH 307 & PSYCH 308

DESCRIPTION: Basic principles of designing, conducting, and reporting psychological investigations.

NOTE: Psych 309 must be taken prior to or concurrently with Psych 310. Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able to critically review the literature to generate a testable hypothesis based on a summation of current research findings and scientific thought.Measurement: Writing assignment.
- Students will be able to distinguish between methodological designs and implement and execute an appropriate design to test the hypothesis, demonstrating an understanding of and sensitivity to relevant ethical considerations, including how to identify and measure dependent variables and measure or control for independent and other variables critical to the design of the study.Measurement: Multiple choice tests, short essays.
- Students will be able to prepare a written report of the research project adhering to APA style in all aspects of presentation (e.g., format, figures/tables, referencing) in a format that would be suitable to submit to an APA journal.Measurement: Writing assignment.
- Students will be able to present the research orally to an audience of peers in either a paper or poster format.Measurement: Presentation assignment.
- Students will be able to critically evaluate the quality of published research.Measurement: Writing assignment.

PSYCH 311 : Critical Issues in Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Critical and comparative examination of underlying theoretical and philosophical issues relavant to contemporary social, personality, and cognitive psychology, neuroscience, and psychotherapy.

Course Outcomes

- Students will identify and describe basic assumptions (and the implications of those assumptions) that underlie the major theories, methods, practices, and schools of contemporary psychology.Measurement:Multiple choice quizzes or short essay assignments.
- Students will identify and critically evaluate these basic assumptions in the published writings of psychologists.Measurement:Multiple choice reading quizzes and short paper essay assignments.
- Students will compare and contrast alternative assumptions (and the implications of those assumptions) to those associated with the major theories, methods, practices, and schools of contemporary psychology, especially as they may be relevant to a Christian perspective.Measurement:Short paper essay assignments.

PSYCH 320 : Developmental Psychology: Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Physical, mental, emotional, and social development of the child.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will describe current theories and research in human development from pre-natal development through late childhood, demonstrating an understanding of developmental processes that lead to normative development, including perceptual, cognitive, biological, genetic, and social domains, as well as factors that lead to psychopathology and mental illness.Measurement:Multiple choice tests, quizzes.
- Students will assess and critique a key issue in a group format presented to the class.Measurement:Assessment of presentation.
- Students will assess critical issues in early childhood development, integrating current research studies on topics in developmental psychology.Measurement:APA style paper.

PSYCH 321 : Developmental Psychology: Adolescence. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Development and maturation during adolescence; research methodology.

NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

- Students will understand and remember the basic developments that occur during adolescence, the basic patterns of thought, emotion, and behavior characteristic of adolescents, and the important individual and contextual influences on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adolescent psychology and development.Measurement: Multiple choice and short essay questions.
- 3. Students will be able to more effectively communicate verbally and in writing about adolescence.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adolescence.Measurement: Research papers.
- Students will be able to apply knowledge of adolescence to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 322 : Developmental Psychology: Adulthood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Stability and change in psychological, physiological, and interpersonal processes through early, middle, and late adulthood.

NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

- Students will understand and remember the basic developments that occur during adulthood, the basic patterns of thought, emotion, and behavior characteristic of adults, and the important individual and contextual influences on adult psychology and development.Measurement: Multiple choice and short essay questions.
- Students will understand the key concepts and theories that are predominant in the literature on adult psychology and development.Measurement: Multiple choice and short essay questions.
- Students will be able to more effectively communicate verbally and in writing about adulthood.Measurement: Research papers.
- Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adulthood.Measurement: Research papers.
- Students will be able to apply knowledge of adulthood to address real-world issues.Measurement: Short writing assignments and in-class activities.

PSYCH 330 : Organizational Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Personal, interactional, and structural aspects of organizations; motivation, decision making, problem-solving communication, leadership, organizational structure, change.

NOTE: Org B 321 will not substitute for this course.

Course Outcomes

- Students will demonstrate a basic understanding of the major areas of organizational and industrial psychology, including human resources; leadership development; employee training, motivation, and satisfaction; group dynamics, organizational climate; and team-building.Measurement:Multiple choice tests, short essays.
- Students will learn to apply organizational theory to specific organizational situations.Measurement:Writing assignment.
- Students will acquire skill in collaborative teamwork, time management, self-motivation, and project planning.Measurement:Evaluation of cooperative class assignments.

PSYCH 338 : Sport Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Application of psychological principles to sporting activities.

Course Outcomes

- Students will demonstrate a basic understanding of the current status of the discipline of sport psychology and of the psychological theories that inform it, including behavioral principles and applications, social psychology, personality psychology, assessment, special athletic populations, coaching, and exercise psychology.Measurement: In-class exams on assigned textbook reading.
- Students will demonstrate familiarity with selected sport- psychology journals.Measurement: Author a paper that combines a literature review with application to a sport-performance environment.
- Students will identify and discuss current events related to sport psychology.Measurement: In-class reports and discussion of video clips or other media reports relevant to sport psychology.

PSYCH 341 : Personality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Individual patterns of behavior, thought, and emotion; personality theories and their associated strategies of research, assessments, and personality change.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and distinguish the major personality theories of psychology.Measurement:Multiple choice/Short essay.
- Students will identify and give examples of contemporary research or applications of these theories.Measurement:Multiple choice/Short essay.
- Students will identify the theoretical assumptions that underlie these personality theories.Measurement:Multiple choice.
- Students will articulate some of the practical and religious implications of these theories.Measurement:Essay assignments.

PSYCH 342 : Abnormal Psychology. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders,and current data relevant to such theories.Measurement: Multiple choice, short answer and essay exams; short writing assignments.
- Students will engage in service learning by serving persons diagnosed with psychological disorders.Measurement: Participation assessment/field work report
- Students will critically examine key concepts and theories in abnormal psychology.Measurement: Essay exams, short writing assignments, in-class debates
- Students will examine and critique a topic in abnormal psychology using the current research literature.Measurement: APA style paper

PSYCH 343 : Child Psychopathology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Mental disorders of childhood.

Course Outcomes

- Students will identify and describe the etiology, assessment, diagnosis, and treatment of common psychological and developmental disorders in children and adolescents.Measurement:Multiple choice exams, quizzes.
- Students will demonstrate familiarity with current issues in child psychopathology.Measurement:Presentations, short writing assignments.
- Students will examine and critique a topic using the current research literature.Measurement:APA style paper.

PSYCH 348 : Clinical Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Personality theories, psychopathology, diagnostic interviewing and testing, psychotherapy techniques; research methods.

NOTE: Not a practicum.

Course Outcomes

- Students will identify and describe the theories, practices, and critical issues in clinical psychology.Measurement:Multiple choice exams, quizzes.

Students will summarize and explain a current topic in clinical psychology to the class and/or engage in role play and interview activities.Measurement:Class presentations, role plays.
- Students will assess and evaluate personal career/educational opportunities in the field of clinical psychology.Measurement:Short writing assignments.
- Students will examine and critique current psychotherapies and describe their personal views about therapy.Measurement:APA style paper.

PSYCH 350 : (Psych-Soc) Introduction to Social Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able toidentify the unique contribution of social psychology to social science, situating the discipline within the larger domain of psychology and contrasting it with related disciplines, such as sociology.Measurement: Multiple choice tests, short essays.
- Students will be able to understand the use of surveys, laboratory and field experiments in conducting social psychological research, and understand the ethical principles of informed consent, deception and debriefing when conducting research with human participants.Measurement: Multiple choice tests, short essays.
- Students will be able to identify substantive areas of social psychological inquiry, including the self, person perception, attitudes and persuasion, group processes, stereotyping and prejudice, interpersonal attraction, helping behavior and aggression.Measurement: Multiple choice tests, short essays.
- Students will be able to identify and explain the contributions of major thinkers and contributors of classic and contemporary theory and research in social psychology, such as Leon Festinger and Stanley Milgram.Measurement: Multiple choice tests, short essays.
- Students will be able to identify how social psychological theory and research have been applied to domains outside the discipline, such as in health settings and the law.Measurement: Multiple choice tests, short essays.

PSYCH 352 : Applied Social Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 310; or instructor's consent.

DESCRIPTION: Applying social psychological theory, research, and methods to such domains as law, business, education, the media, mental health, and physical health.

Course Outcomes

- Students will be able tounderstand how one defines something as a "social problem".Measurement: Multiple choice tests, short essays.
- Students will be able to compare and contrast basic and applied social psychology.Measurement: Multiple choice tests, short essays.
- Students will be able to identify substantive areas of social psychological application, such as education, physical health, mental health, the environment, and business.Measurement: Multiple choice tests, short essays.
- Students will be able to apply social psychological methods to an intervention designed to understand or ameliorate a social problem.Measurement: Evaluation of project

PSYCH 353 : LDS Perspectives and Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Relationships between theories of psychology and LDS thought.

Course Outcomes

There are no course outcomes available

PSYCH 354 : Psychology of Religion. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Classification of religious behavior and experience; source of religious motivation; religion and the growth process.

Course Outcomes

- Students will define psychology, religion, and spirituality and compare and contrast their key assumptions.Measurement:Multiple choice/Analytic essays.
- Students will critically examine the implications of psychological perspectives on religion and spirituality, as well as the implications of religious and spiritual perspectives on psychology.Measurement:Analytic essays.
- Students will identify alternative psychological, religious, and spiritual perspectives, examine their assumptions, and consider the value of their alternative implications to the relationship between these three worldviews.Measurement:Multiple choice/Analytical essays.
- Students will critically examine their own assumptions about the relationship between psychology, religion, and spirituality.Measurement:Analytical essays.

PSYCH 356 : Introduction to Health Psychology. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Psychology focusing on the Biopsychological Model, i.e., health issues from standpoint of biological, psychological, and social factors.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and describe key concepts and theories in health psychology.Measurement: Multiple choice and brief response exams; quizzes.
- Students will examine the contributions of health psychology to the understanding of acute and chronic

illness.Measurement: Multiple choice and brief response exams; group assignments and presentation.
- Students will critique current news articles about health using principles and concepts from class.Measurement: Writing assignments.
- Students will explain how principles of health psychology operate in everyday life.Measurement: Writing assignments.

PSYCH 358 : Leadership Development. (3:2:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Principles and practices of successful leadership: decision making, communications, planning, team building, motivation, and interpersonal skills.

Course Outcomes

There are no course outcomes available

PSYCH 359 : Environmental Psychology. (3:3:0)

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Interaction between people and their physical context.

Course Outcomes

- Enter ONE outcome here.

PSYCH 361 : Principles of Learning. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Principles of learning; representative experiments.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will develop their understanding of and facility with the concepts by which behavior analysis makes sense of selected learning phenomena.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will connect the concepts to the behavior of a virtual laboratory rat.Measurement: Individual- and team-based written reports and in-class presentations of the results of virtual experiments. Team-based manuscripts in multiple drafts both peer- and instructor- reviewed.
- Students will apply the concepts to human behavior, including one's own.Measurement: Out-of-class team-based application activities summarized in written reports. Essay exams that emphasize applications to real-life phenomena.

PSYCH 365 : Motivation. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Determinants of motivation, relationship of motives to emotion, cognition, personality, and action. Implications for understanding self and others.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will compare and contrast a wide range of theories and research findings within the subdiscipline of the psychology of motivation.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will categorize and apply theories and concepts to specific fictional characters and settings in film.Measurement: Out-of-class application activities that focus on four films shown in class and that require application of specific concepts to the characters, plots, and themes of the films.
- Students will analyze connections between the subject matter and one's own experience of motivation.Measurement: Individual essays and essay exams that focus on the personal application of concepts to one's experience.

PSYCH 370 : Sensation and Perception. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.

DESCRIPTION: Sensory basis of perception and principles of perceptual organization.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will gain an understanding of how our brains interact with our external environment and give rise to our perceptions.Measurement: Students will demonstrate this understanding on quizzes and on exams.
- Students will develop an understanding of how we know what we know about sensation and perception, i.e., research methods in cognitive neuroscience and the scientific method.Measurement: Students will demonstrate this understanding through in-class discussion, on quizzes/exams, and through coming to class ready to learn. Being ready to learn includes completing the assigned readings and assessments, participating in lecture and discussion, and completing outside assignments (e.g., labs).
- Students will be able to apply the principles discussed in class to the world around them.Measurement: Students will demonstrate this through lab assignments.
- Students will be able to critically reflect on the content of psychology as well as on disciplinary values in light of their knowledge of and commitment to the restored gospel of Jesus Christ and to sustain personal values that are true to the gospel while maintaining their serious study of psychology and neuroscience.Measurement:Multiple choice exams, quizzes.

PSYCH 375 : Cognition. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.

DESCRIPTION: Perceptual organization; information processing; cognitive development; relationships between sensory analysis, perception, memory, learning, language, and problem solving.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will recognize and understand the cognitive processes of perception, memory, language, reasoning, and problem solving.Measurement: This will be assessed on multiple choice and essay quizzes and exams.
- Students will assess and develop ways to apply the principles of cognitive psychology.Measurement: This will be assessed with a design proposal that implements the principles of cognitive psychology.

PSYCH 376 : Language Development. (3:3:0)

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Principles of language acquisition including communicative development in infancy, sematic and syntactic development, language and literacy in the school years, and effects of brain damage.

Course Outcomes

- Students will demonstrate knowledge of early communicative behaviors and the emergence of language.Measurement:Multiple choice tests, short essays.
- Students will demonstrate knowledge of the components of language – specifically phonology, semantics, grammar, and pragmatics.Measurement:Multiple choice tests, short essays.
- Students will show knowledge of how language continues to develop in school age children as well as adulthood.Measurement:Multiple choice tests, short essays.
- Students will have a basic knowledge of various language disorders.Measurement:Multiple choice tests, short essays.
- Students will be able to describe the basic neurological components of language – including the effects of strokes and dementia on language and speech.Measurement:Short essays.

PSYCH 381 : Behavioral Neurobiology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent. (Neuro 205 will substitute for Psych 310.)

DESCRIPTION: Basic physiological, anatomical, and chemical foundations of psychology.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will develop their understanding of how the brain influences one's experience of the world and one's behavior in it.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.
- Students will identify scientific methods, especially those of cognitive neuroscience, that are valuable in behavioral neurobiology.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.
- Students will extend concepts and research findings to diseases, trauma, drug usage, hormones, and genes.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.

PSYCH 382 : Stress Psychobiology. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent. (Neuro 205 will substitute for Psych 310.)

DESCRIPTION: Behavioral neurobiology of stress.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will describe how stress affects physiology and physical health outcomes.Measurement:Multiple choice exams, quizzes.
- Students will integrate their knowledge of stress and health by analyzing a health condition in the context of stress.Measurement:APA style paper.
- Students will experiment with stress management techniques and assess their effectiveness using a stress management journal.Measurement:Journal entries, critique of experience.

PSYCH 387 : Introduction to Primate Behavior. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.

DESCRIPTION: Overview of primate behavior; the role of parental care on developmental outcome, functional neurobiology, and psychopathology.

Course Outcomes

- Students will recognize the diversity of primate species and environments, and examine representative species in detail.Measurement: In-class quizzes and exams on the assigned reading.
- Students will examine specific aspects of behavior, including emotion, cognition, language, parental care, sociality, functional neurobiology, and psychopathology.Measurement: In-class quizzes and exams on the assigned reading.
- Students will compare and contrast nonhuman-primate and human behavior and environments, and consider

the implications for personal beliefs about human behavior.Measurement: Literature review on a self-selected topic in multiple drafts with peer-, Writing Center-, and instructor-review.

PSYCH 388 : Drugs, Reward and Addiction. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PSYCH 111; or NEURO 205

DESCRIPTION: Examines the biopsychosocial nature of drug and behavioral addiction. This course presents the most current research in the field and bridges psychology and neuroscience.

Course Outcomes

There are no course outcomes available

PSYCH 390R : Special Topics in Psychology. (.5-3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

Course Outcomes

- Students will develop their understanding of a psychological topic that is not focal in the undergraduate curriculum otherwise. Recent examples include evolutionary psychology and the psychology of humor.Measurement:In-class quizzes and exams on the assigned reading.
- Students will identify related subdisciplines in psychology and their primary contributions to the topic.Measurement:In-class quizzes and exams on the assigned reading.
- Students will identify primary means of scientific research in the topic, and formulate a proposal for additional research.Measurement: Author a proposal for original research in multiple drafts that includes a literature review, description of method and data analysis, statement of significance, references, and timeline and estimated budget.

: Advanced Personality Studies.

Course Outcomes

: Ethology and Sociobiology.

Course Outcomes

: Comp. Animal Behavior.

Course Outcomes

: Forum Lecture.

Course Outcomes

PSYCH 399R : Academic Internship. (.5-9:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310

NOTE: A maximum of 9 credit hours may be taken.

Course Outcomes

- The first and primary objective is the placement of each student in a professionally enhancing work setting. We intend to continuously improve the quality of internship experiences being offered through a process of continuous assessment of all internships, negotiations with agencies, and internship advisement and counseling of students at the beginning of the contractual process.Measurement: The Internship Profiling Questionnaire (IPQ) has been developed specifically to be used in the on-going process of comparative assessment and improvement of all internship offerings. They are evaluated both by the student participants and also by the internship class instructors.
- Students will critically reflect on the connections between their work experience and the content of psychology and articulate these work-related insights.Measurement:Short essays essay examinations, and applications book review.
- Students will develop professional skills and attitudes through readings on professional etiquette, in-class presentations to classmates, and poster presentation at open house.Measurement:Graded writing assignments, powerpoint presentation, and poster creation and presentation.

400-Level Courses

PSYCH 410R : Senior Practicum: Teaching of Psychology. (1-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Capstone experience as an undergraduate teaching assistant or Psych Central tutor or in other teaching-related activities, including research.

Course Outcomes

- Students will demonstrate skill in grading, mentoring, and /or teaching one or more areas of psychology. In addition to their applied work under a faculty mentor, they will be instructed in a “teaching of psychology” class.Measurement: Student academic performance in this capstone will be assessed using multiple choice and short essay exams on the material from the class. Student application of teaching and grading practices and principles will be assessed through mentor evaluation of performance.

PSYCH 420R : Senior Practicum: Community Projects. (1-3:ARR:ARR)

WHEN Fall; Winter; Spring; Summer

TAUGHT:
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Capstone experience in community-based service learning related to practice of psychology. Structured record of student's experience required.

Course Outcomes
- Students will demonstrate knowledge of the application of the principles of psychology within a community setting.Measurement: Application of psychological principles in a community setting will be assessed through a mentor evaluation.

PSYCH 430R : Senior Practicum: Research in Psychology. (1-3:ARR:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Capstone experience in psychological research -- laboratory-based, field-based, or otherwise. Student typically works with a research team.

Course Outcomes
- Students will demonstrate skill in several aspects of the research process: literature review and evaluation, data gathering, data analysis, writing, and publishing.Measurement: Student mastery of the research process will be assessed from a paper prepared by the end of the semester in proper format for publication.

PSYCH 492R : Supervised Instructional or Research Experience. (.5-3:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.
DESCRIPTION: Course-related instructional activities or laboratory/field research.

Course Outcomes
- Student(s) will demonstrate skill in developing an instructional plan and lectures in an area of psychology, or skill in an area of psychological research.Measurement: Student mastery of the instructional process or the research process will be assessed from a paper or other method of documentation prepared by the end of the semester.

PSYCH 495R : Independent Readings. (.5-3:ARR:ARR)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.

Course Outcomes
- Psychology495R, Independent ReadingsStudent(s) will demonstrate mastery of a topic area of psychological research, obtained by their own independent scholarly work.Measurement:Student mastery of the research area will be assessed from a paper prepared by the end of the semester.

PSYCH 499R : Independent Research. (.5-3:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.

Course Outcomes
- Student(s) will demonstrate skill in several aspects of the research process: literature review and evaluation, data gathering, data analysis, writing, and publishing.Measurement: Student mastery of the research area will be assessed from a paper prepared by the end of the semester.

500-Level Graduate Courses (available to advanced undergraduates)

PSYCH 501 : Data Analysis in Psychological Research 1. (4:3:1)
WHEN TAUGHT: Fall
PREREQUISITE: PSYCH 308; or instructor's consent.
DESCRIPTION: Using and interpreting major quantitative methods in psychology; some commonly used computer methods.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will recognize basic statistical notation, formulae, and concepts.Measurement: This will be measured by quizzes and exams.
- Students will not only learn how to calculate the statistics we discuss, but also learn when such analyses would be appropriate and how to evaluate the results from statistical analyses.Measurement: This will be measured by students' performance on homework assignments, quizzes, exams, and the end of semester project.
- Students will become skilled in using statistical formulae and statistical software–including interpreting the output from the formulae and software.Measurement: This will be measured by students' performance on homework assignments and the end of the semester project.
- Students will become skilled in applying statistical ideas and formulae to novel situations.Measurement: This will be measured by students' performance on the end of semester project.

PSYCH 502 : Data Analysis in Psychological Research 2. (4:3:1)
WHEN TAUGHT: Winter
PREREQUISITE: PSYCH 501; or instructor's consent.
DESCRIPTION: Introduction to multivariate data analysis methods, including multivariate analysis of variance, factor analysis, discriminant analysis, multivariate multiple regression, canonical correlation, structural equations modeling, cluster

analysis, etc.

Course Outcomes
- Students will be able to read and understand the statistical methods in virtually any empirical article.Measurement: This will be measured by quizzes and exams.
- Students will know what statistical tests to use to answer specific research questions.Measurement: This will be measured by quizzes and exams.
- Students will be able to perform—using statistical software—interpret, and write up for publication the results of the multivariate statistical tests most commonly used in psychological science.Measurement: This will be measured by performance on a group course project, and also on exams.

PSYCH 503 : Research Measurement. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PSYCH 501; or instructor's consent.

DESCRIPTION: Classical true score and item response theories; estimation procedures for instrument reliability and validity.

Course Outcomes
- Students will become full-fledged psychometric ninjas. That is, students will develop a thorough understanding of test and measurement theory and their importance to science and practice in clinical psychology.Measurement: This objective will be assessed through students' contributions to class discussions and students' performance on homework assignments and exams.
- Students will gain experience using the statistical analysis software (for example SPSS and AMOS) needed to develop and assess tests and measures used in psychology.Measurement: This objective will be achieved through homework assignments.
- Students will develop a critical perspective of psychological testing by learning its strengths and limitations. "Critical" is used here to denote a thoughtful analysis rather than simply a negative perspective that focuses on limitations.Measurement: This objective will be achieved through class discussion, homework assignments, and exams.
- Students will learn to speak and write about statistics in a way that is clear, concise, and precise.Measurement: This objective will be achieved through class discussion, homework assignments, and exams.

PSYCH 504 : Research Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent enrollment in Psych 501.

DESCRIPTION: Overview of designs used in psychotherapeutic literature, emphasizing critical analysis of empirical research.

Course Outcomes
- Students will acquire a fundamental understanding of research design and methodology, and the thinking skills to develop and critique a research design.Measurement: This will be measured by exams and writing assignments.
- Students will learn to use research design principles in conducting their own research.Measurement: This will be measured by exams and writing assignments.
- Students will acquire a working knowledge of APA ethical standards for research with humans and animals.Measurement: This will be measured by in class conversations about the required reading, exams and assignments.
- Students will acquire skill in developing and critiquing a study from the standpoint of design and methodology.Measurement:This will be measured by exams and assignments.

PSYCH 505 : Clinical Research. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PSYCH 503 & PSYCH 504; or instructor's consent.

DESCRIPTION: Overview of research examining processes and outcomes of psychological treatments for psychological disorders.

Course Outcomes
- Students will describe and summarize the effectiveness of psychological interventions as well as the effective ingredients of therapy.Measurement: Class presentations, brief writing assignments.
- Students will assess the history and evolution of important themes and controversies that have influenced the current state of psychotherapy, such as the impact of managed care, shortened therapy time limits, and the push towards evidence-based practices.Measurement: Class presentations, essay exam.
- Students will discuss the implications of current research findings for the practice of psychotherapy and for their own professional practice.Measurement: Essays questions.

PSYCH 510 : History and Systems of Psychology. (3:3:0)

PREREQUISITE: PSYCH 210; or equivalent; or instructor's consent.

DESCRIPTION: Survey of origins and development of modern psychology, including consideration of the schools and theoretical systems.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will employ advanced critical thinking skills by analyzing via comparison and contrast various assumptions regarding human nature that have traditionally guided and shaped contemporary psychological thought.Measurement: Short essay format group quizzes and short analytic paper assignments.
- Students will identify and evaluate the various implications that these assumptions about human nature have for both the theory and the practice of contemporary psychology.Measurement: Multiple choice quizzes, short essay format group quizzes, and short analytic paper assignments.
- Students will identify the major figures and schools of thought that have made significant historical and conceptual contributions to the contemporary disciplinary landscape of psychology.Measurement: Multiple choice individual and group quizzes.
- Students will express a reasoned position on some of the enduring questions, issues, and concerns of the discipline of psychology that is faithful to the Restored Gospel of Jesus Christ.Measurement: Short analytic paper assignments.

PSYCH 511 : Philosophy of Science for the Social Sciences. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Instructor's consent or admission to PhD program.

DESCRIPTION: Issues in philosophy of science as they apply to social sciences, including methods, epistemology, and construction of knowledge.

Course Outcomes

- Students will identify major issues, trends, and schools of thought in contemporary philosophy of social science.Measurement: Analytic essays.
- Students will critically evaluate via comparison and contrast these issues, trends, and schools of thought.Measurement: Analytic essays.
- Students will articulate their own position on major issues in contemporary philosophy of social science, with particular attention toward the theory and practice of psychology.Measurement: Term paper assignment.

PSYCH 512 : Qualitative Research Methods. (3:3:0)

PREREQUISITE: Instructor's consent.

DESCRIPTION: Theories and methods of qualitative research emphasizing philosophical assumptions, question formulation, data gathering, interpretation, and presentation of findings.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and critically evaluate a broad range of qualitative methods of research in contemporary psychology.Measurement: Multiple choice quizzes/Analytic essays.
- Students will propose, design, and conduct a novel research project employing qualitative methods.Measurement: Course length research project.
- Students will critically evaluate contemporary examples of qualitative research from a variety of traditions, as well as submit their own work in the course to such evaluation.Measurement: Analytic essays and critical review papers.

PSYCH 520 : Advanced Developmental Psychology. (3:3:0)

PREREQUISITE: PSYCH 320 & PSYCH 321 & PSYCH 322; or equivalent; or instructor's consent.

DESCRIPTION: Major research in developmental psychology, emphasizing theory, content, and methodology.

Course Outcomes

- Students will extend their understanding of and appreciation for the developmental perspective.Measurement: Take-home essay examinations and reaction papers based on the assigned textbook reading. Lead class discussions.
- Students will explain how similar experiences can lead to different outcomes (multifinality) and how similar outcomes can arise from different starting points (equifinality).Measurement: Take-home essay examinations and reaction papers based on the assigned textbook reading. Lead class discussions.
- Students will justify the claim that all phenotypic outcomes, including behaviors, have a developmental history.Measurement:Take-home essay exams and reaction papers based on the assigned textbook reading. Lead class discussions.

PSYCH 531 : Organizational Psychology. (3:3:0)

PREREQUISITE: PSYCH 330; or equivalent; or instructor's consent.

DESCRIPTION: Personal and interpersonal aspects of organizational life: goal setting, decision making, problem solving, communication, control, leadership, motivation, and change.

Course Outcomes

There are no course outcomes available

PSYCH 535 : Behavior Modification Techniques. (3:2:2)

PREREQUISITE: PSYCH 361; or equivalent; or instructor's consent.

DESCRIPTION: Practical application of behavior modification to academic discipline; emotional target behaviors of individuals and groups.

Course Outcomes

No outcomes are available at this time.

PSYCH 540 : Personality Theory. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PSYCH 341; or equivalent; or instructor's consent.

DESCRIPTION: Contemporary theories of personality developed within the framework of major psychological systems.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and distinguish the major personality theories of psychology and their specific features and content.Measurement: Multiple choice/critical analytic essays.
- Students will identify, compare and contrast, and critically evaluate the philosophical and theoretical assumptions that underlie these personality theories.Measurement: Multiple choice/critical analytic essays.
- Students will develop and demonstrate understanding of the conceptual tools of theory construction, analysis and evaluation.Measurement: Critical analytic essays.
- Students will articulate their own position on some of the major issues of personality theory, theory construction, and application of theory.Measurement: Essay assignment.

PSYCH 550 : Theory and Research in Social Psychology. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PSYCH 350; or equivalent; or instructor's consent.
DESCRIPTION: Current theories and research on interaction with others.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will acquire a deep familiarity with social psychological theory and social psychological research, and will demonstrate advanced competency in the field.Measurement: Midterm and final essay exams.
- Students will be able to identify and find empirical research related to major topics in social psychology and write knowledgeable summaries of such research.Measurement: Evaluation of class reports and written research summaries.

PSYCH 552 : Applied Social Psychology. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: PSYCH 352; or equivalent; or instructor's consent.
DESCRIPTION: Overview of domains in which social psychological theory and research have been applied in field settings.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will understand the distinctions between basic and applied social psychology and will acquire an advanced understanding of and familiarity with the field of applied social psychology.Measurement: Midterm and final essay exams.
- Students will meet with a client and develop, execute, and report the results of an applied research project.Measurement: Evaluation of written and oral report.

PSYCH 555 : Group Dynamics. (3:3:0)
PREREQUISITE: PSYCH 365; or equivalent; or instructor's consent.
DESCRIPTION: Theories and research on small-group processes and mass behavior.

Course Outcomes
There are no course outcomes available

PSYCH 560 : Learning Theory. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: PSYCH 361; or equivalent; or instructor's consent.
DESCRIPTION: Critical review of current theories and persistent issues.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will extend their understanding of the behavioristic tradition of learning theory as science and philosophy.Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.
- Students will describe the behavioristic account of phenomena typically accounted for in cognitive, intuitive, and humanistic terms, such as mind, will, agency, privacy, and self.Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.
- Students will apply the behavioristic account in an analysis of a phenomenon of personal interest.Measurement: Author an argumentative essay in multiple drafts with peer- and instructor-review.

PSYCH 565 : Motivational Psychology. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: PSYCH 365; or equivalent; or instructor's consent.
DESCRIPTION: Theoretical, historical, and empirical overview; recent trends and issues; role of animal studies; methodological issues.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will synthesize a multi-perspectival psychology of motivation from a series of texts.Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.
- Students will compare and contrast the perspectives represented by the texts.Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.
- Students will identify and expound on a self-selected issue that runs across the texts, and thus illustrate the multi-perspectival view.Measurement: Author a comparative essay in multiple drafts with peer- and instructor-review. In-class presentation summarizing the essay's argument.

PSYCH 575 : Cognitive Processes. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: PSYCH 370 & PSYCH 375; or equivalents; or instructor's consent.
DESCRIPTION: Theory and research in perception, attention, language, problem solving, and other thinking processes.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
There are no course outcomes available

PSYCH 578R : Seminar in Mathematical Psychology. (3:3:0)
PREREQUISITE: PSYCH 308; or equivalent.
DESCRIPTION: Variable topics concerning the application of mathematical and statistical methods to psychology, with emphasis on

jointly publishing a methods paper.

Course Outcomes
No outcomes are available at this time.

PSYCH 583 : Biological and Health Psychology. (3:3:0)

WHEN TAUGHT: Winter
PREREQUISITE: PSYCH 381 & PSYCH 382; or equivalents; or instructor's consent.
DESCRIPTION: In-depth examination of biological bases of behavior from perspective of health and disease.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will identify and describe the biological, psychological, social, and spiritual factors that influence health.Measurement: Multiple choice exams, quizzes.
- Students will integrate understanding of biological, psychological, social, and spiritual factors that influence health by analyzing a health condition in light of the biopsychosocial model.Measurement: APA style paper.
- Students will examine how the biopsychosocial model applies in their own lives using a stress management journal and assessing how the different factors contribute to their own health and well-being.Measurement: Journal entries, critique of experience.

PSYCH 584 : Cognition, Affect, and Brain Function. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: PSYCH 381; or NEURO 380; or equivalent; or instructor's consent.
DESCRIPTION: Basic principles of cognition and affect as they relate to normal brain function and following neural disease or injury.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will extend their understanding of specific brain systems and the cognitive and emotional functions correlated with those systems.Measurement: Participation in class conversation about the required reading; in-class presentations on brain function or disorders; final examination.
- Students will compare and contrast scientific approaches to the study of brain, cognition, and emotion; and describe specific structural and functional research methods.Measurement:Participation in class conversation about the required reading; in-class presentations and writing assignments.
- Students will describe how brain injury can produce cognitive or emotional disorders or both and how the study of brain injury illustrates issues in the evaluation of research findings.Measurement:Author journal article critiques, final exam, and in-class presentations.

PSYCH 585 : Human Neuropsychology. (3:3:0)

WHEN TAUGHT: Winter Contact Department
PREREQUISITE: PSYCH 381 & PSYCH 382; or equivalents; or instructor's consent.
DESCRIPTION: Critical study of brain-behavior relationships.

Course Outcomes
- Students will extend their critical understanding of brain-behavior relationships.Measurement: A series of exams, including a final exam, on the assigned textbook reading. Participation in class conversation about the required reading.
- Students will integrate neuroanatomy with neurobiological functionality.Measurement: A series of exams, including a final exam, on the assigned textbook reading. Participation in class conversation about the required reading.
- Students will apply their understanding to clinical human neuropsychology.Measurement: Author a paper on a contemporary issue in human neuropsychology. The final exam will require analysis of specific human cases.

PSYCH 586 : Hormones and Behavior. (3:3:0)

PREREQUISITE: PSYCH 381 & PSYCH 382; or equivalents; or instructor's consent.
DESCRIPTION: Neural and endocrine mechanisms underlying behavior.

Course Outcomes
No outcomes are available at this time.

PSYCH 587 : Sensory and Perceptual Processes. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department
PREREQUISITE: PSYCH 370 & PSYCH 381; or equivalents; or instructor's consent.
DESCRIPTION: Critical examination of sensory mechanisms and perceptual organization.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
No outcomes are available at this time.

Note: 500-level courses may be used by undergraduate students with instructor's consent only.

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

Undergraduate Courses

200-Level Courses

SOC W 200 : Introduction to Social Work. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Social welfare as a social institution; social work as a profession.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

500-Level Graduate Courses (available to advanced undergraduates)

SOC W 570 : Crisis Intervention. (3:3:0)
WHEN TAUGHT: Fall
DESCRIPTION: Assessment and intervention in crisis situations with clients.

Course Outcomes
There are no course outcomes available

SOC W 580 : Social Work in the School Setting. (3:3:0)
WHEN TAUGHT: Winter Odd Yrs.
DESCRIPTION: Overview of knowledge and skills essential to the practice of social work in educational settings; emphasizes practical interventions when working with student/family/teacher/community resources.

Course Outcomes
There are no course outcomes available

SOC W 581 : Social Services for the Aging. (3:3:0)
WHEN TAUGHT: Winter Odd Yrs.
DESCRIPTION: Process and impact of social service delivery systems on the aged.
NOTE: Utah state certificate available.

Course Outcomes
There are no course outcomes available

SOC W 585 : Global Issues of Children at Risk. (3:3:0)
WHEN TAUGHT: Winter
DESCRIPTION: Analyzing major challenges facing children and their families globally, including poverty, malnutrition, poor health care, gender-based discrimination, child labor and sexual exploitation, AIDS orphans, child soldiers, and refugees.

Course Outcomes
There are no course outcomes available

SOC W 595R : Directed Readings. (.5-3:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.

Course Outcomes
- Under the direction of a mentored professor, students will critically examine, investigate, and integrate the literature for a topic of interest in social work

Admission to Degree Program

All degree programs in the Department of Sociology are open enrollment.

The Discipline

Sociology is the study of social relations. For example, sociologists study social interactions, the relations of power, modern society, family and community life, organizations, and institutions. Among other things, sociologists study social change and social movements, diversity, the origins of inequality, and social conflict. The study of sociology includes learning about the theoretical perspectives and the diverse research methodologies that inform sociological analysis.

Career Opportunities

Students major in sociology in preparation for a number of different careers. Individuals are trained to analyze available information, summarize findings, draw conclusions, and solve problems. The study of sociology prepares a student for professional training in law, social work, public policy, and public or business administration. Sociology also provides training for occupations that do not require graduate training: commercial and retail sales, real estate, financial planning, information management and analysis, and market research. Students interested in working for nonprofit organizations and for government agencies should consider majoring in sociology. Students interested in studying criminology or a career in law enforcement may also consider sociology as a major. Sociology is also good preparation for improving the quality of life in our families and communities.

Becoming a sociologist requires further graduate study, either a PhD or a master's degree.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Sociology (Program Outcomes)

Minor in Sociology (General)

Students should see their college advisement center for help or information concerning the undergraduate programs.

Program Requirements | View MAP | View Program Outcomes

1. The Sociology Department requires a minimum of 24 hours of sociology major courses to be taken in residence at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Complete one of the following introductory courses (preferably in sophomore year or earlier):

SOC 111 : Introductory Sociology. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Social group influence; social interaction, processes, organization, and change; family, religion, government, population, culture, race relations.

Course Outcomes
There are no course outcomes available

SOC 112 : Current Social Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Individual deviance (violence, insanity, drugs, sex, crime, etc.) and social disorganization (poverty, race and sex discrimination, divorce, overpopulation, etc.). Conditions, causes, solutions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Current Social Problems.

Course Outcomes

SOC 113 : Multicultural America. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Diverse cultural heritages in the United States. Cultures studied scientifically will include African American, Hispanic, Asian American, and Native American.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

3. Complete the following introductory statistics course:

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: MATH 110 or equivalent.
DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes
- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation

Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

4. Complete the following introductory methodology courses:

SOC 300 : Methods of Research in Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Soc 111 or 112 or 113.

DESCRIPTION: Tools of social research; survey, experimentation, content analysis, secondary analysis, qualitative research, evaluation research, data processing and analysis, and report writing.

Course Outcomes
There are no course outcomes available

SOC 307 : Data Analysis, Presentation, and Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SOC 300 & STAT 121; Major status.

DESCRIPTION: Framing research questions, locating available data, using programs and statistical packages for univariate and bivariate analysis, presenting and summarizing findings.

Course Outcomes
-
-
-
-

Note: Students must declare a sociology major before registering for Soc 307.

5. Complete the following theory courses:

SOC 310 : Foundations of Social Inquiry. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SOC 111; or SOC 112; or SOC 113

DESCRIPTION: Basic ideas and arguments forming sociological inquiry, including philosophical foundations, philosophy of social science, and development of classical theory.

Course Outcomes
There are no course outcomes available

SOC 311 : Contemporary Sociological Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SOC 310

DESCRIPTION: Ideas, critiques, and arguments that form contemporary sociological inquiry.

Course Outcomes
There are no course outcomes available

Note: Soc 300, 307, 310 and Stat 121 are foundational courses for the major. Students are encouraged to take these courses as early in their program of studies as possible. Students must complete these four courses with a C– or better grade in order to graduate with a degree in sociology.

6. Complete one of the following options in order to fulfill the GE Advanced Written and Oral Communication requirement:

Either

SOC 455R : Senior Capstone Part 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: SOC 307 & SOC 310

DESCRIPTION: This is the first semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.

NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

SOC 456R : Senior Capstone Part 2. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: SOC 455R
DESCRIPTION: This is the second semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.
NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

Or

ENGL 312 : Persuasive Writing. (3:3:0)
OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: First-year writing, junior or senior status.
DESCRIPTION: Expository and persuasive writing focusing on practical reasons for evaluating audiences, generating and structuring an argument, and making stylistic decisions. Library research paper.
NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes
- Employ informed and flexible processes for writing and speaking, including creating and/or finding ideas, evidence, and data to write about; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Create an appropriate ethos in both writing and speaking.
- Analyze the parts of an argument; evaluate them in terms of the intended audience; and generate a reasonable argument for a specific audience.Anticipate and effectively respond to audience objections and counterarguments.

Note: If you choose the first option, Soc 455R and Soc 456R will double count for requirement 10.

7. Complete at least one course from the following social diversity and inequality courses:

SOC 322 : Class Inequality. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Causes and consequences of class, status, and power differences.

Course Outcomes
- Become more aware of the social inequality around us,
- Participate in and evaluate organizations that are attempting to create greater social justice and form your own ideas about what can be done about inequality
- Understand how social structure contributes to inequality
- Understand how sociologists do research on inequality
- Learn to see the connection between sociological concepts and the inquality you observe in everyday life

SOC 323 : Racial and Minority-Group Relations. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Social psychological and social structural analysis of racial and ethnic relations; prejudice, discrimination, responses, protests, current issues.

Course Outcomes
- Demonstrate how the continuing influence and changing meaning of ethnic heritage is bound up in contemporary western culture, both as experienced by others and in their own lives.
- Describe the role of childhood in the construction of moral adulthood, and identify the community consequences of connections and continuity in the life course, as opposed to alienation and boundedness.
- Identify sources of intellectual and personal balance and of communal and personal strength in dealing with problems of cultural identity and social diversity.
- Identify strengths and weaknesses in varying subcultures, including our own, to highlight sources of self deception, and to propose personal and community actions whereby our â woundsâ may be healed.
- Describe relationships between Americaâ s history of slavery, our own attitudes toward essential work and those who perform it, and existing racist and sexist attitudes.
- Offer proposals whereby the harmonizing of social opposites can be achieved.
- Understand the consequences, positive and negative, of ethnic contact and interaction on social creativity and problem solving, and to identify consequences of such contact in their own lives.
- Identify historical examples of positive and negative ethnic contact, in terms of social innovation and creativity, and apply them to contemporary situations
- Describe the complexities of social change and social engineering, cite historical examples in which efforts at social improvement generated unanticipated and sometimes counterproductive effects, and anticipate such effects in their own efforts at personal and social improvement.
- Clarify the differences between race and ethnicity, and the effects of so categorizing our fellow humans.
- Portray the â crisisâ contemporary civilizations face in terms of the age-old tension between settled and tribal peoples, and propose actions to ameliorate the negative effects of detribalization and the

continuing increase in social diversity.
- Have a working understanding of the nature and limitations of prevailing worldviews, especially modernism and postmodernism, and their relation to social morality. Students understand the present-day significance of the Holocaust and other instances of genocide in terms of their lessons for humanity. They can identify the advantages and limits of reason and rationality, and understand that rationality and ethics may point in opposite directions, with potentially disastrous consequences for minorities.
- Demonstrate a basic familiarity with the ethnic structure of American society, how it is changing, and its implications for the future.

SOC 367 : Sociology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Gender in social institutions: family, social hierarchies, economics, education, organizations, religion, and science.

Course Outcomes
There are no course outcomes available

8. Complete the following social psychology course:

SOC 350 : (Soc-Psych) Introduction to Social Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.

Course Outcomes
There are no course outcomes available

9. Complete at least one course in advanced methodology:

SOC 404 : Qualitative Research Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

DESCRIPTION: Purposes, methods, and limitations of qualitative research. Includes participant observation and hermeneutics skills.

Course Outcomes
- Students will be able to explain the epistemological assumptions of qualitative research methods, how to select the appropriate qualitative research method to address a research question, and the criteria for evaluating qualitative research methods.
- Students will be able to design and conduct an in-depth interview study, an oral history interview study, a focus group study, an ethnography, a qualitative content analysis study, a qualitative case study, and a mixed-method study.
- Students will be able to code and interpret qualitative data. (This may include the use of qualitative data analysis software.)
- Students will be able to write a qualitative methods and findings section, as for a qualitative research article.
- Students will be able to connect what they are learning in the sociology program and/or classes with educational and career options.

SOC 405 : Multiple Regression Analysis and Social Science Computing. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307

DESCRIPTION: Data analysis and computer use in sociology; least squares and logistic regression techniques; SPSS and its use in conducting data analysis. Research report required.

Course Outcomes
- Students will be able to read and understand social scientific journal articlesStudents will be able to inspect and transform data in preparation for testing a regression model.Students will know the assumptions of regression analysis. Students will be able to test regression models. Students will know how to present their findings both written an orally.

Note: Students may wish to take both Soc 404 and 405. In such cases the second advanced methodology course may count toward the four-course requirement listed below (see item 11).

10. Complete two capstone courses from the following:

SOC 420 : Understanding Modern Societies. (3:3:0)

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Comparative-historical theory and research on the political, economic, social, and cultural processes in the formation, social organization, and future prospects of modern societies.

Course Outcomes
There are no course outcomes available

SOC 421 : Sociology of Organizations. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Examines organizational arrangements that maximize performance, innovation, and well-being; effective ways to develop social networks; diverse organizational forms like strategic alliances, multinational corporations, and NGOs.

Course Outcomes
There are no course outcomes available

SOC 422 : Inequality and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Distribution of economic and social resources (financial, status, prestige, power, and authority) as they relate to life changes, lifestyle, and social justice.

Course Outcomes
There are no course outcomes available

SOC 424 : Political Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Analysis of power and decision-making, political institutions, grass root politics, stratification, and political activity, social movements and revolutions, science/religion and politics. Writing intensive.

Course Outcomes
There are no course outcomes available

SOC 425 : Markets and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Economic sociology exploring social dynamics of market behavior from an interdisciplinary perspective; topics include social factors related to value, price, and price volatility.

Course Outcomes
There are no course outcomes available

SOC 426 : Sociology of Work and Occupations. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Distinction between work and occupation, changes in the nature of work and labor force, impacts of work, mobility in work life, and occupational attainment.

Course Outcomes
There are no course outcomes available

SOC 450 : The Family and Social Change. (3:3:0)

PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Changing patterns of family-related behaviors, functions, and forms. Demographic, economic, and ideological forces shaping the family.

Course Outcomes
There are no course outcomes available

SOC 455R : Senior Capstone Part 1. (3:3:0)

WHEN TAUGHT: Fall
PREREQUISITE: SOC 307 & SOC 310
DESCRIPTION: This is the first semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.
NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

SOC 456R : Senior Capstone Part 2. (3:3:0)

WHEN TAUGHT: Winter
PREREQUISITE: SOC 455R
DESCRIPTION: This is the second semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a

professional research paper.

NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

SOC 460 : Issues in Family Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Advanced sociological analysis of current issues relating to the family (e.g., theory, methodology, parenting, marriage, divorce, family crises, race, gender, etc.).

Course Outcomes
There are no course outcomes available

SOC 481 : Crime, Justice, and Corrections. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Nature and extent of criminal behavior; current theory and research related to causes of crime and treatment of criminals.

Course Outcomes
There are no course outcomes available

SOC 490R : Special Topics in Sociology. (1-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Course content varies from year to year.

Course Outcomes
There are no course outcomes available

11. Complete four additional courses from the following. Students are encouraged to enroll in courses that meet their academic and professional interests and needs. Courses taken to fulfill other major requirements may not be used to meet this requirement.
    a. Substantive courses:

SOC 301 : Applied Social Research Methods. (3:3:0)

PREREQUISITE: STAT 121 & SOC 300
DESCRIPTION: Research methods training for conducting research in applied settings using social research methods such as needs assessments, social impact analysis, and program evaluations.

Course Outcomes
- Graduates know the full range of methodologies, the basic epistemological assumptions associated with each, the criteria for evaluating quality research, and how to select and implement the appropriate method to test a hypothesis or address a research question.
- Graduates are able to estimate and interpret univariate and bivariate statistics and generalize their meaning to the appropriate population.
- Graduates know how to code and interpret qualitative data or how to code and prepare quantitative data for statistical analysis.
- Graduates have the necessary skills to analyze data and summarize findings including a. basic familiarity with spreadsheet programs and statistical packages, b. the analytic process of comparing across categories, c. how to chart historical trends, and d. how to summarize findings for written or oral presentation.

SOC 302 : Research Proposal for Evaluation Research. (3:3:0)

WHEN TAUGHT: Winter
PREREQUISITE: SOC 301 & IAS 220; or SOC 301 & SOC 340; Consent of instructor required.
DESCRIPTION: Students will prepare a proposal, including literature review, research questions and research design. The proposal must then be approved by the organization, the professor, and IRB. Students must receive instructor approval to enroll.

Course Outcomes
There are no course outcomes available

SOC 318 : (Soc-SFL 333) Adolescent Development in the Family and Other Social Contexts. (3:3:0)

DESCRIPTION: Examining developmental and social contexts of adolescents, emphasizing the importance of the family. Other contexts include peers, religion, community, schools, and cross-cultural issues.

Course Outcomes
There are no course outcomes available

SOC 322 : Class Inequality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Causes and consequences of class, status, and power differences.

Course Outcomes

- Become more aware of the social inequality around us,
- Participate in and evaluate organizations that are attempting to create greater social justice and form your own ideas about what can be done about inequality
- Understand how social structure contributes to inequality
- Understand how sociologists do research on inequality
- Learn to see the connection between sociological concepts and the inquality you observe in everyday life

SOC 323 : Racial and Minority-Group Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Social psychological and social structural analysis of racial and ethnic relations; prejudice, discrimination, responses, protests, current issues.

Course Outcomes

- Demonstrate how the continuing influence and changing meaning of ethnic heritage is bound up in contemporary western culture, both as experienced by others and in their own lives.
- Describe the role of childhood in the construction of moral adulthood, and identify the community consequences of connections and continuity in the life course, as opposed to alienation and boundedness.
- Identify sources of intellectual and personal balance and of communal and personal strength in dealing with problems of cultural identity and social diversity.
- Identify strengths and weaknesses in varying subcultures, including our own, to highlight sources of self deception, and to propose personal and community actions whereby our â woundsâ may be healed.
- Describe relationships between Americaâ s history of slavery, our own attitudes toward essential work and those who perform it, and existing racist and sexist attitudes.
- Offer proposals whereby the harmonizing of social opposites can be achieved.
- Understand the consequences, positive and negative, of ethnic contact and interaction on social creativity and problem solving, and to identify consequences of such contact in their own lives.
- Identify historical examples of positive and negative ethnic contact, in terms of social innovation and creativity, and apply them to contemporary situations
- Describe the complexities of social change and social engineering, cite historical examples in which efforts at social improvement generated unanticipated and sometimes counterproductive effects, and anticipate such effects in their own efforts at personal and social improvement.
- Clarify the differences between race and ethnicity, and the effects of so categorizing our fellow humans.
- Portray the â crisisâ contemporary civilizations face in terms of the age-old tension between settled and tribal peoples, and propose actions to ameliorate the negative effects of detribalization and the continuing increase in social diversity.
- Have a working understanding of the nature and limitations of prevailing worldviews, especially modernism and postmodernism, and their relation to social morality. Students understand the present-day significance of the Holocaust and other instances of genocide in terms of their lessons for humanity. They can identify the advantages and limits of reason and rationality, and understand that rationality and ethics may point in opposite directions, with potentially disastrous consequences for minorities.
- Demonstrate a basic familiarity with the ethnic structure of American society, how it is changing, and its implications for the future.

SOC 325 : Introduction to the Sociology of Religion. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Origin, growth, and organizational development of religious groups; church activity, conversion, secularization, religious change.

Course Outcomes

- Acquire a basic understanding of the major theories, concepts, and perspectives used by sociologists to study religion in the modern world.
- Acquire a basic understanding of the issues and debates concerning the scientific study of religion and the use of sociological theories and methods for the study of religion.
- Develop the ability to think critically about the study of religion and the place of religion in modern life and society.
- Develop the ability to analyze issues related to the study of religion and communicate the analysis in writing (i.e., forming and presenting an argument, using appropriate scholarly language, writing respectfully, etc.).

SOC 326 : Sociology of Education. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Social origins of goals and curricula; theories of change and control; the nature of achievement in education.

Course Outcomes

There are no course outcomes available

SOC 327 : Sociology of the LDS Church and Its People. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: The LDS Church from a social science perspective, including the Church as a new religious

movement; LDS culture; the institutionalization process.

Course Outcomes

- Students become "conversant with the substantive areas of sociology and the variety of theories and research methods associated with these substantive areas," as they apply to the sociology of religion in general and the sociology of Latter-day Saint life in particular. They learn several of the "major controversies and debates, new developments, emerging issues, and current trends" as they impact the study and interpretation of Latter-day Saint life in the contemporary academic and intellectual world. Students also are helped "to critically assess the strengths and weaknesses of current sociological theories and research relating to substantive areas," in this case Latter-day Saint life both historically and in the 20th and 21st centuries.
- Students have direct experience in comparative analysis both at the individual and group level, in interpersonal contexts as well as in vicarious and analytical experience, whereby they learn "the limitations of extrapolating from their own experience" and confront "how the life experience of others may differ from their own," both within social categories (e.g., comparisons with the life experience of other Latter-day Saints) and across social boundaries (e.g., comparisons with members of other faiths or national populations). Students experience "how race, class, and/or gender intersect with other social categories," in this instance, religious membership or national identities, "to create a variety of life experiences." They also learn to "articulate the sources of social conflict and describe the relations of power in modern society" as they consider both the history of the often-hated minority that was the Latter-day Saints and the contemporary setting and participation of Latter-day Saint people in modern and postmodern society.
- Students consider the underlying assumptions and "basic ideas and arguments forming sociological inquiry" as they apply to the sociology of religious life, especially the experience of Mormon people and Mormondom generally. Conflict theory, functionalism, social psychological perspectives, demographic perspectives are all brought into play as they affect the study of Latter-day Saint culture. Special attention is paid to the differences between postmodern and modern theoretical perspectives as they impact definitions of "truth" and "reality" and as they apply to theorizing about and doing research on people's ideas of religion and transcendence.
- Diversity of research methodologies are illustrated; the "fit" of various approaches to the study of religious life are evaluated. This is not a methods course, but as issues of research methodology affect the confidence one can have in the findings of researchers who study Mormonism, issues of methodology are discussed and we learn to distinguish good from poor research.
- Because our focus is social science literature on Mormonism across more than a century, the emphasis on "current" is limited, but because many of our readings and several of the "classics" students review are current, we contribute in part to awareness of the current state of social science analysis of religion, and Mormonism in particular. Students demonstrate their knowledge of substantive areas as applicable to research on LDS populations in their critiques of "classic" sociological studies of Mormonism, ideally demonstrating both the strong points and weaknesses of high quality and/or high profile studies of Mormon thought, life, and people.
- Both the advantages and the disadvantages of sociological perspectives (the plural here is important; there are many social science perspectives, and to speak of the sociological perspective is a distortion) with respect to interpreting daily life and religious life are emphasized throughout the course. Dilemmas and challenges of trying to live an integrated spiritual and successful temporal existence within contemporary societies are stressed throughout the course. Throughout, we stress the importance to the religious life of systematic, honest, and sophisticated awareness of intellectual fads and foibles, changing trends and worldviews, varying standards and assumptions, patterns of globalization and secularization. More than many sociological courses, this one is devoted to the overall aim of BYU education to integrate spiritual and secular life goals and interest, to combine professional and career interests with a more specialized awareness of how religious organizations, beliefs, and institutions fit within and change along with the wider society, and the challenges associated with the sometime conflict of individual, family, organizational and societal interests.

SOC 328 : Sociology of Sport. (3:3:0)

DESCRIPTION: Analysis of the sociological aspects of sport and their relationship to politics, economics, stratification, education, and family. Focus on concepts, theory, and related research.

Course Outcomes

There are no course outcomes available

SOC 329 : Medical Sociology. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Social epidemiology, the sick role, sociocultural definitions of and responses to illness, and the organization of medical-health delivery systems.

Course Outcomes

- Students will gain awareness of the social and structural factors which influence health, healing, and illness. Particular emphasis is given to: (1) influenc eof the social environment on health and illness; (2) health and illness behavior; (3) health care prasctitioners and their relationships with patients; and (4) the health care system. Students will be introduced to the literature and be conversant regarding the primary social and structural factors influencing health and illness.
- Students will gain understanding and awareness of the gender and race and ethnic differences related to health and illness.
- Students will debate a current topic related to the sociology of medicine which will require them to be conversant with the debate and develop oral presentation skills. In addition, students will research and present in written form a medical phenomenon in sociological terms.

SOC 330 : Cultural Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Recent theories and research in sociological approaches to meaning, including cultural systems and institutions, everyday life, symbolism, agency, power, texts, and globalization.

Course Outcomes
- Students will learn concepts, theories, and research methods associated with cultural sociology, with an emphasis on current issues in the subfield.
- Students will be introduced to doing a bibliographic search and a literature review.
- Students will be introduced to analytic and syntopical reading skills.
- Students will learn about educational and career options related to sociology, with an emphasis on those related to cultural sociology.

SOC 339 : Social Organization and Change. (3:3:0)

WHEN TAUGHT: Fall; Winter

RECOMMENDED: Soc 111 and 310.

DESCRIPTION: Understanding processes of social organization, change, and development in contemporary society.

Course Outcomes
There are no course outcomes available

SOC 340 : Sociology of International Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

RECOMMENDED: Soc 111 or 112; IAS 220.

DESCRIPTION: Paradigms of development and poverty; international, national, and grass roots approaches to promote development and reduce poverty; and application in developing nations.

Course Outcomes
- Become familiar with different theories about development.
- Understand the relationship between development and major social insitutions.
- Learn about what different organizations are doing to promote beneficial development.
- Learn to apply what you have learned to a specific aspect of development.
- Integrate what you have learned to develop your own approach to development.

SOC 345 : World Populations. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Fertility, mortality, and migration patterns of world populations as they relate to current social, economic, political, and religious issues.

Course Outcomes
There are no course outcomes available

SOC 360 : Introduction to Family Sociology. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Definitions of "family"; surveying the family as a context for sex, marriage, work, social reproduction, and violence in Western societies.

Course Outcomes
- Be able to critically assess the strengths and weaknesses of current sociological and demographic theories and research related to family sociology.
- Recognize how race, class, and gender intersect with family life and be familiar with the current literature on families and inequality.
- Be able to read current literature, synthesize main points across articles and develop an original thesis or argument in writing that is supported by the literature.
- Know the major controversies and debates, as well as demographic trends related to the family in the United States.
- Integrate current literature on family and determine family patterns for your personal future family.

SOC 361 : Theoretical Foundations of Marriage and Family. (3:3:0)

WHEN TAUGHT: Fall; Spring

DESCRIPTION: Comparative analysis of basic ideas and arguments for understanding marriage and family found in social science, social and political theory, law, and other forms of cultural discourse.

Course Outcomes
There are no course outcomes available

SOC 365 : Sociology of Aging. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Demographic and social factors related to aging: agencies, serving older citizens, and role of community in solving problems of aged.

NOTE: Required for students in gerontology minor and/or certificate programs.

Course Outcomes
There are no course outcomes available

SOC 367 : Sociology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Gender in social institutions: family, social hierarchies, economics, education, organizations, religion, and science.

Course Outcomes
There are no course outcomes available

SOC 370 : The Sociology of Urban Life. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Norms, social controls, and social processes in urban areas in both historical and contemporary perspectives.

Course Outcomes
There are no course outcomes available

SOC 380 : Deviant Behavior and Social Control. (3:3:0)

DESCRIPTION: Theory and research related to deviance. Specific topics include psychosis, addiction, homosexuality, violence, and rape, among others.

Course Outcomes
There are no course outcomes available

SOC 383 : Juvenile Delinquency. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Lawlessness of children and adolescents: causation, treatment, prevention, and outlook.

Course Outcomes
There are no course outcomes available

SOC 390R : Special Topics in Contemporary Sociology. (.5-3:3:0)

PREREQUISITE: Instructor's consent.

DESCRIPTION: Course content varies from year to year.

Course Outcomes
- Students will be able to recognize the ways in which social structure and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.
- Students will begin to gain an appreciation of the contributions of women throughout history and internationally.
- Students will be able to perform and present research related to women's studies in oral, written, and/or multi-media formats.
- Students will be able to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.
- Students will be able to define and use in speech and writing the critical vocabulary basic to the field of women's studies.

SOC 495R : Directed Reading in Sociology. (1-6:0:0)

PREREQUISITE: Consent of instructor required.

DESCRIPTION: Individualized reading program supervised by faculty member. Student selects reading topic and completes systematic in-depth reading of related literature.

Course Outcomes
- Students will develop and read literature from specific sub-field within sociology.
- Students will evaluate, synthesize, and summarize literature in a specific sub-field of sociology.

WS 222 : (WS-Soc) Introduction to Women's Studies. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Survey of scholarship about women's lives; new historical, sociological, psychological, and literary approaches that inform our understanding of women's experience.

Course Outcomes
- 1. Students will be able to define and use the critical vocabulary basic to the field of women's studies.
- 2. Students will be able to recognize the ways in which social structures and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.
- 3. Students will begin to gain an appreciation of the contributions of women throughout history and internationally.
- 4. Students will be able to perform and present research related to women's studies in oral and written formats.
- 5. Students will begin to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.

b. Advanced methodological courses:

SOC 404 : Qualitative Research Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

DESCRIPTION: Purposes, methods, and limitations of qualitative research. Includes participant observation and hermeneutics skills.

Course Outcomes

- Students will be able to explain the epistemological assumptions of qualitative research methods, how to select the appropriate qualitative research method to address a research question, and the criteria for evaluating qualitative research methods.
- Students will be able to design and conduct an in-depth interview study, an oral history interview study, a focus group study, an ethnography, a qualitative content analysis study, a qualitative case study, and a mixed-method study.
- Students will be able to code and interpret qualitative data. (This may include the use of qualitative data analysis software.)
- Students will be able to write a qualitative methods and findings section, as for a qualitative research article.
- Students will be able to connect what they are learning in the sociology program and/or classes with educational and career options.

SOC 405 : Multiple Regression Analysis and Social Science Computing. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307

DESCRIPTION: Data analysis and computer use in sociology; least squares and logistic regression techniques; SPSS and its use in conducting data analysis. Research report required.

Course Outcomes

- Students will be able to read and understand social scientific journal articlesStudents will be able to inspect and transform data in preparation for testing a regression model.Students will know the assumptions of regression analysis. Students will be able to test regression models. Students will know how to present their findings both written an orally.

c. Capstone sociology courses:

SOC 420 : Understanding Modern Societies. (3:3:0)

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Comparative-historical theory and research on the political, economic, social, and cultural processes in the formation, social organization, and future prospects of modern societies.

Course Outcomes

There are no course outcomes available

SOC 421 : Sociology of Organizations. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Examines organizational arrangements that maximize performance, innovation, and well-being; effective ways to develop social networks; diverse organizational forms like strategic alliances, multinational corporations, and NGOs.

Course Outcomes

There are no course outcomes available

SOC 422 : Inequality and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Distribution of economic and social resources (financial, status, prestige, power, and authority) as they relate to life changes, lifestyle, and social justice.

Course Outcomes

There are no course outcomes available

SOC 424 : Political Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Analysis of power and decision-making, political institutions, grass root politics, stratification, and political activity, social movements and revolutions, science/religion and politics. Writing intensive.

Course Outcomes

There are no course outcomes available

SOC 425 : Markets and Society. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Economic sociology exploring social dynamics of market behavior from an interdisciplinary perspective; topics include social factors related to value, price, and price volatility.

Course Outcomes
There are no course outcomes available

SOC 426 : Sociology of Work and Occupations. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Distinction between work and occupation, changes in the nature of work and labor force, impacts of work, mobility in work life, and occupational attainment.

Course Outcomes
There are no course outcomes available

SOC 450 : The Family and Social Change. (3:3:0)
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Changing patterns of family-related behaviors, functions, and forms. Demographic, economic, and ideological forces shaping the family.

Course Outcomes
There are no course outcomes available

SOC 455R : Senior Capstone Part 1. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: SOC 307 & SOC 310
DESCRIPTION: This is the first semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.
NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

SOC 456R : Senior Capstone Part 2. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: SOC 455R
DESCRIPTION: This is the second semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.
NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

SOC 460 : Issues in Family Sociology. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Advanced sociological analysis of current issues relating to the family (e.g., theory, methodology, parenting, marriage, divorce, family crises, race, gender, etc.).

Course Outcomes
There are no course outcomes available

SOC 481 : Crime, Justice, and Corrections. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Nature and extent of criminal behavior; current theory and research related to causes of crime and treatment of criminals.

Course Outcomes
There are no course outcomes available

SOC 490R : Special Topics in Sociology. (1-3:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Course content varies from year to year.

Course Outcomes
There are no course outcomes available

d. Students are strongly encouraged to participate in a semester-long (3 credit hours) professional experience: Academic Internship (Soc 399R), Washington Seminar (Pl Sc 399R), or International Internship (IAS 399R). Students may also want to pursue a research experience with a faculty member (Soc 497R). Students may apply a total of six credit hours towards sociology electives (3 hours of internship and 3 hours of directed research).

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete one course from the following:

SOC 111 : Introductory Sociology. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Social group influence; social interaction, processes, organization, and change; family, religion, government, population, culture, race relations.

Course Outcomes
There are no course outcomes available

SOC 112 : Current Social Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Individual deviance (violence, insanity, drugs, sex, crime, etc.) and social disorganization (poverty, race and sex discrimination, divorce, overpopulation, etc.). Conditions, causes, solutions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Current Social Problems.

Course Outcomes

SOC 113 : Multicultural America. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Diverse cultural heritages in the United States. Cultures studied scientifically will include African American, Hispanic, Asian American, and Native American.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

2. Complete at least one course from the following social diversity and inequality courses:

SOC 322 : Class Inequality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Causes and consequences of class, status, and power differences.

Course Outcomes

- Become more aware of the social inequality around us,
- Participate in and evaluate organizations that are attempting to create greater social justice and form your own ideas about what can be done about inequality
- Understand how social structure contributes to inequality
- Understand how sociologists do research on inequality
- Learn to see the connection between sociological concepts and the inquality you observe in everyday life

SOC 323 : Racial and Minority-Group Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Social psychological and social structural analysis of racial and ethnic relations; prejudice, discrimination, responses, protests, current issues.

Course Outcomes

- Demonstrate how the continuing influence and changing meaning of ethnic heritage is bound up in contemporary western culture, both as experienced by others and in their own lives.
- Describe the role of childhood in the construction of moral adulthood, and identify the community consequences of connections and continuity in the life course, as opposed to alienation and boundedness.
- Identify sources of intellectual and personal balance and of communal and personal strength in dealing with problems of cultural identity and social diversity.
- Identify strengths and weaknesses in varying subcultures, including our own, to highlight sources of self deception, and to propose personal and community actions whereby our â woundsâ may be healed.
- Describe relationships between Americaâ s history of slavery, our own attitudes toward essential work and those who perform it, and existing racist and sexist attitudes.
- Offer proposals whereby the harmonizing of social opposites can be achieved.
- Understand the consequences, positive and negative, of ethnic contact and interaction on social creativity and problem solving, and to identify consequences of such contact in their own lives.
- Identify historical examples of positive and negative ethnic contact, in terms of social innovation and creativity, and apply them to contemporary situations
- Describe the complexities of social change and social engineering, cite historical examples in which efforts at social improvement generated unanticipated and sometimes counterproductive effects, and anticipate such effects in their own efforts at personal and social improvement.
- Clarify the differences between race and ethnicity, and the effects of so categorizing our fellow humans.
- Portray the â crisisâ contemporary civilizations face in terms of the age-old tension between settled and tribal peoples, and propose actions to ameliorate the negative effects of detribalization and the continuing increase in social diversity.
- Have a working understanding of the nature and limitations of prevailing worldviews, especially modernism and postmodernism, and their relation to social morality. Students understand the present-day significance of the Holocaust and other instances of genocide in terms of their lessons for humanity. They can identify the advantages and limits of reason and rationality, and understand that rationality and ethics may point in opposite directions, with potentially disastrous consequences for minorities.
- Demonstrate a basic familiarity with the ethnic structure of American society, how it is changing, and its implications for the future.

SOC 367 : Sociology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Gender in social institutions: family, social hierarchies, economics, education, organizations, religion, and science.

Course Outcomes

There are no course outcomes available

3. Complete an additional 9 credit hours from sociology 300-level and above coursework not previously taken.

Note: Students interested in a sociology minor that emphasizes the research and analysis component of the major may select among the following courses as electives: Soc 300, 307, 404, or 405. Students are cautioned that Soc 404 and 405 have several prerequisites, which will require additional courses beyond the 15 hour minimum for a minor. Soc 307 is currently open only to majors; students interested in the sociology minor may add the course with the instructor's consent.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

SOC 111 : Introductory Sociology. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Social group influence; social interaction, processes, organization, and change; family, religion, government, population, culture, race relations.

Course Outcomes
There are no course outcomes available

SOC 112 : Current Social Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Individual deviance (violence, insanity, drugs, sex, crime, etc.) and social disorganization (poverty, race and sex discrimination, divorce, overpopulation, etc.). Conditions, causes, solutions.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Current Social Problems.

Course Outcomes

SOC 113 : Multicultural America. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Diverse cultural heritages in the United States. Cultures studied scientifically will include African American, Hispanic, Asian American, and Native American.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

200-Level Courses

SOC 222 : (Soc-WS) Introduction to Women's Studies. (3:3:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Survey of scholarship about women's lives; new historical, sociological, psychological, and literary approaches that inform our understanding of women's experience.

Course Outcomes
No outcomes are available at this time.

300-Level Courses

SOC 300 : Methods of Research in Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Soc 111 or 112 or 113.
DESCRIPTION: Tools of social research; survey, experimentation, content analysis, secondary analysis, qualitative research, evaluation research, data processing and analysis, and report writing.

Course Outcomes
There are no course outcomes available

SOC 301 : Applied Social Research Methods. (3:3:0)

PREREQUISITE: STAT 121 & SOC 300

DESCRIPTION: Research methods training for conducting research in applied settings using social research methods such as needs assessments, social impact analysis, and program evaluations.

Course Outcomes
- Graduates know the full range of methodologies, the basic epistemological assumptions associated with each, the criteria for evaluating quality research, and how to select and implement the appropriate method to test a hypothesis or address a research question.
- Graduates are able to estimate and interpret univariate and bivariate statistics and generalize their meaning to the appropriate population.
- Graduates know how to code and interpret qualitative data or how to code and prepare quantitative data for statistical analysis.
- Graduates have the necessary skills to analyze data and summarize findings including a. basic familiarity with spreadsheet programs and statistical packages, b. the analytic process of comparing across categories, c. how to chart historical trends, and d. how to summarize findings for written or oral presentation.

SOC 302 : Research Proposal for Evaluation Research. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: SOC 301 & IAS 220; or SOC 301 & SOC 340; Consent of instructor required.

DESCRIPTION: Students will prepare a proposal, including literature review, research questions and research design. The proposal must then be approved by the organization, the professor, and IRB. Students must receive instructor approval to enroll.

Course Outcomes
There are no course outcomes available

SOC 307 : Data Analysis, Presentation, and Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SOC 300 & STAT 121; Major status.

DESCRIPTION: Framing research questions, locating available data, using programs and statistical packages for univariate and bivariate analysis, presenting and summarizing findings.

Course Outcomes
-
-
-
-

SOC 310 : Foundations of Social Inquiry. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SOC 111; or SOC 112; or SOC 113

DESCRIPTION: Basic ideas and arguments forming sociological inquiry, including philosophical foundations, philosophy of social science, and development of classical theory.

Course Outcomes
There are no course outcomes available

SOC 311 : Contemporary Sociological Theory. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SOC 310

DESCRIPTION: Ideas, critiques, and arguments that form contemporary sociological inquiry.

Course Outcomes
There are no course outcomes available

SOC 318 : (Soc-SFL 333) Adolescent Development in the Family and Other Social Contexts. (3:3:0)

DESCRIPTION: Examining developmental and social contexts of adolescents, emphasizing the importance of the family. Other contexts include peers, religion, community, schools, and cross-cultural issues.

Course Outcomes
There are no course outcomes available

SOC 322 : Class Inequality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Causes and consequences of class, status, and power differences.

Course Outcomes
- Become more aware of the social inequality around us,
- Participate in and evaluate organizations that are attempting to create greater social justice and form your own

ideas about what can be done about inequality
- Understand how social structure contributes to inequality
- Understand how sociologists do research on inequality
- Learn to see the connection between sociological concepts and the inquality you observe in everyday life

SOC 323 : Racial and Minority-Group Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Social psychological and social structural analysis of racial and ethnic relations; prejudice, discrimination, responses, protests, current issues.

Course Outcomes
- Demonstrate how the continuing influence and changing meaning of ethnic heritage is bound up in contemporary western culture, both as experienced by others and in their own lives.
- Describe the role of childhood in the construction of moral adulthood, and identify the community consequences of connections and continuity in the life course, as opposed to alienation and boundedness.
- Identify sources of intellectual and personal balance and of communal and personal strength in dealing with problems of cultural identity and social diversity.
- Identify strengths and weaknesses in varying subcultures, including our own, to highlight sources of self deception, and to propose personal and community actions whereby our â woundsâ may be healed.
- Describe relationships between Americaâ s history of slavery, our own attitudes toward essential work and those who perform it, and existing racist and sexist attitudes.
- Offer proposals whereby the harmonizing of social opposites can be achieved.
- Understand the consequences, positive and negative, of ethnic contact and interaction on social creativity and problem solving, and to identify consequences of such contact in their own lives.
- Identify historical examples of positive and negative ethnic contact, in terms of social innovation and creativity, and apply them to contemporary situations
- Describe the complexities of social change and social engineering, cite historical examples in which efforts at social improvement generated unanticipated and sometimes counterproductive effects, and anticipate such effects in their own efforts at personal and social improvement.
- Clarify the differences between race and ethnicity, and the effects of so categorizing our fellow humans.
- Portray the â crisisâ contemporary civilizations face in terms of the age-old tension between settled and tribal peoples, and propose actions to ameliorate the negative effects of detribalization and the continuing increase in social diversity.
- Have a working understanding of the nature and limitations of prevailing worldviews, especially modernism and postmodernism, and their relation to social morality. Students understand the present-day significance of the Holocaust and other instances of genocide in terms of their lessons for humanity. They can identify the advantages and limits of reason and rationality, and understand that rationality and ethics may point in opposite directions, with potentially disastrous consequences for minorities.
- Demonstrate a basic familiarity with the ethnic structure of American society, how it is changing, and its implications for the future.

SOC 325 : Introduction to the Sociology of Religion. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Origin, growth, and organizational development of religious groups; church activity, conversion, secularization, religious change.

Course Outcomes
- Acquire a basic understanding of the major theories, concepts, and perspectives used by sociologists to study religion in the modern world.
- Acquire a basic understanding of the issues and debates concerning the scientific study of religion and the use of sociological theories and methods for the study of religion.
- Develop the ability to think critically about the study of religion and the place of religion in modern life and society.
- Develop the ability to analyze issues related to the study of religion and communicate the analysis in writing (i.e., forming and presenting an argument, using appropriate scholarly language, writing respectfully, etc.).

SOC 326 : Sociology of Education. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Social origins of goals and curricula; theories of change and control; the nature of achievement in education.

Course Outcomes
There are no course outcomes available

SOC 327 : Sociology of the LDS Church and Its People. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: The LDS Church from a social science perspective, including the Church as a new religious movement; LDS culture; the institutionalization process.

Course Outcomes
- Students become “conversant with the substantive areas of sociology and the variety of theories and research methods associated with these substantive areas,” as they apply to the sociology of religion in general and the sociology of Latter-day Saint life in particular. They learn several of the “major controversies and debates, new developments, emerging issues, and current trends” as they impact the study and interpretation of Latter-day Saint life in the contemporary academic and intellectual world. Students also are helped “to critically assess the strengths and weaknesses of current sociological theories and research relating to substantive areas,” in this case Latter-day Saint life both historically and in the 20th and 21st centuries.
- Students have direct experience in comparative analysis both at the individual and group level, in interpersonal contexts as well as in vicarious and analytical experience, whereby they learn “the limitations of extrapolating from their own experience” and confront “how the life experience of others may differ from their own,” both within social categories (e.g., comparisons with the life experience of other Latter-day Saints) and across social boundaries (e.g., comparisons with members of other faiths or national populations). Students experience “how race, class, and/or gender intersect with other social categories,” in this instance, religious membership

or national identities, “to create a variety of life experiences.” They also learn to “articulate the sources of social conflict and describe the relations of power in modern society” as they consider both the history of the often-hated minority that was the Latter-day Saints and the contemporary setting and participation of Latter-day Saint people in modern and postmodern society.
- Students consider the underlying assumptions and “basic ideas and arguments forming sociological inquiry” as they apply to the sociology of religious life, especially the experience of Mormon people and Mormondom generally. Conflict theory, functionalism, social psychological perspectives, demographic perspectives are all brought into play as they affect the study of Latter-day Saint culture. Special attention is paid to the differences between postmodern and modern theoretical perspectives as they impact definitions of “truth” and “reality” and as they apply to theorizing about and doing research on people’s ideas of religion and transcendence.
- Diversity of research methodologies are illustrated; the “fit” of various approaches to the study of religious life are evaluated. This is not a methods course, but as issues of research methodology affect the confidence one can have in the findings of researchers who study Mormonism, issues of methodology are discussed and we learn to distinguish good from poor research.
- Because our focus is social science literature on Mormonism across more than a century, the emphasis on “current” is limited, but because many of our readings and several of the “classics” students review are current, we contribute in part to awareness of the current state of social science analysis of religion, and Mormonism in particular. Students demonstrate their knowledge of substantive areas as applicable to research on LDS populations in their critiques of “classic” sociological studies of Mormonism, ideally demonstrating both the strong points and weaknesses of high quality and/or high profile studies of Mormon thought, life, and people.
- Both the advantages and the disadvantages of sociological perspectives (the plural here is important; there are many social science perspectives, and to speak of the sociological perspective is a distortion) with respect to interpreting daily life and religious life are emphasized throughout the course. Dilemmas and challenges of trying to live an integrated spiritual and successful temporal existence within contemporary societies are stressed throughout the course. Throughout, we stress the importance to the religious life of systematic, honest, and sophisticated awareness of intellectual fads and foibles, changing trends and worldviews, varying standards and assumptions, patterns of globalization and secularization. More than many sociological courses, this one is devoted to the overall aim of BYU education to integrate spiritual and secular life goals and interest, to combine professional and career interests with a more specialized awareness of how religious organizations, beliefs, and institutions fit within and change along with the wider society, and the challenges associated with the sometime conflict of individual, family, organizational and societal interests.

SOC 328 : Sociology of Sport. (3:3:0)

DESCRIPTION: Analysis of the sociological aspects of sport and their relationship to politics, economics, stratification, education, and family. Focus on concepts, theory, and related research.

Course Outcomes
There are no course outcomes available

SOC 329 : Medical Sociology. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Social epidemiology, the sick role, sociocultural definitions of and responses to illness, and the organization of medical-health delivery systems.

Course Outcomes
- Students will gain awareness of the social and structural factors which influence health, healing, and illness. Particular emphasis is given to: (1) influenc eof the social environment on health and illness; (2) health and illness behavior; (3) health care prasctitioners and their relationships with patients; and (4) the health care system. Students will be introduced to the literature and be conversant regarding the primary social and structural factors influencing health and illness.
- Students will gain understanding and awareness of the gender and race and ethnic differences related to health and illness.
- Students will debate a current topic related to the sociology of medicine which will require them to be conversant with the debate and develop oral presentation skills. In addition, students will research and present in written form a medical phenomenon in sociological terms.

SOC 330 : Cultural Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Recent theories and research in sociological approaches to meaning, including cultural systems and institutions, everyday life, symbolism, agency, power, texts, and globalization.

Course Outcomes
- Students will learn concepts, theories, and research methods associated with cultural sociology, with an emphasis on current issues in the subfield.
- Students will be introduced to doing a bibliographic search and a literature review.
- Students will be introduced to analytic and syntopical reading skills.
- Students will learn about educational and career options related to sociology, with an emphasis on those related to cultural sociology.

SOC 333 : (Soc-Nurs) End-of-Life Care. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: End-of-life (EOL) care from spiritual, physical, and psychosocial perspectives. Comparisons from various cultural/ethnic backgrounds. Complexities of EOL care including impact on families, health care system, and society. Personal perspectives about death, dying, and bereavement.

Course Outcomes
There are no course outcomes available

SOC 339 : Social Organization and Change. (3:3:0)

WHEN TAUGHT: Fall; Winter

RECOMMENDED: Soc 111 and 310.

DESCRIPTION: Understanding processes of social organization, change, and development in contemporary society.

Course Outcomes

There are no course outcomes available

SOC 340 : Sociology of International Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

RECOMMENDED: Soc 111 or 112; IAS 220.

DESCRIPTION: Paradigms of development and poverty; international, national, and grass roots approaches to promote development and reduce poverty; and application in developing nations.

Course Outcomes

- Become familiar with different theories about development.
- Understand the relationship between development and major social insitutions.
- Learn about what different organizations are doing to promote beneficial development.
- Learn to apply what you have learned to a specific aspect of development.
- Integrate what you have learned to develop your own approach to development.

SOC 345 : World Populations. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Fertility, mortality, and migration patterns of world populations as they relate to current social, economic, political, and religious issues.

Course Outcomes

There are no course outcomes available

SOC 350 : (Soc-Psych) Introduction to Social Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.

Course Outcomes

There are no course outcomes available

SOC 360 : Introduction to Family Sociology. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Definitions of "family"; surveying the family as a context for sex, marriage, work, social reproduction, and violence in Western societies.

Course Outcomes

- Be able to critically assess the strengths and weaknesses of current sociological and demographic theories and research related to family sociology.
- Recognize how race, class, and gender intersect with family life and be familiar with the current literature on families and inequality.
- Be able to read current literature, synthesize main points across articles and develop an original thesis or argument in writing that is supported by the literature.
- Know the major controversies and debates, as well as demographic trends related to the family in the United States.
- Integrate current literature on family and determine family patterns for your personal future family.

SOC 361 : Theoretical Foundations of Marriage and Family. (3:3:0)

WHEN TAUGHT: Fall; Spring

DESCRIPTION: Comparative analysis of basic ideas and arguments for understanding marriage and family found in social science, social and political theory, law, and other forms of cultural discourse.

Course Outcomes

There are no course outcomes available

SOC 365 : Sociology of Aging. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Demographic and social factors related to aging: agencies, serving older citizens, and role of community in solving problems of aged.

NOTE: Required for students in gerontology minor and/or certificate programs.

Course Outcomes

There are no course outcomes available

SOC 367 : Sociology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Gender in social institutions: family, social hierarchies, economics, education, organizations, religion, and science.

Course Outcomes
There are no course outcomes available

SOC 370 : The Sociology of Urban Life. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Norms, social controls, and social processes in urban areas in both historical and contemporary perspectives.

Course Outcomes
There are no course outcomes available

SOC 380 : Deviant Behavior and Social Control. (3:3:0)

DESCRIPTION: Theory and research related to deviance. Specific topics include psychosis, addiction, homosexuality, violence, and rape, among others.

Course Outcomes
There are no course outcomes available

SOC 383 : Juvenile Delinquency. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Lawlessness of children and adolescents: causation, treatment, prevention, and outlook.

Course Outcomes
There are no course outcomes available

SOC 390R : Special Topics in Contemporary Sociology. (.5-3:3:0)

PREREQUISITE: Instructor's consent.

DESCRIPTION: Course content varies from year to year.

Course Outcomes
- Students will be able to recognize the ways in which social structure and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.
- Students will begin to gain an appreciation of the contributions of women throughout history and internationally.
- Students will be able to perform and present research related to women's studies in oral, written, and/or multi-media formats.
- Students will be able to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.
- Students will be able to define and use in speech and writing the critical vocabulary basic to the field of women's studies.

SOC 399R : Academic Internship. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Consent of instructor required.

RECOMMENDED: Soc 307 and related 300-level courses.

DESCRIPTION: Individualized work or volunteer experience in either a research setting or some kind of field placement with an organization.

Course Outcomes
- Establish a lifelong practice of making connections and creating a network of people that will help the student develop professionally
- Develop a professional sense of the work that will help the students identify personal learning outcomes for the semester
- Learn about what sociologists call "interactive service work" or jobs that require working with individuals
- Produce a professional analysis of the organization where the student works
- Complete a research project that addresses some need in the organization for which the student is working

400-Level Courses

SOC 404 : Qualitative Research Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

DESCRIPTION: Purposes, methods, and limitations of qualitative research. Includes participant observation and hermeneutics skills.

Course Outcomes
- Students will be able to explain the epistemological assumptions of qualitative research methods, how to select the appropriate qualitative research method to address a research question, and the criteria for evaluating qualitative research methods.
- Students will be able to design and conduct an in-depth interview study, an oral history interview study, a focus group study, an ethnography, a qualitative content analysis study, a qualitative case study, and a mixed-method study.
- Students will be able to code and interpret qualitative data. (This may include the use of qualitative data analysis software.)
- Students will be able to write a qualitative methods and findings section, as for a qualitative research article.
- Students will be able to connect what they are learning in the sociology program and/or classes with educational and career options.

SOC 405 : Multiple Regression Analysis and Social Science Computing. (3:3:0)

WHEN Fall; Winter

TAUGHT:
PREREQUISITE: SOC 307
DESCRIPTION: Data analysis and computer use in sociology; least squares and logistic regression techniques; SPSS and its use in conducting data analysis. Research report required.

Course Outcomes
- Students will be able to read and understand social scientific journal articlesStudents will be able to inspect and transform data in preparation for testing a regression model.Students will know the assumptions of regression analysis. Students will be able to test regression models. Students will know how to present their findings both written an orally.

SOC 420 : Understanding Modern Societies. (3:3:0)
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Comparative-historical theory and research on the political, economic, social, and cultural processes in the formation, social organization, and future prospects of modern societies.

Course Outcomes
There are no course outcomes available

SOC 421 : Sociology of Organizations. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Examines organizational arrangements that maximize performance, innovation, and well-being; effective ways to develop social networks; diverse organizational forms like strategic alliances, multinational corporations, and NGOs.

Course Outcomes
There are no course outcomes available

SOC 422 : Inequality and Society. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Distribution of economic and social resources (financial, status, prestige, power, and authority) as they relate to life changes, lifestyle, and social justice.

Course Outcomes
There are no course outcomes available

SOC 424 : Political Sociology. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Analysis of power and decision-making, political institutions, grass root politics, stratification, and political activity, social movements and revolutions, science/religion and politics. Writing intensive.

Course Outcomes
There are no course outcomes available

SOC 425 : Markets and Society. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Economic sociology exploring social dynamics of market behavior from an interdisciplinary perspective; topics include social factors related to value, price, and price volatility.

Course Outcomes
There are no course outcomes available

SOC 426 : Sociology of Work and Occupations. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Distinction between work and occupation, changes in the nature of work and labor force, impacts of work, mobility in work life, and occupational attainment.

Course Outcomes
There are no course outcomes available

SOC 450 : The Family and Social Change. (3:3:0)
PREREQUISITE: SOC 307 & SOC 310
RECOMMENDED: Soc 404 or 405 or concurrent enrollment.
DESCRIPTION: Changing patterns of family-related behaviors, functions, and forms. Demographic, economic, and ideological forces shaping the family.

Course Outcomes
There are no course outcomes available

SOC 455R : Senior Capstone Part 1. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: SOC 307 & SOC 310

DESCRIPTION: This is the first semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.

NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

SOC 456R : Senior Capstone Part 2. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: SOC 455R

DESCRIPTION: This is the second semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.

NOTE: Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.

Course Outcomes
There are no course outcomes available

SOC 460 : Issues in Family Sociology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Advanced sociological analysis of current issues relating to the family (e.g., theory, methodology, parenting, marriage, divorce, family crises, race, gender, etc.).

Course Outcomes
There are no course outcomes available

SOC 481 : Crime, Justice, and Corrections. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Nature and extent of criminal behavior; current theory and research related to causes of crime and treatment of criminals.

Course Outcomes
There are no course outcomes available

SOC 490R : Special Topics in Sociology. (1-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: SOC 307 & SOC 310

RECOMMENDED: Soc 404 or 405 or concurrent enrollment.

DESCRIPTION: Course content varies from year to year.

Course Outcomes
There are no course outcomes available

SOC 495R : Directed Reading in Sociology. (1-6:0:0)

PREREQUISITE: Consent of instructor required.

DESCRIPTION: Individualized reading program supervised by faculty member. Student selects reading topic and completes systematic in-depth reading of related literature.

Course Outcomes
- Students will develop and read literature from specific sub-field within sociology.
- Students will evaluate, synthesize, and summarize literature in a specific sub-field of sociology.

SOC 497R : Directed Research in Sociology. (1-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Consent of instructor required.

DESCRIPTION: Individualized research program supervised by faculty member. Student selects topic and completes a research project.

Course Outcomes
- Students will develop research project under direction of faculty mentor.
- Students will engage in a mentored research project that may involve reviewing the literature, data collection, data analysis, and/or preparing manuscripts, etc.

500-Level Graduate Courses (available to advanced undergraduates)

SOC 524 : Advanced Political Sociology. (3:3:0)

DESCRIPTION: Social basis of political behavior. Modern theories and research concerning use of power and decision making.

Course Outcomes
No outcomes are available at this time.

SOC 525 : Sociology of Religion. (3:3:0)

PREREQUISITE: Soc 111, 325, or instructor's consent.

DESCRIPTION: Influences of social factors in the development of various religious systems.

Course Outcomes
- Students will be able to explain selected theoretical frameworks in the sociology of religion.
- Students will be able to assess critically both published and unpublished texts relevant to religion, including datasets and other materials, in establishing meaningful frameworks and problems for study.
- Students will be able to participate in all stages of preparing an original, publishable contribution to the sociology of religion.
- Students will be able to organize and conduct team research on joint projects.

SOC 527 : Sociology of the LDS Church and Its People. (3:3:0)

DESCRIPTION: An advanced analysis of the LDS Church from a social science perspective, including the Church as a new religious movement; LDS culture; the institutionalization process.

Course Outcomes
There are no course outcomes available

SOC 528 : Sociology of Rural Communities. (3:3:0)

PREREQUISITE: Soc 311, 370, or instructor's consent.

DESCRIPTION: Review and critique of major theoretical and methodological approaches to the study of community, with a focus on rural communities.

Course Outcomes
There are no course outcomes available

SOC 565 : The Individual and Family in Later Years. (3:3:0)

DESCRIPTION: Developmental aspects of aging, focusing on the biophysical, cognitive, social, affective, and pathological dimensions in people aged 50 and over.

Course Outcomes
No outcomes are available at this time.

SOC 590R : Special Topics in Sociology. (.5-3:3:0)

PREREQUISITE: Instructor's consent.

DESCRIPTION: Course content varies from year to year.

Course Outcomes
There are no course outcomes available

SOC 595R : Directed Readings. (.5-3:0:6)

DESCRIPTION: Individualized reading program supervised by faculty member.

NOTE: Pass/Fail only.

Course Outcomes
- Students will develop and read literature from specific sub-field of sociology.
- Students will evaluate, synthesize, and summarize literature in specific sub-field of sociology.

SOC 598R : Pro-Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Current developments in sociology including research, proposals, professional meetings, teaching, and finding a job.

Course Outcomes
There are no course outcomes available

Purposes

The College of Fine Arts and Communications provides students with a strong liberal arts foundation, fully anchored in the gospel of Jesus Christ. With five distinct academic areas, the college offers a broad range of exceptional education opportunities within the arts.

Each of the programs within the college seeks to produce graduates whose work contributes to society by benefiting the organizations for which they work and the audiences they reach. By encouraging exceptional performance, presentation, and communication, as well as discernment of artistic values, graduates emerge as scholars and professionals within their disciplines.

Interdisciplinary Degrees

Animation is an interdisciplinary degree offered by the College of Fine Arts and Communications through the cooperative involvement of the Department of Theatre and Media Arts, the Department of Visual Arts, and the Ira A. Fulton College of Engineering's School of Technology.

Music Dance Theatre is an interdisciplinary degree offered by the College of Fine Arts and Communications through the cooperative involvement of the School of Music as well as the Department of Theatre and Media Arts and the Department of Dance.

Enrollment in a Major Program

Enrollment in most degree programs in the College of Fine Arts and Communications is limited by the availability of resources such as facilities, equipment, and faculty. Students are asked to carefully study the requirements of the major program they desire to enter, enabling them to determine if the program really fits his or her personal goals and educational objectives.

The application process for each major has been structured to be as fair and impartial as possible. Enrollment limitations require those evaluating applications to make difficult decisions. Those who are not admitted into his or her desired program are encouraged to move quickly and decisively toward an alternative major program.

Applications for degree programs in the college are available online through each department's website. Prior to applying, students must complete all of the prerequisite courses and/or specific requirements stipulated in the application process. For further information, please contact the appropriate department or school directly. For contact information go to http://cfac.byu.edu.

Scholarships and Awards

Performance awards are offered by each of the academic units within the college. Applications and information about auditions for performance awards can be obtained by contacting the appropriate department or school.

Applications for academic scholarships can be obtained online here or at the Scholarship Office (A-41 ASB, 801-422-4104). For information about graduate scholarships, fellowships, and grants-in-aid, see the current BYU Graduate Catalog.

College Advisement Center

The College of Fine Arts and Communications Advisement Center recognizes the opportunity and responsibility to be actively involved in our students' educational journey. The advisement center is committed to not only establish an important, service-oriented connection with each student in a caring, friendly environment, but to also provide accurate and timely information to better prepare them for greater academic success.

Professional academic advisors are available to provide information regarding university policies and procedures, dates and deadlines, registration, faculty advisor referrals, major/minor application preparation, major/minor planning and progression, graduation qualification, as well as many other academic concerns.

The Discipline

The BYU Department of Communications prepares students for careers in fields related to mass communication, such as advertising, journalism, and public relations. The department is nationally accredited by the Accrediting Council on Education in Journalism and Mass Communication. Grounded in a strong liberal arts foundation, this program provides a balance between scholarship and professional skills. This goal is accomplished by requiring core courses and electives that enhance critical thinking about the discipline, while providing courses in emphasis areas that afford additional skills for each profession. See emphasis descriptions for additional information about their discipline and career opportunities.

Educational Outcomes

The Department of Communications exists to help students become professional and scholarly communicators whose messages contribute to a better society by benefiting the organizations for which they work and the audiences they reach.

1. Students will be able to communicate effectively with their audiences. In particular, students will be able to:
   - Prepare mass communication messages in the appropriate style.
   - Apply appropriate technology to the creation and dissemination of messages.
   - Plan communication that serves audience needs.
   - Use appropriate research methods to answer relevant questions.
2. Students will act professionally in their practice. In particular, students will be able to:
   - Practice communication within legal boundaries.
   - Exhibit standards of professional behavior.
   - Demonstrate sensitivity to the ethical issues of their practice.
   - Be literate in the language of the media industries.
3. Students will be scholars of the mass communication process. In particular, students will be able to:
   - Apply relevant theory to communication practice.
   - Understand the factors that shape(d) their profession.
   - Value freedom of speech in the marketplace of ideas.
   - Think critically about the relationship between mass media and society.
4. Students will be able to apply Gospel-centered values as they contribute to society. In particular, students will be able to:
   - Demonstrate respect for diversity and agency in a global society.
   - Exercise moral reasoning when faced with ethical dilemmas.
   - Show a commitment to making a positive difference within their sphere of influence.
   - Critically evaluate media-related issues in light of the gospel of Jesus Christ.

Admission to Degree Program

The degree programs in the Department of Communications have a departmental application process with specific enrollment limitations. Please see the college advisement center for details, telephone 1-801-422-3777, or online at http://comms.byu.edu/.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Students should see their college advisement center for information concerning admittance to the undergraduate programs.

Graduate Programs and Degrees

MA in Mass Communications

For more information see the BYU 2013–2014 Graduate Catalog.

General Information

Working under faculty direction, students in the department edit and publish the *Universe* as a laboratory newspaper for the campus, produce daily television broadcasts on KBYU-TV, produce universe.byu.edu for the Internet, plan advertising and public relations campaigns, and study processes and effects of mass communication.

The Department of Communications sponsors the International Media Studies Program, which seeks to broaden students' awareness of worldwide communications issues and practices. Not only do students have opportunity to study the media systems of other nations through classes and on-site experiences, but media practitioners of other nations are also brought to campus as lecturers and visiting experts.

The department encourages early admission. Students who enroll in Comms 101, 211, and an introductory course and complete the English requirement can apply to the major as early as the second semester of their freshman year.

Departmental Requirements

1. Each student must be formally accepted into a degree program. Contact the college advisement center for admission requirements or online at http://comms.byu.edu.
2. All students must take a campus writing course before applying for admission to the major. The following writing courses fulfill this requirement and satisfy the GE First-Year Writing requirement: Wrtg 150 or Phil 150.
3. Complete 80 hours outside the department, of which at least 65 hours must be in the liberal arts and sciences. Please see the advisement center for a list of liberal arts and sciences courses.
4. Every student is required to complete an internship. Although the department operates an internship office (280 BRMB) that serves as a clearinghouse for internship information, the responsibility for securing an internship rests with the student. However, students may not embark on any required internship without prior approval from a faculty advisor, completing prerequisite courses with a C– or better, processing appropriate documents with the Internship Office, and being enrolled in Comms 496R.
5. Communications students are required to own or rent a computer. Before obtaining a computer, students should first consult the department website for specifications.
6. Communications students must learn the design software used in several of the upper-level courses prior to attending the course.

   The following software will be used in these courses:

   Adobe Publishing — Comms 330, 331, 388, 421.
   Web Publishing — Comms 485, 487.

BA in Communications: Advertising Emphasis (46–61 hours*)

Show All Course Descriptions
Hide All Course Descriptions

This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.

All students admitted to the Department of Communications are required to own a notebook computer. Before purchasing a computer, students should first consult the department website for specifications.

The Discipline

Communications majors who choose the advertising emphasis will participate in a program that will give a strong grounding in the liberal arts and sciences, provide a firm grasp of communications theory and principles, and teach practical workplace skills.

In advertising communications courses students will learn how to use research in studying diverse audiences, to analyze communications problems, and to evaluate communications programs. They will write problem-solving strategies and create advertising and promotion messages to specific target audiences. Creative track students will learn how to concept consumer advertising ads in print, broadcast, and digital formats and will develop a quality portfolio required for careers in the creative field. Management students will learn how to evaluate and select the most effective media for reaching those target audiences and will gain an understanding of how broadcast, print, digital, and other media are used in the advertising process.

Studies will culminate in the student's participation, as a team member, in creating and presenting a comprehensive and competitive integrated communications campaign that includes research, advertising, technology, and sales promotion.

Career Opportunities

This field provides career opportunities in advertising and media planning and buying as well as in its creative, research, strategic planning, media planning, and account management functions.

Program Requirements | View MAP | View Program Outcomes

1. Complete one course from the following:

WRTG 150 : Writing and Rhetoric. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
NOTE: Fulfills General Education First-Year Writing requirement.

Course Outcomes

- Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.
- Critically read texts. This includesanalyzing how a text functions in a specific situation, community, or public;analyzing the nuances of language (diction, figures of speech, tone, etc.);identifying and evaluating the elements of an argument—claims, reasons, assumptions, and ethical, emotional, and logical appeals.
- Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.
- Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.
- Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

PHIL 150 : Reasoning and Writing. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Recommended for philosophy majors and minors.
DESCRIPTION: Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.
NOTE: Fulfills GE First-Year Writing requirement. No course challenges accepted.

Course Outcomes

There are no course outcomes available

Note: Students must receive a B grade or better to be eligible to apply for admission to the program.

2. Complete the following:

COMMS 101 : Mass Communication and Society. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Historical and modern roles of mass media in society, emphasizing media effects on individuals and institutions.

Course Outcomes
- Students should be able to articulate the roles of communicators in their various professions.
- Students should be acquainted with professional expectations such as meeting expectations.
- Students should understand the history and role of professionals and institutions, whose media messages impact society.
- Students should be able to think critically about complex issues related to media and society.
- Students should understand media coverage of multicultural and international peoples. Issues include fairness, accuracy and sensitivity to groups, as well as how media coverage promotes or distorts understanding between different groups and cultures.
- Students should become proficient communicators by writing in clear, accurate, fair, compelling and--where appropriate--persuasvie ways and by making smooth and compelling verbal presentaitons.
- Students should be able to critique the organizational, economic and social constraints on media.

COMMS 211 : Media Writing. (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: WRTG 150; or PHIL 150; Pre-communications status; a B grade or better in Wrtg 150 or Phil 150.
DESCRIPTION: Principles and practices of researching and writing mass communication messages in journalism, public relations, and advertising.
NOTE: Lab required.

Course Outcomes
- Students will be able to memorize and recall elements of structure and style used to engage respective audiences for print, broadcast, public relations, advertising, and online.
- Students will be able to define and repeat the differences between writing for print, broadcast, public relations, advertising, and online communications.
- Students will be able to demonstrate and apply basic interviewing and research skills used to acquire content for mass media.
- Students will be able to make ethical and legal decisions when confronted with dilemmas in the mass media.

COMMS 230 : Introduction to Advertising. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department
DESCRIPTION: Principles of advertising; critical evaluation of its role and value in American society. Experience in writing and creating ads for all media.

Course Outcomes
- Students will learn to communicate effectively with their audiences through the understanding and application of advertising strategy.
- Students will learn to act professionally by working in advertising agency teams, presenting their campaigns, and interacting with client representatives.
- Students will be scholars of the mass communication process by understanding the history of advertising, the concepts of advertising theory, and the creation and implementation of advertising strategy.
- Students will apply Gospel-centered values as they learn to create and develop advertising strategy that is ethical and reflects a sensitivity of diversity.

Note: Students must receive a B grade or better in each course to be eligible to apply for admission to the program.

3. Apply to the major.

4. Complete the following: (These courses may be taken during the semester in which students apply for admission to the major.)

COMMS 300 : Media Ethics, Law and Responsibility. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department
PREREQUISITE: Major status.
DESCRIPTION: Introduction to First Amendment history and press freedom, law, and theory; media regulation and policy; relationship between law and ethics; key ethical issues in professional communications.

Course Outcomes
- Students will be able to practice communication within legal boundaries by employing appropriate use of others' work (in attribution, copyright, trademarks, etc.).
- Students will be able to practice communication within legal boundaries by demonstrating an ability to identify legal constraints and defenses that shape mass media messages.
- Students will be able to practice communication within legal boundaries by writing and constructing messages that meet the laws and statutes applied to free speech.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by knowing how First Amendment rights extend to press and speech.

Students will demonstrate they value freedom of speech in the marketplace of ideas by understanding the historical development of free speech.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by recognizing the legal and moral limits of free speech.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by applying the concepts underlying this principle to current issues.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by by showing a commitment to preserving freedom of speech, even when it may be contrary to majority views, opinions, or values.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by becoming familiar with prominent cases that demonstrate ethical issues in the communication industries.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by identifying professional values that contribute to ethical behavior.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by discerning possible ethical complications in professional practice.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by defining a communications situation that addresses the ethical concerns of alternative actions or decisions.
- Students will be able to exercise moral reasoning when faced with ethical dilemmas by articulating the values that underline their ethical framework.
- Students will be able to exercise moral reasoning when faced with ethical dilemmas by applying principles and theories of ethics to current issues.
- Students will be able to exercise moral reasoning when faced with ethical dilemmas by resolving ethical dilemmas using moral reasoning based on Gospel-centered values.

COMMS 303 : Visual Literacy. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: COMMS 101 & COMMS 211 & COMMS 230; or COMMS 101 & COMMS 211 & COMMS 235; or COMMS 101 & COMMS 211 & COMMS 239

DESCRIPTION: Foundational principles and theories of visual communications.

NOTE: Students should take this course during the semester in which they have applied for admission to the major.

Course Outcomes
- Students will be able to apply appropriate technology to the creation and dissemination of messages.
- Students will demonstrate understanding and respect for diversity, including differing people, opinions, ideas, and agency in a global society.
- Students will be scholars of the mass communication process by applying relevant theory to communication practice.
- Students will be scholars of the mass communication process by thinking critically about the relationship between mass media and society.
- Students will critically evaluate media-related issues in the light of the gospel of Jesus Christ.
- Students will show a commitment to making a positive difference within their sphere of influence.

5. After admission to the major, complete the following:

COMMS 317 : Advertising Research Methods. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Quantitative research methods used in marketing and advertising; the research process; planning, designing, and conducting studies; analyzing results using appropriate methodologies.

Course Outcomes
- Students communicate effectively by knowing and applying appropriate research methods that will lead to greater understanding of target market characteristics.
- Students will act professionally by working in research teams, presenting their research findings, and interacting with clients.
- Students will be scholars of the mass communication process by applying research methods, analyzing data, and reaching conclusions that relate to client needs.
- Students will apply Gospel-centered values as they follow prescribed research protocol.

6. Complete two courses from the following:

COMMS 301 : Mass Media History and Philosophy. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Historical and philosophical development of today's media. Approaches may include theories of media change, social responsibility, economic factors, and influential pioneers.

Course Outcomes
- Students will understand how the technical, professional, and societal development of American mass media influenced current media philosophy.
- Students will understand the relationship between the development of American media, freedom of expression, and American society.
- Students will recognize the men and women who contributed to the development of American mass media.
- Students will gain an understanding of gender and race in relation to both the development and effect of mass media in American history.

COMMS 302 : Popular Culture and Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Impact of new and traditional media on popular culture. Approaches may include media criticism and cultural theories on the artifacts and drivers of cultural values.

Course Outcomes
- Students will develop skills necessary to better recognize the pop culture atmosphere in which they live.
- Students will learn how to use theory to analyze and deconstruct semiotic signs of pop culture.
- Students will be able to think and write critically about issues of pop culture.

COMMS 351 : Media and Their Audiences. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Understanding media content and channels empowering and improving media consumption and interpretation. Approaches may include new technology, social media, consumer behavior, media criticism, and media literacy.

Course Outcomes
- Students will think critically to have an understanding of the conditions that influence and shape media distribution channels.
- Students will understand relevant communication theory to explain various problems of media and their audiences.
- Students will think critically to have an understanding of technological, economic, or cultural conditions that influence the consumption and interpretation of media messages.
- Students will think critically about the portrayal of minority voices in domestic and global contexts.

COMMS 360 : Communication Management Principles and Theory. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Management principles and theory, emphasizing responsible management benefiting organizations and their stakeholders. Approaches may include crisis communication, media or agency management, and programming.

Course Outcomes
- Students should identify how to enhance their personal contribution to an organization by understanding management actions and culture.
- Students should understand various management activities in an organization and learn to apply related technology, tools and practices.
- Students should learn to work effectively in groups within an increasingly complex organizational environment.
- Students should think critically to understand media economics, including the impact of changes in the economy on media organizations and strategic decisions.
- Students should understand leadership styles and approaches to people management. Define a set of leadership principles that you will practice in your career based on your values, ethics and philosophy.

COMMS 381 : International Media Systems. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Comparison of media systems in countries and regions outside the United States. Approaches may include media systems analysis, normative theories of the media, and cultural values and norms.

Course Outcomes
- Students will learn the role of communication in modernization and development.
- Students will learn the history and development of media systems in nations around the world.
- Students will learn the role of media systems in various countries and some international events that effect them.
- Students will learn the barriers and challenges to development and communication in different countries or regions.
- Students will learn about the conflict and oppression of freedom of communications.
- Students will appreciate the communication challenges facing different peoples.
- Students will experience increased respect for diversity of cultures and of the forms of communication.
- Students will recognize freedom of expression as a basic (yet relatively rare) human right.

COMMS 382 : Issues in Global Communication. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Issues relating to communicating in a global village. Approaches may include global information and policy, cultural imperialism, intercultural interaction, and multinational communication strategies.

Course Outcomes
- Students will explore the phenomena of global mass communications, focussing on the role of international communications in the modern world.
- Students will examine the diversity of vehicles, sources, and audiences of global communication, as well as the motivations of individuals, governments, and groups involved in the dissemination of information internationally.
- Students will analyze global change in the Twenty-first Century, including the various instruments for international communication.
- Students will discuss ethics in international communication, including the problems of cultural communication between ethnic groups and diverse nationalities.
- Students will examine some of the major political and humanitarian challenges of our times and the

impact of international communications upon them.
- Students will study the technological developments that are making the flow of international information faster and more open, as well as the impediments and obstructions with which some governments and individuals attempt to impede that flow.

COMMS 406 : Media and the First Amendment. (3:3.0:0.0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: COMMS 300; Major status.

DESCRIPTION: Advanced understanding of media law, policy, and regulation of free speech and press. Approaches may include Freedom of Information, rights of press, government control, and legal precedents regarding the First Amendment.

Course Outcomes
- Students will gain increased appreciation of freedom of speech in the marketplace of ideas and apply this concept to current social issues.
- Students will understand the importance of social advocacy in a democracy to reinforce the concept that both media and citizens have unique opportunities to influence the direction of both government policies and public opinion.
- Students think critically about the relationship between mass media and society and articulate the positive and negative effects of mass media practices on society.
- Students will become more professional by understanding the complex interaction between consumers (public opinion), the news media, the legal process, and lobbying by corporations, associations, and other advocacy groups.
- Students will learn to apply professional and strategic communications skills to social advocacy situations.

COMMS 411 : Media Effects. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Effects resulting from the interaction between media and members of society. Approaches may include self-image, sterotypes, violence, and other social constructs and behaviors involving media consumption.

Course Outcomes
- Students will demonstrate critical and independent thinking related to the role of communicaiton and society.
- Students will have a deeper, theoretical understanding of the impact of media on social systems.

COMMS 416 : Media Advocacy and Social Change. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Communication principles, theories, and approaches applied to effect social change. Approaches may include public policy, grass roots advocacy, social marketing, and social movements.

Course Outcomes
- As citizens, students will better understand the importance of social advocacy in democracy and understand that both media and citizens have unique opportunities to influence the direction of government policies as well as public opinion.
- In the process of becoming life-long learners, students will regularly follow news media coverage of current events to gain an increased appreciation of freedom of speech in the market place of ideas and how to responsibly utilize it with current social and political issues.
- As voters, students will be able to think critically about the relationship between mass media and society and be able to articulate the positive and negative effects of mass media practices on society, especially as those effects relate to objectivity in political matters.
- Students will become more professional by comprehending the complex interaction between citizens (public opinion), the news media, the legal process and lobbying by corporations, associations and other advocacy groups.
- Students will learn to make significant contributions as involved citizens by being able to ethically apply to social and political advocacy situations the communications skills they are now learning.

COMMS 480 : Media Ethics and Moral Reasoning. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Comms 300 or instructor's consent.

DESCRIPTION: Advanced application of moral reasoning and understanding of ethical issues in mass communication. Approaches may include current cases and issues, professional practices, and philosophical foundations of ethics.

Course Outcomes
- Students will understand the moral foundations, philosophical theories and values underlying the ethics of professional communications, and the role of the media in a democratic society.
- Students will develop moral reasoning skills and judgment mechanisms for informed ethical decision-making; for applying with precision, clarity, and subtlety a systematic, normative approach to the consideration, discussion and judgment of ethical dilemmas.
- Students will understand and assess moral arguments.
- Students will become knowledgeable about basic concepts in applied ethics such as deception, secrecy, loyalty, universality, reciprocity, etc.
- Students will understand the relationships among law, ethics, and religion.
- Students will develop a personal ethical framework and a commitment to ethical conduct as a professional communicator and as a member of society.

COMMS 481 : Gender, Race, and Class in the Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Applying critical theory to the interaction between media and underrepresented groups in society. Approaches may include stereotypes and portrayals, access to media, participation, and media ownership.

Course Outcomes

- Students will be able to demonstrate an understanding of and sensitivity to issues related to gender, race, ethnicity, and sexual orientation.
- Students will be inclusive of diverse viewpoints and cultures in a global society.

COMMS 482 : Media and World Religions. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: The interaction of media, world religions, and beliefs. Approaches may include media coverage and portrayal of religion, religions' use of media, conflict between the two, and communicating across religious cultures.

Course Outcomes

- Students will critically discuss and write about contemporary media and religion issues.
- Students will know and apply relevant theory to communication practice and phenomena.
- Students will examine and appreciate diverse media and religion issues outside their own traditions.

7. Complete one of the following tracks:
    - Management Track:
        1. Complete one course from the following:

COMMS 330 : Creating Advertising Concepts - Portfolio 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status; software proficiency in InDesign, Adobe Photoshop, and Adobe Illustrator demonstrated by portfolio review.

DESCRIPTION: Basic consumer advertising; copywriting, design, and layout developed from creative strategies. Solving creative problems.

Course Outcomes

- Students will communicate effectively by creating messages that are salient to their audiences.
- Students will act professionally by working in creative teams and presenting their original advertising concepts to selected audiences.
- Students will be scholars of the mass communication process by critically analyzing and evaluating their own work and other students' work.
- Students will apply Gospel-centered values as they learn to create appropriate messages for diverse audiences.

COMMS 337 : Advertising Account Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Managing advertising agency accounts, including budgets, writing, new business pitches, and relationships with clients.

Course Outcomes

- Students will communicate effectively with their audiences by enhancing their practical business writing and presentation skills.
- Students will act professionally by working in advertising agency teams, managing new business, and creating a resume and portfolio appropriate for the advertising industry.
- Students will be scholars of the mass communication process by understanding the history of account management, the concepts of advertising theory, and by immersing themselves in the current world of advertising.
- Students will apply Gospel-centered values as they learn to manage client expectations ethically.

        2. Complete the following:

BUS M 241 : Marketing Management. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Marketing's role in society and the firm, marketing opportunities, the consumer market, and management of marketing mix.

Course Outcomes

- Understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers.
- Describe how specific firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.
- Design a marketing plan for a new venture by applying the appropriate tools and approaches studied

COMMS 332 : Marketing Media Planning and Strategy. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Media planning, theory, and practice in context of the marketing mix. Application of computer-based models as aids to media decisions. Writing of marketing- based media plans. Case study approach to both print and broadcast media.

Hide All Course Descriptions

This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.

All students admitted to the Department of Communications are required to own a notebook computer. Before purchasing a computer, students should first consult the department website for specifications.

The Discipline

Journalism is a discipline that provides factual and relevant information for democratic decision making, community building, and public deliberation. The study of journalism entails the mastery of working with people to present news and features in a way that accurately and fully reflects the world in which we live. Students will acquire skills in analytical thinking, lucid writing, and effective interviewing to be able to present clear and compelling news products in words, sounds, and images. Students will study media law and ethics, journalism research methods, and will chose the degree to which they will specialize in either new media, traditional print, or traditional broadcasting. To develop a wide understanding of the world and the processes that make society work, students are encouraged to earn more than 60 percent of their credits in other departments.

Career Opportunities

The exciting and dynamic field of journalism offers the allure of working in a profession that has its finger on the changing pulse of society. Whether serving as reporters, producers, or editors for newspaper, television, radio, or online, journalists find themselves rubbing shoulders with important people and recording important events.

A career in journalism implies not only skills with words, but the ability to make sound judgments and to ferret out facts. In addition to the obvious careers as reporters, editors, anchors, and producers, students often find their journalism skills in demand in a variety of other areas.

Many find the challenge of recording the drama of real life both satisfying and enlightening. Recent changes in technologies and business models continue to change the way news is produced and distributed. These changes call for greater skill in writing and multi-media storytelling to be able to visualize the world in an interesting way. Overall, one of journalism's great satisfactions has been the sense that one can make a difference in the world and bring about changes for the better.

Program Requirements | View MAP | View Program Outcomes

1. Complete one course from the following:

PHIL 150 : Reasoning and Writing. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Recommended for philosophy majors and minors.
DESCRIPTION: Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.

- Students will learn business and legal principles associated with freelance writing.
- Students will learn to include in their writing voices from diverse backgrounds and cultures.

COMMS 325 : Broadcast Reporting. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: COMMS 322; Comms 308 or concurrent enrollment; video portfolio; departmental consent.

DESCRIPTION: Principles and techniques of broadcast and online news reporting. Includes recording and editing reports of government, courts, and other institutions. Lab includes reporting for daily television and radio newscasts.

Course Outcomes

- Students will gather relevant and timely information for use in news content.
- Students will employ journalistic style to create news stories for targeted broadcast audiences.
- Students will develop the ability to work well with others in a deadline-driven mass media environment.
- Students will apply behave ethically and report fairly, including in their reportage a diversity of voices.

COMMS 328 : Backpack Journalism. (3:3:Arr)

WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 321; or COMMS 322; Comms 308 or concurrent enrollment.

DESCRIPTION: Mobile media production, including field reporting, editing, and distributing news for multiple platforms.

Course Outcomes

- Students will use consumer and prosumer grade digital technology to gather video, audio, and still images.
- While in the field, students will write news and edit video, audio and still images.
- Students will use social media to gather and disseminate news stories.
- Students will behave ethically and report fairly, including voices that reflect the diversity of the community.

COMMS 365 : Photojournalism. (3:2:Arr)

WHEN TAUGHT: Fall Contact Department; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Instructor's consent.

DESCRIPTION: Shooting, processing, selecting, and preparing images for use in various news platforms.

Course Outcomes

- Students will judge newsworthiness of photographic images.
- Students will effectively document news subjects with photographic images.
- Students will use photographic images and audio to tell stories.
- Students will behave ethically, professionally and within legal boundaries.
- Students will take care to represent diversity in photography of subjects.

8. Complete one course from the following:

COMMS 383 : Online News Editing. (3:2:6)

WHEN TAUGHT: Fall Contact Department; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Comms 324 or 325 or 328 or 365.

DESCRIPTION: Writing, editing, and content production for online and social media platforms; content management systems and search engine optimization for news.

Course Outcomes

- Based on current models, students will create and edit news content specifically for online and digital audiences.
- Students will understand and use professional and theoretical terminology associated with digital and online news media.
- Students will use content management systems and social media in breaking news environment
- Students will plan and produce significant digital projects using interactivity, multimedia and on demand content.
- Students will evaluate and edit editorial materials.
- Students will produce content that conforms to ethical standards.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

COMMS 384 : News Editing and News Judgment. (3:2:6)

WHEN TAUGHT: Fall; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 324; or COMMS 328; or COMMS 365

DESCRIPTION: Management and editing of news flow, ranging from editorial conceptualization and news judgment to copy editing, headline writing, and basic page design.

Course Outcomes

- Students will demonstrate knowledge of AP Style and grammar and employ those skills in editing news copy.

- Students will use editorial judgment, broadcast news writing and editing skills, and television producing methods to produce a 30-minute, live television newscast.
- Students will use industry-standard editing and production tools to produce a daily 30 minute newscast.
- Students will demonstrate an ability to recognize and edit broadcast news content to avoid ethical pitfalls (such as plagiarism and fabrication) and legal problems (including defamation).

COMMS 388 : Publication Graphics and Production. (3:3:Arr)

WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 324; or COMMS 328; or COMMS 365; instructor's consent.

DESCRIPTION: Layout and graphics for publications. Contemporary practices in production.

Course Outcomes

- Students will identify and utilize industry terms, theories, and models to analyze and discuss visual communication.
- Students will create printed and electronic designs that are clear, relevant, and compelling.
- Students will demonstrate a mastery of production techniques, using industry-standard software.
- Students will employ appropriate ethical and legal use of others' work.

9. Complete one course from the following:

COMMS 420 : Advanced Print Reporting. (3:2:1)

WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 383; or COMMS 384

DESCRIPTION: News coverage of government, courts, education, business, international, or legal issues.

Course Outcomes

- Students will demonstrate a high-level ability to evaluate the relative value and reliability of news information coming from a variety of sources, including anonymous and other sources.
- Students will understand the pitfalls and merits of investigative journalism and apply ethical standards in producing news reporting that benefits the community.
- Students will demonstrate professional-level writing skill in researching, writing and producing journalism content that has constructive purpose, depth, and perspective.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

COMMS 486 : Advanced Broadcast Reporting. (3:3:5)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 385
DESCRIPTION: In-depth broadcast news coverage of major public issues and trends. Formats may include daily news reports, series, and documentaries.

Course Outcomes
- Students will demonstrate proficiency in the techniques of visual and aural storytelling by creating advanced-level broadcast news stories.
- Understanding the nature of changes in the broadcast profession, students will create portfolios of their work in order to gain employment.
- Students will employ and defend ethical principles expected in a free and diverse society.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

COMMS 487 : Advanced Multiplatform Journalism. (3:3:0)
WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department
PREREQUISITE: COMMS 383; or COMMS 384; or COMMS 388
DESCRIPTION: Editing, design, and delivery of multiplatform and interactive news content. Theories of new media use and practical application of those theories to create professional-level content.
NOTE: Comms 385 is also a prerequisite option; contact the advisement office.

Course Outcomes
- Students will prepare mass communication messages in the appropriate style.
- Students will apply appropriate technology to the creation and dissemination of messages.
- Students will plan communications that serve audience needs.
- Students will practice communication within legal and ethical boundaries.
- Students will think critically about the relationship between mass media and society.
- Students will demonstrate literacy in the language of the media industries.
- Students will respect diversity and agency in a global society.

- Students should think critically to understand media economics, including the impact of changes in the economy on media organizations and strategic decisions.
- Students should understand leadership styles and approaches to people management. Define a set of leadership principles that you will practice in your career based on your values, ethics and philosophy.

COMMS 381 : International Media Systems. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Comparison of media systems in countries and regions outside the United States. Approaches may include media systems analysis, normative theories of the media, and cultural values and norms.

Course Outcomes

- Students will learn the role of communication in modernization and development.
- Students will learn the history and development of media systems in nations around the world.
- Students will learn the role of media systems in various countries and some international events that effect them.
- Students will learn the barriers and challenges to development and communication in different countries or regions.
- Students will learn about the conflict and oppression of freedom of communications.
- Students will appreciate the communication challenges facing different peoples.
- Students will experience increased respect for diversity of cultures and of the forms of communication.
- Students will recognize freedom of expression as a basic (yet relatively rare) human right.

COMMS 382 : Issues in Global Communication. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Issues relating to communicating in a global village. Approaches may include global information and policy, cultural imperialism, intercultural interaction, and multinational communication strategies.

Course Outcomes

- Students will explore the phenomena of global mass communications, focussing on the role of international communications in the modern world.
- Students will examine the diversity of vehicles, sources, and audiences of global communication, as well as the motivations of individuals, governments, and groups involved in the dissemination of information internationally.
- Students will analyze global change in the Twenty-first Century, including the various instruments for international communication.
- Students will discuss ethics in international communication, including the problems of cultural communication between ethnic groups and diverse nationalities.
- Students will examine some of the major political and humanitarian challenges of our times and the impact of international communications upon them.
- Students will study the technological developments that are making the flow of international information faster and more open, as well as the impediments and obstructions with which some governments and individuals attempt to impede that flow.

COMMS 406 : Media and the First Amendment. (3:3.0:0.0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: COMMS 300; Major status.

DESCRIPTION: Advanced understanding of media law, policy, and regulation of free speech and press. Approaches may include Freedom of Information, rights of press, government control, and legal precedents regarding the First Amendment.

Course Outcomes

- Students will gain increased appreciation of freedom of speech in the marketplace of ideas and apply this concept to current social issues.
- Students will understand the importance of social advocacy in a democracy to reinforce the concept that both media and citizens have unique opportunities to influence the direction of both government policies and public opinion.
- Students think critically about the relationship between mass media and society and articulate the positive and negative effects of mass media practices on society.
- Students will become more professional by understanding the complex interaction between consumers (public opinion), the news media, the legal process, and lobbying by corporations, associations, and other advocacy groups.
- Students will learn to apply professional and strategic communications skills to social advocacy situations.

COMMS 411 : Media Effects. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Effects resulting from the interaction between media and members of society. Approaches may include self-image, sterotypes, violence, and other social constructs and behaviors involving media consumption.

Course Outcomes

- Students will demonstrate critical and independent thinking related to the role of communicaiton and society.
- Students will have a deeper, theoretical understanding of the impact of media on social systems.

COMMS 416 : Media Advocacy and Social Change. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Communication principles, theories, and approaches applied to effect social change. Approaches may include public policy, grass roots advocacy, social marketing, and social movements.

Course Outcomes

- As citizens, students will better understand the importance of social advocacy in democracy and understand that both media and citizens have unique opportunities to influence the direction of government policies as well as public opinion.
- In the process of becoming life-long learners, students will regularly follow news media coverage of current events to gain an increased appreciation of freedom of speech in the market place of ideas and how to responsibly utilize it with current social and political issues.
- As voters, students will be able to think critically about the relationship between mass media and society and be able to articulate the positive and negative effects of mass media practices on society, especially as those effects relate to objectivity in political matters.
- Students will become more professional by comprehending the complex interaction between citizens (public opinion), the news media, the legal process and lobbying by corporations, associations and other advocacy groups.
- Students will learn to make significant contributions as involved citizens by being able to ethically apply to social and political advocacy situations the communications skills they are now learning.

COMMS 480 : Media Ethics and Moral Reasoning. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Comms 300 or instructor's consent.

DESCRIPTION: Advanced application of moral reasoning and understanding of ethical issues in mass communication. Approaches may include current cases and issues, professional practices, and philosophical foundations of ethics.

Course Outcomes

- Students will understand the moral foundations, philosophical theories and values underlying the ethics of professional communications, and the role of the media in a democratic society.
- Students will develop moral reasoning skills and judgment mechanisms for informed ethical decision-making; for applying with precision, clarity, and subtlety a systematic, normative approach to the consideration, discussion and judgment of ethical dilemmas.
- Students will understand and assess moral arguments.
- Students will become knowledgeable about basic concepts in applied ethics such as deception, secrecy, loyalty, universality, reciprocity, etc.
- Students will understand the relationships among law, ethics, and religion.
- Students will develop a personal ethical framework and a commitment to ethical conduct as a professional communicator and as a member of society.

COMMS 481 : Gender, Race, and Class in the Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Applying critical theory to the interaction between media and underrepresented groups in society. Approaches may include stereotypes and portrayals, access to media, participation, and media ownership.

Course Outcomes

- Students will be able to demonstrate an understanding of and sensitivity to issues related to gender, race, ethnicity, and sexual orientation.
- Students will be inclusive of diverse viewpoints and cultures in a global society.

COMMS 482 : Media and World Religions. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: The interaction of media, world religions, and beliefs. Approaches may include media coverage and portrayal of religion, religions' use of media, conflict between the two, and communicating across religious cultures.

Course Outcomes

- Students will critically discuss and write about contemporary media and religion issues.
- Students will know and apply relevant theory to communication practice and phenomena.
- Students will examine and appreciate diverse media and religion issues outside their own traditions.

11. After consulting with an advisor, complete an internship in conjunction with 4 hours of the following:

COMMS 496R : Academic Internship. (1-6:Arr:Arr)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Major status; prerequisites satisfied; clearance by the Communications Department.

DESCRIPTION: Professional field experience.

Course Outcomes

- Students demonstrate proficiency in research, writing, and technical abilities.
- Students demonstrate professionalism by comporting themselves professionally, meeting deadlines, and demonstrating a positive attitude and high level of commitment.
- Students demonstrate ethical and legal-sound behavior and show sensitivity to diversity.

Note: A C– grade or better in the following prerequisite courses must be achieved before the internship experience: Comms 308; 324 or 325 or 328 or 365.

*Hours include courses that may fulfill university core requirements.

BA in Communications: Public Relations Emphasis (49 hours*)

Show All Course Descriptions
Hide All Course Descriptions

This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.

All students admitted to the Department of Communications are required to own a notebook computer. Before purchasing a computer, students should first consult the department website for specifications.

The Discipline

Public relations manages communication to build mutually beneficial relationships between the organization and its vital publics. The public relations program at BYU emphasizes research and measurement; strategic planning; professionally designed, written, and targeted tactics; and ethical practice. We prepare students with critical skills in thinking, writing, research, program planning and management, creative problem solving, and relationship building with publics typical to the public relations challenges of diverse organizations. Those publics include but are not limited to media, consumers, employees, government and other regulatory bodies, and communities. In keeping with the aims of a BYU education, our students and graduates should engage in lifelong learning and professional practice.

Career Opportunities

Virtually all segments of the public and private sectors throughout the world draw employees from public relations. Graduates may work as technical or creative experts or in management communication specialties. They may specialize in media, strategic, crisis, community or employee relations, public affairs, social media, or sever other specialties within the professional arena.

Program Requirements | View MAP | View Program Outcomes

1. Complete one course from the following:

WRTG 150 : Writing and Rhetoric. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
NOTE: Fulfills General Education First-Year Writing requirement.

Course Outcomes

- Students will become knowledgeable about basic concepts in applied ethics such as deception, secrecy, loyalty, universality, reciprocity, etc.
- Students will understand the relationships among law, ethics, and religion.
- Students will develop a personal ethical framework and a commitment to ethical conduct as a professional communicator and as a member of society.

COMMS 481 : Gender, Race, and Class in the Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Applying critical theory to the interaction between media and underrepresented groups in society. Approaches may include stereotypes and portrayals, access to media, participation, and media ownership.

Course Outcomes
- Students will be able to demonstrate an understanding of and sensitivity to issues related to gender, race, ethnicity, and sexual orientation.
- Students will be inclusive of diverse viewpoints and cultures in a global society.

COMMS 482 : Media and World Religions. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: The interaction of media, world religions, and beliefs. Approaches may include media coverage and portrayal of religion, religions' use of media, conflict between the two, and communicating across religious cultures.

Course Outcomes

- Students will critically discuss and write about contemporary media and religion issues.
- Students will know and apply relevant theory to communication practice and phenomena.
- Students will examine and appreciate diverse media and religion issues outside their own traditions.

6. Complete the following:

COMMS 318 : Public Relations Research and Measurement. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Research methods and analysis critical to developing strategic public relations and measuring its effectiveness, emphasizing focus group and survey approaches with qualitative and quantitative statistical analysis.

Course Outcomes

- Students will understand the role of research in the strategic public relations process.
- Students will appreciate the value of research to strategic public relations.
- Students will understand how to conduct research in a way that is ethical and responsible.
- Students will use the terminology of research, especially related to public relations research and measurement.
- Students will choose the appropriate research method to answer research questions.
- Students will conduct a focus group and analyze qualitative data.
- Students will write a survey.
- Students will understand sampling strategies and be able to draw a random sample.
- Students will be able to conduct a survey.
- Students will understand different levels of measurement related to quantitative research methods.
- Students will be able to analyze and interpret survey results using SPSS.
- Students will understand and abide by the guidelines for conducting ethical research.
- Students will write and present research using appropriate style and format.
- Students will exhibit behavior that is conducive to a group/team project task.

COMMS 321 : News Reporting. (3:2:5)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: Comms 300 or concurrent enrollment; major status.

DESCRIPTION: Research and reporting skills. Database retrieval and interviewing. Beat reporting for newspapers, radio, and online media. Lab required.

Course Outcomes

- Students will gather relevant and timely information for use in news content.
- Students will employ journalistic style in creating news stories for targeted print and online audiences.
- Students will develop ability to work well with others in a deadline-driven mass media environment.
- Students will apply behave ethically and report fairly, including a diversity of voices.

COMMS 336 : Strategic Planning and Problem Solving. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Cases selected from wide range of actual public relations problems confronting business, government, education, and other institutions. Focus on strategic planning matrix.

Course Outcomes

- Students will enhance their ability to think analytically and strategically about public relations plans.
- Students will reinforce the need for succinct, clear, accurate, and grammatically correct writing.
- Students will increase their understanding of the professional practices and responsibilities of public relations.
- Students will increase their sensitivity to issues of social responsibility, ethics, and diversity.

COMMS 421 : Public Relations Writing and Production. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 321 & COMMS 336; Software proficiency in InDesign, Adobe Photoshop, Flash, and Dreamweaver demonstrated by portfolio review.

DESCRIPTION: Professional public relations writing and editing in a variety of formats as used in public relations applications.

Course Outcomes

- Students will master the basics of writing and design, including style, punctuation, spelling, grammar, and layout across a range of communications formats and tactics.
- Students will gain experience in a variety of tactics and formats for print, electronic and social media and learn the standards, as well as the benefits and limitations of each.
- Students will develop and demonstrate in-depth thinking, strategic planning, audience analysis and targeting of key messages on all assignments. By the end of the semester, each student will have experienced writing in a variety of formats for a variety of media.

COMMS 485 : Strategic Public Relations Campaigns. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 318 & COMMS 336 & COMMS 421; Software proficiency in Flash, Dreamweaver, and Image Ready as demonstrated by portfolio review.

DESCRIPTION: Capstone course applying communication principles to internal and external publics; fact finding, planning, and evaluating social interrelationships; major campaigns for selected clients.

Course Outcomes

- Students will understand the relationship between theory and practice in public relations.
- Students will apply analytical thinking to produce strategic and creative solutions to problems.
- Students will understand the value of synergy through collaboration in a group environment.
- Students will make deadlines, fulfill requirements, and meet the needs of a real-world client.
- Students will produce tactics that satisfy strategic outcomes, with a critical eye to message creation and design.
- Students will understand current theories, practices and ethical responsibilities of public relations and gain respect for diversity of opinion and thought.
- Students will learn to be more comfortable in working within some impost (or perhaps even occasionally unintentional) ambiguity.

7. Complete the following:

- Students will apply Gospel-centered values as they learn to create and develop advertising strategy that is ethical and reflects a sensitivity of diversity.

COMMS 235 : Introduction to Public Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Philosophy and practice of public relations in business, government, education, and other institutions. Study of publics, media, methods, press relations, and publicity.

Course Outcomes

- Students will be introduced to the professional field of public relations, its history, theory and principles.
- Students will learn the basic skills in the practice of strategic planning and implementation in public relations.
- Students will learn appropriate legal and ethical behavior in the field of public relations.
- Students will be exposed to issues of diversity in the public relations profession.
- Students will recognize the historical development of public relations.
- Students will recognize the role of public relations in business and society.
- Students will establish a theoretical foundation for various practices of public relations and decision making.
- Students will be able to explain the four-step public relations process of research, planning, communication and evaluation and apply the process to a public relation case.
- Students will define key publics and explain how to identify and address them.
- Students will understand the skills necessary for the effective practice of public relations, including professional writing skills, strategic thinking, planning, organization and crisis management.
- Students will understand how organizations work with the media and the crucial role of media in forming public opinion.

COMMS 239 : Principles of Journalism. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

DESCRIPTION: Theories and principles of journalism; critical evaluation of journalists' and news organizations' role and value in societies they serve.

Course Outcomes

- Students will be able to define the characteristics, purposes, problems, and potential of journalism.
- Students will demonstrate an ability to deploy social media technologies for the purposes of newsgathering, distribution and discourse.
- Students will articulate their own personal code of conduct for best practices of journalism.
- Students will understand the historical context of journalism's evolution and how that history has shaped contemporary practice and the role it plays in a democracy.
- Students will understand how drawing from a diversity views—whether based on race, gender, or culture—contributes to more complete and accurate reportage.

COMMS 300 : Media Ethics, Law and Responsibility. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Introduction to First Amendment history and press freedom, law, and theory; media regulation and policy; relationship between law and ethics; key ethical issues in professional communications.

Course Outcomes

- Students will be able to practice communication within legal boundaries by employing appropriate use of others' work (in attribution, copyright, trademarks, etc.).
- Students will be able to practice communication within legal boundaries by demonstrating an ability to identify legal constraints and defenses that shape mass media messages.
- Students will be able to practice communication within legal boundaries by writing and constructing messages that meet the laws and statutes applied to free speech.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by knowing how First Amendment rights extend to press and speech.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by understanding the historical development of free speech.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by recognizing the legal and moral limits of free speech.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by applying the concepts underlying this principle to current issues.
- Students will demonstrate they value freedom of speech in the marketplace of ideas by by showing a commitment to preserving freedom of speech, even when it may be contrary to majority views, opinions, or values.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by becoming familiar with prominent cases that demonstrate ethical issues in the communication industries.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by identifying professional values that contribute to ethical behavior.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by discerning possible ethical complications in professional practice.
- Students will be able to demonstrate sensitivity to the ethical issues of their practice by defining a communications situation that addresses the ethical concerns of alternative actions or decisions.
- Students will be able to exercise moral reasoning when faced with ethical dilemmas by articulating the values that underline their ethical framework.
- Students will be able to exercise moral reasoning when faced with ethical dilemmas by applying principles and theories of ethics to current issues.
- Students will be able to exercise moral reasoning when faced with ethical dilemmas by resolving ethical dilemmas using moral reasoning based on Gospel-centered values.

COMMS 301 : Mass Media History and Philosophy. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Historical and philosophical development of today's media. Approaches may include theories of media change, social responsibility, economic factors, and influential pioneers.

Course Outcomes

- Students will understand how the technical, professional, and societal development of American mass media influenced current media philosophy.
- Students will understand the relationship between the development of American media, freedom of expression, and American society.
- Students will recognize the men and women who contributed to the development of American mass media.
- Students will gain an understanding of gender and race in relation to both the development and effect of mass media in American history.

COMMS 302 : Popular Culture and Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Impact of new and traditional media on popular culture. Approaches may include media criticism and cultural theories on the artifacts and drivers of cultural values.

Course Outcomes

- Students will develop skills necessary to better recognize the pop culture atmosphere in which they live.
- Students will learn how to use theory to analyze and deconstruct semiotic signs of pop culture.

- Students will be able to think and write critically about issues of pop culture.

COMMS 303 : Visual Literacy. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: COMMS 101 & COMMS 211 & COMMS 230; or COMMS 101 & COMMS 211 & COMMS 235; or COMMS 101 & COMMS 211 & COMMS 239

DESCRIPTION: Foundational principles and theories of visual communications.

NOTE: Students should take this course during the semester in which they have applied for admission to the major.

Course Outcomes

- Students will be able to apply appropriate technology to the creation and dissemination of messages.
- Students will demonstrate understanding and respect for diversity, including differing people, opinions, ideas, and agency in a global society.
- Students will be scholars of the mass communication process by applying relevant theory to communication practice.
- Students will be scholars of the mass communication process by thinking critically about the relationship between mass media and society.
- Students will critically evaluate media-related issues in the light of the gospel of Jesus Christ.
- Students will show a commitment to making a positive difference within their sphere of influence.

COMMS 351 : Media and Their Audiences. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Understanding media content and channels empowering and improving media consumption and interpretation. Approaches may include new technology, social media, consumer behavior, media criticism, and media literacy.

Course Outcomes

- Students will think critically to have an understanding of the conditions that influence and shape media distribution channels.
- Students will understand relevant communication theory to explain various problems of media and their audiences.
- Students will think critically to have an understanding of technological, economic, or cultural conditions that influence the consumption and interpretation of media messages.
- Students will think critically about the portrayal of minority voices in domestic and global contexts.

COMMS 360 : Communication Management Principles and Theory. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Management principles and theory, emphasizing responsible management benefiting organizations and their stakeholders. Approaches may include crisis communication, media or agency management, and programming.

Course Outcomes

- Students should identify how to enhance their personal contribution to an organization by understanding management actions and culture.
- Students should understand various management activities in an organization and learn to apply related technology, tools and practices.
- Students should learn to work effectively in groups within an increasingly complex organizational environment.
- Students should think critically to understand media economics, including the impact of changes in the economy on media organizations and strategic decisions.
- Students should understand leadership styles and approaches to people management. Define a set of leadership principles that you will practice in your career based on your values, ethics and philosophy.

COMMS 381 : International Media Systems. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Comparison of media systems in countries and regions outside the United States. Approaches may include media systems analysis, normative theories of the media, and cultural values and norms.

Course Outcomes

- Students will learn the role of communication in modernization and development.
- Students will learn the history and development of media systems in nations around the world.
- Students will learn the role of media systems in various countries and some international events that effect them.
- Students will learn the barriers and challenges to development and communication in different countries or regions.
- Students will learn about the conflict and oppression of freedom of communications.
- Students will appreciate the communication challenges facing different peoples.
- Students will experience increased respect for diversity of cultures and of the forms of communication.
- Students will recognize freedom of expression as a basic (yet relatively rare) human right.

COMMS 382 : Issues in Global Communication. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Issues relating to communicating in a global village. Approaches may include global information and policy, cultural imperialism, intercultural interaction, and multinational communication strategies.

Course Outcomes

- Students will explore the phenomena of global mass communications, focussing on the role of international communications in the modern world.
- Students will examine the diversity of vehicles, sources, and audiences of global communication, as well as the motivations of individuals, governments, and groups involved in the dissemination of information internationally.
- Students will analyze global change in the Twenty-first Century, including the various instruments for international communication.
- Students will discuss ethics in international communication, including the problems of cultural communication between ethnic groups and diverse nationalities.
- Students will examine some of the major political and humanitarian challenges of our times and the impact of international communications upon them.
- Students will study the technological developments that are making the flow of international information faster and more open, as well as the impediments and obstructions with which some governments and individuals attempt to impede that flow.

COMMS 411 : Media Effects. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Effects resulting from the interaction between media and members of society. Approaches may include self-image, sterotypes, violence, and other social constructs and behaviors involving media consumption.

Course Outcomes

- Students will demonstrate critical and independent thinking related to the role of communicaiton and society.
- Students will have a deeper, theoretical understanding of the impact of media on social systems.

COMMS 416 : Media Advocacy and Social Change. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Communication principles, theories, and approaches applied to effect social change. Approaches may include public policy, grass roots advocacy, social marketing, and social movements.

Course Outcomes

- As citizens, students will better understand the importance of social advocacy in democracy and understand that both media and citizens have unique opportunities to influence the direction of government policies as well as public opinion.
- In the process of becoming life-long learners, students will regularly follow news media coverage of current events to gain an increased appreciation of freedom of speech in the market place of ideas and how to responsibly utilize it with current social and political issues.
- As voters, students will be able to think critically about the relationship between mass media and society and be able to articulate the positive and negative effects of mass media practices on society, especially as those effects relate to objectivity in political matters.
- Students will become more professional by comprehending the complex interaction between citizens (public opinion), the news media, the legal process and lobbying by corporations, associations and other advocacy groups.
- Students will learn to make significant contributions as involved citizens by being able to ethically apply to social and political advocacy situations the communications skills they are now learning.

COMMS 481 : Gender, Race, and Class in the Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Applying critical theory to the interaction between media and underrepresented groups in society. Approaches may include stereotypes and portrayals, access to media, participation, and media ownership.

Course Outcomes

- Students will be able to demonstrate an understanding of and sensitivity to issues related to gender, race, ethnicity, and sexual orientation.
- Students will be inclusive of diverse viewpoints and cultures in a global society.

COMMS 482 : Media and World Religions. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: The interaction of media, world religions, and beliefs. Approaches may include media coverage and portrayal of religion, religions' use of media, conflict between the two, and communicating across religious cultures.

Course Outcomes

- Students will critically discuss and write about contemporary media and religion issues.
- Students will know and apply relevant theory to communication practice and phenomena.
- Students will examine and appreciate diverse media and religion issues outside their own traditions.

Note: Comms 211 is not intended to be an option for a minor. However, pre-Communications students who are not admitted to the major may count Comms 211 toward a minor. Advisors can provide clarification.

- Students will be able to exercise moral reasoning when faced with ethical dilemmas by resolving ethical dilemmas using moral reasoning based on Gospel-centered values.

COMMS 301 : Mass Media History and Philosophy. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Historical and philosophical development of today's media. Approaches may include theories of media change, social responsibility, economic factors, and influential pioneers.

Course Outcomes

- Students will understand how the technical, professional, and societal development of American mass media influenced current media philosophy.
- Students will understand the relationship between the development of American media, freedom of expression, and American society.
- Students will recognize the men and women who contributed to the development of American mass media.
- Students will gain an understanding of gender and race in relation to both the development and effect of mass media in American history.

COMMS 302 : Popular Culture and Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Impact of new and traditional media on popular culture. Approaches may include media criticism and cultural theories on the artifacts and drivers of cultural values.

Course Outcomes

- Students will develop skills necessary to better recognize the pop culture atmosphere in which they live.
- Students will learn how to use theory to analyze and deconstruct semiotic signs of pop culture.
- Students will be able to think and write critically about issues of pop culture.

COMMS 303 : Visual Literacy. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: COMMS 101 & COMMS 211 & COMMS 230; or COMMS 101 & COMMS 211 & COMMS 235; or COMMS 101 & COMMS 211 & COMMS 239

DESCRIPTION: Foundational principles and theories of visual communications.

NOTE: Students should take this course during the semester in which they have applied for admission to the major.

Course Outcomes

- Students will be able to apply appropriate technology to the creation and dissemination of messages.
- Students will demonstrate understanding and respect for diversity, including differing people, opinions, ideas, and agency in a global society.
- Students will be scholars of the mass communication process by applying relevant theory to communication practice.
- Students will be scholars of the mass communication process by thinking critically about the relationship between mass media and society.
- Students will critically evaluate media-related issues in the light of the gospel of Jesus Christ.
- Students will show a commitment to making a positive difference within their sphere of influence.

COMMS 308 : Research Methods for Journalism. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Qualitative and quantitative information-gathering strategies and techniques: interviewing, use of surveys and public records; online information gathering and data base analysis.

Course Outcomes

- Students will demonstrate ability to employ various research methods to collect and analyze quantitative data and qualitative information for news. Such methods include, but are not limited to court and other public documents, surveys, and computer databases.
- Students will apply ethical standards to assess data and information for accuracy, reliability, and relevance.
- Students will understand and defend the value of freedom of information and freedom of speech in the marketplace of ideas.
- Students will employ research techniques and to contextualize, evaluate, and organize data and information. Such methods include, but are not limited to the use of computer spreadsheets and databases.

COMMS 317 : Advertising Research Methods. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Quantitative research methods used in marketing and advertising; the research process; planning, designing, and conducting studies; analyzing results using appropriate methodologies.

Course Outcomes

- Students communicate effectively by knowing and applying appropriate research methods that will lead to greater understanding of target market characteristics.
- Students will act professionally by working in research teams, presenting their research findings, and interacting with clients.
- Students will be scholars of the mass communication process by applying research methods, analyzing data, and reaching conclusions that relate to client needs.
- Students will apply Gospel-centered values as they follow prescribed research protocol.

COMMS 318 : Public Relations Research and Measurement. (3:2:1)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Research methods and analysis critical to developing strategic public relations and measuring its effectiveness, emphasizing focus group and survey approaches with qualitative and quantitative statistical analysis.

Course Outcomes

- Students will understand the role of research in the strategic public relations process.
- Students will appreciate the value of research to strategic public relations.
- Students will understand how to conduct research in a way that is ethical and responsible.
- Students will use the terminology of research, especially related to public relations research and measurement.
- Students will choose the appropriate research method to answer research questions.
- Students will conduct a focus group and analyze qualitative data.
- Students will write a survey.
- Students will understand sampling strategies and be able to draw a random sample.
- Students will be able to conduct a survey.
- Students will understand different levels of measurement related to quantitative research methods.
- Students will be able to analyze and interpret survey results using SPSS.
- Students will understand and abide by the guidelines for conducting ethical research.
- Students will write and present research using appropriate style and format.
- Students will exhibit behavior that is conducive to a group/team project task.

COMMS 319 : Research in Communication. (3:2:1)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major status.

DESCRIPTION: Procedures and design considerations for studying media messages, audiences, and effects. Emphasizes survey and focus group approaches to data collection and analysis.

Course Outcomes

- Students will design a survey instrument that meets the scientific criteria of reliability and validity.
- Students will know how to take an appropriate sample.
- Students will perform basic univariate and multivariate statistical analyses.
- Students will produce clear, comprehensive research reports for professional and scientific use.
- Students will design, plan, and implement a focus group.
- Students will analyze and interpret findings using appropriate qualitative methods of data inquiry.

COMMS 321 : News Reporting. (3:2:5)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: Comms 300 or concurrent enrollment; major status.

DESCRIPTION: Research and reporting skills. Database retrieval and interviewing. Beat reporting for newspapers, radio, and online media. Lab required.

Course Outcomes

- Students will gather relevant and timely information for use in news content.
- Students will employ journalistic style in creating news stories for targeted print and online audiences.
- Students will develop ability to work well with others in a deadline-driven mass media environment.
- Students will apply behave ethically and report fairly, including a diversity of voices.

COMMS 322 : Video and Audio News Production and Writing. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: Comms 300 or concurrent enrollment; major status.

DESCRIPTION: Fundamental principles and theories of broadcasting and the practical application of visual and aural multimedia storytelling; audio and video field production; audio and video editing for radio, television, and online media.

Course Outcomes

- Students will demonstrate an ability to use broadcast writing style to accompany visual storytelling.
- Students will employ industry-accepted skills to capture or collect audio and video content for use in broadcast and online storytelling.
- Students will demonstrate an ability to use industry-standard equipment to edit audio and video for broadcast and online storytelling.
- Students will employ audio narration and on-camera presentation for mass media storytelling.

COMMS 324 : Feature Writing. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 321; Comms 308 or concurrent enrollment.

DESCRIPTION: Creating, writing, and pitching articles for nonfiction magazine markets; effective writing methods; analysis and criticism of articles.

Course Outcomes

- Students will create meaningful article ideas and pitch them for niche and general audiences.
- Students will learn and apply feature-style storytelling techniques in compelling ways.
- Students will apply personal ethics and professional norms in reporting and writing.
- Students will learn business and legal principles associated with freelance writing.
- Students will learn to include in their writing voices from diverse backgrounds and cultures.

COMMS 325 : Broadcast Reporting. (3:2:3)

WHEN Fall; Winter; Spring; Summer Contact Department

TAUGHT:

PREREQUISITE: COMMS 322; Comms 308 or concurrent enrollment; video portfolio; departmental consent.

DESCRIPTION: Principles and techniques of broadcast and online news reporting. Includes recording and editing reports of government, courts, and other institutions. Lab includes reporting for daily television and radio newscasts.

Course Outcomes

- Students will gather relevant and timely information for use in news content.
- Students will employ journalistic style to create news stories for targeted broadcast audiences.
- Students will develop the ability to work well with others in a deadline-driven mass media environment.
- Students will apply behave ethically and report fairly, including in their reportage a diversity of voices.

COMMS 326 : Performance for Broadcast. (3:2:2)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Instructor's consent.

DESCRIPTION: Theory and practice of presenting news and information for radio, television, and new media.

NOTE: This course will not count as a departmental requirement.

Course Outcomes

- Students will demonstrate principles of broadcast presentation, including procedures and methods to use the voice as a tool for narration on television, radio, and online media.
- Students will develop and practice skills for on camera news delivery, including field reporting and in-studio anchoring.
- Students will understand the responsibility that accompanies the high community profile of on camera journalists and act accordingly and ethically.

COMMS 327R : Special Topics in Broadcasting. (3:2:Arr.)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Instructor's consent.

DESCRIPTION: Includes radio arts, specialty reporting, documentary production, and sports broadcasting.

Course Outcomes

- Outcomes for this course depend upon the topic being taught and will be published in the syllabus.

COMMS 328 : Backpack Journalism. (3:3:Arr)

WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 321; or COMMS 322; Comms 308 or concurrent enrollment.

DESCRIPTION: Mobile media production, including field reporting, editing, and distributing news for multiple platforms.

Course Outcomes

- Students will use consumer and prosumer grade digital technology to gather video, audio, and still images.
- While in the field, students will write news and edit video, audio and still images.
- Students will use social media to gather and disseminate news stories.
- Students will behave ethically and report fairly, including voices that reflect the diversity of the community.

COMMS 329 : Opinion Writing. (3:3:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Function of editorials, columns, commentaries, and reviews in the mass media.

NOTE: Open enrollment.

Course Outcomes

- Students will demonstrate an understanding of the process of research, writing, and revising columns and opinion pieces.
- Students will understanding the role of opinion in journalism.
- Students will understand the ethical boundaries of opinion writing.
- Students will be able to write clear and persuasive editorial copy.
- Students will consider diversity of thought, representing gender, race, class, and culture.

COMMS 330 : Creating Advertising Concepts - Portfolio 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status; software proficiency in InDesign, Adobe Photoshop, and Adobe Illustrator demonstrated by portfolio review.

DESCRIPTION: Basic consumer advertising; copywriting, design, and layout developed from creative strategies. Solving creative problems.

Course Outcomes

- Students will communicate effectively by creating messages that are salient to their audiences.
- Students will act professionally by working in creative teams and presenting their original advertising concepts to selected audiences.
- Students will be scholars of the mass communication process by critically analyzing and evaluating their own work and other students' work.
- Students will apply Gospel-centered values as they learn to create appropriate messages for diverse audiences.

COMMS 331 : Creating Advertising Concepts - Portfolio 2. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 330; Software proficiency in InDesign, Adobe Photoshop, and Adobe Illustrator demonstrated by portfolio review.

DESCRIPTION: Advanced consumer advertising: copywriting, design, and layout.

Course Outcomes

- Students will communicate effectively by creating compelling advertising for multiple venues.
- Students will learn to act professionally by working in creative teams and presenting their original advertising concepts to industry professionals.
- Students will be scholars of the mass communication process by critically analyzing and evaluating their own work, other students' work, and industry awarded work.
- Students will apply Gospel-centered values as they learn to create appropriate messages for diverse audiences.

COMMS 332 : Marketing Media Planning and Strategy. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Media planning, theory, and practice in context of the marketing mix. Application of computer-based models as aids to media decisions. Writing of marketing- based media plans. Case study approach to both print and broadcast media.

Course Outcomes

- Students will learn to communicate effectively with their audiences through the understanding and application of media buying and planning strategy.
- Students will act professionally by working in media teams, presenting their media campaigns, and exhibiting literacy in the language of media planning and buying.
- Students will be scholars of the mass communication process by understanding media concepts, advertising theory, current trends in media use, and the use of media industry databases.
- Students will apply Gospel-centered values as they learn to create and develop media strategy that is ethical and reflects a sensitivity to diversity.

COMMS 335 : TV Commercial Production. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status or instructor's consent.

RECOMMENDED: Comms 330.

DESCRIPTION: Discussing and applying television commercial production principles; creating and executing TV commercial concepts.

Course Outcomes

- Students will be able to conceptually design and write commercial television scripts.
- Students will learn to apply commercial production principles for television using current technology.
- Students will develop media that is ethical and reflects a sensitivity to diversity.

COMMS 336 : Strategic Planning and Problem Solving. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Cases selected from wide range of actual public relations problems confronting business, government, education, and other institutions. Focus on strategic planning matrix.

Course Outcomes

- Students will enhance their ability to think analytically and strategically about public relations plans.
- Students will reinforce the need for succinct, clear, accurate, and grammatically correct writing.
- Students will increase their understanding of the professional practices and responsibilities of public relations.
- Students will increase their sensitivity to issues of social responsibility, ethics, and diversity.

COMMS 337 : Advertising Account Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Major status.

DESCRIPTION: Managing advertising agency accounts, including budgets, writing, new business pitches, and relationships with clients.

Course Outcomes

- Students will communicate effectively with their audiences by enhancing their practical business writing and presentation skills.
- Students will act professionally by working in advertising agency teams, managing new business, and creating a resume and portfolio appropriate for the advertising industry.
- Students will be scholars of the mass communication process by understanding the history of account management, the concepts of advertising theory, and by immersing themselves in the current world of advertising.
- Students will apply Gospel-centered values as they learn to manage client expectations ethically.

COMMS 345 : Media Sales and Promotion. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major status.

DESCRIPTION: Fundamentals of media sales process. Theory and application of persuasion relating to media sales.

Course Outcomes

- Students will have an understanding of good practices that are grounded in client relationships and based on trust and integrity.
- Students will have an understanding of the requirements and expectations to be successful as a media salesperson.
- Students will h ave an understanding of the sales process, including prospecting, proposing, negotiating and closing the sale.
- Students will have an understanding of the emotional and logical process required as a media salesperson.

COMMS 351 : Media and Their Audiences. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Understanding media content and channels empowering and improving media consumption and interpretation. Approaches may include new technology, social media, consumer behavior, media criticism, and media literacy.

Course Outcomes

- Students will think critically to have an understanding of the conditions that influence and shape media distribution channels.
- Students will understand relevant communication theory to explain various problems of media and their audiences.
- Students will think critically to have an understanding of technological, economic, or cultural conditions that influence the consumption and interpretation of media messages.
- Students will think critically about the portrayal of minority voices in domestic and global contexts.

COMMS 360 : Communication Management Principles and Theory. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Management principles and theory, emphasizing responsible management benefiting organizations and their stakeholders. Approaches may include crisis communication, media or agency management, and programming.

Course Outcomes

- Students should identify how to enhance their personal contribution to an organization by understanding management actions and culture.
- Students should understand various management activities in an organization and learn to apply related technology, tools and practices.
- Students should learn to work effectively in groups within an increasingly complex organizational environment.
- Students should think critically to understand media economics, including the impact of changes in the economy on media organizations and strategic decisions.
- Students should understand leadership styles and approaches to people management. Define a set of leadership principles that you will practice in your career based on your values, ethics and philosophy.

COMMS 365 : Photojournalism. (3:2:Arr)

WHEN TAUGHT: Fall Contact Department; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Instructor's consent.

DESCRIPTION: Shooting, processing, selecting, and preparing images for use in various news platforms.

Course Outcomes

- Students will judge newsworthiness of photographic images.
- Students will effectively document news subjects with photographic images.
- Students will use photographic images and audio to tell stories.
- Students will behave ethically, professionally and within legal boundaries.
- Students will take care to represent diversity in photography of subjects.

COMMS 370R : Special Topics in Communications. (1-3:Arr.:Arr.)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Subject matter may vary. Specific topics emphasizing general issues related to all mass communication.

Course Outcomes

- Students will be given learning outcomes that are specific to the topic being taught.

COMMS 381 : International Media Systems. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Comparison of media systems in countries and regions outside the United States. Approaches may include media systems analysis, normative theories of the media, and cultural values and norms.

Course Outcomes

- Students will learn the role of communication in modernization and development.
- Students will learn the history and development of media systems in nations around the world.
- Students will learn the role of media systems in various countries and some international events that effect them.
- Students will learn the barriers and challenges to development and communication in different countries or regions.
- Students will learn about the conflict and oppression of freedom of communications.
- Students will appreciate the communication challenges facing different peoples.
- Students will experience increased respect for diversity of cultures and of the forms of communication.
- Students will recognize freedom of expression as a basic (yet relatively rare) human right.

COMMS 382 : Issues in Global Communication. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Communications or international relations major or minor status.

DESCRIPTION: Issues relating to communicating in a global village. Approaches may include global information and policy, cultural imperialism, intercultural interaction, and multinational communication strategies.

Course Outcomes

- Students will explore the phenomena of global mass communications, focussing on the role of international communications in the modern world.
- Students will examine the diversity of vehicles, sources, and audiences of global communication, as well as the motivations of individuals, governments, and groups involved in the dissemination of information internationally.
- Students will analyze global change in the Twenty-first Century, including the various instruments for international communication.
- Students will discuss ethics in international communication, including the problems of cultural communication between ethnic groups and diverse nationalities.
- Students will examine some of the major political and humanitarian challenges of our times and the impact of international communications upon them.
- Students will study the technological developments that are making the flow of international information faster and more open, as well as the impediments and obstructions with which some governments and individuals attempt to impede that flow.

COMMS 383 : Online News Editing. (3:2:6)

WHEN TAUGHT: Fall Contact Department; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: Comms 324 or 325 or 328 or 365.

DESCRIPTION: Writing, editing, and content production for online and social media platforms; content management systems and search engine optimization for news.

Course Outcomes

- Based on current models, students will create and edit news content specifically for online and digital audiences.
- Students will understand and use professional and theoretical terminology associated with digital and online news media.
- Students will use content management systems and social media in breaking news environment
- Students will plan and produce significant digital projects using interactivity, multimedia and on demand content.
- Students will evaluate and edit editorial materials.
- Students will produce content that conforms to ethical standards.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

COMMS 384 : News Editing and News Judgment. (3:2:6)

WHEN TAUGHT: Fall; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 324; or COMMS 328; or COMMS 365

DESCRIPTION: Management and editing of news flow, ranging from editorial conceptualization and news judgment to copy editing, headline writing, and basic page design.

Course Outcomes

- Students will demonstrate knowledge of AP Style and grammar and employ those skills in editing news copy.
- Students will learn and practice headline writing and caption writing skills.
- Students will demonstrate ability to recognize and edit news content to avoid ethical pitfalls (such as plagiarism and fabrication) and legal problems (such as defamation).
- Students wil develop and employ skills using industry standard software to engage in visual storytelling.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

COMMS 385 : Television News Producing. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

PREREQUISITE: COMMS 325; or COMMS 328

DESCRIPTION: Theory and practice of producing and presenting information for television. Role of television news in society, nature of audiences, production techniques, and TV news management. Lab includes producing daily television newscast.

Course Outcomes

- Students will critically analyze newscasts and their audiences.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.
- Students will demonstrate excellent leadership and team-building skills in a deadline-driven newsroom environment.
- Students will use editorial judgment, broadcast news writing and editing skills, and television producing methods to produce a 30-minute, live television newscast.
- Students will use industry-standard editing and production tools to produce a daily 30 minute newscast.
- Students will demonstrate an ability to recognize and edit broadcast news content to avoid ethical pitfalls (such as plagiarism and fabrication) and legal problems (including defamation).

COMMS 388 : Publication Graphics and Production. (3:3:Arr)

WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 324; or COMMS 328; or COMMS 365; instructor's consent.

DESCRIPTION: Layout and graphics for publications. Contemporary practices in production.

Course Outcomes

- Students will identify and utilize industry terms, theories, and models to analyze and discuss visual communication.
- Students will create printed and electronic designs that are clear, relevant, and compelling.
- Students will demonstrate a mastery of production techniques, using industry-standard software.
- Students will employ appropriate ethical and legal use of others' work.

COMMS 390R : Student Media Labs. (1:1:Arr)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Appropriate introductory course (Comms 211, 230, 235, or 239); lab advisor's consent.
DESCRIPTION: Student-run media labs such as the Advanced Advertising Lab, Bradley Agency, Eleven News, and Daily Universe.
NOTE: Cannot be combined with paid position in the same lab.

Course Outcomes
- Students will demonstrate an ability to contribute to projects managed by the Bradley Lab, Ad Lab, Universe and ElevenNEWS.

COMMS 395R : International Media Studies Abroad. (1-3:Arr:0)
WHEN TAUGHT: Contact Department.
DESCRIPTION: Study Abroad course emphasizing media and culture of region selected.

Course Outcomes
There are no course outcomes available

COMMS 396R : Communications Practicum. (1:0:Arr)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent and approval of task or projects.
DESCRIPTION: Practice and projects in communication.

Course Outcomes
- Students will meet practicum outcomes for a specific project or activity as specified the instructor.

COMMS 398R : Projects in Communications. (.5-4:Arr:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Junior standing and sequence coordinator's consent. Project approval required before registration.
DESCRIPTION: Projects in communication studies.

Course Outcomes
- Students will meet outcomes for a specific project or activity as specified the instructor.

COMMS 399R : Academic Internship. (1:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Major status; departmental consent.
DESCRIPTION: Professional field experience.

Course Outcomes
- Students will use coursework knowledge in a practical, professional setting with the support of a practitioner and faculty advisor.

400-Level Courses

COMMS 406 : Media and the First Amendment. (3:3.0:0.0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: COMMS 300; Major status.
DESCRIPTION: Advanced understanding of media law, policy, and regulation of free speech and press. Approaches may include Freedom of Information, rights of press, government control, and legal precedents regarding the First Amendment.

Course Outcomes
- Students will gain increased appreciation of freedom of speech in the marketplace of ideas and apply this concept to current social issues.
- Students will understand the importance of social advocacy in a democracy to reinforce the concept that both media and citizens have unique opportunities to influence the direction of both government policies and public opinion.
- Students think critically about the relationship between mass media and society and articulate the positive and negative effects of mass media practices on society.
- Students will become more professional by understanding the complex interaction between consumers (public opinion), the news media, the legal process, and lobbying by corporations, associations, and other advocacy groups.
- Students will learn to apply professional and strategic communications skills to social advocacy situations.

COMMS 411 : Media Effects. (3:3:0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: Major or minor status.
DESCRIPTION: Effects resulting from the interaction between media and members of society. Approaches may include self-image, sterotypes, violence, and other social constructs and behaviors involving media consumption.

Course Outcomes
- Students will demonstrate critical and independent thinking related to the role of communicaiton and society.
- Students will have a deeper, theoretical understanding of the impact of media on social systems.

COMMS 416 : Media Advocacy and Social Change. (3:3:0)
WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Communication principles, theories, and approaches applied to effect social change. Approaches may include public policy, grass roots advocacy, social marketing, and social movements.

Course Outcomes

- As citizens, students will better understand the importance of social advocacy in democracy and understand that both media and citizens have unique opportunities to influence the direction of government policies as well as public opinion.
- In the process of becoming life-long learners, students will regularly follow news media coverage of current events to gain an increased appreciation of freedom of speech in the market place of ideas and how to responsibly utilize it with current social and political issues.
- As voters, students will be able to think critically about the relationship between mass media and society and be able to articulate the positive and negative effects of mass media practices on society, especially as those effects relate to objectivity in political matters.
- Students will become more professional by comprehending the complex interaction between citizens (public opinion), the news media, the legal process and lobbying by corporations, associations and other advocacy groups.
- Students will learn to make significant contributions as involved citizens by being able to ethically apply to social and political advocacy situations the communications skills they are now learning.

COMMS 420 : Advanced Print Reporting. (3:2:1)

WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 383; or COMMS 384

DESCRIPTION: News coverage of government, courts, education, business, international, or legal issues.

Course Outcomes

- Students will demonstrate a high-level ability to evaluate the relative value and reliability of news information coming from a variety of sources, including anonymous and other sources.
- Students will understand the pitfalls and merits of investigative journalism and apply ethical standards in producing news reporting that benefits the community.
- Students will demonstrate professional-level writing skill in researching, writing and producing journalism content that has constructive purpose, depth, and perspective.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

COMMS 421 : Public Relations Writing and Production. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 321 & COMMS 336; Software proficiency in InDesign, Adobe Photoshop, Flash, and Dreamweaver demonstrated by portfolio review.

DESCRIPTION: Professional public relations writing and editing in a variety of formats as used in public relations applications.

Course Outcomes

- Students will master the basics of writing and design, including style, punctuation, spelling, grammar, and layout across a range of communications formats and tactics.
- Students will gain experience in a variety of tactics and formats for print, electronic and social media and learn the standards, as well as the benefits and limitations of each.
- Students will develop and demonstrate in-depth thinking, strategic planning, audience analysis and targeting of key messages on all assignments. By the end of the semester, each student will have experienced writing in a variety of formats for a variety of media.

COMMS 432 : Account Planning Management (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 317; major status.

DESCRIPTION: Development and execution of a comprehensive strategic advertising research program, including data collecting, interpretation, field investigating, audience analysis, and strategy development.

Course Outcomes

- Students will communicate effectively with their audiences through understanding through the principles of account planning and applying them to clients' advertising problems.
- Students will act professionally by conducting qualitative research with participants and working directly with client representatives.
- Students will be scholars of the mass communication process by applying appropriate qualitative research methodologies and protocols and developing the creative brief.
- Students will apply Gospel-centered values as they follow prescribed research protocol.

COMMS 433 : Advanced Advertising Concepting - Portfolio 3. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: COMMS 331

DESCRIPTION: Capstone course in creating consumer advertising concepts, copywriting, design, and layout. Emphasizes finished portfolios.

Course Outcomes

- Students will prepare a portfolio worthy of positive reviews by top creative directors in the country's best ad agencies.
- Students will prepare advertising materials for submission to the creative awards shows and other venues, leading to internships, scholarships and advanced career placement.
- Students will experience a stimulating and challenging atmosphere in which to continue improving strategic thinking processes and creative skills.

COMMS 480 : Media Ethics and Moral Reasoning. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Comms 300 or instructor's consent.

DESCRIPTION: Advanced application of moral reasoning and understanding of ethical issues in mass communication. Approaches may include current cases and issues, professional practices, and philosophical foundations of ethics.

Course Outcomes

- Students will understand the moral foundations, philosophical theories and values underlying the ethics of professional communications, and the role of the media in a democratic society.
- Students will develop moral reasoning skills and judgment mechanisms for informed ethical decision-making; for applying with precision, clarity, and subtlety a systematic, normative approach to the consideration, discussion and judgment of ethical dilemmas.
- Students will understand and assess moral arguments.
- Students will become knowledgeable about basic concepts in applied ethics such as deception, secrecy, loyalty, universality, reciprocity, etc.
- Students will understand the relationships among law, ethics, and religion.
- Students will develop a personal ethical framework and a commitment to ethical conduct as a professional communicator and as a member of society.

COMMS 481 : Gender, Race, and Class in the Media. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: Applying critical theory to the interaction between media and underrepresented groups in society. Approaches may include stereotypes and portrayals, access to media, participation, and media ownership.

Course Outcomes

- Students will be able to demonstrate an understanding of and sensitivity to issues related to gender, race, ethnicity, and sexual orientation.
- Students will be inclusive of diverse viewpoints and cultures in a global society.

COMMS 482 : Media and World Religions. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Major or minor status.

DESCRIPTION: The interaction of media, world religions, and beliefs. Approaches may include media coverage and portrayal of religion, religions' use of media, conflict between the two, and communicating across religious cultures.

Course Outcomes

- Students will critically discuss and write about contemporary media and religion issues.
- Students will know and apply relevant theory to communication practice and phenomena.
- Students will examine and appreciate diverse media and religion issues outside their own traditions.

COMMS 483 : Advanced Communications Studies (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: COMMS 319; or SOC 300; Comms 411 or concurrent enrollment.

DESCRIPTION: Contemporary developments in communication theory, research, and practice.

Course Outcomes

- Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about the social role and effects of communications and communications technologies in society.
- Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about current literature and research related to communications issues in contemporary society.
- Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about issues in contemporary practice of communications and other professions.
- Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about ethical issues that confront communicators, and ethical theory that can guide ethical decision making; the moral responsibility of professional communicators to make a positive difference within their sphere of influence.
- Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about strategies for bridge-building from school to work and/or from undergraduate to graduate studies.

COMMS 485 : Strategic Public Relations Campaigns. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 318 & COMMS 336 & COMMS 421; Software proficiency in Flash, Dreamweaver, and Image Ready as demonstrated by portfolio review.

DESCRIPTION: Capstone course applying communication principles to internal and external publics; fact finding, planning, and evaluating social interrelationships; major campaigns for selected clients.

Course Outcomes

- Students will understand the relationship between theory and practice in public relations.
- Students will apply analytical thinking to produce strategic and creative solutions to problems.
- Students will understand the value of synergy through collaboration in a group environment.
- Students will make deadlines, fulfill requirements, and meet the needs of a real-world client.
- Students will produce tactics that satisfy strategic outcomes, with a critical eye to message creation and design.
- Students will understand current theories, practices and ethical responsibilities of public relations and gain respect for diversity of opinion and thought.
- Students will learn to be more comfortable in working within some impost (or perhaps even occasionally unintentional) ambiguity.

COMMS 486 : Advanced Broadcast Reporting. (3:3:5)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 385

DESCRIPTION: In-depth broadcast news coverage of major public issues and trends. Formats may include daily news reports, series, and documentaries.

Course Outcomes

- Students will demonstrate proficiency in the techniques of visual and aural storytelling by creating advanced-level broadcast news stories.
- Understanding the nature of changes in the broadcast profession, students will create portfolios of their work in order to gain employment.
- Students will employ and defend ethical principles expected in a free and diverse society.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

COMMS 487 : Advanced Multiplatform Journalism. (3:3:0)

WHEN TAUGHT: Fall; Winter Contact Department; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 383; or COMMS 384; or COMMS 388

DESCRIPTION: Editing, design, and delivery of multiplatform and interactive news content. Theories of new media use and practical application of those theories to create professional-level content.

NOTE: Comms 385 is also a prerequisite option; contact the advisement office.

Course Outcomes

- Students will prepare mass communication messages in the appropriate style.
- Students will apply appropriate technology to the creation and dissemination of messages.
- Students will plan communications that serve audience needs.
- Students will practice communication within legal and ethical boundaries.
- Students will think critically about the relationship between mass media and society.
- Students will demonstrate literacy in the language of the media industries.
- Students will respect diversity and agency in a global society.
- Students will show a commitment to making a positive difference within their sphere of influence.

COMMS 488 : Advanced Broadcast Producing. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 385; instructor's consent.

DESCRIPTION: Advanced concepts in television news producing, news judgment, audiences and newsroom leadership.

Course Outcomes

- Students will supervise newsroom personnel to demonstrate advanced leadership and knowledge of newsroom management concepts.
- Students will demonstrate critical thinking and advanced news judgment related to story selection and approval of newscasts.
- Students will analyze news ratings, audience surveys and related scholarly research.
- Students will demonstrate mastery of editing news content to avoid ethical pitfalls (such as plagiarism and fabrication) and legal problems (including defamation).
- Students will demonstrate mastery in newswriting, editing, and presentation of images for broadcast.
- Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.
- Students will employ industry-standard technology relevant to the dissemination of broadcast news.

COMMS 489 : Strategic Advertising Campaigns. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: COMMS 332 & COMMS 337 & COMMS 432; or COMMS 317 & COMMS 331; or COMMS 332 & COMMS 330 & COMMS 432; Comms 433 or concurrent enrollment.

DESCRIPTION: Researching, planning, budgeting, creating, and writing national advertising campaigns; writing and producing a complete advertising plan, accompanied by a formal client presentation.

Course Outcomes

- Students will learn to communicate effectively with their audiences through a comprehensive applicaiton of advertising strategy.
- Students will act professionally by working in advertising agency teams, presenting their advertising campaigns, and interacting with client representatives in a competitive environment.
- Students will be scholars of the mass communication process by applying the concepts of advertising theory learned in previous courses to create comprehensive advertising campaigns.
- Students will apply Gospel-centered values as they learn to create ethical and morally responsible persuasive messages for diverse audiences.

COMMS 495R : Research and Readings in Communication Practice. (.5-4:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Senior standing and instructor's approval of projects.

DESCRIPTION: Independent research projects and readings for communications majors.

NOTE: Projects must be approved in advance of registration.

Course Outcomes

- Students will meet outcomes for a specific readings and research activity as specified the instructor.

COMMS 496R : Academic Internship. (1-6:Arr:Arr)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Major status; prerequisites satisfied; clearance by the Communications Department.

DESCRIPTION: Professional field experience.

Course Outcomes

- Students demonstrate proficiency in research, writing, and technical abilities.
- Students demonstrate professionalism by comporting themselves professionally, meeting deadlines, and demonstrating a positive attitude and high level of commitment.
- Students demonstrate ethical and legal-sound behavior and show sensitivity to diversity.

COMMS 497R : Mentored Research Practicum. (1:0:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Conducting research in a mentored environment with a faculty-sponsored research project.

Course Outcomes

- Students will demonstrate competency in research skills.
- Students will demonstrate an ability to effectively communicate research in a scholarly fashion.

Admission to Degree Program

The degree programs in the Department of Dance carry special enrollment limitations. Please see the college advisement center for specific details.

The Discipline

Dance is an art form expressed and communicated through human movement. Throughout history, and in every culture, people have danced. Dance incorporates the physical, mental, emotional, and spiritual aspects of each individual in creating a unique nonverbal expression of thoughts and feelings. As both process and product, dance has the power to refine neuromuscular skill, broaden understanding, increase creative potential, and expand aesthetic sensitivity. At Brigham Young University, dance celebrates the best in humankind and strives to enrich the lives of all who experience it.

The BYU Department of Dance has been accredited by the National Association of Schools of Dance (NASD) since 1989.

Career Opportunities

The majority of career opportunities in the dance field are teaching and performance related. Teaching opportunities are available in colleges and universities (for those with graduate degrees), public schools, private studios, health and fitness spas, special and adult education programs, day care centers, and recreation programs. Performing opportunities are available by audition with professional and regional companies and in theatrical, television, and film production.

Less common, but equally rewarding dance-related careers are also available in the areas of choreography and dance administration, therapy, criticism, history, research, notation, and reconstruction.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BA in Dance (Program Outcomes)
BA in Dance Education K-12 (Program Outcomes)

Minor in Ballroom Dance
Minor in Contemporary Dance
Minor in World Dance

Students should see their college advisement center for help or information concerning the undergraduate programs.

General Information

The Department of Dance includes four areas: Ballet, Ballroom Dance, Contemporary Dance, and World Dance. These areas work cooperatively to provide opportunities for all students at the university to develop their potential in dance. Most dance technique classes and performance opportunities are open enrollment and not restricted to dance majors. Placement is determined by audition. Besides the wide variety of basic or beginning courses, there are professional courses that develop leadership, performance, and choreographic ability in all types of dance. Performing opportunities are provided both on and off campus in concerts with groups that tour throughout the world.

Requirements

1. Majors are counseled to maintain healthy lifestyle practices.
2. Dance technique courses (including Dance 243R and 244R) require a grade of at least B– for advancement to next level.

This is a limited-enrollment program requiring departmental admissions approval. Please see item 1 below for information regarding requirements for admission to this major.

Program Requirements | View MAP | View Program Outcomes

1. Students must pass a dance audition for acceptance into the major. Please see the Dance Department for further details.
2. The Dance Department requires a minimum of 30 hours of dance credit to be taken in residency at BYU's Provo campus for this degree program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.
3. Students must complete annual mandatory advisement.
4. Complete the following prerequisite course:

   PDBIO 220 : Human Anatomy (with lab). (3:2:2)

   WHEN TAUGHT: Fall; Winter; Spring; Summer

   DESCRIPTION: Structure and function of the human body. Lab included.

   Course Outcomes
   - Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.
   - Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.
   - Students will be able to list the name, location, and function of each of the body's organs and organ systems.

5. Complete the following:

   DANCE 230 : Conditioning and Injury Prevention for Dance. (2:3:3)

   WHEN TAUGHT: Fall; Winter

   PREREQUISITE: PDBIO 220

   DESCRIPTION: Developing conditioning programs specific to dance. Recognizing and resolving dance injuries. Practical application.

   Course Outcomes
   - 1. Students will learn how to develop a well rounded conditioning program.
   - 2. Students will gain knowledge of training and conditioning principles that will help them prevent injury.
   - 3. Students will create and participate in an actual conditioning program based on principles learned in the class.
   - 4. Students will be in better physical condition and have a working knowledge of all aspects of conditioning and injury prevention.

   DANCE 241R : Contemporary Dance, Technique and Theory 2. (2:0:6)

   WHEN TAUGHT: Fall; Winter; Summer

   Course Outcomes
   - 1. articulate a knowledge and appreciation of the human body regarding physical function, spirituality, and as a tool of expressivity.
   - 2. demonstrate increased technical ability in the areas of:flexibilitystrengthendurancebalancecoordinationphrasingdance performance skillsapplying the Patterns of Total Body Connectivitykinesthetic awareness of body alignment
   - 3. demonstrate knowledge, fundamental control, and application of the elements of dance (as defined by the BEST and BESS vocabularies);
   - 4. articulate an appreciation for dance as an art form.

   DANCE 243R : Studio Workshop in Contemporary Dance Technique and Theory. (2.5:0:7.5)

   WHEN TAUGHT: Fall; Winter

   PREREQUISITE: Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 244R the first time taken.

   DESCRIPTION: Technique and theory in a workshop setting.

Course Outcomes

- 1. Students will demonstrate increased body connectivity and kinesthetic awareness, including:BreathCore-distalHead-tailUpper-lowerBody-halfCross-lateral connections
- 2. demonstrate performance skills including intent, nuance, dynamics, and sense of ensemble.
- 3. articulate and analyze the above principles of technique using accurate anatomical and dance elements language.

DANCE 244R : Studio Workshop in Contemporary Dance Improvisation and Choreography. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 243R the first time taken.

DESCRIPTION: Beginning improvisation and choreography in a workshop setting.

Course Outcomes

- 1. Students will demonstrate, apply, and articulate a fundamental understanding of the elements of dance in improvisation and choreography.
- 2. Students will demonstrate problem solving skills in collaborative group and solo improvisation and choreography.
- 3. Students will demonstrate the ability to create original and personally meaningful movement - avoiding habit or cliche.
- 4. Students will articulate a knowledge of, and critically analyze, the creative process and movement intention in improvisation and choreography.
- 5. Students will articulate aesthetic and expressive values in dance and other arts.

DANCE 261 : Orientation to Dance. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to dance as a discipline and at Brigham Young University.

Course Outcomes

- 1. Students will be able to hone in on important information while also providing their own thoughtful reactions to what they have read.
- 2. Students will understand principles, terminology, and execution of Laban Movement Analysis.
- 3. Students will develop critical analysis skills.
- 4. Students will delve into a dance related topic of interest to them and develop group collaboration and presentation skills.
- 5. Students will understand the common aspects of several forms of dance through analysis of how aesthetic principles and varied movement techniques are applied and emphasized within various dance genres.

DANCE 264 : Music for Dancers. (2:1:2)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Basic music notation, simple and complex rhythmic patterns, and polyrhythms; analysis of selected international music styles; brief historical survey.

Course Outcomes

- Demonstrate an understanding of basic musical concepts through physical movement.
- Acquire improved awareness of his/her physical responses to music.
- Demonstrate the ability to utilize music appropriately in the technique class and collaborate with musicians.
- Demonstrate musical awareness by creating appropriate movement to odd meter music and binary/ternary rhythms.
- Acquire improved listening skills to use music to stage or create choreography

DANCE 290 : Ballet Accelerated Technique 1. (1.5:0:4.5)

WHEN TAUGHT: Fall; Winter; Spring

Course Outcomes

- Each student will:1. Acquire a degree of mastery in accelerated beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the Ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at a beginning level standard.
- Each student will:1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 291R : Ballet Technique 2. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 290 or equivalent.

Course Outcomes

- TECHNIQUE OBJECTIVE 1. Acquire a degree of mastery in intermediate beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary listed in the appendix. Please consult the appendix for the specific criteria and standards.

- TECHNIQUE OBJECTIVE 2. Increase postural awareness; begin to correct imperfections; add physical strength, endurance, flexibility, extension, coordination, grace, precision and elevation; and improve the health and appearance of the physical body.
- WRITING OBJECTIVE 1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level, then pass an objective written exam prepared by the Ballet Division.
- Each student will: Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 342 : Kinesiology and Related Sciences for Dancers. (4:4:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: PDBIO 220 & DANCE 230

DESCRIPTION: Study and analysis of the neuromusculoskeletal system in practical application to dance for more efficient use of the body and reduction of injuries.

Course Outcomes

- 1. Identify actions and roles of specific joints and muscle groups while moving and stationary
- 2. Identify correct skeletal alignment, as well as incorrect alignment and skeletal deviations common to dancers.
- 3. Identify chain reactions of skeletal misalignment, and muscular imbalances that commonly occur in the presence of a given misalignment.
- 4. Identify individual differences in body structure and function, and outline specific strategies for working with those differences.
- 5. Outline appropriate procedures to address bodily education/re-education through neurological, muscular and skeletal means.
- 6. Demonstrate explicit knowledge in one self-selected dance and science related topic.

DANCE 355 : Dance Production, Introduction. (2:2:1)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles and practices of technical aspects of dance production.

Course Outcomes

- 1. Students will identify and articulate a knowledge of equipment, techniques, and procedures in technical theatre.
- 2. Students will demonstrate basic competency (in theory and practice) of theatrical production principles, including lighting, costuming, and technologies for dance performances
- Students will demonstrate an understanding of the relationship of light, color, fabric, and technology; and how to use that knowledge to accomplish an artistic vision.

DANCE 356 : Dance and Technology. (2:2.0:0)

WHEN TAUGHT: Winter

DESCRIPTION: Introduction to techniques and technology of photo, audio, and digital video software.

Course Outcomes

There are no course outcomes available

DANCE 459 : Seminar in Dance. (1:1:0)

WHEN TAUGHT: Winter

DESCRIPTION: Seminar exposing students to a variety of dance related topics. Instruction by multiple dance professionals in their areas of expertise.

Course Outcomes

- 1. Student will articulate an understanding of advanced degree opportunities
- 2. Student will identify a variety of career opportunities in the field of dance
- 3. Student will demonstrate an understanding of appropriate professional skills needed for entry into the dance field
- 4. Student will generate professional documents relevant to their future in the dance field
- 5. Student will articulate an enhanced perspective on current dance issues
- 6.Student will express personal spiritual views in relation to dance performance, choreography and pedagogy

DANCE 460 : Dance History to 1850. (2:2:0)

WHEN TAUGHT: Fall; Summer Odd Yrs.

DESCRIPTION: Survey of dance in tribal cultures and ancient through Romantic historical periods, emphasizing dance of Western civilization.

Course Outcomes

- 1. Students will critically analyze, synthesize, internalize, and apply to present day dance prevalent in Western civilization, dance information gleaned through the study of dance within tribal cultures and ancient through romantic historical periods. (To be evaluated via midterm and final written examinations)
- 2. Students will analyze current dance and culturally related issues in contemporary society and articulate them verbally and in written form through class discussion and completion of course assignments. (To be evaluated via written response questions)
- 3. Students will apply basic historical research concepts and methodology in personal research processes and products. (To be evaluated via unit assignments.)
- 4. Students will become proficient in the use of MLA documentation style and format through application in unit assignments. (To be evaluated via formal documentation associated with unit assignments.)

DANCE 461 : Dance History from 1850. (2:2:0)

WHEN TAUGHT: Winter; Summer Even Yrs.

DESCRIPTION: Survey of dance in modern and postmodern historical periods, emphasizing dance of Western civilization.

Course Outcomes

- 1. Students will critically analyze, synthesize, and internalize key Western dance history information focusing on 1850 to the present. (To be evaluated via midterm and final written examinations)
- 2. Students will analyze current dance and culturally related issues in contemporary society; and articulate them verbally and in written form through class discussion and completion of course assignments. (To be evaluated via written response questions)
- 3. Students will apply basic historical research concepts and methodology to strengthen personal research processes and products. (To be evaluated via unit assignments)
- 4. Students will become competent in the use of MLA documentation style and format through application in relevant course assignments. (To be evaluated via formal documentation associated with unit assignments)

DANCE 469 : Capstone in Dance. (2:0:ARR)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: BA in Dance: Dance 362 if a choreographic project. Dance Education: Dance 362; 361 or 462.

Course Outcomes

- Students will reflect in their capstone project a philosophy compatible with the mission of BYU
- Students will complete a capstone project, whether it be choreographic, research, or performance that represents a significant and comprehensive synthesis of the learning they have experienced during their years in the program

Note: Qualified students may substitute higher-level technique courses for required lower-level technique courses with permission from the Dance Department.

6. Complete one course from the following:

DANCE 362 : Contemporary Choreography Intermediate. (2:0:4)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 244R

DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in contemporary dance.

Course Outcomes

There are no course outcomes available

DANCE 377 : World Dance Choreography. (2:0:4)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in World Dance.

Course Outcomes

- 1. Students will learn technical elements, process and crafting principles of composition, such as: transitions, traditional formations, dynamic structure, stylistic coherence, form, musical dynamics and phrasing.
- 2. Students will develop a critical eye in analyzing and forming own aesthetic criteria.
- 3. Students will discover ethno-choreographic elements of a particular style or cultural group.
- 4. Students will address issues of authenticity versus creativity, traditional versus contemporary.
- 5. Students will learn to document choreography.

DANCE 387 : Ballroom Dance Choreography. (2:0:4)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Choreography in Ballroom Dance emphasizing formation dancing.

Course Outcomes

- 1. Students will find coherence in foundational elements of formation choreography.
- 2. Students will demonstrate basic skills of composing ballroom formation choreography.

DANCE 397 : Ballet Choreography. (2:0:4)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in ballet. Exploration of hte choreographic process through theoretical study and analysis as well as practical application in the presentation of choreographic work. Concepts include clarity, creativity, transition, musical accent and phrasing, dynamic structure, form, stylistic coherence, artistic merit.

Course Outcomes

- Each student will creatively experiment with and arrange movement with regard to clarity, transition, musical accent and phrasing, dynamic structure, form and stylistic coherence.
- Each student will begin to formulate his/her own aesthetic criteria through the process of watching dance concerts and writing concise and thoughtful critiques.

Each student will enhance his/her understanding of choreography through reading, observation, discussion, and active participation.
- Each student will demonstrate knowledge acquired through completion of creative, choreographic project and written examination.

7. Complete one course from the following:

DANCE 343 : Principles of Somatics. (2:2:1)

WHEN TAUGHT: Fall; Spring Even Yrs.

PREREQUISITE: DANCE 243R & DANCE 244R; or DANCE 291R; Dance 342.

DESCRIPTION: Experiential approach to movement training including body patterning. Integration and personal expression of body and movement choices.

Course Outcomes
- Students will be able to:1. identify and demonstrate a basic theoretical and practical understanding of selected Somatic principles and practices.
- 2. demonstrate an awareness and understanding of movement from a place of inward knowing.
- 3. physically embody connectivity
- 4. understand the joys and consequences of their own personal movement choices
- 5. integrate the concepts of the class into the practical applications of teaching, coaching and re-patterning for self or other.

DANCE 351 : Laban Movement Analysis. (2:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: DANCE 243R & DANCE 244R & DANCE 291R

DESCRIPTION: Tools to make sense of, and derive meaning from movement. Constituent movement components that facilitate accuracy in teaching, performance, and choreography.

Course Outcomes
- Each student will be able to:1. Identify the basic vocabulary, concepts and principles that are used in LMA.
- 2. Describe a movement event systematically using the aspects of the system.
- 3. Demonstrate functional skill in both a personal and professional application of LMA, including appropriate notational forms and/or specialized terminologies.

8. Complete one course from the following:

DANCE 359R : Special Topics and Issues. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: DANCE 243R & DANCE 244R & DANCE 261

DESCRIPTION: Seminar with rotating topics and issues selected from: dance and health, dance and identity, dance and technology, and dance philosophy and aesthetics.

Course Outcomes
- PHOTOSHOP OBJECTIVES&1. Students will demonstrate competency in the Photoshop interface.
- 2.Students will acquire knowledge in the use of the key commands.
- 3. Students will apply knowledge of the toning and selection tools to re-touch dance photos.
- 4.Students will create a complex image using layers, digital filters and blending modes.
- 5.Students will construct a dance concert poster.
- LOGIC EXPRESS OBJECTIVES1. Students will demonstrate competency in the Logic Express interface.
- 2.Students will acquire knowledge in the use of key commands
- 3.Students will create background music for a slideshows and video.
- 4.Students will understand and apply audio effects techniques when mixing and exporting music.
- 5.Students will demonstrate audio editing techniques to cut pre-recorded music.
- FINAL EXPRESS OBJECTIVES:1. Students will demonstrate competency in the Final Cut interface.
- 2. Students will acquire knowledge in the use of key commands.
- 3. Students will understand the Final Cut workflow.
- 4. Students will demonstrate knowledge of video editing.
- 5. Students will analyze and color correct video.
- 6.Students will create a solo dance on video.
- 7.Students will create a group dance on video.
- iDVD OBJECTIVES1.Students will demonstrate competency in the iDVD interface.
- 2.Students will Understand the iDVD workflow.
- .Students will Create and author a DVD.

: Dance and Identity.

Course Outcomes

: Dance and Health Issues.

Course Outcomes

: Dance Philosophy and Aesthetics.

Course Outcomes

(**Note:** Choose one from three rotating titles: Dance and Health, Dance and Identity, or Dance Philosophy and Aesthetics.)

DANCE 477 : Dance - a Reflection of Culture. (2:2:0)

WHEN TAUGHT: Winter

DESCRIPTION: Study of dance as an expression of culture.

Course Outcomes
- 1. Students will learn cultural concepts and identity associated with world dance
- 2. Students will understand the differences and similarities in traditions and rituals connected to dance
- 3. Students will participate in class discussions and analysis of group research and assigned readings;
- 4. Students will understand ethnochoreology and ethnography and how they interface in cultural dance

9. Complete one course from each of the following categories:

- Foot articulation:

DANCE 135 : Tap Dance, Beginning. (.5:0:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes
- 1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance
- 2. Students will demonstrate advanced technical and artistic skill in one dance genre and at least beginning to intermediate skill in another.

DANCE 171 : Clog Dance, Beginning. (.5:0:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Beginning steps and technique, emphasizing slide/drag.

Course Outcomes
- 1. Students will learn traditional and contemporary clogging techniques including arm movements, footwork, correct alignment, placement and weight shifts.
- 2. Students will learn a movement vocabulary using correct clog dance terminology.
- 3. Students will learn, dance and test beginning sequences and patterns of movement.
- 4. Students will learn basic presentation skills in clog dance movement patterns, combinations, and skills .
- 5. Students will learn a knowledge of the history and progression of clog dance

DANCE 174 : Ethnic Dance Beginning - Irish. (.5:0:2)
DESCRIPTION: Introduction to Irish dance technique--soft and hard shoe--at a begining level. Instruction in solo and figure dances as well as some cultural background information about music, costumes, traditions and on-going development in this style of dance.

Course Outcomes
There are no course outcomes available

DANCE 175 : Ethnic Dance Beginning - Polynesian. (.5:0:2)
DESCRIPTION: Instruction in movement, songs, myths and legends of Hawaii, New Zealand, Tahiti, Samoa, and Tonga.

Course Outcomes
There are no course outcomes available

DANCE 235 : Tap Dance Technique 1. (1:0:3)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Dance 135 or equivalent.

Course Outcomes
- 1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.
- 2. Students will demonstrate advanced technical and artistic skill in one dance genre and at least beginning to intermediate skill in another.

DANCE 271 : Clog Dance Technique 1. (1:0:3)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Dance 171 or equivalent.
DESCRIPTION: Intermediate steps and technique; buck styling; introduction to choreography.

Course Outcomes
- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn a knowledge of the history and progressions of clog dance.
- Students will learn traditional and contemporary intermediate clogging techniques including arm movements, footwork, correct alignment, placement and weight shifts.

DANCE 274R : Ethnic Dance Technique 1, Irish. (1:0:3)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Dance 173R (Ethnic Dance Irish) or equivalent.
DESCRIPTION: Accelerated ethnic dance technique from the Irish culture.

Course Outcomes
- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.

- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music and costumes.
- 7. Students will learn how to analyze and self correct technique and performance skills

DANCE 277 : Ethnic Dance Technique 1, Spanish. (1:0:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Spanish culture.

Course Outcomes

There are no course outcomes available

DANCE 335R : Tap Dance Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 235 or equivalent.

Course Outcomes

- Students will explore the intricacies of complex rhythms
- Students will focus on dynamics, accents, and shading, etc.
- Students will continue to work on speed, clarity, and exactness in tap technique
- Students will explore the use of counterpoint, stop time, phrasing, and different time signatures.
- Students will enhance improvisational skills, creative thinking and risk-taking.
- Students will learn the theory and process of composition.
- Students will work on their performance skills and personal style.
- Students will learn the skills of tap notation.
- Students will develop a sense of aesthetic perception to self evaluate and self correct.

DANCE 371R : Clog Dance Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 271 or equivalent.

DESCRIPTION: Fundamentals of clog technique at the advanced level.

Course Outcomes

- Students will learn traditional and contemporary advanced clogging techniques including arm movements, footwork, correcrt alignment, placement, and weight shifts
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn, dance and test intermediate sequences and patterns of movement.
- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a knowledge of the history and progression of clog dance.

DANCE 374R : Ethnic Dance Technique 2, Irish. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 274R or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Irish culture.

Course Outcomes

- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.
- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music, costumes and history.
- 7. Students will learn how to analyze and self correct technique and performance skills.

DANCE 474R : Percussive Step Styles. (1:0:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Two of three possible courses: Dance 371 or 335 or 374R.

DESCRIPTION: Technique and theory, fusing a diversity of percussive dance styles including, but not limited to, French Canadian Gigue, Cape Breton Step, Power Tap, traditional and contemporary Clog Dance. Composition and improvisation included.

- 4. Students will learn a movement vocabulary of square dance terminology, etc.
- 5. Students will enhance their coordination and rhythmic abilities
- 6. Students will develop social interaction skills and proper dance etiquette used in dance
- 7. Students will enhance their ability to memorize sequential patterns and combinations of movement

DANCE 184 : Ballroom, International Beginning (.5:0:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Bronze level. Waltz, fox-trot, tango, quickstep.

Course Outcomes
- 1. Students will be able to effectively demonstrate bronze level school figures of International Style Waltz and Quickstep.
- 2. Students will be able to effectively demonstrate beginning level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 185 : Ballroom Dance, International Latin, Beginning. (.5:0:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Bronze level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to effectively demonstrate bronze level school figures of International Style Samba and Rumba.
- 2. Students will be able to effectively demonstrate beginning level technique in the following areas:1) posture and dance position 2) clarity and use timing 3)proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 273 : Ethnic Dance Technique 1, Hungarian. (1:0:3)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance techniques from the Hungarian culture.

Course Outcomes
- 1. Each student will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Each student will learn to demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Each student will learn rhythmical & musical awareness skills
- 4. Each student will learn improvisational skills of specific traditional Hungarian couple dance styles
- 5. Each student will learn partnering skills
- 6. Each student will learn basic aspects of music, costumes, history and cultural issues

DANCE 278 : Ethnic Dance Technique 1, Ukrainian. (1:0:3)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Ukrainian culture.

Course Outcomes
- 1. Students will learn stylistic movement combinations, footwork, arm placement and choreography from the regions Poltava, Hutsul, Bukovynia and Volyn.
- 2. Students will learn a warm-up combination designed to prepare and train the body for Ukrainian dance.
- 3. Students will learn information about cultural traditions, ritual beliefs and historical facts Ukraine which influence the movement and stylistic characteristics.
- 4. Students will learn basic Ukrainian dance vocabulary.

DANCE 280 : Social Dance, Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 180 or equivalent.

Course Outcomes
- 1. Students will demonstrate the school figures associated with each dance by practice and application.
- 2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

DANCE 284 : Ballroom, International Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 184 or equivalent.

DESCRIPTION: Silver level. Waltz, fox-trot, tango, quickstep.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Waltz, Tango and Foxtrot.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 285 : Ballroom Dance, International Latin, Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 185 or equivalent.

DESCRIPTION: Silver level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Samba, Rumba and Paso Doble.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 373 : Ethnic Dance Technique 2, Hungarian. (1:0:3)

WHEN TAUGHT: Fall

PREREQUISITE: Dance 273 or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Hungarian culture.

Course Outcomes
- 1. Students will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Students will demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Students will gain improvisational skills of specific traditional Hungarian couple dance styles.
- 4. Students will learn rhythmical & musical awareness skills.
- 5. Students will acquire partnering skills in Hungarian Dance.
- 6. Students will learn basic aspects of music, costumes, history and cultural issues.

DANCE 380R : Social Dance, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 280 or equivalent.

Course Outcomes
- 1. Students will demonstrate the school figures associated with each dance by practice and application.
- 2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

DANCE 382R : Ballroom, International Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Dance 284 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Waltz, tango, fox-trot, quickstep.

Course Outcomes
- 1. Students will be able to effectively demonstrate gold level school figures of International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to effectively demonstrate advanced level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 383R : Ballroom Dance, International Latin, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: Dance 285 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Cha-cha, samba, rumba, paso doble.

Course Outcomes
- Students will be able to effectively demonstrate gold level school figures of International Style Cha-Cha, Samba, Rumba, Paso Doble
- Students will be able to effectively demonstrate advanced level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 384R : Ballroom, International Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 382R or equivalent; instructor's consent.

DESCRIPTION: Gold 2 level. Waltz, fox-trot, tango, quickstep.

Course Outcomes
- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in the

International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate pre-championship level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 385R : Ballroom Dance, International Latin, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 383R or equivalent ; instructor's consent.

DESCRIPTION: Gold 2 level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate pre-championship level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 480R : Social Dance, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 380R or equivalent.

Course Outcomes
- 1. Students will demonstrate the class routines associated with each dance by practice and application
- 2. Students will demonstrate advanced level the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to compete in an open event by participation in the BYU Dancesport competition.

DANCE 484R : Ballroom, International Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 384R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: waltz, tango, fox-trot, quickstep, Viennese waltz.

Course Outcomes
- 1. Students will be able to demonstrate competitive figures at a championship level in International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate "championship" level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 485R : Ballroom Dance, International Latin, Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 385R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to demonstrate competitive figures at a championship level in the International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate "championship" level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 495R : Pas de Deux. (1:0:2)

WHEN TAUGHT: Winter

PREREQUISITE: Audition.

DESCRIPTION: Ballet partnering techniques.

Course Outcomes
- 1. Students will find the point of balance for incomplete and complete turns.
- 2. Students will learn to perform falling poses and promenades.
- 3. Students will demonstrate knowledge of three basic turns: finger pirouette, pirouette partnered at the waist, and pirouette partnered at the hand(s) / wrist(s).
- 4. Students will maintain placement and strength during lifts (Female).

- 6. Each student will increase awareness and appreciation of world dance and how it relates to other dance forms and styles

DANCE 271 : Clog Dance Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 171 or equivalent.

DESCRIPTION: Intermediate steps and technique; buck styling; introduction to choreography.

Course Outcomes

- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn a knowledge of the history and progressions of clog dance.
- Students will learn traditional and contemporary intermediate clogging techniques including arm

movements, footwork, correct alignment, placement and weight shifts.

DANCE 272 : Ethnic Dance Technique 1, Chinese. (1:0:3)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Chinese culture.

Course Outcomes

There are no course outcomes available

DANCE 273 : Ethnic Dance Technique 1, Hungarian. (1:0:3)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance techniques from the Hungarian culture.

Course Outcomes

- 1. Each student will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Each student will learn to demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Each student will learn rhythmical & musical awareness skills
- 4. Each student will learn improvisational skills of specific traditional Hungarian couple dance styles
- 5. Each student will learn partnering skills
- 6. Each student will learn basic aspects of music, costumes, history and cultural issues

DANCE 274R : Ethnic Dance Technique 1, Irish. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 173R (Ethnic Dance Irish) or equivalent.

DESCRIPTION: Accelerated ethnic dance technique from the Irish culture.

Course Outcomes

- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.
- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music and costumes.
- 7. Students will learn how to analyze and self correct technique and performance skills

DANCE 275 : Ethnic Dance Technique 1, Polynesian. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 173R or previous experience.

DESCRIPTION: Accelerated ethnic dance technique from the Polynesian culture.

Course Outcomes

- 1. Students will learn beginning Polynesian dance skills with proper technique and theory in the styles of Modern Hawaiian, Maori and Tahiti dance syles.
- 2. Students will gain a knowledge of the history of Polynesian dance including myths and legends.
- 3. Students will enhance their coordination and rhythm.
- 4. Students will develop correct alignment and posture in the various styles of Polynesian dance.
- 5. Students will learn a movement vocabulary using correct Polynesian terminology.
- 6. Students will gain a basic knowledge of the music and costumes of Polynesian dance.

DANCE 277 : Ethnic Dance Technique 1, Spanish. (1:0:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Spanish culture.

Course Outcomes

There are no course outcomes available

DANCE 278 : Ethnic Dance Technique 1, Ukrainian. (1:0:3)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Ukrainian culture.

Course Outcomes

- 1. Students will learn stylistic movement combinations, footwork, arm placement and choreography from the regions Poltava, Hutsul, Bukovynia and Volyn.
- 2. Students will learn a warm-up combination designed to prepare and train the body for Ukrainian dance.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 184 or equivalent.

DESCRIPTION: Silver level. Waltz, fox-trot, tango, quickstep.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Waltz, Tango and Foxtrot.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 285 : Ballroom Dance, International Latin, Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 185 or equivalent.

DESCRIPTION: Silver level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Samba, Rumba and Paso Doble.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 294R : Ballet Technique, Men. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: DANCE 290

DESCRIPTION: Intermediate classical ballet technique for men.

Course Outcomes
- 1. Students will acquire a degree of mastery in men's intermediate ballet technique.
- 2. Students will Increase postural awareness; begin to correct imperfections; add physical strength, endurance, flexibility, extension, coordination, grace, precision and elevation; and improve the health and appearance of the physical body.
- 3. Students will Increase their awareness and appreciation for ballet, its aesthetic beauty, demanding discipline, and lifelong benefit of enhancing and integrating the physical, spiritual, intellectual, and emotional aspects.
- 4. Students will acquire improved awareness of the physical body and its capacity to move.
- 5. Students will gain a sense of personal accomplishment and worth.
- 6. Enlarge one's understanding of the relationship between religion and the fine arts.
- 7. Students will increase in desire to patronize the art to some degree in the future.
- 8. Students will develop an evaluation standard to aid in selecting future quality ballet training for self and/or for family.

DANCE 331R : Jazz Dance Technique 2. (1.5:0:4.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 231 or equivalent. Dance 241R and Dance 243; or Dance 291R.

Course Outcomes

- Students will gain a greater knowledge jazz dance styles through various advance movement combinations.
- Students will acquire a degree of mastery in jazz dance technique at an advance level as their foundation.
- Students will increase their intellectual ability to retain complex and substantial length of movement sequences given in a short amount of time.
- Students will explore the psychology of performance and auditioning.
- Students will experience the joy of jazz rhythms and motion.
- Students will increase awareness in their physical health and well-being through activity and correct principles of training.
- Students will increase awareness to their overall self-image, emphasizing; discipline, coordination, strength, flexibility and endurance.
- Students will gain understanding of the gospel of Jesus Christ as an artist in the world.
- Students will acquire the desire to patronize the art to some degree in the future.
- Students will develop an evaluation standard to aid in selecting future quality jazz dance training for self and/or for family.

DANCE 335R : Tap Dance Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 235 or equivalent.

Course Outcomes

- Students will explore the intricacies of complex rhythms
- Students will focus on dynamics, accents, and shading, etc.
- Students will continue to work on speed, clarity, and exactness in tap technique
- Students will explore the use of counterpoint, stop time, phrasing, and different time signatures.
- Students will enhance improvisational skills, creative thinking and risk-taking.
- Students will learn the theory and process of composition.
- Students will work on their performance skills and personal style.
- Students will learn the skills of tap notation.
- Students will develop a sense of aesthetic perception to self evaluate and self correct.

DANCE 340R : Contemporary Dance, Technique and Theory 3. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Dance 243R or equivalent; by audition.

Course Outcomes

- Demonstrate intermediate/advanced Contemporary dance technical proficiency in whole body connectivitystrength & flexibilitybreath initiation and supportconsistent core support functional alignmentbalance & coordination groundedness and weight sensingshape clarity, spatial accuracy and rangefocusrhythmic accuracyarticulationdynamic contrastcomplex movement skills
- Demonstrate increased dance performance artistry in:sequence masterymusicalityexpressivitypersonal interpretationnuanceensemble
- Describe, assess and write about demonstrated achievement of technical and performance skill
- Show sustained application of feedback from assessments
- Articulate understanding of Contemporary/Modern dance as an art form
- Articulate dance connections to gospel principles mind, body and spirit

DANCE 341R : Contemporary Dance Technique Forms. (2.5:0:7.5)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 340 or equivalent; by audition.

DESCRIPTION: Contemporary dance forms and techniques, including Chinese contemporary dance, contact improvisation, and other new and hybrid dance forms useful in contemporary dance training. Offerings subject to teacher expertise.

Course Outcomes

- 1. Demonstrate intermediate/advanced technical proficiency in both ballet and contemporary dance technique. Areas requiring proficiency include:whole body connectivitystrength & flexibilitybreath initiation and supportconsistent core supportfunctional alignmentbalance & coordinationgroundedness and weight sensingshape clarity, spatial accuracy and rangefocusrhythmic accuracyarticulationdynamic contrastcomplex movement skills
- 2. Demonstrate increased dance performance artistry in:sequence masterymusicalityexpressivitypersonal interpretationnuanceensemble
- 3. Describe, assess, and write about:demonstrated achievement of technical and performance skill.the essential and developing relationship that exists between ballet and contemporary dance movement.
- 4. Show consistent and sustained application of feedback from daily class and assessments.
- 5. Demonstrate intermediate/advanced knowledge of ballet and contemporary vocabulary through participation, observation, discussion, and writing.
- 6. Articulate dance connections of gospel principles in mind, body and spirit

DANCE 370 : World Dance Technique 2. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: DANCE 270

DESCRIPTION: In-depth dance technique of selected traditional, folk, and national dance styles.

Course Outcomes

- 1. Demonstrate complex movement patterns from selected cultures

- 2. Develop proper technique of posture and gesture
- 3. Interpret proper body alignment and technical execution of movement styles and phrases
- 4. Enhance the ability to recognize and understand world dance vocabulary, significance andcontext within selected cultures

DANCE 371R : Clog Dance Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 271 or equivalent.

DESCRIPTION: Fundamentals of clog technique at the advanced level.

Course Outcomes

- Students will learn traditional and contemporary advanced clogging techniques including arm movements, footwork, correcrt alignment, placement, and weight shifts
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn, dance and test intermediate sequences and patterns of movement.
- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a knowledge of the history and progression of clog dance.

DANCE 373 : Ethnic Dance Technique 2, Hungarian. (1:0:3)

WHEN TAUGHT: Fall

PREREQUISITE: Dance 273 or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Hungarian culture.

Course Outcomes

- 1. Students will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Students will demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Students will gain improvisational skills of specific traditional Hungarian couple dance styles.
- 4. Students will learn rhythmical & musical awareness skills.
- 5. Students will acquire partnering skills in Hungarian Dance.
- 6. Students will learn basic aspects of music, costumes, history and cultural issues.

DANCE 374R : Ethnic Dance Technique 2, Irish. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 274R or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Irish culture.

Course Outcomes

- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.
- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music, costumes and history.
- 7. Students will learn how to analyze and self correct technique and performance skills.

DANCE 380R : Social Dance, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 280 or equivalent.

Course Outcomes

- 1. Students will demonstrate the school figures associated with each dance by practice and application.
- 2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

DANCE 382R : Ballroom, International Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Dance 284 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Waltz, tango, fox-trot, quickstep.

Course Outcomes

- 1. Students will be able to effectively demonstrate gold level school figures of International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to effectively demonstrate advanced level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 383R : Ballroom Dance, International Latin, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: Dance 285 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Cha-cha, samba, rumba, paso doble.

Course Outcomes

- Students will be able to effectively demonstrate gold level school figures of International Style Cha-Cha, Samba, Rumba, Paso Doble
- Students will be able to effectively demonstrate advanced level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer

5) a clear understanding of partnering skills

DANCE 384R : Ballroom, International Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 382R or equivalent; instructor's consent.

DESCRIPTION: Gold 2 level. Waltz, fox-trot, tango, quickstep.

Course Outcomes

- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in the International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate pre-championship level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 385R : Ballroom Dance, International Latin, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 383R or equivalent ; instructor's consent.

DESCRIPTION: Gold 2 level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes

- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate pre-championship level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 390R : Ballet Technique 3. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Audition.

Course Outcomes

- Each student will:1. Acquire a degree of mastery in advanced/intermediate ballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced/intermediate level standard.
- Each student will:Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 391R : Ballet Technique 4. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

Course Outcomes

- Each student will:1. Acquire a degree of mastery in advanced levelballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced level standard.
- Each student will:Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 392R : Ballet Pointe 1. (.5:0:1.5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: A minimum of two years of previous pointe technique and concurrent enrollment in Dance 390R.

DESCRIPTION: Intermediate level pointe. Satisfies BA requirements in Dance.

NOTE: Although this is an open enrollment course, all students must receive teacher approval or level placement audition before registering.

Course Outcomes

There are no course outcomes available

DANCE 393R : Ballet Pointe 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition required; concurrent enrollment in Dance 390R or 391R.

DESCRIPTION: Advanced level pointe. Satisfies BA requirements in Dance.

NOTE: Although this is an open enrollment course, all students must receive teacher approval or level placement audition before registering.

Course Outcomes
- Each student will:1. Acquire a degree of mastery in advanced/intermediateballet pointe technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Apply a working knowledge of French ballet terminology, analytical skills, and sound writing skills by submitting a weekly journal entry or written self-evaluation, and a written critique of a live performance.
- Each student will:Participate fully in the pointe technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 440R : Contemporary Dance, Technique and Theory 4. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 340R or equivalent; by audition.

Course Outcomes
- 1. Students will demonstrate advanced technique proficiency instrength flexibilityconnectivitycomplex sequence mastery movement problems
- 2. Students will demonstrate performance awareness and control over movement innuancedynamicmusicalityfreedom from tensionshapinginitiationbreath qualityphrasing and composition
- 3. Students will describe, assess and write about achievement of technical skills and performing skills
- 4. Students will articulate appreciation for the divine nature of the human body as it relates to gospel principles as well as the relationship between mind/body/spirit.
- 5. Students will articulate appreciation for dance as an art form

DANCE 474R : Percussive Step Styles. (1:0:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Two of three possible courses: Dance 371 or 335 or 374R.

DESCRIPTION: Technique and theory, fusing a diversity of percussive dance styles including, but not limited to, French Canadian Gigue, Cape Breton Step, Power Tap, traditional and contemporary Clog Dance. Composition and improvisation included.

Course Outcomes
- 1. Students will gain speed, clarity and precise technique in various styles of percussive footwork.
- 2. Students will improve coordination, motor memory, fine and gross motor skills.
- 3. Students will demonstrate correct alignment, placement and weight shifts.
- 4. Students will learn sequences and patterns of movement.
- 5. Students will apply the theory and process of improvisation and composition.
- 6. Students will learn the current movement vocabulary and or terminology.
- 7. Students will gain a kinesthetic perception and concentration in order to self-evaluate and self correct.

DANCE 480R : Social Dance, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 380R or equivalent.

Course Outcomes
- 1. Students will demonstrate the class routines associated with each dance by practice and application
- 2. Students will demonstrate advanced level the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to compete in an open event by participation in the BYU Dancesport competition.

DANCE 484R : Ballroom, International Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 384R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: waltz, tango, fox-trot, quickstep, Viennese waltz.

Course Outcomes
- 1. Students will be able to demonstrate competitive figures at a championship level in International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate "championship" level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 485R : Ballroom Dance, International Latin, Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 385R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to demonstrate competitive figures at a championship level in the International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate "championship" level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 490R : Ballet Technique 5. (3:0:9.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Advanced ballet technique, including advanced pointe work for women and advanced technique for men.

Course Outcomes

- Each student will:1. Acquire a degree of mastery in advancedballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced level standard.
- Each student will:Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 494R : Ballet Variations. (1:0:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: Dance 391R and 393R or equivalents.

Course Outcomes

- Students will learn and achieve technical and stylistic mastery of several variations from classical ballets.
- Students will learn and record the background, libretto, and style of the specific ballets through brief lectures.
- Students will compile a notebook with the background, libretto, and details of each variation which will aid in the future instructing of these variations. The student will include specifics on choreographers, composers, and dancers where applicable; as well as all steps of each variation written in a clear, understandable form.
- Students will learn each variation and be required to perform throughout the semester.
- Students will prepare variations to perform and be graded on those technical and stylistic requirements.

DANCE 495R : Pas de Deux. (1:0:2)

WHEN TAUGHT: Winter

PREREQUISITE: Audition.

DESCRIPTION: Ballet partnering techniques.

Course Outcomes

- 1. Students will find the point of balance for incomplete and complete turns.
- 2. Students will learn to perform falling poses and promenades.
- 3. Students will demonstrate knowledge of three basic turns: finger pirouette, pirouette partnered at the waist, and pirouette partnered at the hand(s) / wrist(s).
- 4. Students will maintain placement and strength during lifts (Female).
- 5. Students will lift partner above the head with stretched elbows and correct position of the back and head, with knees stretched and heel on the floor (Male).
- 6. Students will demonstrate focus on partner during combinations while being cognizant of the facial expressions.
- 7. Students will demonstrate shoulder lift on one side (left or right) with appropriate expression and maintain position for 10 seconds.
- 8. Students will perform a double pirouette, en dehors and en dedans, when partnered at the waist at least 75% of the time.
- 9. Perform triple finger pirouettes, en dehors at least 75% of the time.
- 10. Perform technique and partnering skills correctly to avoid injury.
- 11. Students will achieve traditional manners of courtesy and noble dignity that should be present between the male and female dancers.
- 12. Students will achieve an appreciation for the partner's role in creating a union of movement.
- 13. Students will increase trust between the male and female partner.

11. Complete two hours from the following teaching methods courses:

DANCE 336 : Methods of Teaching Aerobic Dance. (2:2:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 342 & DANCE 343; or EXSC 362 & DANCE 343

RECOMMENDED: NDFS 100.

Course Outcomes

- 1. Students will identify scientific fitness principles regarding cardiovascular endurance, strength, flexibility and lean/fat body ratio.
- 2. Students will analyze important characteristics of teaching anatomically sound warm-up and cool down sessions and choreographing and teaching aerobic workouts based on sound physiological principles.
- 3. Students will evaluate and administrate physical fitness assessments.

DANCE 365 : Creative Dance for Elementary Education. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 243R, 244R, or approved Kinnect membership.

DESCRIPTION: Theory and teaching experience in creative movement for preschool and elementary school

children.

Course Outcomes
- 1. Articulate an understanding of creative dance education theory, content, and pedagogy that facilitates artistic development and process orientation.
- 2. Apply knowledge of developmentally appropriate dance learning activities for children pre-school through grade eight.
- 3. Demonstrate an understanding of dance, elements, concepts and vocabulary physically, verbally and in writing, and apply that knowledge to teaching dance in the elementary setting
- 4. Identify and use clear lesson content objectives drawn from national and state curriculum standards when planning lessons and teaching dance.
- 5. Understand and apply a variety of teaching strategies and management techniques necessary to effectively guide dance skill building, exploration, improvisation, and compositional experiences for young children.
- 6. Explore and identify various forms of dance assessment

DANCE 366 : Methods of Teaching Contemporary Dance. (2:2:2)

WHEN TAUGHT: Winter; Spring Odd Yrs.
PREREQUISITE: DANCE 243R & DANCE 261; Dance 244R or equivalent.
DESCRIPTION: Planning, teaching, and evaluating lessons.

Course Outcomes
- 1. develop, articulate and demonstrate a clear philosophy of teaching and learning as it relates to Contemporary Dance.
- 2. demonstrate a conceptual understanding of the content and processes needed to facilitate learning in the field of Contemporary Dance.
- 3. demonstrate teaching competency through experiences in planning, teaching and evaluating lessons.
- 4. demonstrate an ability to use a variety of teaching strategies to produce new knowledge and skills in others.
- 5. facilitate artistic development through process-oriented instruction.

DANCE 367 : Methods of Teaching Children's Creative Dance. (2:1:2)

WHEN TAUGHT: Fall; Spring Even Yrs.
PREREQUISITE: DANCE 243R & DANCE 244R

Course Outcomes
- Students will:1. Gain an increased understanding of the importance of Creative Dance for children.
- 2. Learn to teach developmentally appropriate technical dance skills to children.
- 3. Demonstrate an understanding of the methods of encouraging creative problem solving skills and the creative process.
- 4. Demonstrate knowledge, mastery and application of the elements of dance (time, space, and force) in relation to the teaching of children.
- 5. Gain practical experience through teaching children.

DANCE 376 : Methods of Teaching World Dance. (2:2:3)

WHEN TAUGHT: Fall
RECOMMENDED: Dance 170 or equivalent.

Course Outcomes
- 1. Students will study logical progressions in the breakdown of steps, formations and positions
- 2. Students will learn to communicate specific verbal cues in the delivery of content
- 3. Students will develop calling ahead techniques
- 4. Students will learn the mechanics of class structure and management
- 5. Students will demonstrate correct styling and technique
- 6. Students will learn how to read and understand world dance descriptions
- 7. Students will learn the skills in successfully teaching large groups in a recreational setting
- 8. Students will develop and actualize a clear philosophy of teaching and learning as it related to dance

DANCE 386 : Methods of Teaching Social Dance. (2:1:2)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: DANCE 280
DESCRIPTION: Pedagogy training in social dance at the bronze and silver skill levels.

Course Outcomes
- 1. Students will analyze the most important characteristics of great teachers through discussion.
- 2. Students will demonstrate basic skills of ballroom dance by participation and practice including both the mans and ladies parts.
- 3. Students will demonstrate the basic skills of teaching dance to groups by developing lesson plans and through practical experience.

DANCE 396 : Methods of Teaching Ballet. (2:2:2)

WHEN TAUGHT: Fall Odd Yrs.
PREREQUISITE: Dance 390R or equivalent.
DESCRIPTION: Teaching classical ballet from preballet through advanced; includes analysis of Bournonville, Cecchetti, Vaganova, RAD, Kneeland, and SAB methods.

Course Outcomes
- 1. Students will demonstrate a knowledge of ballet class structure and progression between levels bywriting an 8-year ballet curriculum.
- 2. Students will experience practical observation of ballet classes/labs and analyze teachers at work.
- 3. Students will apply sound musical principles in practical teaching experiences.

- 4. Students will philosophically and historically analyze each of the major ballet methodologies: Cecchetti, Royal Academy of Dancing, Vaganova, etc.
- 5. Students will demonstrate a working knowledge (both written and verbal) of ballet French terminology for the technique appropriate for each level of ballet instruction.

DANCE 486 : Theory and Notation of Ballroom Dance, International. (2:0:4)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: DANCE 384R

DESCRIPTION: Preparation for professional teaching certification examinations.

Course Outcomes

- 1. Students will find coherence in technical codification of International Style Waltz, Tango Foxtrot, and Quickstep.
- 2. Students will be able to demonstrate with technical clarity the man and woman's part of Bronze and Silver level school figures of the Waltz, Tango Foxtrot, and Quickstep.
- 3. Students will be able to correctly articulate and deliver the technical information as required for a future professional examination the following categories: Feet Positions, Alignment, Amount of Turn, Rise & Fall, Footwork, C.B.M., and Sway
- 4.Students will be able to successfully amalgamate school figures into a cohesive routine.

DANCE 487 : Theory and Notation of Ballroom Dance, International Latin. (2:0:4)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: DANCE 385R

DESCRIPTION: Theory and notation of International Latin Dance and preparation for professional teaching certification examinations.

Course Outcomes

- 1. Students will find coherence in technical codification of International Style Cha-Cha, Samba Rumba Paso Doble, and Jive
- 2. Students will be able to demonstrate with technical clarity the man and woman's part of Bronze and Silver level school figures of the Cha-Cha, Samba, Rumba, Paso Doble, and Jive
- 3. Students will be able to correctly articulate and deliver the technical information as required for a future professional examination the following categories: Feet Positions, Alignment, Amount of Turn, Footwork
- 4. Students will be able to successfully amalgamate school figures into a cohesive routine.

12. Complete two semesters (2-4 hours) from the following performance company options:

DANCE 229R : Dance Performance 1. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Production director's consent.

DESCRIPTION: Participation as dancers in concert dance production.

Course Outcomes

- The learning outcomes of this course will be correlated somewhat with the learning outcomes of one of the regular dance performance groups. However, due to the individualized nature of this course, individual outcomes will be designed by the instructor based upon the needs and opportunities of the student.

DANCE 348R : Kinnect. (1-2:1:6)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: Audition.

DESCRIPTION: Educational outreach dance company specifically focusing on developing teaching, creative, and performance skills.

Course Outcomes

- 1. Collaboratively choreograph theme based dances for an educational lecture performance
- 2. Demonstrate creative dance teaching skills with children in elementary schools
- 3. Demonstrate increased performance and improvisation skill in real world venues
- 4. Demonstrate leadership within the group by fulfilling specific roles and assignments related to the creation, production, presentation, and teaching tasks of the company
- 6. Evaluate, modify and adapt original presentations, lessons and dances in authentic dance experiences in schools, museums and/or conferences
- 7. Demonstrate dance education professionalism and advocacy

DANCE 368R : DancEnsemble - Contemporary Dance Performance and Choreography. (1-2:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Experiences in contemporary dance choreography and performance.

Course Outcomes

- 1. Demonstrate increasing performance skill, including skills of concentration, discipline, focus and stage presence.
- 2. Demonstrate increasing technical skill, focusing specifically of the refinement of nuance, projection, dynamics and the ability to dance within the context of an ensemble.
- 3. Create and evaluate dances, giving increased attention to the ability to see and respond to the possibilities within any given choreographic situation.
- 4. Investigate and refine their own individual choreographic and performance voice.

DANCE 378R : Folk Dance Performance, Intermediate. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Performance techniques and experience in folk dance.

Course Outcomes

- 1. Students will learn the traditional dance technique and stylization of selected countries or regions
- 2. Students will develop the performance skills of posture, presentation, and characterization
- 3.Students will explore both the recreational and staged forms of world dance
- 4. Students will demonstrate strong citizenship as a member of a performance team

DANCE 388R : Ballroom Dance Performance, Intermediate. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Audition.

DESCRIPTION: Performance techniques and experience in ballroom dance.

Course Outcomes

- 1. Students will demonstrate dance skills through technique, stylization, and choreography.
- 2. Students will find coherence if what it means to represent Brigham Young University and the Church of Jesus Christ of Latter-day Saints in local areas.

DANCE 429R : Dance Performance 2. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Instructor's consent.

DESCRIPTION: Participation as dancers in concert dance production.

Course Outcomes

- The learning outcomes of this course will be correlated somewhat with the learning outcomes of one of the regular dance performance groups. However, due to the individualized nature of this course, individual outcomes will be designed by the instructor based upon the needs and opportunities of the student.

DANCE 468R : Contemporary Dance Theatre. (2:0:12)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Performing modern and contemporary dance repertory on and off campus.

Course Outcomes

- 2. Show increased technical ability.
- 1. Develop advanced performance skill and artistry.
- 3. Understand choreographic principles.
- 4. Contribute to the choreographic process.
- 5. Perform dances for audiences on campus, in schools, in professional venues, and at conferences.
- 6. Make visible attitudes of professional behavior.
- 7. Strengthen their testimony of the gospel and deepen their desire to share light and truth through the art form of dance.

DANCE 478R : Folk Dance Performance Company. (2:0:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Performance technique and experience with International Folk Dance Ensemble.

Course Outcomes

- 1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.
- 2. Students will demonstrate artistry and advanced ability in dance performance.

DANCE 488R : Ballroom Dance Performance Company. (2:0:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Performance techniques and experience with BYU Ballroom Dance Company.

Course Outcomes

- 1. Students will demonstrate an increased ability to perform the art of Ballroom Dance through participation in choreographic repertoire .
- 2. Students will exemplify the standards of Brigham Young University and the Church of Jesus Christ of Latter-day Saints, and the United States as student ambassadors
- 3. Students will find coherence of dance as a cultural tradition, an art form, an uplifting form of entertainment, and a social/recreational activity.

DANCE 489R : Preparation for Ballroom Dance Competitions. (1:0:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Creation and presentation of ballroom competitive routines, emphasizing visual and musical aspects.

Course Outcomes

- 1. Students will find coherence in the rigor required for competitive dancing. practices for International Style Ballroom Dance.

- 2. Students will demonstrate a repertoire of competitive dances in the Ballroom or Latin style.

DANCE 498R : Ballet Performance Company. (2:0:10)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition and concurrent enrollment in Dance 391R or 490R; 494R or 495R.

DESCRIPTION: Performance technique and experience with BYU Theatre Ballet.

Course Outcomes

- Students will:1. Learn and master technically and stylistically several variations from various ballets, thereby expanding his/her ballet knowledge and repertoire. (Specific variations and ballets vary according to semester.)2. Learn the background, libretto, and style of the specific ballets through brief lectures.
- Students will:1. Acquire, through research, a working knowledge of several classical ballets and classical ballet variations2. Compile a notebook with the background, libretto, and details of each variation which will aid in the future instructing of these variations. The student will include specifics on choreographers, composers, and dancers where applicable; as well as all steps of each variation written in a clear, understandable form. This will be a valuable written source that will be a lasting tool for any future teaching, dancing, or choreographing position.
- Students will:1. Learn the variations and strive to understand the differing technical and stylistic requirements of each. 2. Prepare the variations to perform and be graded on those technical and stylistic requirements.

DANCE 498R : Theatre Ballet. (2:0:10)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition and concurrent enrollment in Dance 391R or 490R; 494R or 495R.

DESCRIPTION: Performance technique and experience with BYU Theatre Ballet.

13. Complete 6 hours from the following elective courses:

Courses in items 6, 7, 8, and 11 not already completed and

DANCE 332R : Cougarette Collegiate Performing Team. (2:0:14)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

Course Outcomes

- 1. Students will represent Brigham Young University with honor and dignity.
- 2. Students will demonstrate advanced level technique.
- 3. Students will compete on a Nationals Level as determined each year.

DANCE 361 : Music Dance Theatre Choreographic Styles. (2:0:6)

WHEN TAUGHT: Winter

PREREQUISITE: DANCE 231R & DANCE 244R & DANCE 291R; Dance 235, 243R, 229.

DESCRIPTION: Physical and conceptual aspects of dance styles as they relate to music dance theatre.

Course Outcomes

- Students will:1. Be able to reproduce specific Music Theatre dance styles with clarity. Sequences to be mastered will come from a variety of sources – instructor, guests, and fellow students.

- 2. Acquire knowledge on a specific historical or current Music Theatre choreographer or appropriate style that is pertinent in the field of Music Theatre.
- 3. Increase better understanding of techniques used for professional auditioning.
- 4. Gain specific skills to produce original choreography that can be used in Musical Theatre.
- 5. Develop more understanding of a relationship between religion and the role of Music Theatre in culture and society.

DANCE 363 : Dance Improvisation, Intermediate. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 244R

Course Outcomes

- Students will learn to Move! To Explore!
- Students will learn to break comfortable and limiting movement patterns, dancing in ways that you have not moved before.
- Students will learn to "call up spontaneity at will".
- Students will learn to develop improvisational skills of "muscle readiness".
- Students will learn to learn how to suspend judgment.
- Students will learn to evolve movement over an extended period of time without losing spontaneity.
- Students will learn to practice recalling movement.
- Students will learn to practice relating to other dancers in various improvisational structures.
- Students will learn to evolve movement "in the moment" with a sense of form and definition (beginning, middle, end) thus "finding the dance" in the instant of exploration and improvisation.

DANCE 399R : Academic Internship: Dance. (.5-4:0:50)

Course Outcomes

- 2. Demonstrate the propensity to interact with professionals in their field of study in a credible, responsible and articulate manner.
- 1. Develop contacts with professionals in their field of study with the intent of creating a network that will be beneficial to future career choices.
- 3. Demonstrate improvement in the assigned responsibilities throughout the course of the internship as evaluated by the mentor teacher/intern supervisor in three periods, early, middle, and end of the internship.

DANCE 462 : Contemporary Choreography, Advanced. (2:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 362

DESCRIPTION: Creation and presentation of complete choreographic works.

Course Outcomes

There are no course outcomes available

DANCE 464 : Dance Accompaniment. (1:1:1)

WHEN TAUGHT: Fall; Summer Odd Yrs.

PREREQUISITE: DANCE 264

Course Outcomes

- Students will demonstrate leadership skills by teaching and accompanying short dance sequences.
- Students will understand the importance of dynamics, articulation and rhythm in dance.
- Students will understand how to improvise rhythms by practicing and demonstrating rhythms on a djembe drum.
- Students will demonstrate musical proficiency by accompanying dancers movement exercises.
- Students will use technology to edit and enhance audio files used for movement studies.

DANCE 500R : Studies in Dance. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Experience in dance. Possibilities include but are not limited to study abroad, workshops, or pilot dance courses.

Course Outcomes

- 2. Students will demonstrate content specific dance skill.
- 1. Students will demonstrate a commitment to BYU and Dance Department standards in dress and behavior.
- 3. Students will demonstrate content specific proficiency through research, presentations, and creative works.

: Workshop in Ballet.

Course Outcomes

: Workshop in Ballroom.

Course Outcomes

P MGT 321 : Financial Issues in Public and Not-for-Profit Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Introduction to fund accounting, budgeting processes, and sources of revenue such as taxes, municipal bonds, user fees, donations, grants, dues, and ticket sales.

Course Outcomes

- Students will be able to describe different funding sources used in public and non-profit settings
- Students will be able to explain basic economic principles
- Students will be able to perform basic analysis to help in the management and decision making of how resources are used.

Note: R courses may count only once to complete this requirement, with the exception of Dance 359R, 399R, and 500R.

*Hours include courses that may fulfill university core requirements.

BA in Dance Education K-12 (80 hours*, including licensure hours)

Show All Course Descriptions
Hide All Course Descriptions

This is a limited-enrollment program requiring departmental admissions approval. Please see item 1 below for information regarding requirements for admission to this major.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Acceptance Requirements

Acceptance into the dance education major is a two-step process. To be accepted as a dance education major, students must:

1. Complete an audition at the annual fall dance major auditions and designate dance education as their desired track. Those accepted will receive dance major status and may register for courses in the dance major core. These students will be designated in department records as pre-dance education track and will receive advisement from the dance education faculty.

2. Complete Dance 276R with an appropriate high rating by the teacher *and* receive recommendation by the Dance Education Committee to be advanced to dance education major status. The Dance 276R course is a gateway course at the end of which qualifying students will be officially switched from the general dance major to the dance education major. (Students who are not accepted into the dance education major have the option to continue as a general dance major or retake Dance 276R the following year.)
   Please note: Students must have completed the FBI fingerprint and background clearance **before** enrolling in Dance 276R.

Once accepted into the dance education major, continuing dance education major status is contingent upon satisfactory student performance in all major course work. This includes, but is not limited to, skill development in teaching and technique courses. Students who fail to meet required standards for these courses (particularly Dance 365 and 366) may be counseled to consider continuing as a general dance major.

Program Requirements | View MAP | View Program Outcomes

1. The Dance Department requires at least 21 hours from major courses to be completed in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

2. Students must complete an annual mandatory advisement.

3. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

4. A teaching minor is recommended.

5. Complete the following prerequisite course:
   PDBIO 220 : Human Anatomy (with lab). (3:2:2)
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: Structure and function of the human body. Lab included.

   Course Outcomes
   - Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.
   - Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.
   - Students will be able to list the name, location, and function of each of the body's organs and organ systems.

6. Complete the following:
   DANCE 230 : Conditioning and Injury Prevention for Dance. (2:3:3)
   WHEN TAUGHT: Fall; Winter
   PREREQUISITE: PDBIO 220
   DESCRIPTION: Developing conditioning programs specific to dance. Recognizing and resolving dance injuries. Practical application.

   Course Outcomes
   - 1. Students will learn how to develop a well rounded conditioning program.

- 2. Students will gain knowledge of training and conditioning principles that will help them prevent injury.
- 3. Students will create and participate in an actual conditioning program based on principles learned in the class.
- 4. Students will be in better physical condition and have a working knowledge of all aspects of conditioning and injury prevention.

DANCE 241R : Contemporary Dance, Technique and Theory 2. (2:0:6)

WHEN TAUGHT: Fall; Winter; Summer

Course Outcomes

- 1. articulate a knowledge and appreciation of the human body regarding physical function, spirituality, and as a tool of expressivity.
- 2. demonstrate increased technical ability in the areas of:flexibilitystrengthendurancebalancecoordinationphrasingdance performance skillsapplying the Patterns of Total Body Connectivitykinesthetic awareness of body alignment
- 3. demonstrate knowledge, fundamental control, and application of the elements of dance (as defined by the BEST and BESS vocabularies);
- 4. articulate an appreciation for dance as an art form.

DANCE 243R : Studio Workshop in Contemporary Dance Technique and Theory. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 244R the first time taken.

DESCRIPTION: Technique and theory in a workshop setting.

Course Outcomes

- 1. Students will demonstrate increased body connectivity and kinesthetic awareness, including:BreathCore-distalHead-tailUpper-lowerBody-halfCross-lateral connections
- 2. demonstrate performance skills including intent, nuance, dynamics, and sense of ensemble.
- 3. articulate and analyze the above principles of technique using accurate anatomical and dance elements language.

DANCE 261 : Orientation to Dance. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to dance as a discipline and at Brigham Young University.

Course Outcomes

- 1. Students will be able to hone in on important information while also providing their own thoughtful reactions to what they have read.
- 2. Students will understand principles, terminology, and execution of Laban Movement Analysis.
- 3. Students will develop critical analysis skills.
- 4. Students will delve into a dance related topic of interest to them and develop group collaboration and presentation skills.
- 5. Students will understand the common aspects of several forms of dance through analysis of how aesthetic principles and varied movement techniques are applied and emphasized within various dance genres.

DANCE 264 : Music for Dancers. (2:1:2)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Basic music notation, simple and complex rhythmic patterns, and polyrhythms; analysis of selected international music styles; brief historical survey.

Course Outcomes

- Demonstrate an understanding of basic musical concepts through physical movement.
- Acquire improved awareness of his/her physical responses to music.
- Demonstrate the ability to utilize music appropriately in the technique class and collaborate with musicians.
- Demonstrate musical awareness by creating appropriate movement to odd meter music and binary/ternary rhythms.
- Acquire improved listening skills to use music to stage or create choreography

DANCE 290 : Ballet Accelerated Technique 1. (1.5:0:4.5)

WHEN TAUGHT: Fall; Winter; Spring

Course Outcomes

- Each student will:1. Acquire a degree of mastery in accelerated beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the Ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at a beginning level standard.
- Each student will:1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 342 : Kinesiology and Related Sciences for Dancers. (4:4:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: PDBIO 220 & DANCE 230

DESCRIPTION: Study and analysis of the neuromusculoskeletal system in practical application to dance for more efficient use of the body and reduction of injuries.

Course Outcomes

- 1. Identify actions and roles of specific joints and muscle groups while moving and stationary
- 2. Identify correct skeletal alignment, as well as incorrect alignment and skeletal deviations common to dancers.
- 3. Identify chain reactions of skeletal misalignment, and muscular imbalances that commonly occur in the presence of a given misalignment.
- 4. Identify individual differences in body structure and function, and outline specific strategies for working with those differences.
- 5. Outline appropriate procedures to address bodily education/re-education through neurological, muscular and skeletal means.
- 6. Demonstrate explicit knowledge in one self-selected dance and science related topic.

DANCE 343 : Principles of Somatics. (2:2:1)

WHEN TAUGHT: Fall; Spring Even Yrs.

PREREQUISITE: DANCE 243R & DANCE 244R; or DANCE 291R; Dance 342.

DESCRIPTION: Experiential approach to movement training including body patterning. Integration and personal expression of body and movement choices.

Course Outcomes

- Students will be able to:1. identify and demonstrate a basic theoretical and practical understanding of selected Somatic principles and practices.
- 2. demonstrate an awareness and understanding of movement from a place of inward knowing.
- 3. physically embody connectivity
- 4. understand the joys and consequences of their own personal movement choices
- 5. integrate the concepts of the class into the practical applications of teaching, coaching and re-patterning for self or other.

DANCE 355 : Dance Production, Introduction. (2:2:1)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles and practices of technical aspects of dance production.

Course Outcomes

- 1. Students will identify and articulate a knowledge of equipment, techniques, and procedures in technical theatre.
- 2. Students will demonstrate basic competency (in theory and practice) of theatrical production principles, including lighting, costuming, and technologies for dance performances
- Students will demonstrate an understanding of the relationship of light, color, fabric, and technology; and how to use that knowledge to accomplish an artistic vision.

DANCE 460 : Dance History to 1850. (2:2:0)

WHEN TAUGHT: Fall; Summer Odd Yrs.

DESCRIPTION: Survey of dance in tribal cultures and ancient through Romantic historical periods, emphasizing dance of Western civilization.

Course Outcomes

- 1. Students will critically analyze, synthesize, internalize, and apply to present day dance prevalent in Western civilization, dance information gleaned through the study of dance within tribal cultures and ancient through romantic historical periods. (To be evaluated via midterm and final written examinations)
- 2. Students will analyze current dance and culturally related issues in contemporary society and articulate them verbally and in written form through class discussion and completion of course assignments. (To be evaluated via written response questions)
- 3. Students will apply basic historical research concepts and methodology in personal research processes and products. (To be evaluated via unit assignments.)
- 4. Students will become proficient in the use of MLA documentation style and format through application in unit assignments. (To be evaluated via formal documentation associated with unit assignments.)

DANCE 461 : Dance History from 1850. (2:2:0)

WHEN TAUGHT: Winter; Summer Even Yrs.

DESCRIPTION: Survey of dance in modern and postmodern historical periods, emphasizing dance of Western civilization.

Course Outcomes

- 1. Students will critically analyze, synthesize, and internalize key Western dance history information focusing on 1850 to the present. (To be evaluated via midterm and final written examinations)
- 2. Students will analyze current dance and culturally related issues in contemporary society; and articulate them verbally and in written form through class discussion and completion of course assignments. (To be evaluated via written response questions)
- 3. Students will apply basic historical research concepts and methodology to strengthen personal research processes and products. (To be evaluated via unit assignments)
- 4. Students will become competent in the use of MLA documentation style and format through application in relevant course assignments. (To be evaluated via formal documentation associated with unit assignments)

DANCE 464 : Dance Accompaniment. (1:1:1)
WHEN TAUGHT: Fall; Summer Odd Yrs.
PREREQUISITE: DANCE 264

Course Outcomes
- Students will demonstrate leadership skills by teaching and accompanying short dance sequences.
- Students will understand the importance of dynamics, articulation and rhythm in dance.
- Students will understand how to improvise rhythms by practicing and demonstrating rhythms on a djembe drum.
- Students will demonstrate musical proficiency by accompanying dancers movement exercises.
- Students will use technology to edit and enhance audio files used for movement studies.

7. Complete two enrollments of the following:

DANCE 340R : Contemporary Dance, Technique and Theory 3. (2.5:0:7.5)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Dance 243R or equivalent; by audition.

Course Outcomes
- Demonstrate intermediate/advanced Contemporary dance technical proficiency in whole body connectivitystrength & flexibilitybreath initiation and supportconsistent core support functional alignmentbalance & coordination groundedness and weight sensingshape clarity, spatial accuracy and rangefocusrhythmic accuracyarticulationdynamic contrastcomplex movement skills
- Demonstrate increased dance performance artistry in:sequence masterymusicalityexpressivitypersonal interpretationnuanceensemble
- Describe, assess and write about demonstrated achievement of technical and performance skill
- Show sustained application of feedback from assessments
- Articulate understanding of Contemporary/Modern dance as an art form
- Articulate dance connections to gospel principles mind, body and spirit

DANCE 341R : Contemporary Dance Technique Forms. (2.5:0:7.5)
WHEN TAUGHT: Winter
PREREQUISITE: Dance 340 or equivalent; by audition.
DESCRIPTION: Contemporary dance forms and techniques, including Chinese contemporary dance, contact improvisation, and other new and hybrid dance forms useful in contemporary dance training. Offerings subject to teacher expertise.

Course Outcomes
- 1. Demonstrate intermediate/advanced technical proficiency in both ballet and contemporary dance technique. Areas requiring proficiency include:whole body connectivitystrength & flexibilitybreath initiation and supportconsistent core supportfunctional alignmentbalance & coordinationgroundedness and weight sensingshape clarity, spatial accuracy and rangefocusrhythmic accuracyarticulationdynamic contrastcomplex movement skills
- 2. Demonstrate increased dance performance artistry in:sequence masterymusicalityexpressivitypersonal interpretationnuanceensemble
- 3. Describe, assess, and write about:demonstrated achievement of technical and performance skill.the essential and developing relationship that exists between ballet and contemporary dance movement.
- 4. Show consistent and sustained application of feedback from daily class and assessments.
- 5. Demonstrate intermediate/advanced knowledge of ballet and contemporary vocabulary through participation, observation, discussion, and writing.
- 6. Articulate dance connections of gospel principles in mind, body and spirit

DANCE 440R : Contemporary Dance, Technique and Theory 4. (2.5:0:7.5)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Dance 340R or equivalent; by audition.

Course Outcomes
- 1. Students will demonstrate advanced technique proficiency instrength flexibilityconnectivitycomplex sequence mastery movement problems
- 2. Students will demonstrate performance awareness and control over movement innuancedynamicmusicalityfreedom from tensionshapinginitiationbreath qualityphrasing and composition
- 3. Students will describe, assess and write about achievement of technical skills and performing skills
- 4. Students will articulate appreciation for the divine nature of the human body as it relates to gospel principles as well as the relationship between mind/body/spirit.
- 5. Students will articulate appreciation for dance as an art form

8. Complete 2.5 hours from the following:

DANCE 192 : Character Dance. (.5:0:2)
WHEN TAUGHT: Winter
DESCRIPTION: Male and female techniques of traditional Hungarian, Polish, and Ukrainian folk forms stylized with classical ballet discipline.

Course Outcomes
There are no course outcomes available

DANCE 231R : Jazz Dance Technique 1. (1:0:3)
WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 240R or Dance 290 or equivalent; Dance 131 or equivalent.

Course Outcomes
- Students will gain knowledge of styles within the jazz genre.
- Students will acquire a degree of mastery in jazz dance technique at a intermediate level as their foundation.
- Students will experience the joy of jazz rhythms and motion.
- Students will increase awareness in their physical health and well-being through activity and correct principles of training.
- Students will increase awareness to their overall self-image, emphasizing; discipline, coordination, strength, flexibility and endurance.
- Students will develop more understanding of a relationship between religion and the fine arts.
- Students will acquire the desire to patronize the art to some degree in the future.
- Students will develop an evaluation standard to aid in selecting future quality jazz dance training for self and/or for family.

DANCE 235 : Tap Dance Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 135 or equivalent.

Course Outcomes
- 1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.
- 2. Students will demonstrate advanced technical and artistic skill in one dance genre and at least beginning to intermediate skill in another.

DANCE 270 : World Dance Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Dance 170 or equivalent.

DESCRIPTION: Techniques of selected traditional, folk, and national dance styles.

Course Outcomes
- 1. Each student will demonstrate footwork and various rhythmic structures from selected cultures
- 2. Each student will develop proper technique of posture, gesture and free movement
- 3. Each student will interpret proper body alignment and technical execution of movement styles and phrases
- 4. Each student will enhance the ability to recognize and understand world dance vocabulary, significance and context within selected cultures
- 5. Each student will understand the distinction of various patterns concerning tradition and innovation
- 6. Each student will increase awareness and appreciation of world dance and how it relates to other dance forms and styles

DANCE 271 : Clog Dance Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 171 or equivalent.

DESCRIPTION: Intermediate steps and technique; buck styling; introduction to choreography.

Course Outcomes
- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn a knowledge of the history and progressions of clog dance.
- Students will learn traditional and contemporary intermediate clogging techniques including arm movements, footwork, correct alignment, placement and weight shifts.

DANCE 272 : Ethnic Dance Technique 1, Chinese. (1:0:3)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Chinese culture.

Course Outcomes
There are no course outcomes available

DANCE 273 : Ethnic Dance Technique 1, Hungarian. (1:0:3)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance techniques from the Hungarian culture.

Course Outcomes
- 1. Each student will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Each student will learn to demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Each student will learn rhythmical & musical awareness skills
- 4. Each student will learn improvisational skills of specific traditional Hungarian couple dance styles
- 5. Each student will learn partnering skills
- 6. Each student will learn basic aspects of music, costumes, history and cultural issues

DANCE 274R : Ethnic Dance Technique 1, Irish. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 173R (Ethnic Dance Irish) or equivalent.

DESCRIPTION: Accelerated ethnic dance technique from the Irish culture.

Course Outcomes
- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.
- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music and costumes.
- 7. Students will learn how to analyze and self correct technique and performance skills

DANCE 275 : Ethnic Dance Technique 1, Polynesian. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 173R or previous experience.

DESCRIPTION: Accelerated ethnic dance technique from the Polynesian culture.

Course Outcomes
- 1. Students will learn beginning Polynesian dance skills with proper technique and theory in the styles of Modern Hawaiian, Maori and Tahiti dance syles.
- 2. Students will gain a knowledge of the history of Polynesian dance including myths and legends.
- 3. Students will enhance their coordination and rhythm.
- 4. Students will develop correct alignment and posture in the various styles of Polynesian dance.
- 5. Students will learn a movement vocabulary using correct Polynesian terminology.
- 6. Students will gain a basic knowledge of the music and costumes of Polynesian dance.

DANCE 277 : Ethnic Dance Technique 1, Spanish. (1:0:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Spanish culture.

Course Outcomes
There are no course outcomes available

DANCE 278 : Ethnic Dance Technique 1, Ukrainian. (1:0:3)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Ukrainian culture.

Course Outcomes
- 1. Students will learn stylistic movement combinations, footwork, arm placement and choreography from the regions Poltava, Hutsul, Bukovynia and Volyn.
- 2. Students will learn a warm-up combination designed to prepare and train the body for Ukrainian dance.
- 3. Students will learn information about cultural traditions, ritual beliefs and historical facts Ukraine which influence the movement and stylistic characteristics.
- 4. Students will learn basic Ukrainian dance vocabulary.

DANCE 279 : Ethnic Dance Technique 1, India. (1:0:3)

WHEN TAUGHT: Winter; Spring

DESCRIPTION: Classical India dance technique, primarily in religious-based styles and motifs of Bharatha Natyam, Ganapathi, Allaripu, and Bollywood.

Course Outcomes
- 1. Students will learn various movement patterns expressing the technique, motifs and rhythmic structure of the four styles.
- 2. Students will develop postural and gestural techniques including hand/arm articulation.
- 3. Students will explore proper body alignment, whole body precision, sequencing, eye movement and expression.
- 4. Students will understand the basic movement vocabulary, the significance and context.
- 5. Students will understand the cultural processes at work on movement practices and structures such as improvisation, composition, tradition and innovation.
- 6. Students will experience the ability to comprehend, appreciate and participate in cultural aspects of dance from India.

DANCE 280 : Social Dance, Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 180 or equivalent.

Course Outcomes
- 1. Students will demonstrate the school figures associated with each dance by practice and application.
- 2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

DANCE 281 : Country Western Social Dance, Intermediate. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 181 or equivalent.

DESCRIPTION: Intermediate-level instruction in popular country western dances.

Course Outcomes
- 1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.
- 2. Students will demonstrate advanced technical skill and artistic skill in one dance genre and at least beginning to intermediate skill in another.

DANCE 284 : Ballroom, International Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Dance 184 or equivalent.
DESCRIPTION: Silver level. Waltz, fox-trot, tango, quickstep.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Waltz, Tango and Foxtrot.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 285 : Ballroom Dance, International Latin, Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Dance 185 or equivalent.
DESCRIPTION: Silver level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Samba, Rumba and Paso Doble.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 291R : Ballet Technique 2. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Dance 290 or equivalent.

Course Outcomes
- TECHNIQUE OBJECTIVE 1. Acquire a degree of mastery in intermediate beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary listed in the appendix. Please consult the appendix for the specific criteria and standards.
- TECHNIQUE OBJECTIVE 2. Increase postural awareness; begin to correct imperfections; add physical strength, endurance, flexibility, extension, coordination, grace, precision and elevation; and improve the health and appearance of the physical body.
- WRITING OBJECTIVE 1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level, then pass an objective written exam prepared by the Ballet Division.
- Each student will: Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 294R : Ballet Technique, Men. (1:0:3)

WHEN TAUGHT: Winter
PREREQUISITE: DANCE 290
DESCRIPTION: Intermediate classical ballet technique for men.

Course Outcomes
- 1. Students will acquire a degree of mastery in men's intermediate ballet technique.
- 2. Students will Increase postural awareness; begin to correct imperfections; add physical strength, endurance, flexibility, extension, coordination, grace, precision and elevation; and improve the health and appearance of the physical body.
- 3. Students will Increase their awareness and appreciation for ballet, its aesthetic beauty, demanding discipline, and lifelong benefit of enhancing and integrating the physical, spiritual, intellectual, and emotional aspects.
- 4. Students will acquire improved awareness of the physical body and its capacity to move.
- 5. Students will gain a sense of personal accomplishment and worth.
- 6. Enlarge one's understanding of the relationship between religion and the fine arts.
- 7. Students will increase in desire to patronize the art to some degree in the future.
- 8. Students will develop an evaluation standard to aid in selecting future quality ballet training for self and/or for family.

DANCE 331R : Jazz Dance Technique 2. (1.5:0:4.5)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Dance 231 or equivalent. Dance 241R and Dance 243; or Dance 291R.

Course Outcomes
- Students will gain a greater knowledge jazz dance styles through various advance movement combinations.
- Students will acquire a degree of mastery in jazz dance technique at an advance level as their foundation.
- Students will increase their intellectual ability to retain complex and substantial length of movement sequences given in a short amount of time.

- Students will explore the psychology of performance and auditioning.
- Students will experience the joy of jazz rhythms and motion.
- Students will increase awareness in their physical health and well-being through activity and correct principles of training.
- Students will increase awareness to their overall self-image, emphasizing; discipline, coordination, strength, flexibility and endurance.
- Students will gain understanding of the gospel of Jesus Christ as an artist in the world.
- Students will acquire the desire to patronize the art to some degree in the future.
- Students will develop an evaluation standard to aid in selecting future quality jazz dance training for self and/or for family.

DANCE 335R : Tap Dance Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 235 or equivalent.

Course Outcomes

- Students will explore the intricacies of complex rhythms
- Students will focus on dynamics, accents, and shading, etc.
- Students will continue to work on speed, clarity, and exactness in tap technique
- Students will explore the use of counterpoint, stop time, phrasing, and different time signatures.
- Students will enhance improvisational skills, creative thinking and risk-taking.
- Students will learn the theory and process of composition.
- Students will work on their performance skills and personal style.
- Students will learn the skills of tap notation.
- Students will develop a sense of aesthetic perception to self evaluate and self correct.

DANCE 370 : World Dance Technique 2. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: DANCE 270

DESCRIPTION: In-depth dance technique of selected traditional, folk, and national dance styles.

Course Outcomes

- 1. Demonstrate complex movement patterns from selected cultures
- 2. Develop proper technique of posture and gesture
- 3. Interpret proper body alignment and technical execution of movement styles and phrases
- 4. Enhance the ability to recognize and understand world dance vocabulary, significance andcontext within selected cultures

DANCE 371R : Clog Dance Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 271 or equivalent.

DESCRIPTION: Fundamentals of clog technique at the advanced level.

Course Outcomes

- Students will learn traditional and contemporary advanced clogging techniques including arm movements, footwork, correcrt alignment, placement, and weight shifts
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn, dance and test intermediate sequences and patterns of movement.
- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a knowledge of the history and progression of clog dance.

DANCE 373 : Ethnic Dance Technique 2, Hungarian. (1:0:3)

WHEN TAUGHT: Fall

PREREQUISITE: Dance 273 or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Hungarian culture.

Course Outcomes

- 1. Students will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Students will demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Students will gain improvisational skills of specific traditional Hungarian couple dance styles.
- 4. Students will learn rhythmical & musical awareness skills.
- 5. Students will acquire partnering skills in Hungarian Dance.
- 6. Students will learn basic aspects of music, costumes, history and cultural issues.

DANCE 374R : Ethnic Dance Technique 2, Irish. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 274R or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Irish culture.

Course Outcomes

- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.
- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music, costumes and history.
- 7. Students will learn how to analyze and self correct technique and performance skills.

DANCE 377 : World Dance Choreography. (2:0:4)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in World Dance.

Course Outcomes

- 1. Students will learn technical elements, process and crafting principles of composition, such as: transitions, traditional formations, dynamic structure, stylistic coherence, form, musical dynamics and phrasing.
- 2. Students will develop a critical eye in analyzing and forming own aesthetic criteria.
- 3. Students will discover ethno-choreographic elements of a particular style or cultural group.
- 4. Students will address issues of authenticity versus creativity, traditional versus contemporary.
- 5. Students will learn to document choreography.

DANCE 380R : Social Dance, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 280 or equivalent.

Course Outcomes

- 1. Students will demonstrate the school figures associated with each dance by practice and application.
- 2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

DANCE 382R : Ballroom, International Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Dance 284 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Waltz, tango, fox-trot, quickstep.

Course Outcomes

- 1. Students will be able to effectively demonstrate gold level school figures of International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to effectively demonstrate advanced level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 383R : Ballroom Dance, International Latin, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: Dance 285 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Cha-cha, samba, rumba, paso doble.

Course Outcomes

- Students will be able to effectively demonstrate gold level school figures of International Style Cha-Cha, Samba, Rumba, Paso Doble
- Students will be able to effectively demonstrate advanced level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 384R : Ballroom, International Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 382R or equivalent; instructor's consent.

DESCRIPTION: Gold 2 level. Waltz, fox-trot, tango, quickstep.

Course Outcomes

- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in the International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate pre-championship level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 385R : Ballroom Dance, International Latin, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 383R or equivalent ; instructor's consent.

DESCRIPTION: Gold 2 level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes

- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate pre-championship level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 387 : Ballroom Dance Choreography. (2:0:4)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Choreography in Ballroom Dance emphasizing formation dancing.

Course Outcomes

- 1. Students will find coherence in foundational elements of formation choreography.

- 2. Students will demonstrate basic skills of composing ballroom formation choreography.

DANCE 390R : Ballet Technique 3. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Audition.

Course Outcomes

- Each student will:1. Acquire a degree of mastery in advanced/intermediate ballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced/intermediate level standard.
- Each student will:Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 391R : Ballet Technique 4. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

Course Outcomes

- Each student will:1. Acquire a degree of mastery in advanced levelballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced level standard.
- Each student will:Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 392R : Ballet Pointe 1. (.5:0:1.5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: A minimum of two years of previous pointe technique and concurrent enrollment in Dance 390R.

DESCRIPTION: Intermediate level pointe. Satisfies BA requirements in Dance.

NOTE: Although this is an open enrollment course, all students must receive teacher approval or level placement audition before registering.

Course Outcomes

There are no course outcomes available

DANCE 393R : Ballet Pointe 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition required; concurrent enrollment in Dance 390R or 391R.

DESCRIPTION: Advanced level pointe. Satisfies BA requirements in Dance.

NOTE: Although this is an open enrollment course, all students must receive teacher approval or level placement audition before registering.

Course Outcomes

- Each student will:1. Acquire a degree of mastery in advanced/intermediateballet pointe technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Apply a working knowledge of French ballet terminology, analytical skills, and sound writing skills by submitting a weekly journal entry or written self-evaluation, and a written critique of a live performance.
- Each student will:Participate fully in the pointe technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 397 : Ballet Choreography. (2:0:4)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in ballet. Exploration of hte choreographic process through theoretical study and analysis as well as practical application in the presentation of choreographic work. Concepts include clarity, creativity, transition, musical accent and phrasing, dynamic structure, form, stylistic coherence, artistic merit.

Course Outcomes

- Each student will creatively experiment with and arrange movement with regard to clarity, transition,

musical accent and phrasing, dynamic structure, form and stylistic coherence.
- Each student will begin to formulate his/her own aesthetic criteria through the process of watching dance concerts and writing concise and thoughtful critiques.
- Each student will enhance his/her understanding of choreography through reading, observation, discussion, and active participation.
- Each student will demonstrate knowledge acquired through completion of creative, choreographic project and written examination.

DANCE 440R : Contemporary Dance, Technique and Theory 4. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 340R or equivalent; by audition.

Course Outcomes
- 1. Students will demonstrate advanced technique proficiency instrength flexibilityconnectivitycomplex sequence mastery movement problems
- 2. Students will demonstrate performance awareness and control over movement innuancedynamicmusicalityfreedom from tensionshapinginitiationbreath qualityphrasing and composition
- 3. Students will describe, assess and write about achievement of technical skills and performing skills
- 4. Students will articulate appreciation for the divine nature of the human body as it relates to gospel principles as well as the relationship between mind/body/spirit.
- 5. Students will articulate appreciation for dance as an art form

DANCE 474R : Percussive Step Styles. (1:0:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Two of three possible courses: Dance 371 or 335 or 374R.

DESCRIPTION: Technique and theory, fusing a diversity of percussive dance styles including, but not limited to, French Canadian Gigue, Cape Breton Step, Power Tap, traditional and contemporary Clog Dance. Composition and improvisation included.

Course Outcomes
- 1. Students will gain speed, clarity and precise technique in various styles of percussive footwork.
- 2. Students will improve coordination, motor memory, fine and gross motor skills.
- 3. Students will demonstrate correct alignment, placement and weight shifts.
- 4. Students will learn sequences and patterns of movement.
- 5. Students will apply the theory and process of improvisation and composition.
- 6. Students will learn the current movement vocabulary and or terminology.
- 7. Students will gain a kinesthetic perception and concentration in order to self-evaluate and self correct.

DANCE 480R : Social Dance, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 380R or equivalent.

Course Outcomes
- 1. Students will demonstrate the class routines associated with each dance by practice and application
- 2. Students will demonstrate advanced level the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to compete in an open event by participation in the BYU Dancesport competition.

DANCE 484R : Ballroom, International Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 384R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: waltz, tango, fox-trot, quickstep, Viennese waltz.

Course Outcomes
- 1. Students will be able to demonstrate competitive figures at a championship level in International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate "championship" level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 485R : Ballroom Dance, International Latin, Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 385R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to demonstrate competitive figures at a championship level in the International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate "championship" level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 490R : Ballet Technique 5. (3:0:9.5)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Advanced ballet technique, including advanced pointe work for women and advanced technique

for men.

Course Outcomes
- Each student will:1. Acquire a degree of mastery in advancedballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced level standard.
- Each student will:Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 494R : Ballet Variations. (1:0:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: Dance 391R and 393R or equivalents.

Course Outcomes
- Students will learn and achieve technical and stylistic mastery of several variations from classical ballets.
- Students will learn and record the background, libretto, and style of the specific ballets through brief lectures.
- Students will compile a notebook with the background, libretto, and details of each variation which will aid in the future instructing of these variations. The student will include specifics on choreographers, composers, and dancers where applicable; as well as all steps of each variation written in a clear, understandable form.
- Students will learn each variation and be required to perform throughout the semester.
- Students will prepare variations to perform and be graded on those technical and stylistic requirements.

DANCE 495R : Pas de Deux. (1:0:2)

WHEN TAUGHT: Winter

PREREQUISITE: Audition.

DESCRIPTION: Ballet partnering techniques.

Course Outcomes
- 1. Students will find the point of balance for incomplete and complete turns.
- 2. Students will learn to perform falling poses and promenades.
- 3. Students will demonstrate knowledge of three basic turns: finger pirouette, pirouette partnered at the waist, and pirouette partnered at the hand(s) / wrist(s).
- 4. Students will maintain placement and strength during lifts (Female).
- 5. Students will lift partner above the head with stretched elbows and correct position of the back and head, with knees stretched and heel on the floor (Male).
- 6. Students will demonstrate focus on partner during combinations while being cognizant of the facial expressions.
- 7. Students will demonstrate shoulder lift on one side (left or right) with appropriate expression and maintain position for 10 seconds.
- 8. Students will perform a double pirouette, en dehors and en dedans, when partnered at the waist at least 75% of the time.
- 9. Perform triple finger pirouettes, en dehors at least 75% of the time.
- 10. Perform technique and partnering skills correctly to avoid injury.
- 11. Students will achieve traditional manners of courtesy and noble dignity that should be present between the male and female dancers.
- 12. Students will achieve an appreciation for the partner's role in creating a union of movement.
- 13. Students will increase trust between the male and female partner.

9. Complete the following composition and improvisation courses in the order listed:

DANCE 244R : Studio Workshop in Contemporary Dance Improvisation and Choreography. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 243R the first time taken.

DESCRIPTION: Beginning improvisation and choreography in a workshop setting.

Course Outcomes
- 1. Students will demonstrate, apply, and articulate a fundamental understanding of the elements of dance in improvisation and choreography.
- 2. Students will demonstrate problem solving skills in collaborative group and solo improvisation and choreography.
- 3. Students will demonstrate the ability to create original and personally meaningful movement - avoiding habit or cliche.
- 4. Students will articulate a knowledge of, and critically analyze, the creative process and movement intention in improvisation and choreography.
- 5. Students will articulate aesthetic and expressive values in dance and other arts.

DANCE 362 : Contemporary Choreography Intermediate. (2:0:4)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 244R

DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in contemporary dance.

Course Outcomes
There are no course outcomes available

DANCE 363 : Dance Improvisation, Intermediate. (1:0:3)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: DANCE 244R

Course Outcomes
- Students will learn to Move! To Explore!
- Students will learn to break comfortable and limiting movement patterns, dancing in ways that you have not moved before.
- Students will learn to "call up spontaneity at will".
- Students will learn to develop improvisational skills of "muscle readiness".
- Students will learn to learn how to suspend judgment.
- Students will learn to evolve movement over an extended period of time without losing spontaneity.
- Students will learn to practice recalling movement.
- Students will learn to practice relating to other dancers in various improvisational structures.
- Students will learn to evolve movement "in the moment" with a sense of form and definition (beginning, middle, end) thus "finding the dance" in the instant of exploration and improvisation.

DANCE 462 : Contemporary Choreography, Advanced. (2:0:3)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: DANCE 362
DESCRIPTION: Creation and presentation of complete choreographic works.

Course Outcomes
There are no course outcomes available

DANCE 469 : Capstone in Dance. (2:0:ARR)
WHEN TAUGHT: Fall; Winter; Summer
PREREQUISITE: BA in Dance: Dance 362 if a choreographic project. Dance Education: Dance 362; 361 or 462.

Course Outcomes
- Students will reflect in their capstone project a philosophy compatible with the mission of BYU
- Students will complete a capstone project, whether it be choreographic, research, or performance that represents a significant and comprehensive synthesis of the learning they have experienced during their years in the program

10. Complete two credit hours from the following performance courses:

DANCE 348R : Kinnect. (1-2:1:6)
WHEN TAUGHT: Winter; Spring
PREREQUISITE: Audition.
DESCRIPTION: Educational outreach dance company specifically focusing on developing teaching, creative, and performance skills.

Course Outcomes
- 1. Collaboratively choreograph theme based dances for an educational lecture performance
- 2. Demonstrate creative dance teaching skills with children in elementary schools
- 3. Demonstrate increased performance and improvisation skill in real world venues
- 4. Demonstrate leadership within the group by fulfilling specific roles and assignments related to the creation, production, presentation, and teaching tasks of the company
- 6. Evaluate, modify and adapt original presentations, lessons and dances in authentic dance experiences in schools, museums and/or conferences
- 7. Demonstrate dance education professionalism and advocacy

DANCE 368R : DancEnsemble - Contemporary Dance Performance and Choreography. (1-2:1:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Audition.
DESCRIPTION: Experiences in contemporary dance choreography and performance.

Course Outcomes
- 1. Demonstrate increasing performance skill, including skills of concentration, discipline, focus and stage presence.
- 2. Demonstrate increasing technical skill, focusing specifically of the refinement of nuance, projection, dynamics and the ability to dance within the context of an ensemble.
- 3. Create and evaluate dances, giving increased attention to the ability to see and respond to the possibilities within any given choreographic situation.
- 4. Investigate and refine their own individual choreographic and performance voice.

DANCE 468R : Contemporary Dance Theatre. (2:0:12)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Audition.
DESCRIPTION: Performing modern and contemporary dance repertory on and off campus.

Course Outcomes
- 2. Show increased technical ability.
- 1. Develop advanced performance skill and artistry.
- 3. Understand choreographic principles.

- 4. Contribute to the choreographic process.
- 5. Perform dances for audiences on campus, in schools, in professional venues, and at conferences.
- 6. Make visible attitudes of professional behavior.
- 7. Strengthen their testimony of the gospel and deepen their desire to share light and truth through the art form of dance.

11. Complete the Professional Education Component:
    - Complete the following:

CPSE 402 : Educating Students with Disabilities in Secondary Classrooms. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or comparable major course; FBI fingerprint background clearance.

DESCRIPTION: Issues, policies, and methods in teaching secondary students with disabilities in general education classrooms. Lab.

Course Outcomes

- Demonstrate sensitivity to individuals with disabilities.
- Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- Describe the steps in the Individual Education Program (IEP) process, including Individualized Transition Plans for students aged 14-22.
- Use research-supported methods for academic instruction of individuals with disabilities including explicit instruction, learning strategies, task analysis, and active participation.
- Describe models and strategies of consultation and collaboration including co-planning and co-teaching.
- Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act (IDEA).
- Develop a personal philosophy of special education which includes an understanding of the implications of Least Restrictive Environment as defined in IDEA.
- Demonstrate knowledge of basic classroom management theories and an understanding of teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs.
- Describe the characteristics and educational implications of students with high and low incidence disabilities
- Demonstrate ability to identify and prioritize areas of the general curriculum and provide accommodations for individuals with exceptional learning needs

DANCE 276R : Exploration of Teaching. (4:6:8)

PREREQUISITE: DANCE 261 & DANCE 243R & DANCE 244R; Major approval; FBI fingerprint and background clearance.

DESCRIPTION: Field-based, initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching developmentally sequenced dance in K-12 settings.

Course Outcomes

- @font-face { font-family: "Calibri";}@font-face { font-family: "Georgia";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 10pt; line-height: 115%; font-size: 11pt; font-family: "Times New Roman"; }div.Section1 { page: Section1; }ol { margin-bottom: 0in; }ul { margin-bottom: 0in; }Students will:1. identify the challenges and uniqueness involved with teaching dance in the Elementary, Junior High and High School settings.
- @font-face { font-family: "Calibri";}@font-face { font-family: "Georgia";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 10pt; line-height: 115%; font-size: 11pt; font-family: "Times New Roman"; }div.Section1 { page: Section1; }ol { margin-bottom: 0in; }ul { margin-bottom: 0in; }2. articulate a personal philosophy about the role of dance in education and effective teaching methods and strategies that they will apply as future teachers.

DANCE 346 : Methods of Teaching Dance to Social Groups in Secondary Education. (2:1:2)

WHEN TAUGHT: Fall

RECOMMENDED: Dance 170, 180.

DESCRIPTION: Teaching methodologies in social and world dance, specifically to prepare students in secondary dance education to teach these forms in the public schools.

NOTE: For dance education majors only.

Course Outcomes

- 1. Students will learn the basic skill fundamentals of social & world dance.
- 2. Students will learn the vocabulary of the steps associated with social & world dance.
- 3. Students will learn the basic teaching methodology of social & world dance.
- 4. Students will learn basics of calling ahead and prompting for social & world dance.
- 5. Students will understand the value of good teaching skills and techniques in order to help others enjoy these dance styles.
- 6. Students will begin to develop a teaching style of your very own.

DANCE 365 : Creative Dance for Elementary Education. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 243R, 244R, or approved Kinnect membership.

DESCRIPTION: Theory and teaching experience in creative movement for preschool and elementary school children.

Course Outcomes

- 1. Articulate an understanding of creative dance education theory, content, and pedagogy that facilitates artistic development and process orientation.
- 2. Apply knowledge of developmentally appropriate dance learning activities for children pre-school through grade eight.
- 3. Demonstrate an understanding of dance, elements, concepts and vocabulary physically, verbally and in writing, and apply that knowledge to teaching dance in the elementary setting
- 4. Identify and use clear lesson content objectives drawn from national and state curriculum standards when planning lessons and teaching dance.
- 5. Understand and apply a variety of teaching strategies and management techniques necessary to effectively guide dance skill building, exploration, improvisation, and compositional experiences for young children.
- 6. Explore and identify various forms of dance assessment

DANCE 366 : Methods of Teaching Contemporary Dance. (2:2:2)

WHEN TAUGHT: Winter; Spring Odd Yrs.

PREREQUISITE: DANCE 243R & DANCE 261; Dance 244R or equivalent.

DESCRIPTION: Planning, teaching, and evaluating lessons.

Course Outcomes

- 1. develop, articulate and demonstrate a clear philosophy of teaching and learning as it relates to Contemporary Dance.
- 2. demonstrate a conceptual understanding of the content and processes needed to facilitate learning in the field of Contemporary Dance.
- 3. demonstrate teaching competency through experiences in planning, teaching and evaluating lessons.
- 4. demonstrate an ability to use a variety of teaching strategies to produce new knowledge and skills in others.
- 5. facilitate artistic development through process-oriented instruction.

DANCE 465 : K-12 Dance Curriculum Design. (2:2:1)

PREREQUISITE: DANCE 276R & DANCE 365 & DANCE 366; Dance 348R or 399R.

DESCRIPTION: Dance unit planning, scope and sequencing, core curriculum, and curriculum mapping with cross-curricular, thematic, and cultural integration K-12.

Course Outcomes

- @font-face { font-family: "Courier New";}@font-face { font-family: "Wingdings";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 0.0001pt; font-size: 10pt; font-family: "Times New Roman"; }div.Section1 { page: Section1; }ol { margin-bottom: 0in; }ul { margin-bottom: 0in; }1. Demonstrate the ability to represent existing national and state dance standards within a relevant dance curriculum;
- @font-face { font-family: "Courier New";}@font-face { font-family: "Wingdings";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 0.0001pt; font-size: 10pt; font-family: "Times New Roman"; }div.Section1 { page: Section1; }ol { margin-bottom: 0in; }ul { margin-bottom: 0in; }2. Understand and be able to articulate the value of unit planning and scope and sequencing within a larger curriculum map;
- @font-face { font-family: "Courier New";}@font-face { font-family: "Wingdings";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 0.0001pt; font-size: 10pt; font-family: "Times New Roman"; }div.Section1 { page: Section1; }ol { margin-bottom: 0in; }ul { margin-bottom: 0in; }3. Demonstrate the ability to organize and create unit and curricular plans that are developmentally appropriate for specific populations within the K-12 setting;
- @font-face { font-family: "Courier New";}@font-face { font-family: "Wingdings";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 0.0001pt; font-size: 10pt; font-family: "Times New Roman"; }div.Section1 { page: Section1; }ol { margin-bottom: 0in; }ul { margin-bottom: 0in; }4. Demonstrate the ability to apply cross-disciplinary concepts within a larger dance curriculum in K-12 settings;
- @font-face { font-family: "Courier New";}@font-face { font-family: "Wingdings";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 0.0001pt; font-size: 10pt; font-family: "Times New Roman"; }div.Section1 { page: Section1; }ol { margin-bottom: 0in; }ul { margin-bottom: 0in; }5. Articulate understanding of the language and uses of assessment.

DANCE 466 : Dance Teaching Practicum. (2:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: Dance major status.

DESCRIPTION: Pre-student teaching course giving students practical teaching and classroom management experience in a mentored environment. Discussion lab integrating theory and experience.

Course Outcomes
- 1. Create unit and lesson plans that appropriately align with the Utah core curriculum;
- 2. Demonstrate competent use of INTASC standards while teaching;
- 3. Articulate and demonstrate various strategies for successful classroom management;
- 4. Demonstrate varied student assessment methods and strategies, including successful design and use of a rubric;
- 5. Reflect upon and accurately self-assess teaching strengths and weaknesses.

(prerequisite: Dance 243R, 244R, 261)

IP&T 286 : Instructional Technology in Teaching. (1:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

Course Outcomes
There are no course outcomes available

SC ED 350 : Adolescent Development in an Education Context. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or HIth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Adolescent development and its implications for integrated school culture, curriculum design, instructional practices, and assessment.

Course Outcomes
- The students will demonstrate how the stages of development impact instructional practices.
- The students will understand the social, physical, and cognitive developmental stages of adolescence in relation to the tasks of automony, identity and intimacy.
- The students will demonstrate how the stages of development impact classroom environments and management.

SC ED 353 : Multicultural Education. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or HIth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Designing and adapting instruction for diverse learners; collaborating with families, cultures, and communities in promoting and sustaining learning.

Course Outcomes
- Students will examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavio through a process of reflection.
- Acknowledge the dynamics of culture and diversity in school success and teachers' teaching. This includes recognizing and overcoming deficit thinking.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.
- Recognize and acknowledge racism, discrimination and other forms of inquity and privilege in themselves, in others, and within institutions.
- Recognize and use a personal moral spiritual framework along with principles and concepts of social science to guide educational accomplishments for diverse learners.

Note 1: FBI fingerprint and background clearance must be completed before entry into Dance 276R.

Note 2: Sc Ed 350 must be taken prior to or concurrently with Dance 466.

- Complete 1 credit hour of the following:

DANCE 399R : Academic Internship: Dance. (.5-4:0:50)

Course Outcomes
- 2. Demonstrate the propensity to interact with professionals in their field of study in a credible, responsible and articulate manner.
- 1. Develop contacts with professionals in their field of study with the intent of creating a network that will be beneficial to future career choices.
- 3. Demonstrate improvement in the assigned responsibilities throughout the course of the internship as evaluated by the mentor teacher/intern supervisor in three periods, early, middle, and end of the internship.

Note: Complete an elementary teaching practicum of 42 hours of unpaid dance core curriculum (20 hours planning and reflection, plus 22 hours teaching with children grades K-6) in one of the following ways:

- Kinnect teaching Winter and Spring
- Arts Bridge Side-by-Side Teaching Project
- Other elementary dance teaching internships approved by the dance education faculty

- Complete 12 hours from the following:

DANCE 476 : Secondary Student Teaching. (12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes
There are no course outcomes available

*Hours include courses that may fulfill university core requirements.

Program Requirements | View MAP

1. Before being accepted into the minor, a student must complete the following with a grade of B– or better:

DANCE 284 : Ballroom, International Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Dance 184 or equivalent.
DESCRIPTION: Silver level. Waltz, fox-trot, tango, quickstep.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Waltz, Tango and Foxtrot.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 285 : Ballroom Dance, International Latin, Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Dance 185 or equivalent.
DESCRIPTION: Silver level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes
- 1. Students will be able to effectively demonstrate silver level school figures of International Style Samba, Rumba and Paso Doble.
- 2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

2. The Dance Department requires a minimum of 10 hours to be completed in residency at BYU for this minor program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

3. Complete the following core courses:

DANCE 260 : Introduction to Dance. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Critical analysis of dance as a cultural and expressive art form, studied through lecture, reading, research, multimedia presentations, and practical movement experiences.
NOTE: No previous dance experience required. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

DANCE 280 : Social Dance, Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Dance 180 or equivalent.

Course Outcomes
- 1. Students will demonstrate the school figures associated with each dance by practice and application.
- 2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

4. Complete one course from the following:

DANCE 386 : Methods of Teaching Social Dance. (2:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 280

DESCRIPTION: Pedagogy training in social dance at the bronze and silver skill levels.

Course Outcomes

- 1. Students will analyze the most important characteristics of great teachers through discussion.
- 2. Students will demonstrate basic skills of ballroom dance by participation and practice including both the mans and ladies parts.
- 3. Students will demonstrate the basic skills of teaching dance to groups by developing lesson plans and through practical experience.

DANCE 486 : Theory and Notation of Ballroom Dance, International. (2:0:4)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: DANCE 384R

DESCRIPTION: Preparation for professional teaching certification examinations.

Course Outcomes

- 1. Students will find coherence in technical codification of International Style Waltz, Tango Foxtrot, and Quickstep.
- 2. Students will be able to demonstrate with technical clarity the man and woman's part of Bronze and Silver level school figures of the Waltz, Tango Foxtrot, and Quickstep.
- 3. Students will be able to correctly articulate and deliver the technical information as required for a future professional examination the following categories: Feet Positions, Alignment, Amount of Turn, Rise & Fall, Footwork, C.B.M., and Sway
- 4.Students will be able to successfully amalgamate school figures into a cohesive routine.

DANCE 487 : Theory and Notation of Ballroom Dance, International Latin. (2:0:4)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: DANCE 385R

DESCRIPTION: Theory and notation of International Latin Dance and preparation for professional teaching certification examinations.

Course Outcomes

- 1. Students will find coherence in technical codification of International Style Cha-Cha, Samba Rumba Paso Doble, and Jive
- 2. Students will be able to demonstrate with technical clarity the man and woman's part of Bronze and Silver level school figures of the Cha-Cha, Samba, Rumba, Paso Doble, and Jive
- 3. Students will be able to correctly articulate and deliver the technical information as required for a future professional examination the following categories: Feet Positions, Alignment, Amount of Turn, Footwork
- 4. Students will be able to successfully amalgamate school figures into a cohesive routine.

5. Complete five hours from the following:

DANCE 380R : Social Dance, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Dance 280 or equivalent.

Course Outcomes

- 1. Students will demonstrate the school figures associated with each dance by practice and application.
- 2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

DANCE 382R : Ballroom, International Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Dance 284 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Waltz, tango, fox-trot, quickstep.

Course Outcomes

- 1. Students will be able to effectively demonstrate gold level school figures of International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to effectively demonstrate advanced level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 383R : Ballroom Dance, International Latin, Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: Dance 285 or equivalent; instructor's consent.

DESCRIPTION: Gold 1 level. Cha-cha, samba, rumba, paso doble.

Course Outcomes

- Students will be able to effectively demonstrate gold level school figures of International Style Cha-Cha, Samba, Rumba, Paso Doble
- Students will be able to effectively demonstrate advanced level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 384R : Ballroom, International Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 382R or equivalent; instructor's consent.

DESCRIPTION: Gold 2 level. Waltz, fox-trot, tango, quickstep.

Course Outcomes

- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in the International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate pre-championship level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 385R : Ballroom Dance, International Latin, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 383R or equivalent ; instructor's consent.

DESCRIPTION: Gold 2 level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes

- 1. Students will be able to demonstrate, competitive figures at a pre-championship level in International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate pre-championship level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 480R : Social Dance, Technique 3. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 380R or equivalent.

Course Outcomes

- 1. Students will demonstrate the class routines associated with each dance by practice and application
- 2. Students will demonstrate advanced level the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- 3. Students will demonstrate their ability to compete in an open event by participation in the BYU Dancesport competition.

DANCE 484R : Ballroom, International Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 384R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: waltz, tango, fox-trot, quickstep, Viennese waltz.

Course Outcomes

- 1. Students will be able to demonstrate competitive figures at a championship level in International Style Waltz, Tango, Foxtrot and Quickstep.
- 2. Students will be able to demonstrate "championship" level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 485R : Ballroom Dance, International Latin, Technique 4. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 385R or equivalent; instructor's consent.

DESCRIPTION: Gold bar level: cha-cha, rumba, samba, jive, paso doble.

Course Outcomes

- 1. Students will be able to demonstrate competitive figures at a championship level in the International Style Cha-Cha, Samba, Rumba, Paso Doble
- 2. Students will be able to demonstrate "championship" level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Note: No more than two hours may be completed from each of the listed R technique courses.

6. Complete two hours from the following:

DANCE 387 : Ballroom Dance Choreography. (2:0:4)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Choreography in Ballroom Dance emphasizing formation dancing.

Course Outcomes

- 1. Students will find coherence in foundational elements of formation choreography.
- 2. Students will demonstrate basic skills of composing ballroom formation choreography.

DANCE 388R : Ballroom Dance Performance, Intermediate. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Audition.

DESCRIPTION: Performance techniques and experience in ballroom dance.

Course Outcomes

- 1. Students will demonstrate dance skills through technique, stylization, and choreography.

- 2. Students will find coherence if what it means to represent Brigham Young University and the Church of Jesus Christ of Latter-day Saints in local areas.

DANCE 399R : Academic Internship: Dance. (.5-4:0:50)

Course Outcomes
- 2. Demonstrate the propensity to interact with professionals in their field of study in a credible, responsible and articulate manner.
- 1. Develop contacts with professionals in their field of study with the intent of creating a network that will be beneficial to future career choices.
- 3. Demonstrate improvement in the assigned responsibilities throughout the course of the internship as evaluated by the mentor teacher/intern supervisor in three periods, early, middle, and end of the internship.

DANCE 488R : Ballroom Dance Performance Company. (2:0:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Performance techniques and experience with BYU Ballroom Dance Company.

Course Outcomes
- 1. Students will demonstrate an increased ability to perform the art of Ballroom Dance through participation in choreographic repertoire .
- 2. Students will exemplify the standards of Brigham Young University and the Church of Jesus Christ of Latter-day Saints, and the United States as student ambassadors
- 3. Students will find coherence of dance as a cultural tradition, an art form, an uplifting form of entertainment, and a social/recreational activity.

Program Requirements | View MAP

1. Before being accepted into the minor, a student must:
   a. Complete the following with a grade of B– or better:

DANCE 241R : Contemporary Dance, Technique and Theory 2. (2:0:6)

WHEN TAUGHT: Fall; Winter; Summer

Course Outcomes
- 1. articulate a knowledge and appreciation of the human body regarding physical function, spirituality, and as a tool of expressivity.
- 2. demonstrate increased technical ability in the areas of:flexibilitystrengthendurancebalancecoordinationphrasingdance performance skillsapplying the Patterns of Total Body Connectivitykinesthetic awareness of body alignment
- 3. demonstrate knowledge, fundamental control, and application of the elements of dance (as defined by the BEST and BESS vocabularies);
- 4. articulate an appreciation for dance as an art form.

   b. Pass a dance audition for acceptance into the minor. Please see the Dance Department for further details.

2. The Dance Department requires a minimum of 10.5 hours to be completed in residency at BYU for this minor program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

3. Complete the following core courses:

DANCE 260 : Introduction to Dance. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Critical analysis of dance as a cultural and expressive art form, studied through lecture, reading, research, multimedia presentations, and practical movement experiences.
NOTE: No previous dance experience required. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

DANCE 264 : Music for Dancers. (2:1:2)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Basic music notation, simple and complex rhythmic patterns, and polyrhythms; analysis of selected international music styles; brief historical survey.

Course Outcomes
- Demonstrate an understanding of basic musical concepts through physical movement.
- Acquire improved awareness of his/her physical responses to music.
- Demonstrate the ability to utilize music appropriately in the technique class and collaborate with musicians.
- Demonstrate musical awareness by creating appropriate movement to odd meter music and binary/ternary rhythms.
- Acquire improved listening skills to use music to stage or create choreography

4. Complete the following:

DANCE 243R : Studio Workshop in Contemporary Dance Technique and Theory. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 244R the first time taken.
DESCRIPTION: Technique and theory in a workshop setting.

Course Outcomes

- 1. Students will demonstrate increased body connectivity and kinesthetic awareness, including:BreathCore-distalHead-tailUpper-lowerBody-halfCross-lateral connections
- 2. demonstrate performance skills including intent, nuance, dynamics, and sense of ensemble.
- 3. articulate and analyze the above principles of technique using accurate anatomical and dance elements language.

DANCE 244R : Studio Workshop in Contemporary Dance Improvisation and Choreography. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 243R the first time taken.

DESCRIPTION: Beginning improvisation and choreography in a workshop setting.

Course Outcomes

- 1. Students will demonstrate, apply, and articulate a fundamental understanding of the elements of dance in improvisation and choreography.
- 2. Students will demonstrate problem solving skills in collaborative group and solo improvisation and choreography.
- 3. Students will demonstrate the ability to create original and personally meaningful movement - avoiding habit or cliche.
- 4. Students will articulate a knowledge of, and critically analyze, the creative process and movement intention in improvisation and choreography.
- 5. Students will articulate aesthetic and expressive values in dance and other arts.

DANCE 362 : Contemporary Choreography Intermediate. (2:0:4)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 244R

DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in contemporary dance.

Course Outcomes

There are no course outcomes available

DANCE 363 : Dance Improvisation, Intermediate. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 244R

Course Outcomes

- Students will learn to Move! To Explore!
- Students will learn to break comfortable and limiting movement patterns, dancing in ways that you have not moved before.
- Students will learn to "call up spontaneity at will".
- Students will learn to develop improvisational skills of "muscle readiness".
- Students will learn to learn how to suspend judgment.
- Students will learn to evolve movement over an extended period of time without losing spontaneity.
- Students will learn to practice recalling movement.
- Students will learn to practice relating to other dancers in various improvisational structures.
- Students will learn to evolve movement "in the moment" with a sense of form and definition (beginning, middle, end) thus "finding the dance" in the instant of exploration and improvisation.

5. Complete one course from the following:

DANCE 365 : Creative Dance for Elementary Education. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 243R, 244R, or approved Kinnect membership.

DESCRIPTION: Theory and teaching experience in creative movement for preschool and elementary school children.

Course Outcomes

- 1. Articulate an understanding of creative dance education theory, content, and pedagogy that facilitates artistic development and process orientation.
- 2. Apply knowledge of developmentally appropriate dance learning activities for children pre-school through grade eight.
- 3. Demonstrate an understanding of dance, elements, concepts and vocabulary physically, verbally and in writing, and apply that knowledge to teaching dance in the elementary setting
- 4. Identify and use clear lesson content objectives drawn from national and state curriculum standards when planning lessons and teaching dance.
- 5. Understand and apply a variety of teaching strategies and management techniques necessary to effectively guide dance skill building, exploration, improvisation, and compositional experiences for young children.
- 6. Explore and identify various forms of dance assessment

DANCE 366 : Methods of Teaching Contemporary Dance. (2:2:2)

WHEN TAUGHT: Winter; Spring Odd Yrs.

PREREQUISITE: DANCE 243R & DANCE 261; Dance 244R or equivalent.

DESCRIPTION: Planning, teaching, and evaluating lessons.

Course Outcomes

- 1. develop, articulate and demonstrate a clear philosophy of teaching and learning as it relates to Contemporary Dance.

- 2. demonstrate a conceptual understanding of the content and processes needed to facilitate learning in the field of Contemporary Dance.
- 3. demonstrate teaching competency through experiences in planning, teaching and evaluating lessons.
- 4. demonstrate an ability to use a variety of teaching strategies to produce new knowledge and skills in others.
- 5. facilitate artistic development through process-oriented instruction.

DANCE 367 : Methods of Teaching Children's Creative Dance. (2:1:2)

WHEN TAUGHT: Fall; Spring Even Yrs.

PREREQUISITE: DANCE 243R & DANCE 244R

Course Outcomes

- Students will:1. Gain an increased understanding of the importance of Creative Dance for children.
- 2. Learn to teach developmentally appropriate technical dance skills to children.
- 3. Demonstrate an understanding of the methods of encouraging creative problem solving skills and the creative process.
- 4. Demonstrate knowledge, mastery and application of the elements of dance (time, space, and force) in relation to the teaching of children.
- 5. Gain practical experience through teaching children.

6. Complete a minimum of two hours from the following:

DANCE 340R : Contemporary Dance, Technique and Theory 3. (2.5:0:7.5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Dance 243R or equivalent; by audition.

Course Outcomes

- Demonstrate intermediate/advanced Contemporary dance technical proficiency in whole body connectivitystrength & flexibilitybreath initiation and supportconsistent core support functional alignmentbalance & coordination groundedness and weight sensingshape clarity, spatial accuracy and rangefocusrhythmic accuracyarticulationdynamic contrastcomplex movement skills
- Demonstrate increased dance performance artistry in:sequence masterymusicalityexpressivitypersonal interpretationnuanceensemble
- Describe, assess and write about demonstrated achievement of technical and performance skill
- Show sustained application of feedback from assessments
- Articulate understanding of Contemporary/Modern dance as an art form
- Articulate dance connections to gospel principles mind, body and spirit

DANCE 348R : Kinnect. (1-2:1:6)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: Audition.

DESCRIPTION: Educational outreach dance company specifically focusing on developing teaching, creative, and performance skills.

Course Outcomes

- 1. Collaboratively choreograph theme based dances for an educational lecture performance
- 2. Demonstrate creative dance teaching skills with children in elementary schools
- 3. Demonstrate increased performance and improvisation skill in real world venues
- 4. Demonstrate leadership within the group by fulfilling specific roles and assignments related to the creation, production, presentation, and teaching tasks of the company
- 6. Evaluate, modify and adapt original presentations, lessons and dances in authentic dance experiences in schools, museums and/or conferences
- 7. Demonstrate dance education professionalism and advocacy

DANCE 365 : Creative Dance for Elementary Education. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 243R, 244R, or approved Kinnect membership.

DESCRIPTION: Theory and teaching experience in creative movement for preschool and elementary school children.

Course Outcomes

- 1. Articulate an understanding of creative dance education theory, content, and pedagogy that facilitates artistic development and process orientation.
- 2. Apply knowledge of developmentally appropriate dance learning activities for children pre-school through grade eight.
- 3. Demonstrate an understanding of dance, elements, concepts and vocabulary physically, verbally and in writing, and apply that knowledge to teaching dance in the elementary setting

- 5. Understand and apply a variety of teaching strategies and management techniques necessary to effectively guide dance skill building, exploration, improvisation, and compositional experiences for young children.
- 6. Explore and identify various forms of dance assessment

DANCE 366 : Methods of Teaching Contemporary Dance. (2:2:2)

WHEN TAUGHT: Winter; Spring Odd Yrs.

PREREQUISITE: DANCE 243R & DANCE 261; Dance 244R or equivalent.

DESCRIPTION: Planning, teaching, and evaluating lessons.

Course Outcomes

- 1. develop, articulate and demonstrate a clear philosophy of teaching and learning as it relates to Contemporary Dance.
- 2. demonstrate a conceptual understanding of the content and processes needed to facilitate learning in the field of Contemporary Dance.
- 3. demonstrate teaching competency through experiences in planning, teaching and evaluating lessons.
- 4. demonstrate an ability to use a variety of teaching strategies to produce new knowledge and skills in others.
- 5. facilitate artistic development through process-oriented instruction.

DANCE 367 : Methods of Teaching Children's Creative Dance. (2:1:2)

WHEN TAUGHT: Fall; Spring Even Yrs.

PREREQUISITE: DANCE 243R & DANCE 244R

Course Outcomes

- Students will:1. Gain an increased understanding of the importance of Creative Dance for children.
- 2. Learn to teach developmentally appropriate technical dance skills to children.
- 3. Demonstrate an understanding of the methods of encouraging creative problem solving skills and the creative process.
- 4. Demonstrate knowledge, mastery and application of the elements of dance (time, space, and force) in relation to the teaching of children.
- 5. Gain practical experience through teaching children.

DANCE 368R : DancEnsemble - Contemporary Dance Performance and Choreography. (1-2:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Experiences in contemporary dance choreography and performance.

Course Outcomes

- 1. Demonstrate increasing performance skill, including skills of concentration, discipline, focus and stage presence.
- 2. Demonstrate increasing technical skill, focusing specifically of the refinement of nuance, projection, dynamics and the ability to dance within the context of an ensemble.
- 3. Create and evaluate dances, giving increased attention to the ability to see and respond to the possibilities within any given choreographic situation.
- 4. Investigate and refine their own individual choreographic and performance voice.

DANCE 462 : Contemporary Choreography, Advanced. (2:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DANCE 362

DESCRIPTION: Creation and presentation of complete choreographic works.

Course Outcomes

There are no course outcomes available

DANCE 468R : Contemporary Dance Theatre. (2:0:12)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Performing modern and contemporary dance repertory on and off campus.

Course Outcomes

- 2. Show increased technical ability.
- 1. Develop advanced performance skill and artistry.
- 3. Understand choreographic principles.
- 4. Contribute to the choreographic process.
- 5. Perform dances for audiences on campus, in schools, in professional venues, and at conferences.

Course Outcomes
There are no course outcomes available

DANCE 271 : Clog Dance Technique 1. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 171 or equivalent.

DESCRIPTION: Intermediate steps and technique; buck styling; introduction to choreography.

Course Outcomes
- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn a knowledge of the history and progressions of clog dance.
- Students will learn traditional and contemporary intermediate clogging techniques including arm movements, footwork, correct alignment, placement and weight shifts.

DANCE 370 : World Dance Technique 2. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: DANCE 270

DESCRIPTION: In-depth dance technique of selected traditional, folk, and national dance styles.

Course Outcomes
- 1. Demonstrate complex movement patterns from selected cultures
- 2. Develop proper technique of posture and gesture
- 3. Interpret proper body alignment and technical execution of movement styles and phrases
- 4. Enhance the ability to recognize and understand world dance vocabulary, significance andcontext within selected cultures

DANCE 376 : Methods of Teaching World Dance. (2:2:3)

WHEN TAUGHT: Fall

RECOMMENDED: Dance 170 or equivalent.

Course Outcomes
- 1. Students will study logical progressions in the breakdown of steps, formations and positions
- 2. Students will learn to communicate specific verbal cues in the delivery of content
- 3. Students will develop calling ahead techniques
- 4. Students will learn the mechanics of class structure and management
- 5. Students will demonstrate correct styling and technique
- 6. Students will learn how to read and understand world dance descriptions
- 7. Students will learn the skills in successfully teaching large groups in a recreational setting
- 8. Students will develop and actualize a clear philosophy of teaching and learning as it related to dance

4. Complete five credit hours from the following (only two credit hours total may be used for performance classes, either Dance 378R or Dance 478R):

DANCE 371R : Clog Dance Technique 2. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 271 or equivalent.

DESCRIPTION: Fundamentals of clog technique at the advanced level.

Course Outcomes
- Students will learn traditional and contemporary advanced clogging techniques including arm movements, footwork, correcrt alignment, placement, and weight shifts
- Students will learn a movement vocabulary using correct clog dance terminology.
- Students will learn, dance and test intermediate sequences and patterns of movement.
- Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.
- Students will learn a knowledge of the history and progression of clog dance.

DANCE 373 : Ethnic Dance Technique 2, Hungarian. (1:0:3)

WHEN TAUGHT: Fall

PREREQUISITE: Dance 273 or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Hungarian culture.

Course Outcomes
- 1. Students will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Students will demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Students will gain improvisational skills of specific traditional Hungarian couple dance styles.
- 4. Students will learn rhythmical & musical awareness skills.
- 5. Students will acquire partnering skills in Hungarian Dance.
- 6. Students will learn basic aspects of music, costumes, history and cultural issues.

DANCE 374R : Ethnic Dance Technique 2, Irish. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: Dance 274R or equivalent.

DESCRIPTION: Advanced ethnic dance techniques from the Irish culture.

Course Outcomes
- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.
- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music, costumes and history.
- 7. Students will learn how to analyze and self correct technique and performance skills.

DANCE 377 : World Dance Choreography. (2:0:4)

WHEN Fall Even Yrs.

TAUGHT:
DESCRIPTION: Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in World Dance.

Course Outcomes
- 1. Students will learn technical elements, process and crafting principles of composition, such as: transitions, traditional formations, dynamic structure, stylistic coherence, form, musical dynamics and phrasing.
- 2. Students will develop a critical eye in analyzing and forming own aesthetic criteria.
- 3. Students will discover ethno-choreographic elements of a particular style or cultural group.
- 4. Students will address issues of authenticity versus creativity, traditional versus contemporary.
- 5. Students will learn to document choreography.

DANCE 378R : Folk Dance Performance, Intermediate. (1:0:3)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Audition.
DESCRIPTION: Performance techniques and experience in folk dance.

Course Outcomes
- 1. Students will learn the traditional dance technique and stylization of selected countries or regions
- 2. Students will develop the performance skills of posture, presentation, and characterization
- 3.Students will explore both the recreational and staged forms of world dance
- 4. Students will demonstrate strong citizenship as a member of a performance team

DANCE 474R : Percussive Step Styles. (1:0:3)
WHEN TAUGHT: Fall Even Yrs.
PREREQUISITE: Two of three possible courses: Dance 371 or 335 or 374R.
DESCRIPTION: Technique and theory, fusing a diversity of percussive dance styles including, but not limited to, French Canadian Gigue, Cape Breton Step, Power Tap, traditional and contemporary Clog Dance. Composition and improvisation included.

Course Outcomes
- 1. Students will gain speed, clarity and precise technique in various styles of percussive footwork.
- 2. Students will improve coordination, motor memory, fine and gross motor skills.
- 3. Students will demonstrate correct alignment, placement and weight shifts.
- 4. Students will learn sequences and patterns of movement.
- 5. Students will apply the theory and process of improvisation and composition.
- 6. Students will learn the current movement vocabulary and or terminology.
- 7. Students will gain a kinesthetic perception and concentration in order to self-evaluate and self correct.

DANCE 477 : Dance - a Reflection of Culture. (2:2:0)
WHEN TAUGHT: Winter
DESCRIPTION: Study of dance as an expression of culture.

Course Outcomes
- 1. Students will learn cultural concepts and identity associated with world dance
- 2. Students will understand the differences and similarities in traditions and rituals connected to dance
- 3. Students will participate in class discussions and analysis of group research and assigned readings;
- 4. Students will understand ethnochoreology and ethnography and how they interface in cultural dance

DANCE 478R : Folk Dance Performance Company. (2:0:ARR)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Audition.
DESCRIPTION: Performance technique and experience with International Folk Dance Ensemble.

Course Outcomes
- 1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.
- 2. Students will demonstrate artistry and advanced ability in dance performance.

5. Complete one course from the following (the course that best fits your ballet technique level):

DANCE 190 : Ballet, Beginning. (.5:0:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Fundamentals of ballet technique for those with little or no previous training.

Course Outcomes
- Each student will:1. Acquire a degree of mastery in beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific technique criteria and standards
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at a beginning level standard
- 1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

DANCE 192 : Character Dance. (.5:0:2)

WHEN TAUGHT: Winter

DESCRIPTION: Male and female techniques of traditional Hungarian, Polish, and Ukrainian folk forms stylized with classical ballet discipline.

Course Outcomes
There are no course outcomes available

6. Complete two hours from the following:

DANCE 272 : Ethnic Dance Technique 1, Chinese. (1:0:3)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Chinese culture.

Course Outcomes
There are no course outcomes available

DANCE 273 : Ethnic Dance Technique 1, Hungarian. (1:0:3)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance techniques from the Hungarian culture.

Course Outcomes
- 1. Each student will learn to become proficient in several Hungarian and Transylvanian dance dialects.
- 2. Each student will learn to demonstrate a knowledge of step combinations performing couple, solo, and circle dances.
- 3. Each student will learn rhythmical & musical awareness skills
- 4. Each student will learn improvisational skills of specific traditional Hungarian couple dance styles
- 5. Each student will learn partnering skills
- 6. Each student will learn basic aspects of music, costumes, history and cultural issues

DANCE 274R : Ethnic Dance Technique 1, Irish. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 173R (Ethnic Dance Irish) or equivalent.

DESCRIPTION: Accelerated ethnic dance technique from the Irish culture.

Course Outcomes
- 1. Students will learn Irish solo and figure dances with correct technique and theory.
- 2. Students will memorize sequential movement/patterns and step combinations.
- 3. Students will develop coordination, rhythm and enhanced concentration and focus.
- 4. Students will develop correct alignment, placement and weight shifts.
- 5. Students will learn a movement vocabulary using Irish dance terminology.
- 6. Students will learn about the various types of Irish dance music and costumes.
- 7. Students will learn how to analyze and self correct technique and performance skills

DANCE 275 : Ethnic Dance Technique 1, Polynesian. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Dance 173R or previous experience.

DESCRIPTION: Accelerated ethnic dance technique from the Polynesian culture.

Course Outcomes
- 1. Students will learn beginning Polynesian dance skills with proper technique and theory in the styles of Modern Hawaiian, Maori and Tahiti dance syles.
- 2. Students will gain a knowledge of the history of Polynesian dance including myths and legends.
- 3. Students will enhance their coordination and rhythm.
- 4. Students will develop correct alignment and posture in the various styles of Polynesian dance.
- 5. Students will learn a movement vocabulary using correct Polynesian terminology.
- 6. Students will gain a basic knowledge of the music and costumes of Polynesian dance.

DANCE 277 : Ethnic Dance Technique 1, Spanish. (1:0:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Spanish culture.

Course Outcomes
There are no course outcomes available

DANCE 278 : Ethnic Dance Technique 1, Ukrainian. (1:0:3)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: Dance 173R or previous dance experience.

DESCRIPTION: Accelerated ethnic dance technique from the Ukrainian culture.

Course Outcomes
- 1. Students will learn stylistic movement combinations, footwork, arm placement and choreography from the regions Poltava, Hutsul, Bukovynia and Volyn.
- 2. Students will learn a warm-up combination designed to prepare and train the body for Ukrainian

dance.
- 3. Students will learn information about cultural traditions, ritual beliefs and historical facts Ukraine which influence the movement and stylistic characteristics.
- 4. Students will learn basic Ukrainian dance vocabulary.

DANCE 279 : Ethnic Dance Technique 1, India. (1:0:3)

WHEN TAUGHT: Winter; Spring

DESCRIPTION: Classical India dance technique, primarily in religious-based styles and motifs of Bharatha Natyam, Ganapathi, Allaripu, and Bollywood.

Course Outcomes

- 1. Students will learn various movement patterns expressing the technique, motifs and rhythmic structure of the four styles.

- 6. Students will develop social interaction skills and proper dance etiquette used in dance
- 7. Students will enhance their ability to memorize sequential patterns and combinations of movement

DANCE 173R : Ethnic Dance, Beginning. (.5:0:2)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Ethnic dances selected from the Irish, Polynesian, or Spanish cultures.

Course Outcomes

There are no course outcomes available

: Ethnic Dance - Spanish.

Course Outcomes

DANCE 174 : Ethnic Dance Beginning - Irish. (.5:0:2)

DESCRIPTION: Introduction to Irish dance technique--soft and hard shoe--at a begining level. Instruction in solo and figure dances as well as some cultural background information about music, costumes, traditions and on-going development in this style of dance.

Course Outcomes

There are no course outcomes available

DANCE 175 : Ethnic Dance Beginning - Polynesian. (.5:0:2)

DESCRIPTION: Instruction in movement, songs, myths and legends of Hawaii, New Zealand, Tahiti, Samoa, and Tonga.

Course Outcomes

There are no course outcomes available

DANCE 180 : Social Dance, Beginning. (.5:0:2)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Traditional and popular ballroom dance; also social skills.

Course Outcomes

- Students will demonstrate beginning level school figures associated with each dance by practice and application.
- Students will demonstrate beginning level the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.
- Students will demonstrate their ability to lead and follow through their participation at labs and through exams.
- Students will improve their social skills though knowledge and practice.

DANCE 181 : Country Western Social Dance, Beginning. (.5:0:2)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Beginning popular country western dance.

Course Outcomes

- Students will demonstrate the beginning level school figures associated with each dance by practice and application.
- Students will demonstrate beginning level technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.

- Students will demonstrate their ability to lead and follow through their participation at labs and through exams.
- Students will improve their social skills though knowledge and practice.

DANCE 184 : Ballroom, International Beginning (.5:0:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Bronze level. Waltz, fox-trot, tango, quickstep.

Course Outcomes

- 1. Students will be able to effectively demonstrate bronze level school figures of International Style Waltz and Quickstep.
- 2. Students will be able to effectively demonstrate beginning level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 185 : Ballroom Dance, International Latin, Beginning. (.5:0:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Bronze level. Cha-cha, rumba, samba, jive, paso doble.

Course Outcomes

- 1. Students will be able to effectively demonstrate bronze level school figures of International Style Samba and Rumba.
- 2. Students will be able to effectively demonstrate beginning level technique in the following areas:1) posture and dance position 2) clarity and use timing 3)proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

DANCE 190 : Ballet, Beginning. (.5:0:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Fundamentals of ballet technique for those with little or no previous training.

Course Outcomes

- Each student will:1. Acquire a degree of mastery in beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific technique criteria and standards
- Each student will:1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at a beginning level standard
